To Our Shareholders,

For the quarter ended September 30, 2017, the net asset value ("NAV") total return of The Gabelli Go Anywhere Trust (the "Fund") was 3.2%, compared with a total return of 4.5% for the Standard & Poor's ("S&P") 500 Index. The total return for the Fund's publicly traded shares was 1.0%. The Fund's NAV per share was $19.80, while the price of the publicly traded shares closed at $17.00 on the NYSE American.

Comparative Results

Average Annual Returns through September 30, 2017 (a)

	Month	Quarter	Since Inception (11/02/16)*
The Gabelli Go Anywhere Trust			
NAV Total Return (b)	3.29%	3.18%	7.26%
Investment Total Return (c)	(2.80)	1.01	(13.92)
Standard & Poor's (S&P) 500 Index	2.06	4.48	18.13 (d)

*For purposes of calculating these comparative results, November 2, 2016, the date when the common shares began trading separately on the NYSE American, is considered the inception date.

(a) *Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.* The S&P 500 Index is an unmanaged indicator of stock market performance. Dividends are considered reinvested. You cannot invest directly in an index.

(b) The total returns reflect changes in the NAV per share and are net of expenses. The inception return is based on a NAV of $18.46 as of November 2, 2016. During the period September 2, 2016 through November 1, 2016, the Fund traded as a combination.

(c) The total returns reflect changes in closing market values on the NYSE American. The inception return is based on price of $19.75 as of November 2, 2016. During the period September 2, 2016 through November 1, 2016, the Fund traded as a combination.

(d) From October 31, 2016, the date closest to the Fund's inception for which data is available.

Fund Origin and Mandate

The Gabelli Go Anywhere Trust is a non-diversified, closed-end management investment company, whose primary investment objective is total return, consisting of capital appreciation and current income. The Fund's portfolio management team, consisting of Mario J. Gabelli, Ronald S. Eaker, Robert D. Leininger, Laura S. Linehan, and Gian Maria Magrini, can seek out value across the world. Under normal market conditions, the Fund intends to invest primarily in a broad range of equity securities consisting of common stock, preferred stock, convertible or exchangeable securities, depositary receipts and warrants and rights to purchase such securities and, to a lesser extent, in debt securities. The team employs the Private Market Value with a Catalyst™ approach, pioneered by Mario Gabelli, to seek superior risk adjusted returns for the Fund.

The Quarter in Review

The third quarter of 2017 was full of newsworthy events, some alternatively scary and sad. Although we usually do not discuss the weather on these pages, there were three hurricanes that impacted the United States during the quarter: Harvey, which hit Texas; Irma, which hit Florida; and Maria, which hit Puerto Rico. All three hurricanes were major events that caused tens of billions of dollars in damages and impacted millions of people. The Federal government agreed to pay billions of dollars in emergency funds to help the affected areas, and we hope this will serve as a catalyst to help a new infrastructure bill pass Congress over the next year.

On the geopolitical front, the quarter was also full of newsworthy events. The saber rattling with North Korea continued unabated during the quarter. The British continued to move forward with Brexit, and the Catalonian region of Spain is considering if it would break away from Spain. Despite all of these geopolitical concerns, the stock market continued on its upward trend. Surprisingly, volatility was relatively low, with the average daily change during the quarter being only 0.3%, its lowest since 1968.

In Washington, DC, the Trump administration was not able to move forward with any legislation regarding health care reform, but, right at the end of the quarter, the administration did propose an outline for much needed tax reform. We are hopeful that Congress will come together in a bipartisan manner and pass most, although probably not all, of the reforms proposed by the administration.

Specifically, the Trump administration is proposing that corporate tax rates come down dramatically, from 35% under current law to 20%. Right now, the 35% corporate tax rate of U.S. based companies is the highest in the developed world, and it is a major reason why many companies are choosing to relocate to different countries. Due to the large number of tax loopholes, U.S. companies in aggregate, however, usually only pay an effective tax rate just below 25%. The administration hopes to get rid of most of those tax loopholes and make the statutory rate much closer to the effective tax rate, which most economists agree would be good for the economy.

On the personal tax front, the administration hopes to bring the top individual rate down from 39.6% to 35%, and reduce the number of tax brackets to just three. In addition, the standard deduction would almost double from the current $12,600 to $24,000. The top tax rate on dividends would remain at 23.8%.

The Economy

The U.S. economy continues to grow at a modest pace. The days of 4% real gross domestic product (GDP) growth are over, and it has been a long time since we saw a year of 3% growth, although we are happy to report that second quarter 2017 real gross domestic product was calculated to be 3.1% versus the 1.2% that was calculated for the first quarter of 2017. Part of the slowdown in real GDP growth can be attributed to demographics, slower population growth, and an aging workforce. We seem to be stuck in an annual real growth range of 1.5% to 2.5%. That has been the case since this recovery commenced in July of 2009. Although the Trump administration would like to get the economy growing at a 3% real rate once again, the odds of that happening in 2017 are very dim. Growth this year will once again probably be about 2.0%. The bad news is this is the slowest expansion on record. The good news is that it is one of the longest. Slow and steady is a recipe for enduring growth. There are certainly policy prescriptions that could elevate us out of this 2% growth range, some of which the Trump administration is advancing, such as tax reform and infrastructure spending, but the likelihood of achieving such legislation through Congress remains to be seen.

The Markets

The Federal Reserve has been on a path of raising short term interest rates slowly back up to a more normalized level. After the financial crisis, the Fed slashed short term interest rates down to near zero, but now rates are at 1.25%, after three increases over the past four quarters by the Fed. We expect that gradual increases will continue and that by this time next year, short term rates will be around 2.0%. In addition to raising short term interest rates gradually, the Fed will also probably start to unwind its massive $4.5 trillion asset portfolio, which it built up during the quantitative easing (QE) period. We expect the unwinding will be very gradual, whereby some maturing securities will not be reinvested, and the whole process will go on for many years.

Investors are facing an acute shortage of good income generating opportunities. While not a realistic choice for some investors, stocks must play a larger role overall in meeting investors' income needs. At this writing, 37% of the stocks in the S&P 500 have dividend yields that are higher than the 10 year U.S. Treasury yield, which is currently right around 2.3%. Stocks offer compelling current income and growth of income for investors who can tolerate stock market volatility. Stocks also offer the potential for growth in capital over time. It is hard to imagine growing capital by investing in bonds at historically low interest rates. We are probably near the end of a thirty-five year bull market in bonds.

Let's Talk Stocks

The following are stock specifics on selected holdings of our Fund. Favorable earnings prospects do not necessarily translate into higher stock prices, but they do express a positive trend that we believe will develop over time. Individual securities mentioned are not necessarily representative of the entire portfolio. For the following holdings, the share prices are listed first in United States dollars (USD) and secondly in the local currency, where applicable, and are presented as of September 30, 2017.

Citigroup Inc. (C – $72.74 – NYSE) is a leading global bank, with approximately 100 million customer accounts. The firm conducts business in more than 100 countries and jurisdictions. Citigroup provides consumers, corporations, governments, and institutions with a broad range of financial products and services, including consumer banking and credit, corporate and investment banking, securities brokerage, transaction services, and wealth management. The firm is well positioned to capitalize on the growth of global personal wealth.

CNH Industrial NV (CNHI – $12.01 – NYSE), with headquarters in London, England and Burr Ridge, Illinois, is a global capital equipment manufacturer that was demerged from parent Fiat in 2013. CNHI is unique in that it has leading positions in a variety of global machinery markets. It is best known for its agricultural equipment business, consisting of Case IH, New Holland Agriculture, and Steyr brands. The company's other businesses include Iveco, a leading global truck and bus manufacturer, as well as Case and New Holland construction machinery. Finally, FPT Industrial provides engines and transmissions for the company's captive businesses and also sells to other machinery manufacturers. CNHI is well positioned, not only for a cyclical recovery in its agricultural and equipment end markets, but also as an entity finally separated from its global auto parent, providing capital flexibility and setting the stage for what is likely to be significant cash flow generation in the years ahead.

HERC Holdings Inc. (HRI – $49.13 – NYSE), based in Bonita Springs, Florida, is the third largest equipment rental company in the United States after United Rentals and Sunbelt Rentals (owned by Ashtead). HRI was spun out of former parent Hertz on June 30, 2016. Underemphasized as part of a significantly larger car rental company, HRI now has the opportunity to improve profitability to levels more commensurate with peers as a standalone entity. Ultimately, we view HRI as an attractive acquisition candidate.

Mueller Water Products Inc. (MWA – $12.80 – NYSE) is one of the most recognized brands for products used in the transmission, distribution, and measurement of water in North America. The company possesses one of the largest installed bases of fire hydrants and iron gate valves in the United States, and is thus well positioned to benefit from the expected increases in both water infrastructure spending and new residential construction. In addition, Mueller has a fast growing water metering and leak detection business designed to take advantage of the large shift to advanced metering in the water industry. In early 2017, MWA announced the sale of its Anvil business for $315 million, as well as the appointment of J. Scott Hall as President and CEO. The cash generated from the sale and the company's consistent cash flow generation should enable Mueller to further expand its portfolio of industry leading products for the water infrastructure market, as well as increase returns of capital to shareholders.

Twenty-First Century Fox Inc. (FOX – $25.79 – NASDAQ) is a diversified media company with operations in cable network television, television broadcasting, and filmed entertainment. Cable networks account for 77% of the company's EBITDA, and benefit from contractually recurring affiliate fees and exposure to the fast growing global pay television market. We expect the company to benefit from rising demand for premium content, driven by emerging distribution platforms such as Netflix, and retransmission revenue growth. We believe the acquisition of satellite TV provider Sky plc will be accretive to value.

Westar Energy Inc. (WR – $49.60 – NYSE), based in Topeka, Kansas, is an electric utility serving 700,000 customers in central and northeastern KS, including the cities of Topeka, Lawrence, Manhattan, and Hutchinson; and southcentral and southeastern KS, including the city of Wichita. WR's 6,800 MW generation portfolio includes coal (75% of output), nuclear (13%), natural gas (10%) and wind. On May 31, 2016, WR announced a definitive agreement to be acquired by Great Plains Energy (GXP) for an enterprise value of $12.2 billion, or $60.00 per share. On July 10, 2017, WR and GXP amended the merger agreement where the two companies would combine via a merger of equals. WR shareholders would receive one share of the new company, and GXP shareholders would receive 0.5891 shares. We expect this transaction to be approved, accretive in the first year, produce a higher growth rate, stronger credit profile, and result in a higher dividend of $1.84 per share (from $1.60 per share) to WR holders. The companies expect the transaction to close in the first half of 2018, and be accretive (to respective stand-alone earnings) in the first year after closing, and then generate 6%-to-8% annual earnings growth from 2016-2021, which is higher than the previous transaction projection of 5%-7% and standalone 4%-6% projections. GXP expects to have $1.25 billion in cash on its balance sheet which the combined company plans to use to buy-back 30 million shares per year over the following two years.

Beneficial ownership of shares held in the Fund by Mr. Gabelli and various entities he is deemed to control are disclosed in the Fund's annual proxy statement.

Quarterly Distribution Policy for Common Shareholders

The Board of Trustees of the Fund has adopted a quarterly distribution policy for the Fund's common shareholders. Under this distribution policy, the Fund plans to make quarterly cash distributions beginning in the fourth quarter of 2017 of an amount to be determined by the Board of Trustees.

The Board of Trustees believes that instituting this distribution policy is in the best interests of the Fund's common shareholders. The Board of Trustees recognizes that cash flow may be a consideration for many of the Fund's shareholders and believes that periodic cash distributions may attract investors.

Each quarter, the Board of Trustees will review the amount of any potential distribution from the income, realized capital gain, or capital available. The Board of Trustees will monitor the Fund's distribution level, taking into consideration the Fund's net asset value and the financial market environment. The Fund's distribution policy is subject to modification by the Board of Trustees at any time, and there can be no guarantee that the policy will continue. The distribution rate should not be considered as the dividend yield or total return on an investment in the Fund.

If the Fund does not generate sufficient earnings (dividends and interest income and realized net capital gain) equal to or in excess of the aggregate distributions paid by the Fund in a given year, then the amount distributed in excess of the Fund's earnings would be deemed a return of capital. Since this would be considered a return of a portion of a shareholder's original investment, it is generally not taxable and is treated as a reduction in the shareholder's cost basis.

Series A Cumulative Puttable and Callable Preferred Shares

The Fund declared an $0.80 per share cash distribution payable on September 26, 2017, to Series A preferred shareholders of record on September 19, 2017, representing an 8.00% distribution rate in its first year outstanding. The Series A Preferred Shares trade on the NYSE American under the symbol "GGO.A."

The Series A Preferred Shares pay distributions quarterly and will have an annual dividend rate of 5.00% or $2.00 per share effective September 27, 2017, through September 26, 2019. Thereafter, the Board of Trustees will determine a fixed annual distribution rate that will apply for all subsequent dividend periods, which will be 200 basis points over the yield of the ten year U.S. Treasury Note, but in no case will the annual dividend rate be less than 5.00% or greater than 7.00%. The Series A Preferred Shares will be non-callable for five years from the date of issuance (September 2, 2016), unless the redemption is necessary in the judgment of the Fund's Board of Trustees to maintain the Fund's status as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended, and may be put back to the Fund by shareholders during the 30 day period prior to the last distribution payment date in year three and the last distribution payment date in year five. The next distribution is scheduled for December 2017.

The Fund is authorized to repurchase these Preferred Shares in the open market from time to time when such shares are trading at a discount to the liquidation value of $40.00 per share. The Fund did not repurchase any Preferred Shares during the third quarter of 2017.

If the Fund does not generate sufficient earnings (dividends and interest income and realized net capital gain) equal to or in excess of the aggregate distributions paid by the Fund in a given year, then the amount distributed in excess of the Fund's earnings would be deemed a return of capital. Since this would be considered a return of a portion of a shareholder's original investment, it is generally not taxable and is treated as a reduction in the shareholder's cost basis. Despite the challenges of the extra recordkeeping, a distribution that incorporates a return of capital serves as a smoothing mechanism resulting in a more stable and consistent cash flow available to shareholders.

Long term capital gains, qualified dividend income, and ordinary income, if any, will be allocated on a pro-rata basis to all distributions to preferred shareholders for the year.

Based on the accounting records of the Fund currently available, the current distribution paid to preferred shareholders represents approximately 15% from net capital gains and 85% from paid-in capital on a book basis. The estimated components of each distribution are updated and provided to shareholders of record in a notice accompanying the distribution and are available on our website (www.gabelli.com). The final determination of the sources of all distributions in 2017 will be made after year end and can vary from the quarterly estimates. All shareholders with taxable accounts will receive written notification regarding the components and tax treatment for all 2017 distributions in early 2018 via Form 1099-DIV.

AUTOMATIC DIVIDEND REINVESTMENT AND VOLUNTARY CASH PURCHASE PLANS

Enrollment in the Plan

It is the policy of The Gabelli Go Anywhere Trust Inc. (the "Fund") to automatically reinvest dividends payable to common shareholders. As a "registered" shareholder you automatically become a participant in the Fund's Automatic Dividend Reinvestment Plan (the "Plan"). The Plan authorizes the Fund to credit shares of common stock to participants upon an income dividend or a capital gains distribution regardless of whether the shares are trading at a discount or a premium to net asset value. All distributions to shareholders whose shares are registered in their own names will be automatically reinvested pursuant to the Plan in additional shares of the Fund. Plan participants may send their stock certificates to Computershare Trust Company, N.A. ("Computershare") to be held in their dividend reinvestment account. Registered shareholders wishing to receive their distributions in cash must submit this request in writing to:

The Gabelli Go Anywhere Trust Inc.
c/o Computershare
P.O. Box 505000
Louisville, KY 40233

Shareholders requesting this cash election must include the shareholder's name and address as they appear on the Fund's records. Shareholders with additional questions regarding the Plan or requesting a copy of the terms of the Plan, may contact Computershare at (800) 336-6983.

If your shares are held in the name of a broker, bank, or nominee, you should contact such institution. If such institution is not participating in the Plan, your account will be credited with a cash dividend. In order to participate in the Plan through such institution, it may be necessary for you to have your shares taken out of "street name" and re-registered in your own name. Once registered in your own name your distributions will be automatically reinvested. Certain brokers participate in the Plan. Shareholders holding shares in "street name" at participating institutions will have dividends automatically reinvested. Shareholders wishing a cash dividend at such institution must contact their broker to make this change.

The number of shares of common stock distributed to participants in the Plan in lieu of cash dividends is determined in the following manner. Under the Plan, whenever the market price of the Fund's common stock is equal to or exceeds net asset value at the time shares are valued for purposes of determining the number of shares equivalent to the cash dividends or capital gains distribution, participants are issued shares of common stock valued at the greater of (i) the net asset value as most recently determined or (ii) 95% of the then current market price of the Fund's common stock. The valuation date is the dividend or distribution payment date or, if that date is not a NYSE American trading day, the next trading day. If the net asset value of the common stock at the time of valuation exceeds the market price of the common stock, participants will receive shares from the Fund valued at market price. If the Fund should declare a dividend or capital gains distribution payable only in cash, Computershare will buy shares of common stock in the open market, or on the NYSE American or elsewhere, for the participants' accounts, except that Computershare will endeavor to terminate purchases in the open market and cause the Fund to issue shares at net asset value if, following the commencement of such purchases, the market value of the common stock exceeds the then current net asset value.

The automatic reinvestment of dividends and capital gains distributions will not relieve participants of any income tax which may be payable on such distributions. A participant in the Plan will be treated for federal income tax purposes as having received, on a dividend payment date, a dividend or distribution in an amount equal to the cash the participant could have received instead of shares.

Voluntary Cash Purchase Plan

The Voluntary Cash Purchase Plan is yet another vehicle for our shareholders to increase their investment in the Fund. In order to participate in the Voluntary Cash Purchase Plan, shareholders must have their shares registered in their own name.

Participants in the Voluntary Cash Purchase Plan have the option of making additional cash payments to Computershare for investments in the Fund's common shares at the then current market price. Shareholders may send an amount from $250 to $10,000. Computershare will use these funds to purchase shares in the open market on or about the 1st and 15th of each month. Computershare will charge each shareholder who participates $0.75, plus a pro rata share of the brokerage commissions. Brokerage charges for such purchases are expected to be less than the usual brokerage charge for such transactions. It is suggested that any voluntary cash payments be sent to Computershare, P.O. Box 505000, Louisville, KY 40233 such that Computershare receives such payments approximately 10 days before the 1st and 15th of the month. Funds not received at least five days before the investment date shall be held for investment until the next purchase date. A payment may be withdrawn without charge if notice is received by Computershare at least 48 hours before such payment is to be invested.

Shareholders wishing to liquidate shares held at Computershare must do so in writing or by telephone. Please submit your request to the above mentioned address or telephone number. Include in your request your name, address, and account number. The cost to liquidate shares is $2.50 per transaction as well as the brokerage commission incurred. Brokerage charges are expected to be less than the usual brokerage charge for such transactions.

For more information regarding the Automatic Dividend Reinvestment Plan and Voluntary Cash Purchase Plan, brochures are available by calling (914) 921-5070 or by writing directly to the Fund.

The Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to the members of the Plan at least 90 days before the record date for such dividend or distribution. The Plan also may be amended or terminated by Computershare on at least 90 days written notice to participants in the Plan.

Overnight correspondence should be sent to:

Computershare
462 South 4th Street, Suite 1600
Louisville, KY 40202

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.

The Net Asset Value per share appears in the Publicly Traded Funds column, under the heading "General Equity Funds," in Monday's The Wall Street Journal. It is also listed in Barron's Mutual Funds/Closed End Funds section under the heading "General Equity Funds."

The Net Asset Value per share may be obtained each day by calling (914) 921-5070 or visiting www.gabelli.com.

The NASDAQ symbol for the Net Asset Value per share is "XGGOX."

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Fund may from time to time purchase its common shares in the open market when the Fund's shares are trading at a discount of 7.5% or more from the net asset value of the shares. The Fund may also from time to time purchase its preferred shares in the open market when the preferred shares are trading at a discount to the liquidation value.

To Our Shareholders,

For the quarter ended September 30, 2017, the net asset value ("NAV") total return of The Gabelli Go Anywhere Trust (the "Fund") was 3.2% compared with a total return of 4.5% for the Standard & Poor's ("S&P") 500 Index. The total return for the Fund's publicly traded shares was 1.0%. The Fund's NAV per share was $19.80, while the price of the publicly traded shares closed at $17.00 on the NYSE American. See below for additional performance information.

Enclosed is the schedule of investments as of September 30, 2017.

Comparative Results

Total Returns through September 30, 2017 (a) (Unaudited)

	Quarter	Since Inception (11/02/16)
Gabelli Go Anywhere Trust		
NAV Total Return (b)	3.18%	7.26%
Investment Total Return (c)	1.01	(13.92)
S&P 500 Index	4.48	18.13(d)

(a) *Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. Performance returns for periods of less than one year are not annualized. Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.* The S&P 500 Index is an unmanaged indicator of stock market performance. Dividends are considered reinvested. You cannot invest directly in an index.

(b) The total return reflects changes in the NAV per share and is net of expenses. The inception return is based on a NAV of $18.46 as of November 2, 2016. During the period September 2, 2016 through November 1, 2016, the Fund traded as a combination.

(c) The total return reflects changes in closing market value on the NYSE American. The inception return is based on a price of $19.75 as of November 2, 2016. During the period September 2, 2016 through November 1, 2016, the Fund traded as a combination.

(d) From October 31, 2016, the date closest to the Fund's inception for which data are available.

See accompanying notes to schedule of investments.

As an investment company, the Fund follows the investment company accounting and reporting guidance, which is part of U.S. generally accepted accounting principles ("GAAP") that may require the use of management estimates and assumptions in the preparation of its schedule of investments. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its schedule of investments.

Security Valuation. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Trustees (the "Board") so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the "Adviser").

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market, but prior to the close of business on the day the securities are being valued. Debt obligations for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Certain securities are valued principally using dealer quotations. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded. OTC futures and options on futures for which market quotations are readily available will be valued by quotations received from a pricing service or, if no quotations are available from a pricing service, by quotations obtained from one or more dealers in the instrument in question by the Adviser.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities with the equivalent U.S. dollar value American Depositary Receipt securities at the close of the U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 — quoted prices in active markets for identical securities;
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 — significant unobservable inputs (including the Board's determinations as to the fair value of investments).

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in the aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of the Fund's investments in securities by inputs used to value the Fund's investments as of September 30, 2017 is as follows:

	Valuation Inputs			
	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Total Market Value at 9/30/17
INVESTMENTS IN SECURITIES:				
ASSETS (Market Value):				
Common Stocks:				
Automotive: Parts and Accessories	$ 983,532	—	$130,000	$ 1,113,532
Financial Services	3,526,583	—	2,333	3,528,916
Real Estate	917,765	—	39,560	957,325
Wireless Communications	—	—	30,694	30,694
Other Industries (a)	26,264,976	—	—	26,264,976
Total Common Stocks	31,692,856	—	202,587	31,895,443
Rights (a)	—	—	15,000	15,000
U.S. Government Obligations	—	$21,522,088	—	21,522,088
TOTAL INVESTMENTS IN SECURITIES – ASSETS	$31,692,856	$21,522,088	$217,587	$53,432,531

(a) Please refer to the Schedule of Investments for the industry classifications of these portfolio holdings.

Additional Information to Evaluate Qualitative Information.

General. The Fund uses recognized industry pricing services – approved by the Board and unaffiliated with the Adviser – to value most of its securities, and uses broker quotes provided by market makers of securities not valued by these and other recognized pricing sources. Several different pricing feeds are received to value domestic equity securities, international equity securities, preferred equity securities, and fixed income securities. The data within these feeds are ultimately sourced from major stock exchanges and trading systems where these securities trade. The prices supplied by external sources are checked by obtaining quotations or actual transaction prices from market participants. If a price obtained from the pricing source is deemed unreliable, prices will be sought from another pricing service or from a broker/dealer that trades that security or similar securities.

Fair Valuation. Fair valued securities may be common or preferred equities, warrants, options, rights, or fixed income obligations. Where appropriate, Level 3 securities are those for which market quotations are not available, such as securities not traded for several days, or for which current bids are not available, or which are restricted as to transfer. When fair valuing a security, factors to consider include recent prices of comparable securities that are publicly traded, reliable prices of securities not publicly traded, the use of valuation models, current analyst reports, valuing the income or cash flow of the issuer, or cost if the preceding factors do not apply. A significant change in the unobservable inputs could result in a lower or higher value in Level 3 securities. The circumstances of Level 3 securities are frequently monitored to determine if fair valuation measures continue to apply.

The Adviser reports quarterly to the Board the results of the application of fair valuation policies and procedures. These may include backtesting the prices realized in subsequent trades of these fair valued securities to fair values previously recognized.

Foreign Currency Translations. The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments, and other assets and liabilities are translated into U.S. dollars at current exchange rates. Purchases and sales of investment securities, income, and expenses are translated at the exchange rate prevailing on the respective dates of such transactions. Unrealized gains and losses that result from changes in foreign exchange rates and/or changes in market prices of securities have been included in unrealized appreciation/depreciation on investments and foreign currency translations. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gain/(loss) on investments.

Foreign Securities. The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the inability to repatriate funds, less complete financial information about companies, and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than securities of comparable U.S. issuers.

Foreign Taxes. The Fund may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

Tax Information. The Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended.

Portfolio Management Team Biographies

Mario J. Gabelli, CFA, is Chairman, Chief Executive Officer, and Chief Investment Officer - Value Portfolios of GAMCO Investors, Inc. that he founded in 1977, and Chief Investment Officer - Value Portfolios of Gabelli Funds, LLC and GAMCO Asset Management Inc. He is also Executive Chairman of Associated Capital Group, Inc. Mr. Gabelli is a summa cum laude graduate of Fordham University and holds an MBA degree from Columbia Business School and Honorary Doctorates from Fordham University and Roger Williams University.

Ronald S. Eaker joined GAMCO Investors, Inc. in 1987. Currently he is a Managing Director of Gabelli Fixed Income, LLC and a portfolio manager of Gabelli Funds, LLC. Mr. Eaker manages short term cash products and high grade intermediate fixed income products. Prior to joining Gabelli, Mr. Eaker was affiliated with Frank Henjes & Co. He is a graduate of Pennsylvania State University with a B.S. in Finance.

Robert D. Leininger, CFA, joined GAMCO Investors, Inc. in 1993 as an equity analyst. Subsequently, he was a partner and portfolio manager at Rorer Asset Management before rejoining GAMCO in 2010 where he currently serves as a portfolio manager of Gabelli Funds, LLC. Mr. Leininger is a magna cum laude graduate of Amherst College with a degree in Economics and holds an MBA degree from the Wharton School at the University of Pennsylvania.

Laura S. Linehan, CFA, joined G.research in 1995 and has served as a portfolio manager of the TETON Westwood Mighty Mites Fund since its inception in 1998. Ms. Linehan also serves as a portfolio manager for Gabelli Funds, LLC. Prior thereto, Ms. Linehan was an investment banker at Smith Barney and a financial analyst and systems engineer at IBM. Ms. Linehan holds an MBA in Finance and Public Policy from The Wharton School of Business, University of Pennsylvania and a B.A. in Biology from Lehigh University.

Gian Maria Magrini, CFA, is an analyst dedicated to the Gabelli merger arbitrage portfolios, specifically to our U.S. open and closed-end funds. He joined the team in 2013 after serving various roles in the operations and research departments. Mr. Magrini earned a B.S. in Finance from Fordham University.

We have separated the portfolio managers' commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio managers' commentary is unrestricted. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.

The Net Asset Value per common share appears in the Publicly Traded Funds column, under the heading "General Equity Funds," in Monday's The Wall Street Journal. It is also listed in Barron's Mutual Funds/Closed End Funds section under the heading "General Equity Funds."

The Net Asset Value per share may be obtained each day by calling (914) 921-5070 or visiting www.gabelli.com.

The NASDAQ symbol for the Net Asset Value is "XGGOX."

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Fund may, from time to time, purchase its common shares in the open market when the Fund's shares are trading at a discount of 7.5% or more from the net asset value of the shares. The Fund may also, from time to time, purchase its preferred shares in the open market when the preferred shares are trading at a discount to the liquidation value.
