How did the Fund perform?

For the fiscal year ended December 31, 2024, The Gabelli Asset Fund underperformed its broad-based benchmark, the S&P 500 and its comparative, the Dow Jones Industrial Average. The S&P 500's record performance has been driven by a focused group of technology-enabled growth stocks. Our Fund has historically allocated a significant percentage of assets to small-cap companies which did not perform as well as large companies during the year. Top contributors consisted of companies with strong balance sheets and disciplined capital allocations histories. Detractors included companies adversely impacted by changes in consumer behavior and individual corporate developments.

How has the Fund performed over the past 10 years?

The performance chart of the fund class presented reflects a hypothetical \$10,000 investment, assuming the maximum sales charge, compared to a broad-based securities market index and more narrowly based indices reflecting market sectors in which the Fund invests over a 10-year period. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains distribution. Fund expenses were deducted.
