

Comstock Capital Value Fund

Class C - CPCCX

Annual Shareholder Report - December 31, 2024

Fund Overview

This annual shareholder report contains important information about Comstock Capital Value Fund (the Fund) for the period of May 1, 2024 to December 31, 2024. The Fund follows a value oriented strategy and seeks to achieve its investment objective by investing in equity and debt securities, money market instruments, and derivatives. The Fund may invest in, and may shift frequently among, a wide range of asset classes and market sectors. The equity securities in which the Fund invests include common and preferred stock (including convertible preferred stock), warrants, and depository receipts. There is no restriction on the market capitalization of the Fund's equity securities. The debt securities in which the Fund may invest include: U.S. corporate debt, U.S. government and agency debt, and foreign sovereign and other debt securities (including debt securities from emerging market issuers). What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10k Investment	Costs Paid as a % of a \$10k Investment
Comstock Capital Value Fund - Class C	\$0	-%

How did the Fund perform?

For the period ended December 31, 2024, the Comstock Capital Value Fund underperformed its broad-based benchmark, the S&P 500 Index, and comparative benchmark, the MSCI USA Value Index. It outperformed its other comparative benchmark, the Bloomberg US Government/Credit Bond Index. Merger and Acquisition activity totaled \$3.2 trillion globally in 2024, a 10% increase year over year. We expect this deal environment will persist in 2025 as headwinds from recent years become tailwinds; namely interest rates and antitrust regulation. Top performers were focused on the Financials and Industrials sectors. Detractors were driven by holdings in the Consumer Staples and Materials sectors.

How has the Fund performed over the past 10 years?

The performance chart of the fund class presented reflects a hypothetical \$10,000 investment, assuming the maximum sales charge, compared to a broad-based securities market index and more narrowly based indices reflecting market sectors in which the Fund invests over a 10-year period. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains distribution. Fund expenses were deducted.
