

# The Gabelli Enterprise Mergers and Acquisitions

## Class A - EMAAX

Annual Shareholder Report - September 30, 2024

### Fund Overview

This annual shareholder report contains important information about The Gabelli Enterprise Mergers and Acquisitions Fund (the "Fund") for the period of November 1, 2023 to September 30, 2024. The primary investment objective of the Fund is capital appreciation. The Fund seeks arbitrage opportunities by investing in the equity securities of companies involved in publicly announced mergers, takeovers, tender offers, leveraged buyouts, spin-offs, liquidations and other corporate reorganizations. The Fund combines traditional risk arbitrage techniques with a buy-and-hold component for companies believed to be likely takeover targets within 12 to 18 months. You can find additional information about the Fund at [www.gabelli.com/funds/open\\_ends](http://www.gabelli.com/funds/open_ends). **This report describes changes to the Fund that occurred during the reporting period.**

### What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10k Investment	Costs Paid as a % of a \$10k Investment
The Gabelli Enterprise Mergers and Acquisitions Fund - Class A	\$185	1.87%

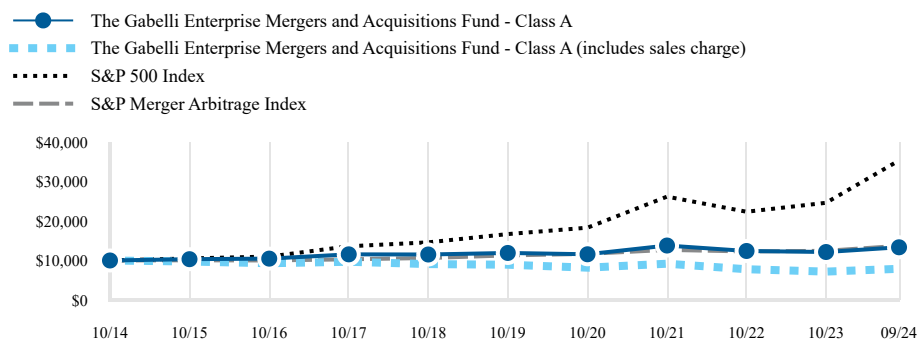

### How did the Fund perform?

During the fiscal year ended September 30, 2024, the Gabelli Enterprise, Mergers and Acquisitions Fund underperformed its broad-based benchmark, the S&P 500 Index, while outperforming its comparative benchmark, the S&P Merger Arbitrage Index. Globally announced mergers and acquisitions activity has remained stable over the past year. Deal activity and a widening of deal spreads has been impacted by uncertainty surrounding the Federal Reserve's interest rate policy and the US Presidential election. Some executives in corporate boardrooms, as well as financial buyers have paused their pursuits of acquisitions as they have waited for further clarity on these two issues.

### How has the Fund performed over the past 10 years?

The performance chart of the fund class presented reflects a hypothetical \$10,000 investment, assuming the maximum sales charge, compared to a broad-based securities market index and more narrowly based indices reflecting market sectors in which the Fund invests over a 10-year period. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains distribution. Fund expenses were deducted.
