

# The Gabelli Dividend Growth Fund

## SUMMARY PROSPECTUS April 29, 2024

### Class AAA (GABBX), A (GBCAX), C (GBCCX), I (GBCIX)

**Before you invest, you may want to review the Fund's Prospectus and Statement of Additional Information ("SAI"), which contain more information about the Fund and its risks. You can find the Fund's Prospectus and SAI and other information about the Fund online at [www.gabelli.com](http://www.gabelli.com). You can also get this information at no cost by calling 800-422-3554 or by sending an email request to [info@gabelli.com](mailto:info@gabelli.com). The Fund's Prospectus and SAI, both dated April 29, 2024, are incorporated by reference into this Summary Prospectus.**

#### Investment Objectives

The Fund's primary objective is to seek to provide long term growth of capital. Current income is a secondary objective of the Fund.

#### Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below. You may qualify for sales charge discounts on Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A shares of the Gabelli family of mutual funds. More information about these and other discounts is available from your financial professional and in the section entitled "Classes of Shares" on page 16 of the Fund's prospectus and in Appendix A, "Sales Charge Reductions and Waivers Available through Certain Intermediaries," attached to the Fund's prospectus.

	Class AAA Shares	Class A Shares	Class C Shares	Class I Shares
<b>Shareholder Fees</b> (fees paid directly from your investment):				
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price) . . . . .	None	5.75%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of redemption or offering price, whichever is lower) . . . . .	None	None	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (as a percentage of amount invested) . . . . .	None	None	None	None
Redemption Fee (as a percentage of amount redeemed for shares held seven days or less) . . . . .	2.00%	2.00%	2.00%	2.00%
Exchange Fee . . . . .	None	None	None	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment):				
Management Fees . . . . .	1.00%	1.00%	1.00%	1.00%
Distribution and Service (Rule 12b-1) Fees . . . . .	0.25%	0.25%	1.00%	None
Other Expenses . . . . .	1.45%	1.45%	1.45%	1.45%
Total Annual Fund Operating Expenses <sup>(1)</sup> . . . . .	2.70%	2.70%	3.45%	2.45%
Less Fee Waiver and Expense Reimbursement <sup>(1)</sup> . . . . .	(0.69)%	(0.69)%	(0.69)%	(1.44)%
Net Annual Fund Operating Expenses . . . . .	2.01%	2.01%	2.76%	1.01%

(1) The Adviser has contractually agreed to waive its investment advisory fees and/or to reimburse expenses of the Fund to the extent necessary to maintain the Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement (excluding brokerage costs, acquired

fund fees and expenses, interest, taxes, and extraordinary expenses) at no more than an annual rate of 2.00%, 2.00%, 2.75%, and 1.00% for Class AAA, Class A, Class C, and Class I shares, respectively. Under this same arrangement, the Fund has also agreed, during the two year period following the year of any such waiver or reimbursement by the Adviser, to repay such amount, but only to the extent the Fund's adjusted Total Annual Fund Operating Expenses would not exceed an annual rate of 2.00%, 2.00%, 2.75%, and 1.00% for Class AAA, Class A, Class C, and Class I shares, respectively, after giving effect to the repayments. This arrangement is in effect through April 30, 2025, and may be terminated only by the Board of Directors of the Fund (the "Board") before such time. The Fund will carry forward any fees and expenses in excess of the expense limitation and repay the Adviser such amount provided the Fund is able to do so without exceeding the lesser of (1) the expense limit in effect at the time of the waiver or reimbursement, as applicable, or (2) the expense limit in effect at the time of recoupment after giving effect to the repayment.

### ***Expense Example***

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example assumes a waiver of expenses through the date of the expiration of the waiver, and reflects Total Annual Fund Operating Expenses following the date of the expiration of the waiver. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<b><u>1 Year</u></b>	<b><u>3 Years</u></b>	<b><u>5 Years</u></b>	<b><u>10 Years</u></b>
Class AAA Shares .....	\$204	\$ 773	\$1,369	\$2,981
Class A Shares .....	\$767	\$1,304	\$1,865	\$3,385
Class C Shares .....	\$379	\$ 996	\$1,734	\$3,684
Class I Shares .....	\$103	\$ 626	\$1,175	\$2,677

You would pay the following expenses if you did not redeem your shares of the Fund:

	<b><u>1 Year</u></b>	<b><u>3 Years</u></b>	<b><u>5 Years</u></b>	<b><u>10 Years</u></b>
Class AAA Shares .....	\$204	\$ 773	\$1,369	\$2,981
Class A Shares .....	\$767	\$1,304	\$1,865	\$3,385
Class C Shares .....	\$279	\$ 996	\$1,734	\$3,684
Class I Shares .....	\$103	\$ 626	\$1,175	\$2,677

### ***Portfolio Turnover***

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund's shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 19% of the average value of its portfolio.

### ***Principal Investment Strategies***

Under normal market conditions, the Fund invests at least 80% of its net assets in dividend paying stocks. Dividend paying stocks include, for example, common stocks, preferred stocks, and convertible securities. In addition to seeking out stocks that pay a dividend, the Fund will focus on stocks that the portfolio manager believes are well positioned to increase their dividend over the long term. In selecting investments, the portfolio manager will consider, among other things, the market price of the issuer's securities, earnings expectations, dividend paying and other earnings and price histories, balance sheet characteristics, and perceived management skills. The portfolio manager will also consider changes in economic and political outlooks as well as individual corporate developments. For additional information about selection of investments suitable for the Fund, see page 8 of the prospectus.

In general, the portfolio manager seeks to take advantage of investors' tendency to overemphasize near term events by investing in companies which are temporarily undervalued and which may return to a significantly higher valuation. The portfolio manager will sell any Fund investments which lose their perceived value relative to other investments in the judgment of the portfolio manager.

The Fund's assets will be invested primarily in a broad range of readily marketable equity securities consisting primarily of common stocks. Many of the common stocks the Fund will buy will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The Fund's secondary objective is to achieve current income by investing in dividend paying common stocks.

The Fund may invest up to 40% of its total assets in equity securities of non-U.S. issuers.

### ***Principal Risks***

#### ***You may want to invest in the Fund if:***

- you are a long term investor
- you seek growth of capital
- you seek income

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Stocks are subject to market, economic, and business risks that may cause their prices to fluctuate. Holders of common stocks only have rights to the value in the company after all debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty. The Fund is also subject to the risk that market values may never be realized in the market, or that the price of its portfolio securities will decline, or that its portfolio companies will reduce or eliminate the dividend rate on securities held by the Fund, or that value stocks as a category lose favor with investors compared with growth stocks or because the Adviser was incorrect in its judgment of which stocks or which industries would benefit from changing market or economic conditions. In addition, the portfolio manager's value strategy may produce returns that are more volatile than other mutual funds that invest in similar securities. Foreign securities are subject to currency, information, and political risks.

An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell Fund shares, they may be worth less than what you paid for them; you may lose money by investing in the Fund.

Investing in the Fund involves the following risks:

- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause a security to be worth less than it was worth when it was purchased by the Fund. Because the value of securities, and thus shares of the Fund could decline, you could lose money. Dividends on common equity securities are not fixed but are declared at the discretion of an issuer's board of directors. Companies that have historically paid dividends on their securities are not required to continue to pay dividends on such securities. There is no guarantee that the issuers of the common equity securities will declare dividends in the future or that, if declared, they will remain at current levels or increase over time.

Therefore, there is the possibility that such companies could reduce or eliminate the payment of dividends in the future. The Fund's investments in dividend producing equity securities may also limit its potential for appreciation during a broad market advance. The prices of dividend producing equity securities can be highly volatile. Investors should not assume that the Fund's investments in these securities will necessarily reduce the volatility of the Fund's net asset value per share ("NAV") or provide "protection," compared to other types of equity securities, when markets perform poorly.

- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities.

In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.

- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Emerging Markets Risk.** The above listed foreign securities risks are more pronounced in the securities of companies located in emerging markets.
- **Infectious Illness Risk.** A widespread outbreak of an infectious illness, such as the COVID-19 pandemic, may result in travel restrictions, disruption of healthcare services, prolonged quarantines, cancellations, supply chain disruptions, business closures, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic, social and political impacts. Such events may adversely affect the Fund, its investments, and the value of your investment in the Fund. The fallout from the COVID-19 pandemic and its subsequent variants, and the long-term impact on economies, markets, industries and individual issuers, are not known.
- **Interest Rate Risk.** Investments in dividend paying securities and other securities with an income component, including preferred stock and securities convertible into or exchangeable for common or preferred stock, involve interest rate risk. When interest rates decline, the value of such securities generally rises. Conversely, when interest rates rise, the value of such securities generally declines. It is also possible that the issuer of a security will not be able to make dividend, interest and principal payments when due. The Fund is subject to a greater risk of rising interest rates due to the current period of rising interest rates. Recently, the Federal Reserve has been raising interest rates from historically low levels. The Federal Reserve's aggressive increases to the federal funds rate may present a greater risk than has historically been the case due to the previous prolonged period of low interest rates and the market's reaction to the Federal Reserve's initiatives. Furthermore, there is no way of predicting or knowing when, or if, the Federal Reserve may enact cuts to the federal funds rate. There is a risk that increased interest rates may cause the economy to enter a recession. Any such recession would negatively impact the Fund and the investments held by the Fund.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics.
- **Value Investing Risk.** The Fund invests in "value" stocks. The portfolio manager may be wrong in the assessment of a company's value and the stocks the Fund holds may not reach what the portfolio manager believes are their full values. From time to time "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.

## Performance

The bar chart and table that follow provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year, and by showing how the Fund's average annual returns for one year, five years, and ten years compared with those of a broad based securities market index. As with all mutual funds, the Fund's past performance (before and after taxes) does not predict how the Fund will perform in the future. Updated information on the Fund's results can be obtained by visiting [www.gabelli.com](http://www.gabelli.com).

### THE GABELLI DIVIDEND GROWTH FUND (Total Returns for Class AAA Shares for the Years Ended December 31)

During the calendar years shown in the bar chart, the highest return for a quarter was 18.75% (quarter ended June 30, 2020), and the lowest return for a quarter was (26.75)% (quarter ended March 31, 2020).

Average Annual Total Returns (for the years ended December 31, 2023, with maximum sales charge, if applicable)		Past One Year	Past Five Years	Past Ten Years
The Gabelli Dividend Growth Fund Class AAA Shares				
Return Before Taxes . . . . .		7.61%	9.21%	5.62%
Return After Taxes on Distributions . . . . .		7.24%	8.16%	4.07%
Return After Taxes on Distributions and Sale of Fund Shares . . . . .		4.76%	7.25%	4.20%
Class A Shares				
Return Before Taxes . . . . .		1.42%	7.92%	5.00%
Class C Shares				
Return Before Taxes . . . . .		5.75%	8.39%	4.83%
Class I Shares				
Return Before Taxes . . . . .		8.70%	10.33%	6.47%
Lipper Large Cap Value Fund Index (reflects no deduction for fees, expenses, or taxes) . . . . .		15.49%	12.24%	9.05%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the "Return After Taxes on Distributions and Sale of Fund Shares" may be greater than "Return Before Taxes" because the investor is assumed to have sufficient capital gains of the same character from other investments to offset any capital losses from the redemption so that the taxpayer may deduct the capital losses in full. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax deferred arrangements, such as 401(k) plans or individual retirement accounts, including Roth IRAs and SEP IRAs (collectively, "IRAs"). After-tax returns are shown only for Class AAA shares and after-tax returns for other classes will vary due to the differences in expenses.

---

## ***Management***

**The Adviser.** Gabelli Funds, LLC

**The Portfolio Managers.** Mr. Justin Bergner, CFA, Portfolio Manager of the Adviser and Vice President at Gabelli & Company, have served as portfolio managers of the Fund since March 2017. Ms. Sarah Donnelly, Portfolio Manager of the Adviser and Senior Vice President of Gabelli & Company, became portfolio manager of the Fund on September 18, 2017.

### ***Purchase and Sale of Fund Shares***

The minimum initial investment for Class AAA, Class A, and Class C shares is \$1,000 (\$250 for IRAs or Coverdell Education Savings Plans). There is no minimum initial investment for Class AAA, Class A, and Class C shares in an automatic monthly investment plan. Class I shares are available to investors with a minimum investment of \$10,000 when purchasing the shares directly through G.distributors, LLC, the Fund's distributor ("G.distributors" or the "Distributor"), or investors purchasing Class I shares through brokers or financial intermediaries that have entered into selling agreements with the Distributor specifically with respect to Class I shares, and which have different minimum investment amounts. The minimum initial investment for Class I shares is waived for employee benefit plans with assets of at least \$50 million. If you transact in Class I shares through a broker or financial intermediary, you may be required to pay a commission and/or other forms of compensation to the broker or financial intermediary. The Distributor reserves the right to waive or change minimum investment amounts. There is no minimum for subsequent investments.

Since the minimum initial investment amount for Class I shares of the Fund purchased through the Distributor is reduced to \$10,000, shareholders eligible to purchase a different class of shares of the Fund and making an initial investment of \$10,000 should instead consider purchasing Class I shares of the Fund since Class I shares carry no sales load and no ongoing distribution fees. Investors and shareholders who wish to purchase shares of the Fund through a broker or financial intermediary should consult their broker or financial intermediary with respect to the purchase of shares of the Fund.

You can purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open for trading (a "Business Day"). You may purchase or redeem Fund shares by written request via mail (The Gabelli Funds, P.O. Box 219204, Kansas City, MO 64121-9204), personal or overnight delivery (The Gabelli Funds, c/o SS&C Global Investor & Distribution Solutions, Inc., 430 W 7th Street, Suite 219204, Kansas City, MO 64105-1407), Internet, bank wire, or Automated Clearing House ("ACH") system. You may also purchase Fund shares by telephone at 800-GABELLI (800-422-3554), if you have an existing account with banking instructions on file.

Fund shares can also be purchased or sold through registered broker-dealers or financial intermediaries that have entered into appropriate selling agreements with the Distributor. The broker-dealer or other financial intermediary will transmit these transaction orders to the Fund on your behalf and send you confirmation of your transactions and periodic account statements showing your investments in the Fund.

### ***Tax Information***

The Fund expects that distributions will generally be taxable as ordinary income or long term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

### ***Payments to Broker-Dealers and Other Financial Intermediaries***

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of the Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
