TAX EFFICIENCY

Investors in the Gabelli Love Our Planet & People ETF can benefit from the same tax dynamics as traditional ETFs through direct fund transactions that are typically done in-kind with Authorized Participants (APs). These cashless transactions are not taxable events and therefore may help mitigate the yearly capital gain distributions.

COST EFFECTIVENESS

Like traditional ETFs, the Fund can reduce operational costs from the transfer agent and other custody fees. Also, since the buying and selling of fund shares happens outside of the structure, internal costs can be lower. This is achieved through the ETF creation/redemption process.

ABOUT GABELLI LOVE OUR PLANET AND PEOPLE ETF

Gabelli Love Our Planet & People ETF is a diversified, open-end management investment company whose primary investment objective is to seek capital appreciation. Under normal market conditions the Fund will invest at least 80% of its assets in U.S. exchange-listed common and preferred stocks of companies that meet the Fund's guidelines for social responsibility at the time of investment. Your investment in the Fund is not guaranteed and you could lose some or all of the amount you invested. The Fund is managed by Gabelli Funds, LLC, a subsidiary of GAMCO Investors, Inc. (OTCQX: GAMI).

These ETFs are different from traditional ETFs. Traditional ETFs tell the public what assets they hold each day. These ETFs do not. This may create additional risks for your investment. For example:

You may have to pay more money to trade the ETFs' shares. These ETFs will provide less information to traders, who tend to charge more for trades when they have less information.

The price you pay to buy ETF shares on an exchange may not match the value of the ETF's portfolio. The same is true when you sell shares. These price differences may be greater for these ETFs compared to other ETFs because it provides less information to traders.

These additional risks may be even greater in bad or uncertain market conditions. The differences between these ETFs and other ETFs may also have advantages. By keeping certain information about ETFs secret, these ETFs may face less risk that other traders can predict or copy its investment strategy. This may improve the ETF's performance. If other traders are able to copy or predict the ETF's investment strategy however, this may hurt the ETF's performance. For additional information regarding the unique attributes and risks of the ETF, see the ActiveShares prospectus/registration statement.

You should consider the ETF's investment objectives, risks, charges and expenses carefully before you invest.
