

Gabelli Growth Innovators ETF

(the “Growth Innovators Fund” or the “Fund”)

SUMMARY PROSPECTUS *December 15, 2025*

Ticker: GGRW

Exchange: NYSE Arca

Before you invest, you may want to review the Fund’s Prospectus and Statement of Additional Information (“SAI”), which contain more information about the Fund and its risks. You can find the Fund’s Prospectus, SAI, reports to shareholders and other information about the Fund online at www.gabelli.com/funds/etfs/ggrw. You can also get this information at no cost by calling 800-422-3554 or by sending an email request to info@gabelli.com. The Fund’s Prospectus and SAI, both dated December 15, 2025, as may be amended or supplemented, are incorporated by reference into this Summary Prospectus.

Investment Objective

The Fund’s primary investment objective is to seek to provide capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.90%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.90%
Less Fee Waiver and/or Expenses Reimbursement ⁽¹⁾	(0.90)%
Total Annual Fund Operating Expenses After Fee Waiver	<u>0.00%</u>

(1) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% on the first \$25 million in net assets. The fee waiver agreement for the Growth Innovators Fund will continue for at least one year from the effective date of this Prospectus. This agreement may be terminated only by, or with the consent of, the Fund’s Board of Trustees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$0	\$196	\$410	\$1,025

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund's shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Growth Innovators Fund's portfolio turnover rate was 45% of the average value of its portfolio.

Principal Investment Strategies

The Fund will primarily invest in common stocks of companies that are relevant to the Fund's investment theme of innovation. The Adviser defines "innovation" as the introduction of new technologies, products or services that redefines how businesses operate. The Fund seeks to invest in companies whose prospects for earnings growth remain undervalued. The Fund may also invest in foreign securities by investing in American Depositary Receipts. The Adviser will sell any Fund investments that lose their perceived value when compared with other investment alternatives in the judgment of the portfolio managers.

The Adviser uses fundamental security analysis to develop earnings forecasts for companies and to identify investment opportunities. The Adviser bases its analysis on general economic and industry data provided by the U.S. Government, various trade associations and other sources, and published corporate financial data such as annual reports, 10-Ks, and quarterly statements as well as direct interviews with company management. Generally, the Adviser makes investment decisions first by looking at individual companies and then by scrutinizing their growth prospects in relation to their industries and the overall economy. The Adviser seeks to invest in companies with high future earnings potential relative to their current market valuations.

The Fund's assets will be invested primarily in a broad range of readily marketable equity securities consisting of U.S. exchange-listed common stock and preferred stock. The Fund may invest in companies without regard to market capitalization. Many of these common stocks will not pay dividends; instead, stocks will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer's management, general market conditions, the forecasts for the issuer's industry, and the value of the issuer's assets. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.

Principal Risks

You may want to invest in the Fund if:

- you are a long term investor
- you seek both growth of capital and some income
- you believe that the market will favor growth over value stocks over the long term
- you wish to include a growth strategy as a portion of your overall investments

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca (as defined below) and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. Because this is a novel and unique structure, this could influence the number of entities willing to act as Authorized Participants. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company's particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.

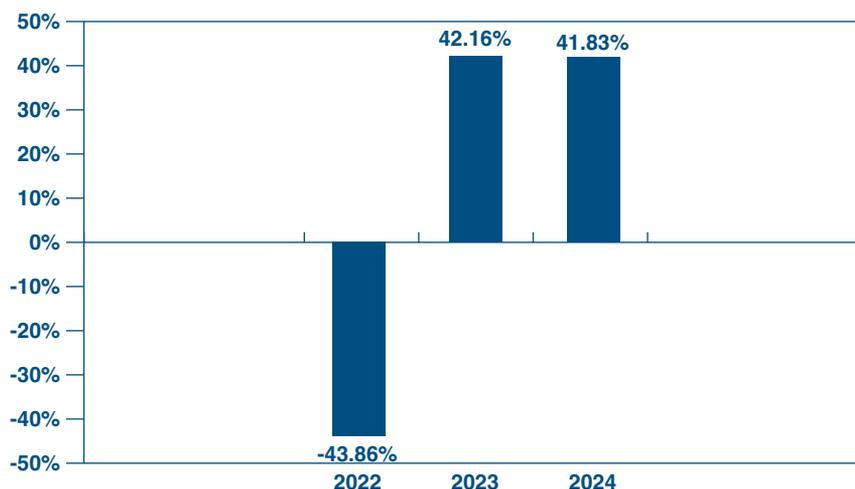

- **American Depositary Receipts (“ADRs”) Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Growth Stock Risk.** Securities of growth companies may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks that can cushion stock prices in a falling market.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer’s goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer’s value, such as investor perception.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund’s shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund’s portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund’s investments and operations. In addition, the value of the Fund’s investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund’s shares may decline.

- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares.
- **Technology Sector Risk.** Technology companies, may have limited product lines, markets, financial resources or personnel. Technology companies typically face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights. Companies in the technology sector are facing increased government and regulatory scrutiny and may be subject to adverse government or regulatory action.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Geopolitical Risk.** Occurrence of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The bar chart and table that follow provide an indication of the risk of investing in the Growth Innovators Fund by showing changes in the Growth Innovators Fund's performance from year to year and by showing how the Growth Innovators Fund's average annual returns compared with those of a broad-based securities market index and an additional index that has investment characteristics similar to those of the Growth Innovators Fund. As with all mutual funds, the Growth Innovators Fund's past performance (before and after taxes) does not predict how the Growth Innovators Fund will perform in the future. Updated information on the Growth Innovators Fund's results can be obtained by visiting www.gabelli.com.

GROWTH INNOVATORS FUND
(Total returns for the Year Ended December 31)

During the calendar years shown in the bar chart, the highest return for a quarter was 19.94% (quarter ended March 31, 2024) and the lowest return for a quarter was (31.27)% (quarter ended June 30, 2022).

Average Annual Total Returns (for the years ended December 31, 2024, with the maximum sales charges, if applicable)	Past One Year	Since Inception (February 12, 2021)
Growth Innovators Fund		
Return Before Taxes	41.83%	4.76%
Return After Taxes on Distributions	41.83%	4.76%
Return After Taxes on Distributions and Sale of Fund Shares	24.76%	3.69%
S&P 500 Index		
(reflects no deduction for fees, expenses or taxes)	25.02%	12.67%
Nasdaq Composite Index		
(reflects no deduction for fees, expenses or taxes)	29.57%	9.41%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the “Return After Taxes on Distributions and Sale of Fund Shares” may be greater than “Return Before Taxes” because the investor is assumed to be able to use the capital loss from the sale of Fund shares to offset other taxable gains. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts, including “Roth” IRAs and SEP IRAs (collectively, “IRAs”).

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Howard F. Ward, CFA, portfolio manager of the Adviser and Chief Investment Officer of Growth Products for GAMCO Investors, Inc., has served as portfolio manager of the Fund since inception. Mr. John Belton, CFA, portfolio manager of the Adviser, has served as a portfolio manager of the Fund since June 1, 2024.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are

made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund's NAV (premium) or less than the Fund's NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the "bid-ask spread"). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof ("Creation Units") to Authorized Participants who have entered into agreements with the Fund's distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
