

GABELLI EQUITY SERIES FUNDS, INC.
The Gabelli Equity Income Fund
The Gabelli Small Cap Growth Fund

Supplement dated March 31, 2026

to

Statutory Prospectus and Statement of Additional Information, each dated January 28, 2026

This supplement amends certain information in the Prospectus (the “Prospectus”) and Statement of Additional Information (the “SAI”), each dated January 28, 2026, of each of The Gabelli Equity Income Fund (the “Equity Income Fund”) and The Gabelli Small Cap Growth Fund (the “Small Cap Growth Fund”, and collectively, the “Funds”). Unless otherwise indicated, all other information included in the Prospectus and SAI, or any previous supplements thereto, that is not inconsistent with the information set forth in this supplement, remains unchanged. Capitalized terms not otherwise defined in this supplement have the same meaning as in the Prospectus and SAI.

The following paragraphs replace the disclosure in the Prospectus sub-section entitled “Management – The Portfolio Manager” for Small Cap Growth Fund beginning on page 7:

The Portfolio Managers. Mario J. Gabelli, CFA, Christopher J. Marangi, and Kevin V. Dreyer are primarily responsible for the day-to-day management of the Fund. Mr. Gabelli has served as portfolio manager of the Fund since its inception on October 22, 1991, and Messrs. Marangi and Dreyer have served as portfolio managers of the Fund since March 2026.

The investment team assists in developing and executing the Fund’s investment strategy, and includes G. Anthony Bancroft, Sarah Donnelly, Joseph Gabelli, Brian C. Sponheimer, and HENDI SUSANTO.

The members of the investment team may take on primary responsibility for the day-to-day management of the Fund in place of or in addition to the named portfolio managers, and are subject to change from time to time, in the judgment and at the discretion of the Adviser.

The following paragraphs replace the disclosure in the Prospectus sub-section entitled “Management – The Portfolio Manager” for Equity Income Fund beginning on page 16:

The Portfolio Managers. Mario J. Gabelli, CFA, Christopher J. Marangi, and Kevin V. Dreyer are primarily responsible for the day-to-day management of the Fund. Mr. Gabelli has served as portfolio manager of the Fund since its inception on January 2, 1992, and Messrs. Marangi and Dreyer have served as portfolio managers of the Fund since March 2026.

The investment team assists in developing and executing the Fund’s investment strategy, and includes G. Anthony Bancroft, Justin Bergner, Robert D. Leininger, Brian C. Sponheimer, and Macrae Sykes.

The members of the investment team may take on primary responsibility for the day-to-day management of the Fund in place of or in addition to the named portfolio managers, and are subject to change from time to time, in the judgment and at the discretion of the Adviser.

The following paragraphs are added to the disclosure in the Prospectus sub-section entitled “Management of the Funds – The Portfolio Managers” beginning on page 46:

Mr. Christopher J. Marangi is primarily responsible for the day to day management of Small Cap Growth Fund and Equity Income Fund. Mr. Marangi is President of GAMI and Co-Chief Investment Officer — Value Portfolios of the Adviser. He joined the firm in 2003 as a research analyst covering the media and entertainment and business services sectors. Previously, he evaluated and executed private equity investments at Wellspring Capital Management. Prior to that, he was an investment banker with J.P. Morgan & Co. Mr. Marangi is a graduate magna cum laude of Williams College and holds an M.B.A. from Columbia University Graduate School of Business.

Mr. Kevin V. Dreyer is primarily responsible for the day to day management of Small Cap Growth Fund and Equity Income Fund. Mr. Dreyer is Co-Chief Investment Officer — Value Portfolios of the Adviser. He joined the firm in 2005 as a research analyst covering companies within the consumer sector, after receiving an M.B.A. from the Columbia Business School. Previously he worked as an analyst at Bank of America Securities. Mr. Dreyer also holds a B.S.E. degree from the University of Pennsylvania.

The following information is added to the Statement of Additional Information in the section titled “Investment Advisory and Other Services—Portfolio Manager Information—Other Accounts Managed”:

Excludes Small Cap Growth Fund

Name of Portfolio Manager	Type of accounts	Total Number of Accounts Manage	Total assets	Number of Accounts Managed with Advisory Fee Based on Performance	Total Assets with Advisory Fee Based on Performance
Christopher J. Marangi	Registered Investment Companies	9	\$7.5 billion	0	\$0
	Other Pooled Investment Vehicles	0	\$0	0	\$0
	Other accounts	240	\$587.8 million	0	\$0
Kevin V. Dreyer	Registered Investment Companies	6	\$7.3 billion	0	\$0
	Other Pooled Investment Vehicles	0	\$0	0	\$0
	Other accounts	235	\$574.8 million	0	\$0

Excludes Equity Income Fund

The following information replaces the paragraphs in the Statement of Additional Information in the section titled “Investment Advisory and Other Services—Portfolio Manager Information—Compensation Structure for Ian Lapey and Daniel M. Miller”:

Compensation Structure for Portfolio Managers of the Adviser other than Mario J. Gabelli

The compensation of the Portfolio Managers for the Fund is structured to enable the Adviser to attract and retain highly qualified professionals in a competitive environment. The Portfolio Managers receive a compensation package that includes a minimum draw or base salary, equity-based incentive compensation via awards of restricted stock, and incentive-based variable compensation based on a percentage of net revenue received by the Adviser for managing a Fund to the extent that the amount exceeds a minimum level of compensation. Net revenues are determined by deducting from gross investment management fees certain of the firm’s expenses (other than the respective Portfolio Manager’s compensation) allocable to the respective Fund (the incentive-based variable compensation for managing other accounts is also based on a percentage of net revenues to the investment adviser for managing the account). This method of compensation is based on the premise that superior long-term performance in managing a portfolio should be rewarded with higher compensation as a result of growth of assets through appreciation and net investment activity. The level of equity-based incentive and incentive-based variable compensation is based on an evaluation by the Adviser’s parent, GAMI, of quantitative and qualitative performance evaluation criteria. This evaluation takes into account, in a broad sense, the performance of the accounts managed by the Portfolio Manager, but the level of compensation is not determined with specific reference to the performance of any account against any specific benchmark. Generally, greater consideration is given to the performance of larger accounts and to longer term performance over smaller accounts and short-term performance.

The following information is added to the Statement of Additional Information in the section titled “Investment Advisory and Other Services—Portfolio Manager Information—Ownership of Shares in the Fund”:

Name	Fund	Dollar Range of Equity Securities Held in the Fund*
Christopher J. Marangi	Small Cap Growth Fund Equity Income Fund	A A
Kevin V. Dreyer	Small Cap Growth Fund Equity Income Fund	A A

GENERAL INFORMATION

The Company is an open-end, management investment company organized under the laws of the State of Maryland on July 25, 1991. The Small Cap Growth Fund, Equity Income Fund, Focused Growth and Income Fund, and Global Financial Services Fund are each a series of the Company and commenced operations on October 22, 1991, January 2, 1992, December 31, 2002, and October 1, 2018, respectively. The Small Cap Growth Fund and Equity Income Fund are each classified as a diversified investment company and the Focused Growth and Income Fund and Global Financial Services Fund are each classified as a “non-diversified” investment company. The Company’s principal office is located at One Corporate Center, Rye, New York 10580-1422. The Funds are advised by Gabelli Funds, LLC (the “Adviser”).

INVESTMENT STRATEGIES AND RISKS

The Funds’ prospectus discusses the investment objective of each Fund and the principal strategies to be employed to achieve these objectives. This SAI contains supplemental information concerning certain types of securities and other instruments in which the Funds may invest, additional strategies that the Funds may utilize in seeking to achieve its investment objective, and certain risks associated with such investments and strategies. Subject to the investment policies and restrictions contained in the prospectus and this SAI, the Funds may invest in any of the securities described herein.

Equity Securities

Common stocks represent the residual ownership interest in the issuer and holders of common stock are entitled to the income and increase in the value of the assets and business of the issuer after all of its debt obligations and obligations to preferred stockholders are satisfied. Common stocks generally have voting rights. Common stocks fluctuate in price in response to many factors including historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions, and market liquidity.

Equity securities also include preferred stock (whether or not convertible into common stock) and debt securities convertible into or exchangeable for common or preferred stock. Preferred stock has a preference over common stock in liquidation (and generally dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similarly stated yield characteristics. Debt securities that are convertible into or exchangeable for preferred or common stock are liabilities of the issuer but are generally subordinated to more senior elements of the issuer’s balance sheet. Although such securities also generally reflect an element of conversion value, their market value also varies with interest rates and perceived credit risk. The market value of preferred stock will also generally reflect whether (and if so when) the issuer may force holders to sell their preferred shares back to the issuer and whether (and if so when) the holders may force the issuer to buy back their preferred shares. Generally speaking the right of the issuer to repurchase the preferred stock tends to reduce any premium that the preferred stock might otherwise trade at due to interest rate or credit factors, while the right of the holders to require the issuer to repurchase the preferred stock tend to reduce any discount that the preferred stock might otherwise trade at due to interest rate or credit factors.

The Adviser believes that opportunities for capital appreciation may be found in the preferred stock and convertible securities of companies. This is particularly true in the case of companies that have performed below expectations at the time the preferred stock or convertible security was issued. If the company’s performance has been poor enough, its preferred stock and convertible debt securities will trade more like its common stock than like a fixed income security and may result in above average appreciation once it becomes apparent that performance is improving. Even if the credit quality of the company is not in question, the market price of the convertible security will often reflect little or no element of conversion value if the price of its common stock has fallen substantially below the conversion price. This leads to the possibility of capital appreciation if the price of the common stock recovers. Many convertible securities are not investment grade, that is, they are not rated BBB or better by Standard & Poor’s Ratings Services (“S&P”), a division of S&P Global, Inc., or Baa or better by Moody’s Investors Service, Inc. (“Moody’s”) and not considered by the Adviser to be of similar quality. There is no minimum credit rating for these securities in which the Funds may invest. Preferred stocks and convertible securities have many of the same characteristics and risks as described below.

Nonconvertible Debt Securities

Under normal market conditions, the Small Cap Growth Fund, Equity Income Fund, and Focused Growth and Income Fund may each invest up to 20% of its total assets, and the Global Financial Services Fund may invest without limit, in lower quality nonconvertible debt securities. These securities include preferred stocks, bonds, debentures, notes, asset-and mortgage-backed securities, and money market instruments such as commercial paper and bankers’ acceptances. These investments involve interest rate risk and credit risk. When interest rates decline, the value of such securities generally rises. Conversely, when interest rates rise, the value of such securities generally declines.

It is also possible that the issuer of a security will not be able to make interest and principal payments when due. There is also no minimum credit rating for these securities in which the Funds may invest. Accordingly, the Funds could invest in securities in default although the Funds will not invest more than 5% of its assets in such securities. The market values of lower quality fixed income securities tend to be

less sensitive to changes in prevailing interest rates than higher-quality securities but more sensitive to individual corporate developments than higher-quality securities. Such lower-quality securities also tend to be more sensitive to economic conditions than are higher-quality securities. Accordingly, these lower-quality securities are considered predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligation and will generally involve more credit risk than securities in the higher-quality categories. Even securities rated Baa or BBB by Moody's and S&P respectively, which ratings are considered investment grade, possess some speculative characteristics. There are risks involved in applying credit ratings as a method for evaluating high yield obligations in that credit ratings evaluate the safety of principal and interest payments, not market value risk. In addition, credit rating agencies may not change credit ratings on a timely basis to reflect changes in economic or company conditions that affect a security's market value. The Funds will rely on the Adviser's judgment, analysis, and experience in evaluating the creditworthiness of an issuer. In this evaluation, the Adviser will take into consideration, among other things, the issuer's financial resources and ability to cover its interest and fixed charges, factors relating to the issuer's industry and its sensitivity to economic conditions and trends, its operating history, the quality of the issuer's management, and regulatory matters.

The risk of loss due to default by the issuer is significantly greater for the holders of lower quality securities because such securities are generally unsecured and are often subordinated to other obligations of the issuer. There is a risk that heightened interest rates may cause the economy to enter a recession. During an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of lower quality securities may experience financial stress and may not have sufficient revenues to meet their interest payment obligations. An issuer's ability to service its debt obligations may also be adversely affected by specific corporate developments, its inability to meet specific projected business forecasts, or the unavailability of additional financing.

Factors adversely affecting the market value of high yield and other securities will adversely affect each Fund's net asset value per share ("NAV"). In addition, each Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or of interest on its portfolio holdings.

From time to time, proposals have been discussed regarding new legislation designed to limit the use of certain high yield debt securities by issuers in connection with leveraged buy-outs, mergers, and acquisitions, or to limit the deductibility of interest payments on such securities. Such proposals, if enacted into law, could reduce the market for such debt securities generally, could negatively affect the financial condition of issuers of high yield securities by removing or reducing a source of future financing, and could negatively affect the value of specific high yield issues and the high yield market in general. For example, under a provision of the Internal Revenue Code of 1986, as amended (the "Code"), a corporate issuer may be limited from deducting all of the original issue discount on high-yield discount obligations (*i.e.*, certain types of debt securities issued at a significant discount to their face amount).

The likelihood of passage of any additional legislation or the effect thereof is uncertain. Similarly, subject to certain exceptions, the Tax Cuts and Jobs Act made substantial changes to the Code that eliminate or modify of various previously allowed deductions, including substantial limitations on the deductibility of interest. The secondary trading market for lower-quality fixed income securities is generally not as liquid as the secondary market for higher-quality securities and is very thin for some securities. The relative lack of an active secondary market may have an adverse impact on market price and a Fund's ability to dispose of particular issues when necessary to meet a Fund's liquidity needs or in response to a specific economic event such as the deterioration in the creditworthiness of the issuer. The relative lack of an active secondary market for certain securities may also make it more difficult for a Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio. Market quotations are generally available on many high yield issues only from a limited number of dealers and may not necessarily represent firm bids of such dealers or prices for actual sales. During such times, the responsibility of the Adviser, as Valuation Designee, to value the securities becomes more difficult and judgment plays a greater role in valuation because there is less reliable, objective data available.

Corporate Reorganizations

Each Fund may, subject to each such Fund's applicable investment policies, invest without limit in securities for which a tender or exchange offer has been made or announced and in securities of companies for which a merger, consolidation, liquidation or reorganization proposal has been announced. The primary risk of this type of investing is that if the contemplated transaction is abandoned, revised, delayed or becomes subject to unanticipated uncertainties, the market price of the securities may decline below the purchase price paid by a Fund. Since such investments are ordinarily short-term in nature, they will tend to increase the turnover ratios of the Funds, thereby increasing their brokerage commissions and other transaction expenses related to the frequent purchasing and selling of such investments.

In general, securities of companies that have announced reorganization transactions sell at a premium to their historic market price immediately prior to the announcement of the tender offer or reorganization proposal. However, the increased market price of such securities may also trade at a discount to what the stated or appraised value of the security would be if the contemplated transaction were approved or consummated. Such investments may be advantageous when the discount significantly overstates the risk of the contingencies involved, significantly undervalues the securities, assets, or cash to be received by shareholders of the prospective acquiring company as a result of the contemplated transaction, or fails adequately to recognize the possibility that the offer or proposal may be replaced or superseded by an offer or proposal of greater value. The evaluation of such contingencies requires unusually broad knowledge and experience on the part of the portfolio manager who must appraise not only the value of the issuer and its component businesses as well as the assets or securities to be received as a result of the contemplated transaction, but also the financial resources and business motivation of the offeror as well as the dynamics and business climate when the offer or proposal is in progress.

In making these types of investments, the Funds are required to adhere to their respective investment restrictions (see “Investment Restrictions” below), including, where applicable, the requirement that, (a) as to 75% of its total assets, it will not invest more than 5% of its total assets in the securities of any one issuer (*Equity Income Fund and Small Cap Growth Fund only*), (b) it will not invest more than 25% of its total assets in any one industry (*Equity Income Fund, Focused Growth and Income Fund and Small Cap Growth Fund only*) and (c) it will not invest more than 25% of its total assets in any one industry, except that under normal market conditions, it will invest at least 25% of the value of its net assets in the securities of companies principally engaged in the group of industries comprising the financial services sector (*Global Financial Services Fund only*).

Sector Risks

Financial Services. The Equity Income Fund has in the past focused (and may in the future focus) its investments in securities issued by financial services companies and the Global Financial Services Fund concentrates its investments in securities issued by financial services companies. Financial services companies can be significantly affected by changing economic conditions, demand for consumer loans, refinancing activity and intense competition. Profitability can be largely dependent on the availability and cost of capital and the rate of consumer debt defaults, and can fluctuate significantly when interest rates change. Profitability can in particular be adversely impacted during periods of rising interest rates. Financial difficulties of borrowers can negatively affect financial services companies. Financial services companies are subject to extensive government regulation, which can change frequently and may adversely affect the scope of their activities, the prices they can charge and the amount of capital they must maintain, or may affect them in other ways that are unforeseeable. In the recent past, financial services companies in general experienced considerable financial distress, which led to the implementation of government programs designed to ease that distress. Insurance companies have additional risks, such as heavy price competition, claims activity and marketing competition, and can be particularly sensitive to specific events such as man-made and natural disasters (including weather catastrophes), terrorism, mortality risks and morbidity rates. The 1940 Act also restricts the Global Financial Services Fund from acquiring any security issued by an insurance company if the Global Financial Services Fund owns, or will own as a result of the acquisition, more than 10% of the total outstanding voting stock of the insurance company.

A significant adverse development (such as a bank run, insolvency, bankruptcy or default) with one or more national or regional banks, financial institutions or other participants in the financial or capital markets may spread to others and lead to significant concentrated or market-wide problems (such as defaults, liquidity problems, impairment charges, additional bank runs and/or losses) for other participants in these markets. Future developments, including actions taken by the U.S. Department of Treasury, FDIC, Federal Reserve Board, and systemic risk in the U.S. and global banking sectors and broader economies in general, are difficult to assess and quantify, and the form and magnitude of such developments or other actions of the U.S. Department of Treasury, FDIC and Federal Reserve Board may remain unknown for significant periods of time and could have an adverse effect on the Fund and its investments. Additionally, should there be additional systemic pressure on the financial system and capital markets, there is no assurance the response of any government, regulator or market participant will be as favorable to industry participants as the current measures. Highly publicized issues related to the U.S. and global capital markets in the past have led to significant and widespread investor concerns and volatility. The current banking situation may lead to further rules and regulations for banks, financial institutions and other participants in the U.S. and global capital markets, and complying with the requirements of any such rules or regulations may be burdensome. There have been recent bank closings and failures that have given rise to significant liquidity concerns in the broader financial services industry and market volatility. Liquidity problems in the financial services industry could have an adverse effect on the Fund’s investment returns.

Investments in Asset-Backed and Mortgage-Backed Securities

The Equity Income Fund, Small Cap Growth Fund and Global Financial Services Fund may invest in asset-backed and mortgage-backed securities. Prepayments of principal may be made at any time on the obligations underlying asset- and most mortgage- backed securities and are passed onto the holders of the asset- and mortgage- backed securities. As a result, if a Fund purchases such a security at a premium, faster than expected prepayments will reduce yield-to-maturity (“YTM”), and slower than expected prepayments will increase YTM. Conversely, if a Fund purchases these securities at a discount, faster than expected prepayments will increase YTM, while slower than expected prepayments will reduce YTM.

Current rules related to credit risk retention requirements for asset-backed securities may increase the cost to originators, securitizers and, in certain cases, asset managers of securitization vehicles in which a Fund may invest. Although the impact of these requirements is uncertain, certain additional costs may be passed to a Fund and the Fund’s investments in asset-backed securities may be adversely affected. Many of the other changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) or foreign regulatory developments could materially impact the value of a Fund’s assets, expose a Fund to additional costs and require changes to investment practices, thereby adversely affecting the Fund’s performance.

Investments in Foreign Securities

The Small Cap Growth Fund and the Equity Income Fund may invest up to 35% of its total assets, and the Focused Growth and Income Fund and the Global Financial Services Fund may invest without limit, in the securities of non-U.S. issuers. However, the Equity Income Fund, Focused Growth and Income Fund and Small Cap Growth Fund do not currently expect to invest a significant portion of their assets

in such securities. These investments involve certain risks not ordinarily associated with investments in securities of domestic issuers. These risks include fluctuations in foreign exchange rates (which the Small Cap Growth Fund and Equity Income Fund will not seek to hedge), future political and economic developments, and the possible imposition of exchange controls or other foreign governmental laws or restrictions. In addition, with respect to certain countries, there is the possibility of expropriation of assets, confiscatory taxation, political or social instability or diplomatic developments which could adversely affect investments in those countries.

There may be less publicly available information about a foreign company than about a United States (“U.S.”) company, and foreign companies may not be subject to accounting, auditing, and financial reporting standards and requirements comparable to or as uniform as those of U.S. companies. Non-U.S. securities markets, while growing in volume, have, for the most part, substantially less volume than U.S. markets, and securities of many foreign companies are less liquid and their prices more volatile than securities of comparable U.S. companies. Transaction costs of investing in non-U.S. securities markets are generally higher than in the U.S. There is generally less government supervision and regulation of exchanges, brokers, and issuers than there is in the U.S. The Funds might have greater difficulty taking appropriate legal action in non-U.S. courts and there may be less developed bankruptcy laws. Foreign markets also have different clearance and settlement procedures that could cause a Fund to encounter difficulties in purchasing and selling securities on such markets and may result in the Fund missing attractive investment opportunities or experiencing loss. In addition, a portfolio that includes foreign securities can expect to have a higher expense ratio because of the increased transaction costs on non-U.S. securities markets and the increased costs of maintaining the custody of foreign securities.

Dividend and interest income from non-U.S. securities will generally be subject to withholding taxes by the country in which the issuer is located and may not be recoverable by the Funds or the investor.

The following provides more detail on certain pronounced risks with foreign investing:

- *Foreign Currency Risk.* The Funds may invest in companies whose securities are denominated or quoted in currencies other than U.S. dollars or have significant operations or markets outside of the United States. In such instances, the Funds will be exposed to currency risk, including the risk of fluctuations in the exchange rate between U.S. dollars (in which a Fund’s shares are denominated) and such foreign currencies, the risk of currency devaluations and the risks of non-exchangeability and blockage. As non-U.S. securities may be purchased with and payable in currencies of countries other than the U.S. dollar, the value of these assets measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations. Fluctuations in currency rates may adversely affect the ability of the Adviser to acquire such securities at advantageous prices and may also adversely affect the performance of such assets.

Certain non-U.S. currencies, primarily in developing countries, have been devalued in the past and might face devaluation in the future. Currency devaluations generally have a significant and adverse impact on the devaluing country’s economy in the short and intermediate term and on the financial condition and results of companies’ operations in that country. Currency devaluations may also be accompanied by significant declines in the values and liquidity of equity and debt securities of affected governmental and private sector entities generally. To the extent that affected companies have obligations denominated in currencies other than the devalued currency, those companies may also have difficulty in meeting those obligations under such circumstances, which in turn could have an adverse effect upon the value of a Fund’s investments in such companies. There can be no assurance that current or future developments with respect to foreign currency devaluations will not impair a Fund’s investment flexibility, its ability to achieve its investment objectives or the value of certain of its foreign currency-denominated investments.

- *Tax Consequences of Foreign Investing.* A Fund’s transactions in foreign currencies, foreign currency-denominated debt obligations and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned. This treatment could increase or decrease a Fund’s ordinary income distributions to you, and may cause some or all of a Fund’s previously distributed income to be classified as a return of capital. In certain cases, a Fund may make an election to treat gain or loss attributable to certain investments as capital gain or loss.
- *EMU and Redenomination Risk.* As the European debt crisis progressed, the possibility of one or more Eurozone countries exiting the European Monetary Union (“EMU”), or even the collapse of the Euro as a common currency, arose, creating significant volatility at times in currency and financial markets generally. The effects of the collapse of the Euro, or of the exit of one or more countries from the EMU, on the U.S. and global economy and securities markets are impossible to predict and any such events could have a significant adverse impact on the value and risk profile of the Fund’s portfolio. Any partial or complete dissolution of the EMU could have significant adverse effects on currency and financial markets, and on the values of a Fund’s portfolio investments. If one or more EMU countries were to stop using the Euro as its primary currency, the Fund’s investments in such countries may be redenominated into a different or newly adopted currency. As a result, the value of those investments could decline significantly and unpredictably. In addition, securities or other investments that are redenominated may be subject to foreign currency risk, liquidity risk and valuation risk to a greater extent than similar investments currently denominated in Euros. To the extent a currency used for redenomination purposes is not specified in respect of certain EMU-related investments, or should the Euro cease to be used entirely, the currency in which such investments are denominated may be unclear, making such investments particularly difficult to value or dispose of. A Fund may incur additional expenses to the extent it is required to seek judicial or other clarification of the denomination or value of such securities.

Emerging Markets Risk. The risks discussed above are generally more pronounced for investments in emerging market countries, including in securities of companies located in emerging markets. The prices of investments in emerging markets can experience sudden and sharp price swings. In many developing markets, there is less government supervision and regulation of business and industry practices (including the potential lack of strict finance and accounting controls and standards), stock exchanges, brokers, and listed companies than in more developed markets, making these investments potentially more volatile in price and less liquid than investments in developed securities markets, resulting in greater risk to investors. There is a risk in developing countries that a future economic or political crisis could lead to price controls, forced mergers of companies, expropriation or confiscatory taxation, imposition or enforcement of foreign ownership limits, seizure, nationalization, sanctions or imposition of restrictions by various governmental entities on investment and trading, or creation of government monopolies, any of which may have a detrimental effect on a Fund's investments. Many emerging market countries have experienced substantial, and in some periods extremely high, rates of inflation or deflation for many years, and future inflation may adversely affect the economies and securities markets of such countries. In addition, the economies of developing countries tend to be heavily dependent upon international trade and, as such, have been, and may continue to be, adversely impacted by trade barriers, exchange controls, managed adjustments in relative currency values, and other protectionist measures. These economies also have been, and may continue to be, adversely affected by economic conditions in the countries with which they do business.

The securities markets of the countries in which the Funds may invest may also be smaller, less liquid, and subject to greater price volatility than those in the United States. In the event of a default on any investments in foreign debt obligations, it may be more difficult for the Funds to obtain or to enforce a judgment against the issuers of such securities. In addition, there may be little financial or accounting information available with respect to issuers of emerging market securities, and it may be difficult as a result to assess the value of an investment in such securities. Further, a Fund's ability to participate fully in the smaller, less liquid emerging markets may be limited by the policy restricting its investments in illiquid securities. The Funds may be subject to emerging markets risk to the extent that they invest in securities of issuers or companies which are not considered to be from emerging markets, but which have customers, products, or transactions associated with emerging markets.

Frontier Markets. Frontier countries generally have smaller economies or less developed capital markets than traditional emerging markets, and, as a result, the risks of investing in emerging market countries are magnified in frontier countries. The economies of frontier countries are less correlated to global economic cycles than those of their more developed counterparts and their markets have low trading volumes and the potential for extreme price volatility and illiquidity. This volatility may be further heightened by the actions of a few major investors. For example, a substantial increase or decrease in cash flows of mutual funds investing in these markets could significantly affect local stock prices and, therefore, the price of Fund shares. These factors make investing in frontier countries significantly riskier than in other countries and any one of them could cause the price of a Fund's shares to decline.

Governments of many frontier countries in which a Fund may invest may exercise substantial influence over many aspects of the private sector. In some cases, the governments of such frontier countries may own or control certain companies. Accordingly, government actions could have a significant effect on economic conditions in a frontier country and on market conditions, prices and yields of securities in a Fund's portfolio. Moreover, the economies of frontier countries may be heavily dependent upon international trade and, accordingly, have been and may continue to be, adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries with which they trade.

Certain foreign governments in countries in which a Fund may invest levy withholding or other taxes on dividend and interest income. Although in some countries a portion of these taxes are recoverable, the non-recovered portion of foreign withholding taxes will reduce the income received from investments in such countries.

From time to time, certain of the companies in which a Fund may invest may operate in, or have dealings with, countries subject to sanctions or embargoes imposed by the U.S. government and the United Nations and/or countries identified by the U.S. government as state sponsors of terrorism. A company may suffer damage to its reputation if it is identified as a company which operates in, or has dealings with, countries subject to sanctions or embargoes imposed by the U.S. government and the United Nations and/or countries identified by the U.S. government as state sponsors of terrorism. As an investor in such companies, a Fund will be indirectly subject to those risks.

Investment in equity securities of issuers operating in certain frontier countries is restricted or controlled to varying degrees. These restrictions or controls may at times limit or preclude foreign investment in equity securities of issuers operating in certain frontier countries and increase the costs and expenses of a Fund. Certain frontier countries require governmental approval prior to investments by foreign persons, limit the amount of investment by foreign persons in a particular issuer, limit the investment by foreign persons only to a specific class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domiciliaries of the countries and/or impose additional taxes on foreign investors. Certain frontier countries may also restrict investment opportunities in issuers in industries deemed important to national interests.

Frontier countries may require governmental approval for the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors, such as a Fund. In addition, if deterioration occurs in a frontier country's balance of payments, the country could impose temporary restrictions on foreign capital remittances. A Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for repatriation of capital, as well as by the application to a Fund of any restrictions on investments. Investing in local markets in frontier countries may require a Fund to adopt special procedures, seek local government approvals or take other actions, each of which may involve additional costs to a Fund.

Investing in Africa. Investing in the economies of African countries involves risks not typically associated with investments in securities of issuers in more developed economies, countries or geographic regions, which may negatively affect the value of investments in a Fund. Such heightened risks include, among others, expropriation and/or nationalization of assets, restrictions on and government intervention in international trade, confiscatory taxation, political instability, including authoritarian and/or military involvement in governmental decision making, armed conflict, civil war, and social instability as a result of religious, ethnic and/or socioeconomic unrest.

The securities markets in Africa are underdeveloped and are often considered to be less correlated to global economic cycles than markets located in more developed countries or geographic regions. Securities markets in Africa are subject to greater risks associated with market volatility, lower market capitalization, lower trading volume, illiquidity, inflation, greater price fluctuations, uncertainty regarding the existence of trading markets, governmental control and heavy regulation of labor and industry. Moreover, trading on securities markets may be suspended altogether.

Certain governments in Africa may restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in those countries. These restrictions and/or controls may at times limit or prevent foreign investment in securities of issuers located or operating in countries in Africa. Moreover, certain countries in Africa may require governmental approval or special licenses prior to investment by foreign investors; may limit the amount of investment by foreign investors in a particular industry and/or issuer; may limit such foreign investment to a certain class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domestic investors of those countries; and/or may impose additional taxes on foreign investors. These factors, among others, make investing in issuers located or operating in countries in Africa significantly riskier than investing in issuers located or operating in more developed countries.

Investing in Eastern Europe. An investment in Eastern European issuers may subject a Fund to legal, regulatory, political, currency, security and economic risks specific to Eastern Europe. Economies of certain Eastern European countries rely heavily on export of commodities, including oil and gas, and certain metals. As a result, such economies will be impacted by international commodity prices and are particularly vulnerable to global demand for these products. Acts of terrorism in certain Eastern European countries may cause uncertainty in their financial markets and adversely affect the performance of the issuers to which a Fund has exposure. The securities markets in Eastern European countries are substantially smaller and inexperienced, with less government supervision and regulation of stock exchanges and less liquid and more volatile than securities markets in the United States or Western European countries. Other risks related to investing in securities of Eastern European issuers include: the absence of legal structures governing private and foreign investments and private property; the possibility of the loss of all or a substantial portion of a Fund's assets invested in Eastern European issuers as a result of expropriation; certain national policies which may restrict a Fund's investment opportunities, including, without limitation, restrictions on investing in issuers or industries deemed sensitive to relevant national interests.

Investing in the Middle East. Certain economies in the Middle East depend to a significant degree upon exports of primary commodities such as oil. A sustained decrease in commodity prices could have a significant negative impact on all aspects of the economy in the region. Middle Eastern governments have exercised and continue to exercise substantial influence over many aspects of the private sector. Countries in the Middle East may be affected by political instability, war or the threat of war, regional instability, terrorist activities and religious, ethnic and/or socioeconomic unrest. Recent unrest and instability in the larger Middle East region has adversely impacted many economies in the region. Recent political instability and protests in the Middle East and North Africa (which has ethnic, religious and economic ties to the Middle East) and the October 2023 Hamas terrorist attacks and resulting conflict have caused significant disruptions to many industries.

Investing in Japan. There are special risks associated with investments in Japan. If a Fund invests in Japan, the value of the Fund's shares may vary widely in response to political and economic factors affecting companies in Japan. Political, social or economic disruptions in Japan or in other countries in the region may adversely affect the values of Japanese securities and thus a Fund's holdings. Additionally, since securities in Japan are denominated and quoted in yen, the value of a Fund's Japanese securities as measured in U.S. dollars may be affected by fluctuations in the value of the Japanese yen relative to the U.S. dollar. Japanese securities are also subject to the more general risks associated with foreign securities.

Investing in Latin America. The economies of Latin American countries have in the past experienced considerable difficulties, including high inflation rates and high interest rates. The emergence of the Latin American economies and securities markets will require continued economic and fiscal discipline that has been lacking at times in the past, as well as stable political and social conditions. International economic conditions, particularly those in the United States, as well as world prices for oil and other commodities may also influence the development of the Latin American economies.

Some Latin American currencies have experienced steady devaluations relative to the U.S. dollar and certain Latin American countries have had to make major adjustments in their currencies from time to time. In addition, governments of many Latin American countries have exercised and continue to exercise substantial influence over many aspects of the private sector. Governmental actions in the future could have a significant effect on economic conditions in Latin American countries, which could affect the companies in which a Fund invests and, therefore,

the value of a Fund's shares. As noted, in the past, many Latin American countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. For companies that keep accounting records in the local currency, inflation accounting rules in some Latin American countries require, for both tax and accounting purposes, that certain assets and liabilities be restated on the company's balance sheet in order to express items in terms of currency of constant purchasing power. Inflation accounting may indirectly generate losses or profits for certain Latin American companies. Inflation and rapid fluctuations in inflation rates have had, and could, in the future, have very negative effects on the economies and securities markets of certain Latin American countries.

Substantial limitations may exist in certain countries with respect to a Fund's ability to repatriate investment income, capital or the proceeds of sales of securities. A Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for repatriation of capital, as well as by the application to a Fund of any restrictions on investments.

Certain Latin American countries have entered into regional trade agreements that are designed to, among other things, reduce barriers between countries, increase competition among companies and reduce government subsidies in certain industries. No assurances can be given that these changes will be successful in the long-term, or that these changes will result in the economic stability intended. There is a possibility that these trade arrangements will not be fully implemented, or will be partially or completely unwound. It is also possible that a significant participant could choose to abandon a trade agreement, which could diminish its credibility and influence. Any of these occurrences could have adverse effects on the markets of both participating and non-participating countries, including sharp appreciation or depreciation of participants' national currencies and a significant increase in exchange rate volatility, a resurgence in economic protectionism, an undermining of confidence in the Latin American markets, an undermining of Latin American economic stability, the collapse or slowdown of the drive towards Latin American economic unity, and/or reversion of the attempts to lower government debt and inflation rates that were introduced in anticipation of such trade agreements. Such developments could have an adverse impact on a Fund's investments in Latin America generally or in specific countries participating in such trade agreements.

Other Latin American market risks include foreign exchange controls, difficulties in pricing securities, defaults on sovereign debt, difficulties in enforcing favorable legal judgments in local courts and political and social instability. Legal remedies available to investors in certain Latin American countries may be less extensive than those available to investors in the United States or other foreign countries.

Investing in Asia-Pacific Countries. In addition to the risks of investing in foreign securities and the risks of investing in emerging markets, the developing market Asia-Pacific countries are subject to certain additional or specific risks. In many of these markets, there is a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of investors and financial intermediaries. Many of these markets also may be affected by developments with respect to more established markets in the region such as in Japan and Hong Kong. Brokers in developing market Asia-Pacific countries typically are fewer in number and less well capitalized than brokers in the United States.

Many of the developing market Asia-Pacific countries may be subject to a greater degree of economic, political and social instability than is the case in the United States and Western European countries. Such instability may result from, among other things: (i) authoritarian governments or military involvement in political and economic decision-making, including changes in government through extra-constitutional means; (ii) popular unrest associated with demands for improved political, economic and social conditions; (iii) internal insurgencies; (iv) hostile relations with neighboring countries; and (v) ethnic, religious and racial disaffection. For example, South Korea is currently experiencing a period of political and economic instability following the attempted declaration of martial law by, and subsequent impeachment of, President Yoon Suk Yeol. In addition, the governments of many of such countries, such as Indonesia, have a substantial role in regulating and supervising the economy.

Another risk common to most such countries is that the economy is heavily export oriented and, accordingly, is dependent upon international trade. The existence of overburdened infrastructure and obsolete financial systems also presents risks in certain countries, as do environmental problems. Certain economies also depend to a significant degree upon exports of primary commodities and, therefore, are vulnerable to changes in commodity prices that, in turn, may be affected by a variety of factors.

The rights of investors in developing market Asia-Pacific companies may be more limited than those of shareholders of U.S. corporations. It may be difficult or impossible to obtain and/or enforce a judgment in a developing market Asia-Pacific country.

Some developing Asia-Pacific countries prohibit or impose substantial restrictions on investments in their capital markets, particularly their equity markets, by foreign entities. For example, certain countries may require governmental approval prior to investments by foreign persons or limit the amount of investment by foreign persons in a particular company.

Investing in Europe. A number of countries in the European Union (the "EU") have experienced, and may continue to experience, severe economic and financial difficulties, increasing the risk of investing in the European markets. In particular, many EU nations are susceptible to economic risks associated with high levels of debt, notably due to investments in sovereign debt of countries such as Greece, Italy, Spain, Portugal, and Ireland. As a result, financial markets in the EU have been subject to increased volatility and declines in asset values and liquidity. Responses to these financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest, and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets, and asset valuations around the world. Greece, Ireland, and Portugal have already received one or more "bailouts" from

other Eurozone member states, and it is unclear how much additional funding they will require or if additional Eurozone member states will require bailouts in the future. One or more other countries may also abandon the euro and/or withdraw from the EU, placing its currency and banking system in jeopardy. The impact of these actions, especially if they occur in a disorderly fashion, is not clear, but could be significant and far-reaching.

In addition, certain European countries have recently experienced negative interest rates on certain fixed-income instruments. A negative interest rate policy is an unconventional central bank monetary policy tool where nominal target interest rates are set with a negative value (i.e., below zero percent) intended to help create self-sustaining growth in the local economy. Negative interest rates may result in heightened market volatility and may detract from a Fund's performance to the extent a Fund is exposed to such interest rates.

Among other things, these developments adversely affected the value and exchange rate of the euro and pound sterling and any similar developments may continue to significantly affect the economies of all EU countries, which in turn may have a material adverse effect on a Fund's investments in such countries, other countries that depend on EU countries for significant amounts of trade or investment, or issuers with exposure to debt issued by certain EU countries.

To the extent a Fund has exposure to European markets or to transactions tied to the value of the euro, these events could negatively affect the value and liquidity of a Fund's investments. All of these developments may continue to significantly affect the economies of all EU countries, which in turn may have a material adverse effect on a Fund's investments in such countries, other countries that depend on EU countries for significant amounts of trade or investment, or issuers with exposure to debt issued by certain EU countries.

Hedging Transactions

Subject to the requirements of Rule 18f-4 under the 1940 Act ("Rule 18f-4"), the Funds may enter into certain derivative transactions (as further described below) including transactions that have economic leverage embedded in them. Rule 18f-4 defines "derivatives transactions" as (1) any swap, security-based swap, futures contract, forward contract, option, any combination of the foregoing, or any similar instrument, under which a fund is or may be required to make any payment or delivery of cash or other assets during the life of the instrument or at maturity or early termination, whether as margin or settlement payment or otherwise; and (2) any short sale borrowing. Derivatives transactions entered into by a Fund in compliance with Rule 18f-4 will not be considered senior securities for purposes of computing the asset coverage requirements described above. Economic leverage exists when a Fund achieves the right to a return on a capital base that exceeds the investment which a Fund has contributed to the instrument achieving a return. Derivative transactions that a Fund may enter into and the risks associated with them are described elsewhere in this Statement of Additional Information.

If a Fund enters into any reverse repurchase agreements or similar financing transactions obligating the Fund to make future payments, the Fund must either treat all such transactions as derivatives transactions for all purposes under Rule 18f-4 or otherwise comply with the asset coverage requirements described above and combine the aggregate amount of indebtedness associated with all such transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the Fund's asset coverage ratio limit requirements. The asset coverage requirements under section 18 of the 1940 Act and the limits and conditions imposed by Rule 18f-4 may limit or restrict portfolio management.

Options. Each Fund may purchase or sell options on individual securities as well as on indices of securities as a means of achieving additional return on or hedging the value of each Fund's portfolio.

A call option is a contract that gives the holder of the option the right, in return for a premium paid, to buy from the seller the security underlying the option at a specified exercise price at any time during the term of the option or, in some cases, only at the end of the term of the option. The seller of the call option has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price. A put option is a contract that gives the holder of the option the right, in return for a premium paid, to sell to the seller the underlying security at a specified price. The seller of the put option, on the other hand, has the obligation to buy the underlying security upon exercise at the exercise price.

If a Fund has sold an option, it may terminate its obligation by effecting a closing purchase transaction. This is accomplished by purchasing an option of the same series as the option previously sold. There can be no assurance that a closing purchase transaction can be affected when a Fund so desires.

The purchaser of an option risks a total loss of the premium paid for the option if the price of the underlying security does not increase or decrease sufficiently to justify exercise. The seller of an option, on the other hand, will recognize the premium as income if the option expires unexercised but foregoes any capital appreciation in excess of the exercise price in the case of a call option and may be required to pay a price in excess of current market value in the case of a put option. Options purchased and sold other than on an exchange in private transactions also impose on a Fund the credit risk that the counterparty will fail to honor its obligations. Each Fund will not purchase options if, as a result, the aggregate cost of all outstanding options exceeds 10% of the Fund's assets. Certain types of options that a Fund may purchase or sell may now be regulated as swaps by the Commodity Futures Trading Commission ("CFTC"), an agency of the U.S. government, or as security-based swaps by the Securities and Exchange Commission ("SEC"). The regulation of such options as swaps or security-based swaps is an ongoing development and there can be no assurance that the regulation of these types of instruments as swaps will not have an adverse effect on a Fund that utilizes these instruments.

Futures Contracts. Each Fund may enter into futures contracts only for certain bona fide hedging, yield enhancement, and risk management purposes. Each Fund may enter into futures contracts for the purchase or sale of debt securities, debt instruments, or indices of prices thereof, stock index futures, other financial indices, and U.S. government securities.

A "sale" of a futures contract (or a "short" futures position) means the assumption of a contractual obligation to deliver the reference assets underlying the contract at a specified price at a specified future time. A "purchase" of a futures contract (or a "long" futures position) means the assumption of a contractual obligation to acquire the reference assets underlying the contract at a specified price at a specified future time.

Certain futures contracts are settled on a net cash payment basis rather than by the sale and delivery of the reference assets underlying the futures contracts. U.S. futures contracts have been designed by exchanges that have been designated as "contract markets" by the CFTC and must be executed through a futures commission merchant (*i.e.*, a brokerage firm) who is a member of the relevant contract market. Futures contracts trade on these contract markets and the exchanges' affiliated clearing organization guarantees performance of the contracts as between the clearing members of the exchange.

Futures contracts entail certain risks, including but not limited to the following: no assurance that futures contracts transactions can be offset at favorable prices, possible reduction of each Fund's yield due to the use of hedging, possible reduction in value of both the securities hedged and the hedging instrument, possible lack of liquidity due to daily limits on price fluctuation, imperfect correlation between the contracts and the securities being hedged, and potential losses in excess of the amount invested in the futures contracts themselves.

Currency Transactions. Each Fund may enter into various currency transactions, including forward foreign currency contracts, currency swaps, foreign currency or currency index futures contracts and put and call options on such contracts or on currencies. A forward foreign currency contract involves an obligation to purchase or sell a specific currency for a set price at a future date. A currency swap is an arrangement whereby each party exchanges one currency for another on a particular date and agrees to reverse the exchange on a later date at a specific exchange rate. Forward currency contracts and currency swaps generally are established in the interbank market directly between currency traders (usually large commercial banks or other financial institutions) on behalf of their customers. Currency swaps and certain types of forward currency contracts now are regulated as swaps by the CFTC and, although they may still be established in the interbank market by currency traders on behalf of their customers, such instruments now must be executed in accordance with applicable federal regulations. The regulation of such currency swaps and forward currency contracts as swaps is an ongoing development and there can be no assurance that the additional regulation of these types of options will not have an adverse effect on a Fund that utilizes these instruments. Futures contracts are similar to forward contracts except that they are traded on an organized exchange and the obligations thereunder may be offset by taking an equal but opposite position to the original contract, with profit or loss determined by the relative prices between the opening and offsetting positions.

Each Fund expects to enter into these currency transactions in primarily the following circumstances: to "lock in" the U.S. dollar equivalent price of a security a Fund is contemplating to buy or sell that is denominated in a non-U.S. currency; or to protect against a decline in the U.S. dollar versus the currency of a particular country to which the Fund's portfolio has exposure. Each Fund anticipates seeking to achieve the same economic result by utilizing from time to time for such hedging a currency different from the one of the given portfolio security as long as, in the view of the Adviser, such currency is essentially correlated to the currency of the relevant portfolio security based on historic and expected exchange rate patterns.

Other Swap and Derivative Transactions. Each Fund may enter into total rate of return, credit default, or other types of swaps and related derivatives for the purpose of hedging and risk management. These transactions generally provide for the transfer from one counterparty to another of certain risks inherent in the ownership of a financial asset such as a common stock or debt instrument. Such risks include, among other things, the risk of default and insolvency of the obligor of such asset, the risk that the credit of the obligor or the underlying collateral will decline, or the risk that the common stock of the underlying issuer will decline in value. The transfer of risk pursuant to a derivative of this type may be complete or partial, and may be for the life of the related asset or for a shorter period. These derivatives may be used as a risk management tool for a pool of financial assets, providing a Fund with the opportunity to gain or reduce exposure to one or more reference securities or other financial assets (each, a "Reference Asset") without actually owning or selling such assets in order, for example,

to increase or reduce a concentration risk or to diversify a portfolio. Conversely, these derivatives may be used by a Fund to reduce exposure to an owned asset without selling it.

Because the Fund would not own the Reference Assets, the Fund may not have any voting rights with respect to the Reference Assets, and in such cases all decisions related to the obligors or issuers of the Reference Assets, including whether to exercise certain remedies, will be controlled by the swap counterparties.

Total rate of return swaps and similar derivatives are subject to many risks, including the possibility that the market will move in a manner or direction that would have resulted in gain for a Fund had the swap or other derivative not been utilized (in which case it would have been better had a Fund not engaged in the transactions), nearly unlimited exposure to changes in the value of the Reference Assets, total loss to a Fund of the entire notional amount of the swap, the risk of imperfect correlation between the risk sought to be hedged and the derivative transactions utilized, the possible inability of the counterparty to fulfill its obligations under the swap and potential illiquidity of the hedging instrument utilized, which may make it difficult for a Fund to close out or unwind one or more transactions.

Total rate of return swaps and related derivatives present certain legal, tax, and market uncertainties. There is currently little or no case law or litigation characterizing total rate of return swaps or related derivatives, interpreting their provisions, or characterizing their tax treatment.

There can be no assurance that future decisions construing similar provisions to those in any swap agreement or other related documents or additional regulations and laws will not have an adverse effect on a Fund if it utilizes these instruments. The Funds will monitor these risks and seek to utilize these instruments in a manner that does not lead to undue risk regarding the tax or other structural elements of the Funds. The Funds will not invest in these types of instruments if the Reference Assets are commodities except for bona fide hedging or risk management purposes. The Funds only will enter into swaps that are regulated by the U.S. Commodity Futures Trading Commission (“CFTC”) if in doing so the Funds will continue to satisfy the restrictions imposed by the CFTC under Rule 4.5.

Dodd-Frank Act Risk. The Dodd-Frank Act made broad changes to the derivatives market and granted significant authority to the CFTC and the SEC to regulate derivatives (swaps and security-based swaps) and participants in these markets. The Dodd-Frank Act is intended to regulate the derivatives market by requiring many derivative transactions to be cleared and traded on an exchange, expanding entity registration requirements, imposing business conduct requirements on dealers and requiring banks to move some derivatives trading units to a non-guaranteed affiliate separate from the deposit-taking bank or divest them altogether. The CFTC has implemented mandatory clearing and exchange-trading of certain derivatives contracts including many standardized interest rate swaps and credit default index swaps. The CFTC continues to approve contracts for central clearing. Exchange-trading and central clearing are expected to reduce counterparty credit risk by substituting the clearinghouse as the counterparty to a swap and increase liquidity, but exchange-trading and central clearing do not make swap transactions risk-free. Uncleared swaps, such as non-deliverable foreign currency forwards, are subject to certain margin requirements that mandate the posting and collection of minimum margin amounts. This requirement may result in a Fund and its counterparties posting higher margin amounts for uncleared swaps than would otherwise be the case. Certain rules require centralized reporting of detailed information about many types of cleared and uncleared swaps. Reporting of swap data may result in greater market transparency, but may subject a Fund to additional administrative burdens, and the safeguards established to protect trader anonymity may not function as expected.

Derivatives Transactions Subject to Rule 18f-4. Rule 18f-4 under the 1940 Act governs the Funds’ use of derivative instruments and certain other transactions that create future payment and/or delivery obligations by the Funds. Rule 18f-4 permits the Funds to enter into Derivatives Transactions (as defined below) and certain other transactions notwithstanding the restrictions on the issuance of “senior securities” under Section 18 of the 1940 Act. Section 18 of the 1940 Act, among other things, prohibits open-end funds, including the Fund, from issuing or selling any “senior security,” other than borrowing from a bank (subject to a requirement to maintain 300% “asset coverage”). In connection with the adoption of Rule 18f-4, the SEC eliminated the asset segregation framework arising from prior SEC guidance for covering Derivatives Transactions and certain financial instruments.

Under Rule 18f-4, “Derivatives Transactions” include the following: (i) any swap, security-based swap (including a contract for differences), futures contract, forward contract, option (excluding purchased options), any combination of the foregoing, or any similar instrument, under which a Fund is or may be required to make any payment or delivery of cash or other assets during the life of the instrument or at maturity or early termination, whether as margin or settlement payment or otherwise; (ii) any short sale borrowing; (iii) reverse repurchase agreements and similar financing transactions, if a Fund elects to treat these transactions as Derivatives Transactions under Rule 18f-4; and (iv) when-issued or forward-settling securities (e.g., firm and standby commitments, including to-be-announced (“TBA”) commitments, and dollar rolls) and non-standard settlement cycle securities, unless the Fund intends to physically settle the transaction and the transaction will settle within 35 days of its trade date.

Unless a Fund is relying on the Limited Derivatives User Exception (as defined below), each Fund must comply with Rule 18f-4 with respect to its Derivatives Transactions. Rule 18f-4, among other things, requires each Fund to (i) appoint a Derivatives Risk Manager, (ii) maintain a Derivatives Risk Management Program designed to identify, assess, and reasonably manage the risks associated with Derivatives Transactions; (iii) comply with certain value-at-risk (VaR)-based leverage limits (VaR is an estimate of an instrument’s or portfolio’s potential losses over a given time horizon and at a specified confidence level); and (iv) comply with certain reporting and recordkeeping requirements of the Company’s Board of Directors (the “Board” and each member of the Board, a “Director”).

Rule 18f-4 provides an exception from the requirements to appoint a Derivatives Risk Manager, adopt a Derivatives Risk Management Program, comply with certain VaR-based leverage limits, and comply with certain Board oversight and reporting requirements if a Fund's "derivatives exposure" (as defined in Rule 18f-4) is limited to 10% of its net assets (as calculated in accordance with Rule 18f-4) and that Fund adopts and implements written policies and procedures reasonably designed to manage its derivatives risks (the "Limited Derivatives User Exception").

Pursuant to Rule 18f-4, if a Fund enters into reverse repurchase agreements or similar financing transactions, that Fund will (i) aggregate the amount of indebtedness associated with all of its reverse repurchase agreements or similar financing transactions with the amount of any other "senior securities" representing indebtedness (e.g., bank borrowings, if applicable) when calculating the Fund's asset coverage ratio or (ii) treat all such transactions as Derivatives Transactions.

The requirements of Rule 18f-4 may limit a Fund's ability to engage in Derivatives Transactions as part of its investment strategies. These requirements may also increase the cost of a Fund's investments and cost of doing business, which could adversely affect the value of a Fund's investments and/or the performance of a Fund.

Limitations on the Purchase and Sale of Futures Contracts, Certain Options, and Swaps. Subject to the guidelines of the Board, each Fund may engage in "commodity interest" transactions (generally, transactions in futures, certain options, certain currency transactions, and certain types of swaps) only for bona fide hedging, yield enhancement and risk management purposes, in each case in accordance with the rules and regulations of the CFTC. Each Fund relies upon an exclusion from the definition of "commodity pool operator" to avoid registration with the CFTC, and this exclusion imposes certain trading restrictions on each Fund. These trading restrictions permit each Fund to engage in commodity interest transactions that include (i) "bona fide hedging" transactions, as that term is defined and interpreted by the CFTC and its staff, without regard to the percentage of the Fund's assets committed to margin and option premiums and (ii) non-bona fide hedging transactions, provided that the Fund not enter into such non-bona fide hedging transactions if, immediately thereafter, either (a) the sum of the amount of initial margin deposits on the Fund's existing futures or swaps positions and option or swaption premiums would exceed 5% of the market value of the Fund's liquidating value, after taking into account unrealized profits and unrealized losses on any such transactions, or (b) the aggregate net notional value of the Fund's commodity interest transactions would not exceed 100% of the market value of the Fund's liquidating value, after taking into account unrealized profits and unrealized losses on any such transactions. In addition to meeting one of the foregoing trading limitations, the Fund may not market itself as a commodity pool or otherwise as a vehicle for trading in the futures, options or swaps markets.

While hedging transactions can reduce or eliminate losses, they can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between the derivative and the underlying instrument, and there can be no assurance that a Fund's hedging transactions will be effective. Derivatives may also give rise to a form of leverage and may expose a Fund to greater risk and increase its costs. Future CFTC or SEC rulemakings could potentially further limit or completely restrict a Fund's ability to use these instruments as a part of the Fund's investment strategy, increase the costs of using these instruments or make them less effective. Limits or restrictions applicable to the counterparties with which a Fund engages in derivative transactions could also prevent the Fund from using these instruments or affect the pricing or other factors relating to these instruments or may change the availability of certain investments. New regulation may make derivatives more costly, may limit the availability of derivatives, or may otherwise adversely affect the value or performance of derivatives.

Unseasoned Companies

The Small Cap Growth Fund, the Focused Growth and Income Fund and the Global Financial Services Fund may invest in securities of unseasoned companies, which generally have limited liquidity, more speculative prospects and price volatility. The Small Cap Growth Fund will not invest more than 10% its of assets (at the time of purchase) in securities of companies (including predecessors) that have operated less than three years.

Other Investment Companies

To the extent permitted by law, each Fund may invest up to 10% of such Fund's total assets in other investment companies (not more than 5% of its total assets may be invested in any one investment company and it may not invest in more than 3% of the voting securities of any one investment company). Investments in other investment companies will cause a Fund to bear a ratable share of any such investment company's expenses, including management fees. A Fund will also remain obligated to pay management fees to the Adviser with respect to the assets invested in any securities of another investment company. In these circumstances, a Fund's shareholders will be subject to duplicative investment expenses.

Investments in Warrants and Rights

Each Fund may invest in warrants or rights (other than those acquired in units or attached to other securities) that entitle the holder to buy equity securities at a specific price for or at the end of a specific period of time. Each Fund will do so only if the underlying equity securities are deemed appropriate by the Adviser for inclusion in a Fund's portfolio.

Investing in rights and warrants can provide a greater potential for profit or loss than an equivalent investment in the underlying security, and thus can be a riskier investment. The value of a right or warrant may decline because of a decline in the value of the underlying security, the passage of time, changes in interest rates or in the dividend or other policies of the issuer whose equity underlies the warrant, a change

in the perception as to the future price of the underlying security, or any combination thereof. Rights and warrants generally pay no dividends and confer no voting or other rights other than the right to purchase the underlying security. With respect to the Small Cap Growth Fund and Equity Income Fund, investments in warrants and rights are limited to up to 5% of each Fund's total assets.

When Issued, Delayed Delivery Securities, and Forward Commitments

Each Fund may enter into forward commitments for the purchase or sale of securities, including on a "when issued" or "delayed delivery" basis in excess of customary settlement periods for the type of security involved. In some cases, a forward commitment may be conditioned upon the occurrence of a subsequent event, such as approval and consummation of a merger, corporate reorganization, or debt restructuring, (*i.e.*, a when, as, and if issued security). When such transactions are negotiated, the price is fixed at the time of the commitment, with payment and delivery taking place in the future, generally a month or more after the date of the commitment. While the Funds will only enter into a forward commitment with the intention of actually acquiring the security, the Funds may sell the forward commitment before the settlement date if it is deemed advisable.

Securities purchased under a forward commitment are subject to market fluctuation, and no interest (or dividend) accrues to the Funds prior to the settlement date.

Short Sales

Each Fund may make short sales of securities. A short sale is a transaction in which a Fund sells a security it does not own in anticipation that the market price of that security will decline. A Fund expects to make short sales both to obtain capital gains from anticipated declines in securities and as a form of hedging to offset potential declines in long positions in the same or similar securities. The short sale of a security is considered a speculative investment technique.

When a Fund makes a short sale, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale in order to satisfy its obligation to deliver the security upon conclusion of the sale. A Fund may have to pay a fee to borrow particular securities and is often obligated to pay over any payments received on such borrowed securities.

The Fund's obligation to replace the borrowed security will be secured by collateral, usually cash, U.S. government securities, or other highly liquid securities. Depending on arrangements made with the broker-dealer from which it borrowed the security regarding payment over of any payments received by the Fund on such security, the Fund may not receive any payments (including interest) on its collateral deposited with such broker-dealer.

If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, a Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

Short-selling necessarily involves certain additional risks. If the short seller does not own the securities sold short (an uncovered short sale), the borrowed securities must be replaced by securities purchased at market prices in order to close out the short position, and any appreciation in the price of the borrowed securities would result in a loss. Uncovered short sales expose the Fund to the risk of uncapped losses until a position can be closed out due to the lack of an upper limit on the price to which a security may rise. Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. There is the risk that the securities borrowed by a Fund in connection with a short-sale must be returned to the securities lender on short notice. If a request for return of borrowed securities occurs at a time when other short-sellers of the security are receiving similar requests, a "short squeeze" can occur, and a Fund may be compelled to replace borrowed securities previously sold short with purchases on the open market at the most disadvantageous time, possibly at prices significantly in excess of the proceeds received at the time the securities were originally sold short.

In September 2008, in response to spreading turmoil in the financial markets, the SEC temporarily banned short selling in the stocks of numerous financial services companies, and also promulgated new disclosure requirements with respect to short positions held by investment managers. The SEC's temporary ban on short selling of such stocks has since expired, but should similar restrictions and/or additional disclosure requirements be promulgated, especially if market turmoil occurs, the Funds may be forced to cover short positions more quickly than otherwise intended and may suffer losses as a result. Such restrictions may also adversely affect the ability of a Fund to execute its investment strategies generally. Similar emergency orders were also instituted in non-U.S. markets in response to increased volatility. The Funds' ability to engage in short sales is also restricted by various regulatory requirements relating to short sales.

With respect to the Small Cap Growth Fund and Equity Income Fund, the market value of the securities sold short of any one issuer will not exceed either 5% of each Fund's total assets or 5% of such issuer's voting securities. With respect to all Funds, a Fund will not make a short sale, if, after giving effect to such sale, the market value of all securities sold short exceeds 25% of the value of its assets or the Fund's aggregate short sales of a particular class of securities exceeds 25% of the outstanding securities of that class. The Funds may also make short sales "against the box" without respect to such limitations. In this type of short sale, at the time of the sale, the Funds own or have the immediate and unconditional right to acquire at no additional cost the identical security.

Restricted and Illiquid Securities

Each Fund may invest up to 15% of its net assets in illiquid securities. The sale of illiquid securities often requires more time and results in higher brokerage charges or dealer discounts and other selling expenses than does the sale of securities eligible for trading on national securities exchanges or in the over-the-counter (“OTC”) markets. Restricted securities, which are subject to legal or contractual restrictions on resale, may be considered illiquid and may sell at a price lower than similar securities that are not subject to restrictions on resale. Securities freely saleable among qualified institutional investors under special rules adopted by the SEC or otherwise determined to be liquid may be treated as liquid if they satisfy liquidity standards established by the Board. The continued liquidity of such securities is not as well assured as that of publicly traded securities, and accordingly the Board will monitor their liquidity. The Board will review pertinent factors such as trading activities, reliability of price information, and trading patterns of comparable securities in determining whether to treat any such security as liquid for purposes of the foregoing 15% test; to the extent the Board treats such securities as liquid, temporary impairment to trading patterns of such securities may adversely affect a Fund’s liquidity.

Repurchase Agreements

Each Fund may enter into repurchase agreements with banks and non-bank dealers of U.S. government securities which are listed as reporting dealers of the New York Federal Reserve Bank and which furnish collateral at least equal in value or market price to the amount of their repurchase obligation. In a repurchase agreement, a Fund purchases a debt security from a seller which undertakes to repurchase the security at a specified resale price on an agreed future date. Custody of such security is maintained by the Fund’s custodian. The resale price generally exceeds the purchase price by an amount which reflects an agreed-upon market interest rate for the term of the repurchase agreement.

The primary risk of entering into repurchase agreements is that if the seller defaults, the proceeds from the disposition of the underlying securities and other collateral for the seller’s obligation could be less than the repurchase price. If the seller becomes bankrupt, the Fund might be delayed in selling the collateral. Under the Investment Company Act of 1940, as amended (the “1940 Act”), repurchase agreements are considered loans. Repurchase agreements are usually settled within a short period, such as one week or less, but could be longer. Except for repurchase agreements settled within a period of a week or less in respect to obligations issued or guaranteed by the U.S. government, its agencies, or instrumentalities, the Fund’s investments in repurchase agreements are subject to the limit of investing no more than 15% of its net assets in illiquid securities. Therefore, a Fund will not enter into repurchase agreements with a duration of more than seven days if, taken together with restricted securities and other securities for which there are no readily available quotations, more than 15% of its net assets would be so invested.

Contingent Convertible Securities

The Global Financial Services Fund may invest in contingent convertible securities, sometimes referred to as “CoCos.” CoCos are a form of hybrid debt security issued by banking institutions that are intended to either automatically convert into equity or have their principal written down upon the occurrence of certain “trigger events,” which may include a decline in the issuer’s capital below a specified threshold level, increase in the issuer’s risk weighted assets, the share price of the issuer falling to a particular level for a certain period of time and certain regulatory events. CoCos’ unique equity conversion or principal write-down features are tailored to the issuing banking institution and its regulatory requirements.

CoCos are a newer form of instrument and the regulatory environment for these instruments continues to evolve. Because the market for such securities is evolving, it is uncertain how the larger market for CoCos would react to a trigger event, coupon cancellation, write-down of par value or coupon suspension (as described below) applicable to a single issuer. Following conversion of a CoCo, because the common stock of the issuer may not pay a dividend, investors in such securities could experience reduced yields or no yields at all.

Loss Absorption Risk. CoCos have fully discretionary coupons. This means coupons can potentially be cancelled at the banking institution’s discretion or at the request of the relevant regulatory authority in order to help the bank absorb losses. The liquidation value of a CoCo may be adjusted downward to below the original par value or written off entirely under certain circumstances. The write-down of the security’s par value may occur automatically and would not entitle holders to institute bankruptcy proceedings against the issuer. In addition, an automatic write-down could result in a reduced income rate if the dividend or interest payment associated with the security is based on the security’s par value. Coupon payments may also be subject to approval by the issuer’s regulator and may be suspended in the event there are insufficient distributable reserves. Due to uncertainty surrounding coupon payments, CoCos may be volatile and their price may decline rapidly in the event that coupon payments are suspended.

Subordinated Instruments. CoCos will, in the majority of circumstances, be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. Accordingly, in the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights and claims of the holders of the CoCos, such as the Fund, against the issuer in respect of or arising under the terms of the CoCos shall generally rank junior to the claims of all holders of unsubordinated obligations of the issuer. In addition, if the CoCos are converted into the issuer’s underlying equity securities following a conversion event (i.e., a “trigger”), each holder will be subordinated due to their conversion from being the holder of a debt instrument to being the holder of an equity instrument. Such conversion may be automatic.

Unpredictable Market Value Fluctuation. The value of CoCos is unpredictable and will be influenced by many factors including, without limitation: (i) the creditworthiness of the issuer and/or fluctuations in such issuer's applicable capital ratios; (ii) supply and demand for the CoCos; (iii) general market conditions and available liquidity; and (iv) economic, financial and political events that affect the issuer, its particular market or the financial markets in general.

Loans of Portfolio Securities

To increase income, each Fund may lend its portfolio securities to securities broker-dealers or financial institutions if (1) the loan is collateralized in accordance with applicable regulatory requirements including collateralization continuously at no less than 100% by marking to market daily, (2) the loan is subject to termination by the Fund at any time, (3) the Fund receives reasonable interest or fee payments on the loan, (4) the Fund is able to exercise all voting rights with respect to the loaned securities and (5) the loan will not cause the value of all loaned securities to exceed 33 $\frac{1}{3}$ % of the value of the Fund's assets.

If the borrower fails to maintain the requisite amount of collateral, the loan automatically terminates and the Fund could use the collateral to replace the securities while holding the borrower liable for any excess of replacement cost over the value of the collateral. As with any extension of credit, there are risks of delay in recovery and in some cases even loss of rights in collateral should the borrower of the securities fail financially.

Borrowing

The Funds may not borrow money except for (1) short-term credits from banks as may be necessary for the clearance of portfolio transactions and (2) borrowings from banks for temporary or emergency purposes, including the meeting of redemption requests, would otherwise require the untimely disposition of their portfolio securities. Borrowing will not, in the aggregate, exceed 15% of assets after giving effect to the borrowing, and borrowing for purposes other than meeting redemptions may not exceed 5% of the value of each Fund's assets after giving effect to the borrowing. The Funds will not make additional investments when borrowings exceed 5% of assets. The Funds may mortgage, pledge, or hypothecate assets to secure such borrowings. The foregoing policies regarding borrowing are not fundamental policies of the Funds and the Board may change them without a vote of the Funds' shareholders so long as they remain consistent with the Funds' fundamental investment restrictions. See "Investment Restrictions."

Temporary Defensive Investments

For temporary defensive purposes each Fund may invest up to 100% of its assets in nonconvertible fixed income securities or high-quality money market instruments.

Market Disruption and Geopolitical Risk

General economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, supply chain disruptions, labor shortages, energy and other resource shortages, changes in laws, trade barriers, currency exchange controls and national and international political circumstances (including governmental responses to public health crises or the spread of infectious diseases), may have long-term negative effects on the U.S. and worldwide financial markets and economy. These conditions have resulted in, and in many cases continue to result in, greater price volatility, less liquidity, widening credit spreads and a lack of price transparency, with many securities remaining illiquid and of uncertain value. Such market conditions may adversely affect the Company, including by making valuation of some of each Fund's securities uncertain and/or result in sudden and significant valuation increases or declines in the Funds' holdings.

Risks resulting from any future debt or other economic crisis could also have a detrimental impact on the global economy, the financial condition of financial institutions and the Funds' business, financial condition and results of operation. Market and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and default on consumer debt and home prices, among other factors. To the extent uncertainty regarding the U.S. or global economy negatively impacts consumer confidence and consumer credit factors, each Fund could be significantly and adversely affected. Downgrades to the credit ratings of major banks could result in increased borrowing costs for such banks and negatively affect the broader economy. Moreover, Federal Reserve policy, including with respect to certain interest rates, may also adversely affect the value, volatility and liquidity of dividend- and interest-paying securities. Market volatility, rising interest rates and/or a return to unfavorable economic conditions could impair the Funds' ability to achieve their investment objectives.

The occurrence of events similar to those in recent years, such as localized wars, instability, new and ongoing pandemics, epidemics or outbreaks of infectious diseases in certain parts of the world, and catastrophic events such as fires, floods, earthquakes, tornadoes, hurricanes and global health epidemics, terrorist attacks in the U.S. and around the world, social and political discord, debt crises sovereign debt downgrades, increasingly strained relations between the U.S. and a number of foreign countries, new and continued political unrest in various countries, the exit or potential exit of one or more countries from the EU or the EMU, continued changes in the balance of political power among and within the branches of the U.S. government, and government shutdowns, among others, may result in market volatility, may have long term effects on the U.S. and worldwide financial markets, and may cause further economic uncertainties in the U.S. and worldwide.

In particular, the consequences of the Russian military invasion of Ukraine, the Hamas terrorist attacks and resulting conflict, the impact on inflation and increased disruption to supply chains and energy resources may impact the Funds' portfolio companies, result in an economic downturn or recession either globally or locally in the U.S. or other economies, reduce business activity, spawn additional conflicts (whether in the form of traditional military action, reignited "cold" wars or in the form of virtual warfare such as cyberattacks) with similar and perhaps wider ranging impacts and consequences and have an adverse impact on the Funds' returns and NAVs. In response to the conflict between Russia and Ukraine, the U.S. and other countries have imposed sanctions or other restrictive actions against Russia, Russian-backed separatist regions in Ukraine, and certain banks, companies, government officials and other individuals in Russia and Belarus. Any of the above factors, including sanctions, export controls, tariffs, trade wars and other governmental actions, could have a material adverse effect on each Fund. The Funds have no way to predict the duration or outcome of the situation, as the conflict and government reactions are rapidly developing and beyond the Funds' control. Prolonged unrest, military activities, or broad-based sanctions could have a material adverse effect on companies in which the Funds invest. Such consequences also may increase such companies' funding costs or limit their access to the capital markets.

The current political climate has intensified concerns about a potential trade war between China and the U.S., as each country has imposed tariffs on the other country's products. These actions may trigger a significant reduction in international trade, the oversupply of certain manufactured goods, substantial price reductions of goods and possible failure of individual companies and/or large segments of China's export industry, which could have a negative impact on our performance. U.S. companies that source material and goods from China and those that make large amounts of sales in China would be particularly vulnerable to an escalation of trade tensions. Uncertainty regarding the outcome of the trade tensions and the potential for a trade war could cause the U.S. dollar to decline against safe haven currencies, such as the Japanese yen and the euro. Events such as these and their consequences are difficult to predict and it is unclear whether further tariffs may be imposed or other escalating actions may be taken in the future. Any of these effects could have a material adverse effect on each Fund.

Economic Events and Market Risk

Periods of market volatility remain, and may continue to occur in the future, in response to various political, social and economic events both within and outside of the U.S. These conditions have resulted in, and in many cases continue to result in, greater price volatility, less liquidity, widening credit spreads and a lack of price transparency, with many securities remaining illiquid and of uncertain value. Such market conditions may adversely affect each Fund, including by making valuation of some of the Fund's securities uncertain and/or result in sudden and significant valuation increases or declines in the Fund's holdings. In addition, local, regional or global events such as war, including Russia's invasion of Ukraine, the Hamas terrorist attacks and resulting conflict, spread of infectious diseases or other public health issues (such as the global pandemic caused by the COVID-19 virus), recessions, rising inflation, or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain geographic regions, countries, sectors and industries more significantly than others.

Risks resulting from any future debt or other economic crisis could also have a detrimental impact on the global economy, the financial condition of financial institutions and our business, financial condition, and results of operation. Market and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and default on consumer debt and home prices, among other factors. To the extent uncertainty regarding the U.S. or global economy negatively impacts consumer confidence and consumer credit factors, the Fund's business, financial condition, and results of operations could be significantly and adversely affected. Downgrades to the credit ratings of major banks could result in increased borrowing costs for such banks and negatively affect the broader economy. Moreover, Federal Reserve policy, including with respect to certain interest rates and the decision to end its quantitative easing policy, may also adversely affect the value, volatility and liquidity of dividend- and interest-paying securities. Market volatility, tariffs, rising interest rates, and/or a return to unfavorable economic conditions could impair the Fund's ability to achieve its investment objective.

Interest Rates. General interest rate fluctuations may have a substantial negative impact on each Fund's investments, the value of each Fund and each Fund's rate of return. A reduction in the interest or dividend rates on new investments relative to interest or dividend rates on current investments could also have an adverse impact on a Fund's net investment income. An increase in interest rates could decrease the value of any investments held by the Funds that earn fixed interest or dividend rates, including debt securities, convertible securities, preferred stocks, loans and high-yield bonds, and also could increase interest or dividend expenses, thereby decreasing net income.

There is a risk that increased interest rates may cause the economy to enter a recession. Any such recession would negatively impact the Funds and the investments held by each Fund. These impacts may include:

- severe declines in the Funds' NAVs;
- inability of the Funds to accurately or reliably value their portfolios;
- inability of the Funds to pay any dividends or distributions;
- inability of the Funds to maintain their status as RICs under the Code;
- declines in the value of the Funds' investments;
- increased risk of default or bankruptcy by the companies in which the Funds invest;
- increased risk of companies in which the Funds invest being unable to weather an extended cessation of normal economic activity and thereby impairing their ability to continue functioning as a going concern; and
- limited availability of new investment opportunities.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. Inflation rates may change frequently and significantly as a result of various factors, including unexpected shifts in the domestic or global economy and changes in economic policies, and the Funds' investments may not keep pace with inflation, which may result in losses to Fund shareholders. As inflation increases, the real value of each Fund's shares and dividends may decline. In addition, during any periods of rising inflation, interest rates of any debt securities held by the Funds would likely increase, which would tend to further reduce returns to shareholders. This risk is greater for fixed-income instruments with longer maturities.

Regulation and Government Intervention Risk

Changes enacted by the current or future presidential administration could significantly impact the regulation of financial markets in the U.S. Areas subject to potential change, amendment or repeal include trade and foreign policy, corporate tax rates, energy and infrastructure policies, the environment and sustainability, criminal and social justice initiatives, immigration, healthcare and the oversight of certain federal financial regulatory agencies and the Federal Reserve. Certain of these changes can, and have, been effectuated through executive order. Potential changes that could be pursued by the current presidential administration could include changes to the corporate income tax rate and changes to regulatory enforcement priorities. It is not possible to predict which, if any, of these actions will be taken or, if taken, their effect on the economy, securities markets or the financial stability of the U.S. The Fund may be affected by governmental action in ways that are not foreseeable, and there is a possibility that such actions could have a significant adverse effect on the Fund and the Fund's ability to achieve its investment objectives.

Additional risks arising from the differences in expressed policy preferences among the various constituencies in the branches of the U.S. government has led in the past, and may lead in the future, to short-term or prolonged policy impasses, which could, and has, resulted in shutdowns of the U.S. federal government. U.S. federal government shutdowns, especially prolonged shutdowns, could have a significant adverse impact on the economy in general and could impair the ability of issuers to raise capital in the securities markets. Any of these effects could have a material adverse effect on each Fund's NAV.

In addition, the rules dealing with the U.S. federal income taxation are constantly under review by persons involved in the legislative process and by the IRS and the U.S. Treasury Department. The effect of any rule changes is uncertain, both in terms of the direct effect on the taxation of an investment in the Funds' shares and their indirect effect on the value of each Fund's assets, Fund shares or market conditions generally.

In addition, the U.S. government has proposed and adopted multiple regulations that could have a long-lasting impact on the Funds and on the mutual fund industry in general. The SEC's final rules and amendments that modernize reporting and disclosure and required the implementation of a liquidity risk management program, along with other potential upcoming regulations, could, among other things, restrict the Funds' ability to engage in transactions, impact flows into the Funds and/or increase overall expenses of the Funds. The Board designated and approved a liquidity committee ("Liquidity Committee") to administer the Funds' liquidity risk management program and related procedures.

Each Fund may be affected by governmental action in ways that are not foreseeable, and there is a possibility that such actions could have a significant adverse effect on the Fund and its ability to achieve its investment objective(s).

Special Risks Related to Cybersecurity

Each Fund and its service providers are susceptible to cybersecurity risks that include, among other things, theft, unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential and highly restricted data; denial of service attacks; unauthorized access to relevant systems, compromises to networks or devices that a Fund and its service providers use to service a Fund's operations; or operational disruption or failures in the physical infrastructure or operating systems that support a Fund and its service providers. Cyberattacks are becoming increasingly common and more sophisticated, and may be perpetrated by computer hackers, cyber-terrorists or others engaged in corporate espionage. Cyberattacks against or security breakdowns of a Fund or its service providers may adversely impact the Fund and its stockholders, potentially resulting in, among other things, financial losses; the inability of Fund stockholders to transact business and the Fund to process transactions; inability to calculate the Fund's NAV; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs; and/or additional compliance costs. A Fund may incur additional costs for cybersecurity risk management and remediation purposes. In addition, cybersecurity risks may also impact issuers of securities in which each Fund invests, which may cause a Fund's investment in such issuers to lose value. There have been a number of recent highly publicized cases of companies reporting the unauthorized disclosure of client or customer information, as well as cyberattacks involving the dissemination, theft and destruction of corporate information or other assets, as a result of failure to follow procedures by employees or contractors or as a result of actions by third parties, including actions by terrorist organizations and hostile foreign governments. Although service providers typically have policies and procedures, business continuity plans and/or risk management systems intended to identify and mitigate cyber incidents, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, a Fund cannot control the cybersecurity policies, plans and systems put in place by its service providers or any other third parties whose operations may affect the Fund or its shareholders. There can be no assurance that a Fund or its service providers will not suffer losses relating to cyberattacks or other information security breaches in the future.

Because technology is consistently changing, new ways to carry out cyberattacks are always developing. Therefore, there is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on each Fund's ability to plan for or respond to a cyberattack. In addition to deliberate cyberattacks, unintentional cyber incidents can occur, such as the inadvertent release of confidential information by a Fund or its service providers. Like other funds and business enterprises, each Fund and its service providers are subject to the risk of cyber incidents occurring from time to time.

Portfolio Turnover

The investment policies of the Funds may lead to frequent changes in investments, particularly in periods of rapidly fluctuating interest or currency exchange rates. Each Fund's portfolio turnover is expected to be less than 100%.

Portfolio turnover generally involves some expense to the Fund, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestment in other securities. The portfolio turnover rate is computed by dividing the lesser of the amount of the securities purchased or securities sold by the average monthly value of securities owned during the year (excluding securities whose maturities at acquisition were one year or less).

Portfolio turnover may vary from year to year, as well as within a year. For the fiscal years ended September 30, 2025 and 2024, the turnover rates were 1% and 2%, respectively, for the Small Cap Growth Fund, 0% and 1%, respectively, for the Equity Income Fund, 35% and 31%, respectively, for the Focused Growth and Income Fund, and 9% and 9%, respectively, for the Global Financial Services Fund.

ReFlow Liquidity Program

The Funds may participate in the ReFlow liquidity program, which is designed to provide an alternative liquidity source for mutual funds experiencing redemptions of their shares. In order to pay cash to shareholders who redeem their shares on a given day, a mutual fund typically must hold cash in its portfolio, liquidate portfolio securities, or borrow money, all of which impose certain costs on the fund. ReFlow Fund, LLC ("ReFlow") provides participating mutual funds with another source of cash by standing ready to purchase shares from a fund at net asset value up to the amount of the fund's net redemptions on a given day. ReFlow then generally redeems those shares when the fund experiences net sales, at the end of a maximum holding period determined by ReFlow, or at other times at a fund's or ReFlow's discretion. In return for this service, a Fund will pay a fee to ReFlow at a rate determined by a daily auction with other participating mutual funds seeking liquidity that day. The current minimum fee rate is 0.14% of the value of the Fund shares purchases by ReFlow, although a Fund may submit a bid at a higher fee rate if it determines that doing so is in the best interest of Fund shareholders. While ReFlow holds a Fund's shares, it has the same rights and privileges with respect to those shares as any other shareholder. However, investments in the Funds by ReFlow are exempt from the 2.00% short term trading fee policy as described in the Prospectus as these transactions do not raise market timing or excessive trading concerns. In accordance with federal securities laws, ReFlow is prohibited from acquiring more than 3% of the outstanding voting securities of a Fund. There is no assurance that ReFlow will have sufficient funds available to meet a Fund's liquidity needs on a particular day. The Funds expect that in-kind redemptions will comprise a significant portion of redemptions paid to ReFlow. Each Fund's participation in the ReFlow program will be reviewed periodically by the Board of Directors.

INVESTMENT RESTRICTIONS

Each Fund's investment objective and the following investment restrictions are fundamental and may not be changed without the approval of a majority of the applicable Fund's shareholders defined in the 1940 Act as the lesser of (1) 67% of the Fund's shares present at a meeting if the holders of more than 50% of the outstanding shares are represented in person or by proxy, or (2) more than 50% of the Fund's outstanding shares. All other investment policies or practices are considered not to be fundamental and accordingly may be changed without shareholder approval. If a percentage restriction on investment or use of assets set forth below is adhered to at the time a transaction is effected, later changes in percentage resulting from changing market values or total assets of a Fund will not be considered a deviation from policy.

Small Cap Growth Fund and Equity Income Fund

Under such restrictions, each of these Funds may not:

1. With respect to 75% of its total assets, invest more than 5% of the value of its total assets (taken at market value at time of purchase) in the outstanding securities of any one issuer or own more than 10% of the outstanding voting securities of any one issuer, in each case other than securities issued or guaranteed by the U.S. government or any agency or instrumentality thereof;
2. Invest 25% or more of the value of its total assets in any one industry;
3. Issue senior securities (including borrowing money, including on margin if margin securities are owned and through entering into reverse repurchase agreements) in excess of 33 $\frac{1}{3}$ % of its total assets (including the amount of senior securities issued but excluding any liabilities and indebtedness not constituting senior securities) except that a Fund may borrow up to an additional 5% of its total assets for temporary purposes; or pledge its assets other than to secure such issuances or in connection with hedging transactions, short sales, when-issued and forward commitment transactions, and similar investment strategies. A Fund's obligations under the foregoing types of transactions and investment strategies are not treated as senior securities;
4. Make loans of money or property to any person, except through loans of portfolio securities, the purchase of fixed income securities, or the acquisition of securities subject to repurchase agreements;
5. Underwrite the securities of other issuers, except to the extent that in connection with the disposition of portfolio securities or the sale of its own shares the Fund may be deemed to be an underwriter;

6. Invest for the purpose of exercising control over management of any company;
7. Purchase real estate or interests therein, including limited partnerships that invest primarily in real estate equity interests, other than mortgage-backed securities and similar instruments; or
8. Purchase or sell commodities or commodity contracts except for hedging purposes or invest in any oil, gas, or mineral interests.

Focused Growth and Income Fund

Under such restrictions, the Fund may not:

1. Invest 25% or more of the value of its total assets in any one industry;
2. Issue senior securities (including borrowing money, including on margin if margin securities are owned and through entering into reverse repurchase agreements) in excess of 33 $\frac{1}{3}$ % of its total assets (including the amount of senior securities issued but excluding any liabilities and indebtedness not constituting senior securities) except that the Fund may borrow up to an additional 5% of its total assets for temporary purposes; or pledge its assets other than to secure such issuances or in connection with hedging transactions, short sales, when-issued and forward commitment transactions, and similar investment strategies. The Fund's obligations under the foregoing types of transactions and investment strategies are not treated as senior securities;
3. Make loans of money or property to any person, except through loans of portfolio assets, the purchase of debt instruments, or the acquisition of assets subject to repurchase agreements;
4. Underwrite the securities of other issuers, except to the extent that in connection with the disposition of portfolio securities the Fund may be deemed to be an underwriter;
5. Invest for the purpose of exercising day-to-day operating control over management of any company;
6. Purchase real estate or interests therein, which does not include securities or other instruments issued by companies that invest primarily in real estate; or
7. Purchase or sell commodities or commodity contracts or invest in any oil, gas, or mineral interests except in each case to the extent the Fund would not be required to register as a commodity pool.

Global Financial Services Fund

Under such restrictions, the Fund may not:

1. Invest 25% or more of the value of its total assets in any one industry, except that under normal market conditions, the Fund will invest at least 25% of the value of its net assets in the securities of companies principally engaged in the group of industries comprising the financial services sector;
2. Issue senior securities (including borrowing money, including on margin if margin securities are owned and through entering into reverse repurchase agreements) in excess of 33 $\frac{1}{3}$ % of its total assets (including the amount of senior securities issued but excluding any liabilities and indebtedness not constituting senior securities) except that the Fund may borrow up to an additional 5% of its total assets for temporary purposes; or pledge its assets other than to secure such issuances or in connection with hedging transactions, short sales, when-issued and forward commitment transactions, and similar investment strategies. The Fund's obligations under the foregoing types of transactions and investment strategies are not treated as senior securities;
3. Make loans of money or property to any person, except through loans of portfolio securities, the purchase of fixed income securities, or the acquisition of securities subject to repurchase agreements;
4. Underwrite the securities of other issuers, except to the extent that in connection with the disposition of portfolio securities or the sale of its own shares the Fund may be deemed to be an underwriter;
5. Invest for the purpose of exercising control over management of any company;
6. Purchase or sell real estate or interests therein, including limited partnerships that invest primarily in real estate equity interests, other than mortgage-backed securities and similar instruments; or
7. Purchase or sell commodities or commodity contracts except for hedging purposes or invest in any oil, gas, or mineral interests.

For purposes of restriction (1) above, with respect to the Fund's industry classifications, the Fund currently utilizes any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Company management. If Company management chooses to define industry classifications pursuant to the foregoing, it will do so in a reasonable manner that is consistent with the purpose and intent of the industry classifications as represented generally by such widely recognized market indexes or rating group indexes, and any such management industry classifications will be applied consistently over time and in good faith.

PORTFOLIO HOLDINGS INFORMATION

Employees of the Adviser and its affiliates will often have access to information concerning the portfolio holdings of the Funds. The Funds and the Adviser have adopted policies and procedures that require all employees to safeguard proprietary information of the Funds, which includes information relating to the Funds' portfolio holdings as well as portfolio trading activity of the Adviser with respect to the Funds (collectively, "Portfolio Holdings Information"). In addition, the Funds and the Adviser have adopted policies and procedures providing that Portfolio Holdings Information may not be disclosed except to the extent that it is (a) made available to the general public by posting on the Funds' website or filed as part of a required filing on Form N-PORT or N-CSR, or (b) provided to a third party for legitimate business purposes or regulatory purposes that has agreed to keep such information confidential under terms approved by the Adviser's legal department or outside counsel, as described below. The Adviser will examine each situation under (b) with a view to determine that release of the information is in the best interest of the Funds and their shareholders and, if a potential conflict between the Adviser's interests and the Funds' interests arises, to have such conflict resolved by the Chief Compliance Officer or those Directors who are not considered to be "interested persons," as defined in the 1940 Act (the "Independent Directors"). These policies further provide that no officer of the Company or employee of the Adviser shall communicate with the media about the Funds without obtaining the advance consent of the Chief Executive Officer, Chief Operating Officer of the Adviser, or Chief Executive Officer, or General Counsel of the parent company of the Adviser.

Under the foregoing policies, the Funds may disclose Portfolio Holdings Information in the circumstances outlined below. Disclosure generally may be either on a monthly or quarterly basis with no time lag in some cases and with a time lag of up to sixty days in other cases (with the exception of proxy voting services which require a regular download of data):

1. To regulatory authorities in response to requests for such information and with the approval of the Chief Compliance Officer of the Funds;
2. To mutual fund rating and statistical agencies and to persons performing similar functions where there is a legitimate business purpose for such disclosure and such entity has agreed to keep such data confidential at least until it has been made public by the Adviser;
3. To service providers of the Funds, as necessary for the performance of their services to the Funds and to the Board, where such entity has agreed to keep such data confidential at least until it has been made public by the Adviser. The Funds' current service providers that may receive such information are its administrator, sub-administrator, custodian, independent registered public accounting firm, legal counsel, and financial printers;
4. To firms providing proxy voting or other proxy services provided such entity has agreed to keep such data confidential at least until it has been made public by the Adviser;
5. To certain broker dealers, investment advisers, and other financial intermediaries for purposes of their performing due diligence on the Funds and not for dissemination of this information to their clients or use of this information to conduct trading for their clients. Disclosure of Portfolio Holdings Information in these circumstances requires the broker, dealer, investment adviser, or financial intermediary to agree to keep such information confidential at least until it has been made public by the Adviser and is further subject to prior approval of the Chief Compliance Officer of the Funds and shall be reported to the Board at the next quarterly meeting; and
6. To consultants for purposes of performing analysis of the Funds, which analysis may be used by the consultant with its clients or disseminated to the public, provided that such entity shall have agreed to keep such information confidential at least until it has been made public by the Adviser.

As of the date of this SAI, each Fund makes information about its portfolio securities available to its administrator, sub-administrator, custodian, and proxy voting services on a daily basis, with no time lag, to its typesetter on a semiannual basis with a ten-day time lag, to its financial printers on a quarterly basis with a forty-five-day time lag, and to its independent registered public accounting firm and legal counsel on an as needed basis, with no time lag. The names of the Funds' administrator, sub-administrator, custodian, independent registered public accounting firm, and legal counsel are set forth in this SAI. The Funds' proxy voting service is Broadridge Financial Solutions, Inc. Donnelley Financial Solutions and Appatura provide typesetting services for the Funds, and the Funds select from a number of financial printers who have agreed to keep such information confidential at least until it has been made public by the Adviser.

Other than arrangements with the Funds' service providers and proxy voting service, the Funds have no ongoing arrangements to make available information about the Funds' portfolio securities prior to such information being disclosed in a publicly available filing with the SEC that is required to include the information.

Disclosures made pursuant to a confidentiality agreement are subject to periodic confirmation by the Chief Compliance Officer of the Funds that the recipient has utilized such information solely in accordance with the terms of the agreement. Neither the Funds, nor the Adviser, nor any of the Adviser's affiliates, will accept on behalf of itself, its affiliates, or the Funds any compensation or other consideration in connection with the disclosure of portfolio holdings of the Funds. The Board will review such arrangements annually with the Funds' Chief Compliance Officer.

DIRECTORS AND OFFICERS

Under Maryland law, the Company's Board is responsible for establishing the Funds' policies and for overseeing the management of the Funds. The Board also elects the Funds' officers who conduct the daily business of the Funds. Information pertaining to the Directors and Officers of the Company is as follows:

Name, Position(s), Address ⁽¹⁾ and Year of Birth	Term of Office and Length of Time Served ⁽²⁾	Number of Funds in Fund Complex ⁽³⁾ Overseen by Trustee	Principal Occupation(s) During Past Five Years	Other Directorships

Name, Position(s), Address ⁽¹⁾ and Year of Birth	Term of Office and Length of Time Served ⁽²⁾	Principal Occupation(s) During Past Five Years
---	---	--

OFFICERS:

John C. Ball President and Treasurer 1976	Since 2017	Senior Vice President (since 2018) of GAMCO Investors, Inc.; President and Chief Operating Officer of Gabelli Funds, LLC; Chief Executive Officer of G. Distributors, LLC since 2020; Officer of registered investment companies within the Gabelli Fund Complex since 2017
Peter Goldstein Secretary and Vice President 1953	Since 2020	General Counsel, GAMCO Investors, Inc. and Chief Legal Officer, Associated Capital Group, Inc. since 2021; General Counsel and Chief Compliance Officer, Buckingham Capital Management, Inc. (2012 – 2020); Chief Legal Officer and Chief Compliance Officer, The Buckingham Research Group, Inc. (2012 – 2020)
Richard J. Walz Chief Compliance Officer 1959	Since 2013	Chief Compliance Officer of registered investment companies within the Gabelli Fund Complex since 2013

- (1) Address: One Corporate Center, Rye, NY 10580-1422.
- (2) Each Director will hold office for an indefinite term until the earliest of (i) the next meeting of shareholders, if any, called for the purpose of considering the election or re-election of such Director and until the election and qualification of his or her successor, if any, elected at such meeting, or (ii) the date a Director resigns or retires, or a Director is removed by the Board or shareholders, in accordance with the Company By-Laws and Articles of Incorporation. For officers, includes time served in prior officer positions with the Trust. Each officer will hold office for an indefinite term or until the date he or she resigns or retires or until his or her successor is elected and qualified.
- (3) The “Fund Complex” or the “Gabelli Fund Complex” includes all the U.S. registered investment companies that are considered part of the same fund complex as the Fund because they have common or affiliated investment advisers.
- (4) “Interested person” of the Funds as defined in the 1940 Act. Messrs. Mario J. Gabelli and John D. Gabelli, who are brothers, are each considered to be an “interested person” of the Funds because of their affiliation with the Funds’ Adviser.
- (5) Directors who are not considered to be “interested persons” of the Funds, as defined in the 1940 Act, are considered to be “Independent” Directors.
- (6) Mr. van Ekris is an independent director of Gabelli International Ltd., Gabelli Fund LDC, GAMA Capital Opportunities Master Ltd., and GAMCO International SICAV; and Mr. Zizza is an independent director of Gabelli International Ltd. all of which may be deemed to be controlled by Mario J Gabelli and/or affiliates and in that event would be deemed to be under common control with the Adviser.
- (7) As of December 31, 2025, there are a total of 52 registered investment companies in the Fund Complex. Of the 52 registered investment companies, Mr. Gabelli serves as a director or trustee for 30 funds, sole portfolio manager of 6 funds, and part of the portfolio management team of 14 funds.

The Board believes that each Director’s experience, qualifications, attributes and skills on an individual basis and in combination with those of other Directors lead to the conclusion that each Director should serve in such capacity. Among the attributes or skills common to all Directors are their ability to review critically and to evaluate, question, and discuss information provided to them, to interact effectively with the other Directors, the Adviser, the sub-administrator, other service providers, counsel, and the Funds’ independent registered public accounting firm, and to exercise effective and independent business judgment in the performance of their duties as Directors. Each Director’s ability to perform his or her duties effectively has been attained in large part through the Director’s business, consulting, or public service positions, and through experience from service as a member of the Board and one or more of the other funds in the Fund Complex, public companies, non-profit entities, or other organizations as set forth above and below. Each Director’s ability to perform his or her duties effectively also has been enhanced by education, professional training, and experience.

Interested Directors:

Mario J. Gabelli, CFA. Mr. Gabelli is Chair of the Board of Directors and Chief Investment Officer of the Fund. Mr. Gabelli is Chair, Co-Chief Executive Officer, and Chief Investment Officer – Value Portfolios of GAMCO Investors, Inc. (“GAMI”), an OTC-listed asset manager and financial services company. He is the Chief Investment Officer of Value Portfolios of Gabelli Funds, LLC and GAMCO Asset Management Inc., each of which are asset management subsidiaries of GAMI. In addition, Mr. Gabelli is Chief Executive Officer, Chief Investment Officer, a director and the controlling shareholder of GGCP, Inc. (“GGCP”), a private company that holds a majority interest in GAMI, and the Chair of MJG Associates, Inc., which acts as an investment manager of various investment funds and other accounts. He is Executive Chair of Associated Capital Group, Inc., a public company that provides alternative management and institutional research services, and is a majority-owned subsidiary of GGCP. Mr. Gabelli has served as Chair of LICT Corporation (LICT), a public company engaged in broadband transport and other communications services, since 2004 and has been the CEO of LICT since December 2010. He has also served as a director of CIBL, Inc. (“CIBL”), a public holding company that was spun-off from LICT in 2007, since 2007 and as Executive Chair since February 2020. He served as the Chair of Morgan Group Holding Co., a public holding company, from 2001 to October 2019 and as the CEO from 2001 to November 2012. Mr. Gabelli serves as Overseer of the Columbia University Graduate School of Business and as a trustee of Boston College and Roger Williams University. He serves as director of the Winston Churchill Foundation, The E.L. Wiegand Foundation, The American-Italian Cancer Foundation, and The Foundation for Italian Art and Culture. He is Chair of the Gabelli Foundation, Inc., a Nevada private charitable trust. Mr. Gabelli serves as Co-President of Field Point Park Association, Inc. Mr. Gabelli received his Bachelor’s degree from Fordham University, M.B.A. from Columbia Business School, and honorary Doctorates from Fordham University and Roger Williams University.

John D. Gabelli. Mr. Gabelli was a Senior Vice President of G.research, LLC (“G.research”), an institutional research and brokerage firm which is an affiliate of the Adviser. He has over thirty-five years of experience in the asset management industry. He serves on the boards of other funds in the Gabelli Fund Complex. Mr. Gabelli also sits on the boards of various charitable foundations including the Mount Vernon Police Foundation.

Independent Directors:

Elizabeth C. Bogan, Ph.D. Dr. Bogan is a member of the Funds’ Audit Committee. She serves on comparable or other board committees with respect to other funds in the Fund Complex on whose boards she sits. Dr. Bogan has been Senior Lecturer in Economics at Princeton University since 1992. She was formerly Chair of the Economics and Finance Department, Fairleigh Dickinson University, and a member of the Executive Committee for the College of Business Administration. She received a Bachelor’s degree in Economics from Wellesley College, an M.A. degree in Quantitative Economics from the University of New Hampshire, and a Ph.D. degree in Economics from Columbia University.

Vincent D. Enright. Mr. Enright is Chairman of the Funds’ Audit Committee and Nominating Committee, *ad hoc* Proxy Voting Committee and both multi-fund *ad hoc* Compensation Committees (described below under “Directors — Leadership Structure and Oversight Responsibilities”) and has been designated as the Fund’s Audit Committee Financial Expert. He serves on comparable or other board committees with respect to other funds in the Fund Complex on whose boards he sits. Mr. Enright was a senior executive and Chief Financial Officer of Key Span Corp., an energy public utility, for four years. Mr. Enright is a former director of a therapeutic and diagnostic company and served as Chairman of its compensation committee and as a member of its audit committee. He is a former director of a pharmaceutical company and a diversified manufacturing company. Mr. Enright received his Bachelor’s degree from Fordham University and completed the Advanced Management Program at Harvard University.

Robert J. Morrissey, Esq. Mr. Morrissey has over forty-five years of experience as an attorney representing clients in the areas of estate planning, civil litigation, business planning, and real estate, including as current senior partner of a law firm. He is a member of the Funds’ *ad hoc* Proxy Voting Committee. Mr. Morrissey serves on comparable or other board committees with respect to other funds in the Gabelli Fund Complex on whose boards he sits. Mr. Morrissey serves as Chairman of the Board of Trustees of the Belmont Savings Bank in Massachusetts. He also served as a trustee to Boston College and is continuing Chairman of its Investment and Endowment Committee. In addition, Mr. Morrissey is a member of the Harvard Law School Dean’s Advisory Board, a member of the Financial Council of the Archdiocese of Boston and Chairman of its Investment Committee. He is a member of the Investment Advisory Committee of Jesuit Curia, Vatican City, and a Director of several other private and public funds, trusts, and foundations. Mr. Morrissey is a graduate of Boston College and Harvard Law School.

Anthonie C. van Ekris. Mr. van Ekris has been the Chairman and Chief Executive Officer of BALMAC International, Inc., a global import/export company for over twenty years. He serves on the boards of other funds in the Fund Complex and is a director of the GAMCO International SICAV. Mr. van Ekris has over fifty-five years of experience as Chairman and/or Chief Executive Officer of public and private companies involved in international trading or commodity trading and served in both of these capacities for nearly twenty years for a large public jewelry chain. Mr. van Ekris is a former director of an oil and gas operations company. He served on the boards of a number of public companies and for more than ten years on the Advisory Board of the Salvation Army of Greater New York.

Salvatore J. Zizza. Mr. Zizza is the President of Zizza & Associates Corp., a private holding company that invests in various industries. He serves as Chairman to other companies involved in manufacturing, recycling, real estate, technology, and pharmaceuticals. Mr. Zizza serves as Lead Independent Director of the Funds. He is also a member of the Funds’ *ad hoc* Proxy Voting Committee and both multi-fund *ad hoc*

Compensation Committees. Mr. Zizza serves on comparable or other board committees with respect to other funds in the Fund Complex on whose boards he sits. In addition to serving on the boards of other funds in the Fund Complex, he is currently and has previously been a director of other public companies. He was also the President, Chief Executive Officer, and Chief Financial Officer of a large NYSE-listed construction company. Mr. Zizza received his Bachelor's degree and M.B.A. in Finance from St. John's University, which awarded him an Honorary Doctorate in Commercial Sciences.

Directors — Leadership Structure and Oversight Responsibilities

Overall responsibility for general oversight of the Funds rests with the Board. The Board has appointed Mr. Zizza as the Lead Independent Director. The Lead Independent Director presides over executive sessions of the Directors and also serves between meetings of the Board as a liaison with service providers, officers, counsel and other Directors on a wide variety of matters including scheduling agenda items for Board meetings. Designation as such does not impose on the Lead Independent Director any obligations or standards greater than or different from other Directors. The Board has established a Nominating Committee and an Audit Committee to assist the Board in the oversight of the management and affairs of the Funds. The Board also has an *ad hoc* Proxy Voting Committee. Each of the Nominating, Audit, and *ad hoc* Proxy Voting Committees are entirely comprised of Independent Directors. From time to time the Board establishes additional committees or informal working groups to deal with specific matters or assigns one of its members to work with trustees or directors of other funds in the Fund Complex on special committees or working groups that deal with complex-wide matters, such as the multi-fund *ad hoc* Compensation Committee relating to compensation of the Chief Compliance Officer for all the funds in the Fund Complex. The Fund Complex also has a separate multi-fund Compensation Committee relating to certain officers of the closed-end funds in the Fund Complex, and some of the Directors may from time to time also serve on this separate committee.

All of the Funds' Directors, other than Messrs. Gabelli, are Independent Directors, and the Board believes they are able to provide effective oversight of the Funds' service providers. In addition to providing feedback and direction during Board meetings, the Directors meet regularly in executive session and chair all committees of the Board.

The Funds' operations entail a variety of risks, including investment, administration, valuation, and a range of compliance matters. Although the Adviser, the sub-administrator, and the officers of the Funds are responsible for managing these risks on a day-to-day basis within the framework of their established risk management functions, the Board also addresses risk management of the Funds through its meetings and those of the committees and working groups. In particular, as part of its general oversight, the Board reviews with the Adviser at Board meetings the levels and types of risks being undertaken by the Funds, and the Audit Committee discusses the Funds' risk management and controls with the independent registered public accounting firm engaged by the Funds. The Board reviews valuation policies and procedures and oversees the Adviser's valuations of specific illiquid securities. The Board also receives periodic reports from the Funds' Chief Compliance Officer regarding compliance matters relating to the Funds and its major service providers, including results of the implementation and testing of the Funds' and such providers' compliance programs. The Board's oversight function is facilitated by management reporting processes that are designed to provide information to the Board about the identification, assessment and management of critical risks and the controls and policies and procedures used to mitigate those risks. The Board reviews its role in supervising the Funds' risk management from time to time and may make changes in its discretion at any time.

The Board has determined that its leadership structure is appropriate for the Funds because it enables the Board to exercise informed and independent judgment over matters under its purview, allocates responsibility among committees in a manner that fosters effective oversight and allows the Board to devote appropriate resources to specific issues in a flexible manner as they arise. The Board periodically reviews its leadership structure as well as its overall structure, composition and functioning and may make changes in its discretion at any time.

Standing Board Committees

The Board has established two standing committees in connection with its governance of the Company: the Audit and Nominating Committees, and has also established an *ad hoc* Proxy Voting Committee. The Company does not have a standing Compensation Committee (although some of the individuals who are Directors of the Fund participate in multi-fund *ad hoc* Compensation Committees described above).

The Company's Audit Committee consists of two members: Mr. Enright (Chairman) and Dr. Bogan, who are Independent Directors of the Company. The Audit Committee operates pursuant to a Charter that was most recently reviewed and approved by the Board on November 12, 2024. As set forth in the Charter, the function of the Audit Committee is oversight; it is managements' responsibility to maintain appropriate systems for accounting and internal control and it is the independent registered public accounting firm's responsibility to plan and carry out a proper audit. The Audit Committee is generally responsible for reviewing and evaluating issues related to the accounting and financial reporting policies and practices of the Company, its internal controls, and, as appropriate, the internal controls of certain service providers, overseeing the quality and objectivity of the Funds' financial statements and the audit thereof, and to act as a liaison between the Board and the Company's independent registered public accounting firm. During the fiscal year ended September 30, 2024, the Audit Committee met twice.

The Company's Nominating Committee consists of one member: Mr. Enright (Chairman), who is an Independent Director of the Company. The Nominating Committee is responsible for selecting and recommending qualified candidates to the full Board in the event that a position is vacated or created. The Nominating Committee would consider, under procedures adopted by the Board, recommendations by shareholders if a vacancy were to exist. Such recommendations should be forwarded to the Secretary of the Company. The Nominating Committee did not meet during the fiscal year ended September 30, 2025.

The Company's *ad hoc* Proxy Voting Committee consists of three members: Messrs. Enright, Morrissey, and Zizza, who are Independent Directors of the Company. Under certain circumstances and pursuant to specific procedures and guidelines, the *ad hoc* Proxy Voting Committee will, in place of the Company's Adviser, exercise complete control and discretion over the exercise of all rights to vote or consent with respect to certain securities owned by the Company and may also determine to exercise complete control and discretion over the disposition of such securities. The *ad hoc* Proxy Voting Committee meets periodically on an as needed basis to consider such matters and did not meet during the fiscal year ended September 30, 2025.

Director Ownership of Fund Shares

Set forth in the table below is the dollar range of equity securities in each Fund beneficially owned by each Director and the aggregate dollar range of equity securities in the Fund Complex beneficially owned by each Director as of December 31, 2025.

* An asterisk indicates that the ownership amount constitutes less than 1% of the total interests outstanding.

Director and Officer Compensation

No director, officer, or employee of G.distributors, LLC ("G.distributors" or the "Distributor"), the Adviser, or an affiliated company receives any compensation from the Funds for serving as an Officer or Director of the Company. The Company pays each Independent Director who is not a director, officer, or employee of the Adviser or any of its affiliates \$18,000 per annum and \$2,000 per meeting attended in person and \$500 per meeting attended by telephone and reimburses each Director for related travel and out of pocket expenses. All Board committee members receive \$1,000 per meeting attended. The Lead Director receives an additional \$2,000 per annum and the Chairman of the Audit Committee receives an additional \$3,000 per annum. A Director may receive a single meeting fee, allocated among the participating funds in the Fund Complex, for participation in certain special meetings or committee meetings on behalf of multiple funds.

The following table sets forth certain information regarding the compensation of the Company's Directors. No Officer or person affiliated with the Company received compensation in excess of \$60,000 from the Company for the fiscal year ended September 30, 2025.

Salvatore J. Zizza, Director	\$ 28,000	\$ 317,500 (35)

* Represents the total compensation paid to such persons for the fiscal year ended September 30, 2025.

** Represents the total compensation paid to such persons during the fiscal year ended September 30, 2025. The parenthetical number represents the number of investment companies (including the Funds) or portfolios that are considered part of the Fund Complex.

Code of Ethics

The Company, its Adviser, and Distributor have adopted a code of ethics (the "Code of Ethics") under Rule 17j-1 of the 1940 Act. The Code of Ethics permits personnel, subject to the Code of Ethics and its restrictive provisions, to invest in securities, including securities that may be purchased or held by the Funds.

Proxy Voting Policies

The Company, on behalf of the Funds, has delegated the voting of portfolio securities to the Adviser. The Adviser has adopted proxy voting policies and procedures (the “Proxy Voting Policy”) for the voting of proxies on behalf of client accounts for which the Adviser has voting discretion, including the Funds. Under the Proxy Voting Policy, portfolio securities held by a Fund are to be voted in the best interests of that Fund.

Normally, the Adviser exercises proxy voting discretion on particular types of proposals in accordance with guidelines (the “Proxy Voting Guidelines”) set forth in the Proxy Voting Policy. The Proxy Voting Guidelines address, for example, proposals to elect the board of directors, to classify the board of directors, to select the independent registered public accounting firm, to issue blank check preferred stock, to use confidential ballots, to eliminate cumulative voting, to require shareholder ratification of poison pills, to support fair price provisions, to require a supermajority shareholder vote for charter or bylaw amendments, to provide for director and officer indemnification and liability protection, to increase the number of authorized shares of common stock, to allow greenmail, to limit shareholders’ rights to call special meetings, to consider the non-financial effects of a merger, to limit shareholders’ rights to act by written consent, to approve executive and director compensation plans (including golden parachutes), to limit executive and director pay, to approve stock option plans, to opt in or out of state takeover statutes, and to approve mergers, acquisitions, corporate restructuring, spin-offs, buyouts, asset sales, or liquidations.

A Proxy Voting Committee (“Committee”) comprised of senior representatives of the Adviser and its affiliated investment advisers has the responsibility for the content, interpretation, and application of the Proxy Voting Guidelines. In general, the Director of Proxy Voting Services, using the Proxy Guidelines, and the analysts of GAMCO Investors, Inc. (“GAMI”), will determine how to vote on each issue. For non-controversial matters, the Director of Proxy Voting Services may vote the proxy if the vote is: (1) consistent with the recommendations of the issuer’s Board of Directors and not contrary to the Proxy Guidelines; (2) consistent with the recommendations of the issuer’s Board of Directors and is a non-controversial issue not covered by the Proxy Guidelines; or (3) the vote is contrary to the recommendations of the Board of Directors but is consistent with the Proxy Guidelines. In those instances, the Director of Proxy Voting Services or the Chairman of the Committee may sign and date the proxy statement indicating how each issue will be voted. The Advisers subscribe to Institutional Shareholders Services (“ISS”) and Glass Lewis & Co. LLC (“Glass Lewis”), which supplies current information on companies, matters being voted on, regulations, trends in proxy voting and information on corporate governance issues. The information provided by ISS and Glass Lewis is for informational purposes only.

All matters identified by the Chairman of the Committee, the Director of Proxy Voting Services or the Legal Department as controversial, taking into account the recommendations of the analysts of GAMI, will be presented to the Proxy Voting Committee. If the Chairman of the Committee, the Director of Proxy Voting Services or the Legal Department has identified the matter as one that (1) is controversial; (2) would benefit from deliberation by the Proxy Voting Committee; or (3) may give rise to a conflict of interest between the Advisers and their clients, the Chairman of the Committee will initially determine what vote to recommend that the Advisers should cast and the matter will go before the Committee.

For matters submitted to the Committee, each member of the Committee will receive, prior to the meeting, a copy of the proxy statement, a summary of any views provided by the Chief Investment Officer and any recommendations by GAMI analysts. The Chief Investment Officer or the GAMI analyst may be invited to present their viewpoints. If the Director of Proxy Voting Services or the Legal Department believe that the matter before the Committee is one with respect to which a conflict of interest may exist between the Adviser and their clients, counsel may provide an opinion to the Committee concerning the conflict. If the matter is one in which the interests of the clients of one or more Advisers may diverge, counsel may so advise and the Committee may make different recommendations as to different clients. For any matters where the recommendation may trigger appraisal rights, counsel may provide an opinion concerning the likely risks and merits of such an appraisal action.

Where a proxy proposal raises a material conflict between the interests of the Funds’ shareholders on the one hand, and those of the Funds’ Adviser and/or the principal underwriters, on the other hand, the conflict will be brought to the *ad hoc* Proxy Voting Committee of the Company to determine a resolution.

Each matter submitted to the Committee will be determined by the vote of a majority of the members present at the meeting. Should the vote concerning one or more recommendations be tied in a vote of the Committee, the Chairman of the Committee will cast the deciding vote. The Committee will notify the proxy department of its decisions and the proxies will be voted accordingly.

The Company files Form N-PX with its complete proxy voting record for the twelve months ended June 30 no later than August 31 of each year. This filing is available without charge, upon request, by calling toll-free (800) 422-3554 and on the SEC’s website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS

As of December 31, 2025, the following persons were known to own of record or beneficially 5% or more of the outstanding voting securities of any class of any Fund:

* Beneficial ownership is disclaimed.

** John D. Lapey is the legal name of Ian Lapey. He is the portfolio manager of the Global Financial Services Fund.

† Beneficial ownership of shares representing 25% or more of the outstanding shares of the Fund may be deemed to represent control, as that term is defined in the 1940 Act.

(a) Includes shares held at Wells Fargo Clearing Services, LLC as shown in the table above.

(b) Includes shares owned by Associated Capital Group Inc. and GAMCO Investors Inc. as shown in the table above.

As of December 31, 2025, as a group, the Officer and Directors owned 1.5%, 2.3%, 2.4%, and 24.4%, of the Small Cap Growth Fund, Equity Income Fund, Focused Growth and Income Fund, and the Global Financial Services Fund, respectively, aggregating all classes of each Fund.

INVESTMENT ADVISORY AND OTHER SERVICES

Investment Adviser

The Adviser, a New York limited liability company and registered investment adviser under the Investment Advisers Act of 1940, as amended, serves as an investment adviser to registered investment companies as well as one fund that trades on the London Stock Exchange and three funds within a Luxembourg SICAV, with combined aggregate net assets of approximately \$23.0 billion as of September 30, 2025. The Adviser is a wholly owned subsidiary of GAMI”), a New York corporation, whose Class A Common Stock is traded on the OTCQX under the symbol, “GAMI.” Mr. Mario J. Gabelli may be deemed a “controlling person” of the Adviser on the basis of his controlling interest in GAMI. Mr. Gabelli owns a majority of the stock of GGCP, Inc. (“GGCP”), which holds a majority of the capital stock and voting power of GAMI. The Adviser has several affiliates that provide investment advisory services: GAMCO Asset Management, Inc., a wholly owned subsidiary of GAMI, acts as investment adviser for individuals, pension trusts, profit sharing trusts, and endowments, and as sub-adviser to certain third-party investment funds, which include registered investment companies, having assets under management of approximately \$12.0 billion as of September 30, 2025; Teton Advisors, LLC (previously Alpha G Investment Management, Inc., with assets under management of approximately \$292 million as of September 30, 2025), and its affiliated investment adviser Keeley-Teton Advisors, LLC, acts as investment adviser to The TETON Westwood Funds and separately managed accounts; and Gabelli & Company Investment Advisers, Inc. (formerly, Gabelli Securities, Inc.), a wholly owned subsidiary of Associated Capital, acts as investment adviser for certain alternative investment products, consisting primarily of risk arbitrage and merchant banking limited partnerships and offshore companies, with assets under management of approximately \$1.4 billion as of September 30, 2025. Alpha G Investment Management, Inc. was spun off by GAMI in March 2009 and is an affiliate of GAMI by virtue of Mr. Gabelli’s ownership of GGCP, the principal shareholder of Alpha G Investment Management, Inc., the parent of Teton Advisors, LLC, as of September 30, 2025. Effective December 31, 2021, Alpha G Investment Management, Inc. completed a reorganization by transferring its entire business operations and personnel to a new wholly-owned subsidiary, Teton Advisors, LLC. Associated Capital was spun off from GAMI on November 30, 2015, and is an affiliate of GAMI by virtue of Mr. Gabelli’s ownership of GGCP, the principal shareholder of Associated Capital.

Affiliates of the Adviser may, in the ordinary course of their business, acquire for their own account or for the accounts of their advisory clients, significant (and possibly controlling) positions in the securities of companies that may also be suitable for investment by the Funds. The securities in which the Funds might invest may thereby be limited to some extent. For instance, many companies in the past several years have adopted so-called “poison pill” or other defensive measures designed to discourage or prevent the completion of non-negotiated offers for control of the company. Such defensive measures may have the effect of limiting the shares of the company that might otherwise be acquired by the Funds if the affiliates of the Adviser or their advisory accounts have or acquire a significant position in the same securities. However, the Adviser does not believe that the investment activities of its affiliates will have a material adverse effect upon the Funds in seeking to achieve their investment objectives.

Securities purchased or sold pursuant to contemporaneous orders entered on behalf of the investment company accounts of the Adviser or the advisory accounts managed by its affiliates for their unaffiliated clients are allocated pursuant to principles believed to be fair and not disadvantageous to any such accounts. In addition, all such orders are accorded priority of execution over orders entered on behalf of accounts in which the Adviser or its affiliates have a substantial pecuniary interest. The Adviser may on occasion give advice or take action with respect to other clients that differs from the actions taken with respect to the Funds. The Funds may invest in the securities of companies which are investment management clients of GAMCO. In addition, portfolio companies or their officers or directors may be minority shareholders of the Adviser or its affiliates.

The Adviser currently serves as investment adviser to the Funds pursuant to investment advisory contracts (the “Contracts”). Pursuant to the Contracts, which were initially approved by each Fund’s sole shareholder on October 2, 1991 for the Small Cap Growth Fund, December 9, 1991 for the Equity Income Fund, December 31, 2002 for the Focused Growth and Income Fund, and September 24, 2018 for the Global Financial Services Fund, the Adviser furnishes a continuous investment program for each Fund’s portfolio, makes the day-to-day investment decisions for the Funds, arranges the portfolio transactions for each Fund, and generally manages each Fund’s investments in accordance with the stated policies of each Fund, subject to the general supervision of the Board.

Under the Contracts, the Adviser also: (i) provides the Funds with the services of persons competent to perform such supervisory, administrative, and clerical functions as are necessary to provide effective administration of the Funds, including maintaining certain books and records and overseeing the activities of the Funds Custodian (as defined below) and Transfer Agent (as defined below); (ii) oversees the performance of administrative and professional services to the Funds by others, including The Bank of New York Mellon, the Funds’ Sub-Administrator (the “Sub-Administrator” or “BNY Mellon”), State Street Bank and Trust Company (“State Street”), the Funds’ Custodian, Transfer Agent, and Dividend Disbursing Agent, as well as accounting, auditing, and other services performed for the Funds; (iii) provides the Funds with adequate office space and facilities; (iv) supervises the preparation of, but does not pay for, the periodic updating of the Funds’ registration statement, prospectus, and SAI, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, the Funds’ tax returns, and reports to each Fund’s shareholders and the SEC; (v) supervises, but does not pay for the calculation of the NAV per share of each class of each Fund; (vi) supervises the preparation of, but does not pay for, all filings under the securities or “Blue Sky” laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification of the Funds and/or their shares under such laws; and (vii) prepares notices and agendas for meetings of the Company Board and minutes of such meetings in all matters required by applicable law to be acted upon by the Board.

The cost of calculating each Fund’s NAV per share is an expense payable by the Company pursuant to the Contracts. To the extent that a portion of the sub-administration fee is used to pay for personnel and equipment related to calculating the NAV, each Fund will reimburse the Adviser for such expense up to \$45,000 in connection with the cost of computing the Funds’ NAV. During the fiscal year ended September 30, 2025, the Small Cap Growth and Equity Income Funds each reimbursed the Adviser \$45,000, and the Global Financial Services Fund reimbursed \$30,000 in connection with the cost of computing each Fund’s NAV. The Adviser did not seek a reimbursement from the Focused Growth and Income during the fiscal year ended September 30, 2025.

The Contracts provide that absent willful misfeasance, bad faith, gross negligence, or reckless disregard of its duty, the Adviser and its employees, officers, directors, and controlling persons are not liable to the Funds or any of their investors for any act or omission by the Adviser or for any error of judgment or for losses sustained by the Funds. However, the Contracts provide that the Funds are not waiving any rights they may have with respect to any violation of law which cannot be waived. The Contracts also provide indemnification for the Adviser and each of these persons for any conduct for which they are not liable to the Funds. The Contracts in no way restrict the Adviser from acting as adviser to others. The Funds have agreed by the terms of the Contract that the word “Gabelli” in its name is derived from the name of the Adviser which in turn is derived from the name of Mario J. Gabelli; that such name is the property of the Adviser for copyright and/or other purposes; and that, therefore, such name may be freely used by the Adviser for other investment companies, entities, or products. The Funds have further agreed that in the event that for any reason, the Adviser ceases to be its investment adviser, the Funds will, unless the Adviser otherwise consents in writing, promptly take all steps necessary to change its name to one which does not include “Gabelli.”

By their terms, the Contracts will remain in effect from year to year, provided each such annual continuance is specifically approved by the Company’s Board or by a “majority” (as defined pursuant to the 1940 Act) vote of its shareholders and, in either case, by a majority vote of the Independent Directors cast in person at a meeting called specifically for the purpose of voting on the continuance of the Contracts. The Contracts are terminable without penalty by each Fund on sixty days’ written notice when authorized either by a majority vote of its outstanding voting shares or by a vote of a majority of its Board, or by the Adviser on sixty days’ written notice, and will automatically terminate in the event of its “assignment” as defined by the 1940 Act.

As compensation for the Adviser’s services and related expenses borne by the Adviser, each Fund pays the Adviser a fee computed daily and payable monthly at the annual rate of 1.00% of each Fund’s net assets and allocable to each class on the basis of assets attributable to such class. For the last three fiscal years ended September 30, each Fund paid investment advisory fees to the Adviser amounting to:

**Advisory Fees Paid to Adviser by Each Fund
(Fiscal years ended September 30)**

	<u>2025</u>	<u>2024</u>	<u>2023</u>
Small Cap Growth Fund	\$ 17,462,321	\$ 17,017,074	\$ 15,935,591
Equity Income Fund	\$ 4,532,220	\$ 4,963,427	\$ 5,371,936
Focused Growth and Income Fund	\$ 473,597	\$ 430,071	\$ 382,758
Global Financial Services Fund	\$ 551,822	\$ 362,714	\$ 266,060

In fiscal years 2025, 2024, and 2023, the Small Cap Growth Fund’s advisory fees were reduced by \$123,234, \$76,509, and \$65,517, respectively, relating to advisory fees on unsupervised assets.

The Adviser has contractually agreed to waive its investment advisory fees and/or to reimburse expenses of the Global Financial Services Fund to the extent necessary to maintain the Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement (excluding brokerage costs, acquired fund fees and expenses, interest, taxes, and extraordinary expenses) at no more than an annual rate of 1.25%, 1.25%, 2.00%, and 1.00% for Class AAA, Class A, Class C, and Class I shares, respectively. Under this same arrangement, the Global Financial Services Fund has also agreed, during the two-year period following the year of any such waiver or reimbursement by the Adviser, to repay such amount, but only to the extent the Fund’s adjusted Total Annual Fund Operating Expenses would not exceed an annual rate of 1.25%, 1.25%, 2.00%, and 1.00% for Class AAA, Class A, Class C, and Class I shares, respectively, after giving effect to the repayments. This arrangement is in effect through January 31, 2027, and may be terminated only by the Board before such time.

The Adviser has contractually agreed to waive its investment advisory fees and/or to reimburse expenses of the Focused Growth and Income Fund to the extent necessary to maintain the Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement (excluding brokerage costs, acquired fund fees and expenses, interest, taxes, and extraordinary expenses) at no more than an annual rate of 0.80% for Class I Shares (effective as of January 21, 2021) and 1.25% for Class A Shares (effective as of August 17, 2022). Under this same arrangement, the Focused Growth and Income Fund has also agreed, during the two-year period following the year of any such waiver or reimbursement by the Adviser, to repay such amount, but only to the extent the Focused Growth and Income Fund’s adjusted Total Annual Fund Operating Expenses would not exceed an annual rate of 0.80% for Class I Shares and 1.25% for Class A Shares. This arrangement is in effect through January 31, 2027 for Class I Shares and Class A Shares, and may be terminated only by the Board before such time.

Portfolio Manager Information

Other Accounts Managed

The table below provides summary information regarding other accounts for which each portfolio manager was primarily responsible for day-to-day management during the fiscal year ended September 30, 2025.

EXCLUDES SMALL CAP GROWTH FUND:

<u>Name of Portfolio Manager</u>	<u>Type of Accounts</u>	<u>Total No. of Accounts Managed</u>	<u>Total Assets</u>	<u>No. of Accounts where Advisory Fee is Based on Performance</u>	<u>Total Assets in Accounts where Advisory Fee is Based on Performance</u>

Ian Lapey	Registered Investment Companies:	2	\$ 2.1 billion	0	\$ 0
	Other Pooled Investment Vehicles:	0	\$ 0	0	\$ 0
	Other Accounts:	14	\$ 40.9 million	0	\$ 0

* The total number of Registered Investment Companies ("RICs") in the Fund Complex is 50. Mr. Gabelli is the sole portfolio manager of 6 RICs and part of the portfolio management team of 14 RICs.

Potential Conflicts of Interest

Actual or apparent conflicts of interest may arise when the portfolio managers also have day-to-day management responsibilities with respect to one or more other accounts. These potential conflicts include:

Allocation of Limited Time and Attention. Because the portfolio managers manage more than one account, they may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as if they were to devote substantially more attention to the management of only a Fund.

Allocation of Limited Investment Opportunities. If the portfolio managers identify an investment opportunity that may be suitable for multiple accounts, the Fund or Funds may not be able to take full advantage of that opportunity because the opportunity may need to be allocated among these accounts or other accounts managed primarily by other portfolio managers of the Adviser and its affiliates.

Pursuit of Differing Strategies. At times, a portfolio manager may determine that an investment opportunity may be appropriate for only some of the accounts for which they exercise investment responsibility, or may decide that certain of these accounts should take differing positions with respect to a particular security. In these cases, the portfolio manager may execute differing or opposite transactions for one or more accounts which may affect the market price of the security or the execution of the transactions, or both, to the detriment of one or more other accounts.

Selection of Broker-Dealers. A portfolio manager may be able to select or influence the selection of the brokers and dealers that are used to execute securities transactions for the funds or accounts that he or she supervises. In addition to providing execution of trades, some brokers and dealers provide the Adviser with brokerage and research services. These services may be more beneficial to certain funds or accounts of the Adviser and its affiliates than to others. Although the payment of brokerage commissions is subject to the requirement that the Adviser determines in good faith that the commissions are reasonable in relation to the value of the brokerage and research services provided to the fund, a portfolio manager's decision as to the selection of brokers and dealers could yield disproportionate costs and benefits among the funds or other accounts that the Adviser and its affiliates manage. In addition, with respect to certain types of accounts (such as pooled investment vehicles and other accounts managed for organizations and individuals), the Adviser may be limited by the client concerning the selection of brokers or may be instructed to direct trades to particular brokers.

In these cases, the Adviser or its affiliates may place separate, non-simultaneous transactions in the same security for a Fund and another account that may temporarily affect the market price of the security or the execution of the transaction, or both, to the detriment of a Fund or the other account. Because of Mr. Gabelli's position with the Funds' Distributor and his indirect majority ownership interest in the Distributor, he may have an incentive to use the Distributor to execute portfolio transactions for the Funds even if using the Distributor is not in the best interest of the Funds.

Variation in Compensation. A conflict of interest may arise where the financial or other benefits available to a portfolio manager differ among the accounts that they manage. If the structure of the Adviser's management fee or the portfolio manager's compensation differs among accounts (such as where certain accounts pay higher management fees or performance-based management fees), the portfolio managers may be motivated to favor certain accounts over others. The portfolio managers also may be motivated to favor accounts in which they have investment interests, or in which the Adviser or its affiliates have investment interests. In Mr. Gabelli's case, the Adviser's compensation (and expenses) for the Funds are marginally greater as a percentage of assets than for certain other accounts and are less than for certain other accounts managed by Mr. Gabelli, while his personal compensation structure varies with near-term performance to a greater degree in certain performance fee based accounts than with non-performance fee based accounts. In addition, he has investment interests in several of the funds managed by the Adviser and its affiliates. Similarly, the desire to maintain assets under management or to enhance a portfolio manager's performance record or to derive other rewards, financial or otherwise, could influence the portfolio manager in affording preferential treatment to those accounts that could most significantly benefit that portfolio manager.

The Adviser and the Funds have adopted compliance policies and procedures that are reasonably designed to address the various conflicts of interest that may arise for the Adviser and its staff members. However, there is no guarantee that such policies and procedures will be able to detect and address every situation in which an actual or potential conflict may arise.

Compensation Structure for Ian Lapey and Daniel M. Miller

The compensation of the portfolio managers for the Gabelli Funds is structured to enable the Adviser to attract and retain highly qualified professionals in a competitive environment. Messrs. Lapey and Miller receive a compensation package that includes a minimum draw or base salary, equity-based incentive compensation via awards of restricted stock, and incentive-based variable compensation based on a percentage of net revenue received by the Adviser for managing the Global Financial Services Fund (Mr. Lapey only), the Focused Growth and Income Fund (Mr. Miller only) and separate accounts to the extent that the amount exceeds a minimum level of compensation. Net

revenues are determined by deducting from gross investment management fees certain of the firm's expenses (other than the respective portfolio manager's compensation) allocable to the Global Financial Services Fund (Mr. Lapey only), the Focused Growth and Income Fund (Mr. Miller only) or other managed accounts.

This method of compensation is based on the premise that superior long-term performance in managing a portfolio should be rewarded with higher compensation as a result of growth of assets through appreciation and net investment activity. Equity-based incentive compensation is based on an evaluation by the Adviser's parent, GAMCO Investors, Inc., of quantitative and qualitative performance evaluation criteria.

Mr. Miller also receives compensation from G.research for services performed in his capacity as an employee of G.research, an affiliate of the Adviser.

Compensation Structure for Mario J. Gabelli

Mr. Gabelli receives incentive-based variable compensation based on a percentage of net revenues received by the Adviser for managing the Equity Income Fund and Small Cap Growth Fund. Net revenues are determined by deducting from gross investment management fees the firm's expenses (other than Mr. Gabelli's compensation) allocable to these Funds. Additionally, he receives similar incentive-based variable compensation for managing other accounts within GAMI and its affiliates. This method of compensation is based on the premise that superior long-term performance in managing a portfolio should be rewarded with higher compensation as a result of growth of assets through appreciation and net investment activity. The level of compensation is not determined with specific reference to the performance of any account against any specific benchmark. One of the other registered investment companies managed by Mr. Gabelli has a performance (fulcrum) fee arrangement for which his compensation is adjusted up or down based on the performance of the investment company relative to an index. Four closed-end registered investment companies managed by Mr. Gabelli have arrangements whereby the Adviser will only receive its investment advisory fee attributable to the liquidation value of outstanding preferred stock (and Mr. Gabelli would only receive his percentage of such advisory fee) if certain performance levels are met. Mr. Gabelli manages other accounts with performance fees. Compensation for managing these accounts has two components. One component of his compensation is based on a percentage of net revenues received by the Adviser for managing the account. The second component is based on absolute performance of the account, with respect to which a percentage of such performance fee is paid to Mr. Gabelli. As an executive officer of the Adviser's parent company, GAMI, Mr. Gabelli also receives ten percent of the net operating profits of the parent company. Additionally, Mr. Gabelli receives a percentage of net management fees as a relationship manager of accounts managed by affiliates. Mr. Gabelli receives no base salary, no annual bonus, and no stock options. Mr. Gabelli may enter into and has arrangements to defer or waive his compensation.

Ownership of Shares in the Fund

Set forth in the table below is the dollar range of equity securities in the Funds beneficially owned by each of the portfolio managers:

Name	Fund	Dollar Range of Equities Securities Held in each Fund*
Mario J. Gabelli	Small Cap Growth Fund Equity Income Fund	G G
Ian Lapey	Global Financial Services Fund	G
Daniel M. Miller	Focused Growth and Income Fund	E

* Key to Dollar Ranges – Information as of September 30, 2025

- A. None
- B. \$1 – \$10,000
- C. \$10,001 – \$50,000
- D. \$50,001 – \$100,000
- E. \$100,001 – \$500,000
- F. \$500,001 – \$1,000,000
- G. Over \$1,000,000

The Sub-Administrator

The Adviser has entered into an agreement (the "Sub-Administration Agreement") with BNY Mellon, which is located at 301 Bellevue Parkway, Wilmington, DE 19809. Under the Sub-Administration Agreement, the Sub-Administrator (a) assists in supervising all aspects of the Company's operations except those performed by the Adviser under its advisory agreement with the Funds; (b) supplies the Funds with office facilities (which may be in the Sub-Administrator's own offices), statistical and research data, data processing services, clerical, accounting, and bookkeeping services, including, but not limited to, the calculation of the NAV of each class of each Funds' shares, internal auditing and regulatory administration services, internal executive and administrative services, and stationery and office supplies; (c) prepares and distributes materials for all of the Company's Board meetings, including the mailing of all Board materials and collates the same materials into the Board books and assists in the

drafting of minutes of the Board meetings; (d) prepares reports to the Company’s shareholders, tax returns, and reports to and filings with the SEC and state “Blue Sky” authorities; (e) provides any equipment or services necessary for the purpose of pricing shares or valuing each Fund’s investment portfolio; (f) provides compliance testing of all Fund activities against applicable requirements of the 1940 Act and the rules thereunder, the Code, and each Fund’s investment restrictions; (g) furnishes to the Adviser such statistical and other factual information and information regarding economic factors and trends as the Adviser from time to time may require; and (h) generally provides all administrative services that may be required for the ongoing operation of the Company in a manner consistent with the requirements of the 1940 Act.

For the services it provides, the Adviser pays the Sub-Administrator an annual fee based on the value of the aggregate average daily net assets of all funds under its administration managed by the Adviser as follows: up to \$10 billion-0.0275%; \$10 billion to \$15 billion-0.0125%; \$15 billion to \$20 billion-0.0100%; over \$20 billion-0.008%. The Sub-Administrator’s fee is paid by the Adviser and will result in no additional expenses to the Funds.

Counsel

Skadden, Arps, Slate, Meagher & Flom LLP, One Manhattan West, New York, New York 10001, serves as the Company’s legal counsel.

Independent Registered Public Accounting Firm

Ernst & Young LLP (“EY”), One Manhattan West, New York, New York 10001, independent registered public accounting firm, has been selected to audit the Funds’ annual financial statements.

Custodian, Transfer Agent, and Dividend Disbursing Agent

State Street, 225 Franklin Street, Boston, Massachusetts 02110 is the Custodian for each Fund’s cash and securities. SS&C Global Investor & Distribution Solutions, Inc. (“SS&C” or the “Transfer Agent”), located at, 801 Pennsylvania Avenue, Suite 219204, Kansas City, Missouri 64105-1307, performs the shareholder services and acts as each Fund’s transfer agent and dividend disbursing agent. Neither State Street or SS&C assists in or is responsible for investment decisions involving assets of the Funds.

Distributor

To implement each Fund’s 12b-1 Plans, each Fund has entered into a Distribution Agreement with G.distributors, a Delaware limited liability company which is a wholly owned subsidiary of GAMI having its principal offices located at One Corporate Center, Rye, New York 10580-1422. The Distributor acts as agent of each Fund’s shares on a best efforts basis. The Distributor also acts as distributor for other funds in the Fund Complex.

Set forth in the table below are the aggregate amount of underwriting commissions and the amount retained by the Distributor during the fiscal year ended September 30, 2025:

	Fiscal Year Ended September 30	Aggregate Commissions	Amounts Retained by Distributor
Small Cap Growth Fund	2023	\$ 106,669	\$ 15,671
	2024	\$ 163,174	\$ 19,561
	2025	\$ 97,849	\$ 18,972
Equity Income Fund	2023	\$ 1,026,152	\$ 169,866
	2024	\$ 741,838	\$ 123,841
	2025	\$ 902,690	\$ 152,895
Focused Growth and Income Fund	2023	\$ 202,015	\$ 32,463
	2024	\$ 113,406	\$ 18,375
	2025	\$ 173,849	\$ 29,547
Global Financial Services Fund	2023	\$ 0	\$ 0
	2024	\$ 0	\$ 0
	2025	\$ 3,586	\$ 573

Set forth in the table below are the amount of commissions and other compensation received by the Distributor during the fiscal year ended September 30, 2025:

	Net Underwriting Discounts and Commissions	Compensation on Redemptions and Repurchases	Brokerage Commissions	Other Compensation
Small Cap Growth Fund	\$ 18,972	\$ 5,443	\$ 21,782	\$ 0
Equity Income Fund	\$ 152,895	\$ 735	\$ 7,249	\$ 0
Focused Growth and Income Fund	\$ 29,547	\$ 100	\$ 0	\$ 0
Global Financial Services Fund	\$ 573	\$ 0	\$ 3,336	\$ 0

DISTRIBUTION PLANS

Each Fund has adopted a separate distribution and service plan (each, a “Plan” and collectively the “Plans”) pursuant to Rule 12b-1 under the 1940 Act on behalf of each Fund’s Class AAA shares, Class A shares, Class C shares. Payments may be made by each Fund under each Plan for the purpose of financing any activity primarily intended to result in the sales of shares in the class to which such Plan relates as determined by the Board. Such activities typically include advertising, compensation for sales and marketing activities of the Distributor and other banks, broker-dealers and service providers; shareholder account servicing; production and dissemination of prospectus and sales and marketing materials; and capital or other expenses of associated equipment, rent, salaries, bonuses, interest, and other overhead. To the extent any activity is one which a Fund may finance without a distribution plan, a Fund may also make payments to finance such activity outside of the Plans and not be subject to their limitations. Payments under the Plans are not dependent on distribution expenses actually incurred by the Distributor. The Plans compensate the Distributor regardless of expense and accordingly a portion of the payments by each Fund may be used indirectly to finance distribution activities on behalf of other funds in the Fund Complex, and a portion of the payments by such other funds may be used to finance distribution activities on behalf of each Fund. The Plans are intended to benefit the Funds, among other things, by increasing its assets and thereby reducing the Funds’ expense ratio.

Under its terms, each Plan remains in effect so long as its continuance is specifically approved at least annually by vote of the Company’s Board, including a majority of the Independent Directors. No Plan may be amended to materially increase the amount to be spent for services provided by the Distributor thereunder without shareholder approval, and all material amendments of any Plan must also be approved by the Directors in the manner described above. Each Plan may be terminated at any time, without penalty, by vote of a majority of the Independent Directors, or by a vote of a majority of the outstanding voting securities of a Fund (as defined in the 1940 Act). Under each Plan, the Distributor will provide the Directors with periodic reports of amounts expended under each Plan and the purpose for which such expenditures were made.

Pursuant to each Plan, the Board will review at least quarterly a written report of the distribution expenses incurred on behalf of each class of shares of each Fund by the Distributor. The report includes an itemization of the distribution expenses and the purposes of such expenditures.

For the fiscal year ended September 30, 2025, the Small Cap Growth Fund, Equity Income Fund, Focused Growth and Income Fund, and Global Financial Services Fund incurred distribution costs of \$2,282,214, \$854,830, \$85,951, and \$9,613, respectively, to G.distributors for underwriting. The Plan compensates the Distributor regardless of its expense.

Distribution Costs and Expenses Incurred for the Year Ended September 30, 2025

	Class AAA	Class A	Class C
Small Cap Growth Fund	\$ 1,743,056	\$ 345,663	\$ 193,495
Equity Income Fund	\$ 443,425	\$ 300,641	\$ 110,764
Focused Growth and Income Fund	\$ 12,154	\$ 56,880	\$ 16,917
Global Financial Services Fund	\$ 8,967	\$ 366	\$ 280

* The Equity Income Fund’s Class C shares have an inception date of June 1, 2023.

For the fiscal year ended September 30, 2025, the Distributor identified expenditures for the Small Cap Growth Fund, Equity Income Fund, Focused Growth and Income Fund, and Global Financial Services Fund, respectively, of approximately: \$61,800, \$19,500, \$3,600, and \$1,630, for advertising and promotion, \$11,600, \$3,700, \$700, and \$310 for printing, postage and stationery, \$45,600, \$14,300, \$2,700, and \$1,210 for overhead support expenses, \$42,200, \$9,800, \$4,900, and \$160 for advanced commissions, \$487,900, \$192,400, \$32,500, and \$12,890 for salaries of personnel of the Distributor, and \$2,101,100, \$750,000, \$79,400, and \$9,060 for third party servicing fees.

Pursuant to the Plans, each Fund pays the Distributor 0.25% of their average daily net assets of Class AAA shares, Class A shares, and 1.00% (0.25% for service and 0.75% for distribution) of its average daily net assets of Class C shares. Due to the possible continuing nature of Rule 12b-1 payments, long-term investors may pay more than the economic equivalent of the maximum front-end sales charge permitted by the Financial Industry Regulatory Authority, Inc. (“FINRA”). Pursuant to the Distribution Agreements, each Fund appoints the Distributor as its general distributor and exclusive agent for the sale of that Fund’s shares. Each Fund has agreed to indemnify the Distributor to the extent permitted by applicable law against certain liabilities under federal securities laws. The Distribution Agreements shall remain in effect from year to year provided that continuance of such agreements shall be approved at least annually by the Company’s Board, including a vote of a majority of the Independent Directors cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreements may be terminated by either party thereto upon sixty days’ written notice.

The amounts included in a previous paragraph as third party servicing fees include amounts paid to the providers of various programs that make shares available to their customers. Subject to approvals by the Board, each of the Funds also makes payments to the providers of these programs, out of their assets other than Rule 12b-1 payments, in amounts not greater than the savings of expenses a Fund would otherwise incur in maintaining shareholder accounts for those who invest in a Fund directly rather than through these programs. The Adviser and its affiliates may also pay for all or a portion of these program’s charges out of their financial resources other than Rule 12b-1 fees.

The following table provides the dates that each Fund’s class of shares were first offered to the public:

	<u>Class AAA</u>	<u>Class A</u>	<u>Class C</u>	<u>Class I</u>
Small Cap Growth Fund	10/22/1991	12/31/2003	12/31/2003	1/11/2008
Equity Income Fund	1/2/1992	12/31/2003	6/1/2023	1/11/2008
Focused Growth and Income Fund	12/31/2002	12/31/2002	12/31/2002	1/11/2008
Global Financial Services Fund	10/1/2018	10/1/2018	10/1/2018	10/1/2018

Shares of the Funds may also be purchased through shareholder agents that are not affiliated with the Company or the Distributor. There is no sales or service charge imposed by the Funds other than as described in the Funds’ prospectus under the “Classes of Shares” section, but agents who do not receive distribution payments or sales charges may impose a charge to the investor for their services.

Such fees may vary among agents, and such agents may impose higher initial or subsequent investment requirements than those established by the Funds. Services provided by broker-dealers may include allowing the investor to establish a margin account and to borrow on the value of the Funds’ shares in that account. It is the responsibility of the shareholder’s agent to establish procedures which would assure that upon receipt of an order to purchase shares of the Funds the order will be transmitted so that it will be received by the Distributor before the time when the price applicable to the buy order expires.

No Independent Director of the Company had a direct or indirect financial interest in the operation of any Plan or related agreements. Those interested persons who beneficially own stock in affiliates of the Adviser or the Distributor or are employed by one of the Gabelli companies may be deemed to have an indirect financial interest.

PORTFOLIO TRANSACTIONS AND BROKERAGE

The Adviser and its affiliates currently serve as investment adviser to a number of investment companies and private account clients and may in the future act as adviser to others. It is the policy of the Adviser and its affiliates to allocate investments suitable and appropriate for each such client in a manner believed by the Adviser to be equitable to each client. In making such allocations among the Funds and other client accounts, the main factors considered are the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment, the size of investment commitments generally held and the opinions of the persons responsible for managing the portfolios of the Funds and other client accounts.

Under each Contract the Adviser is authorized on behalf of each Fund to employ brokers to effect the purchase or sale of portfolio securities with the objective of obtaining prompt, efficient, and reliable execution and clearance of such transactions at the most favorable price obtainable (“best execution”) at a reasonable expense. The Adviser is permitted to (1) direct Fund portfolio brokerage to G.research, an affiliate of the Adviser and a broker-dealer member of FINRA; and (2) pay commissions to brokers other than G.research which are higher than what might be charged by another qualified broker to obtain brokerage and/or research services considered by the Adviser to be useful or desirable for its investment management of the Funds and/or other advisory accounts under the management of the Adviser and any investment adviser affiliated with it. The Adviser does not consider the sales of shares of the Funds or other investment funds managed by the Adviser and its affiliates by brokers, including G.research, as a factor in its selection of brokers or dealers for each Fund’s portfolio transactions and has adopted compliance policies and procedures for itself and its affiliates to prevent any such transactions on that basis.

Transactions on U.S. stock exchanges involve the payment of negotiated brokerage commissions, which may vary among brokers. Transactions in securities other than those for which a securities exchange is the principal market are generally executed through a principal market maker. However, such transactions may be effected through a brokerage firm and a commission is paid whenever it appears that the broker can obtain a price that is at least as favorable taking into account its commissions. In general, there may be no stated commission on principal transactions in OTC securities, but the prices of such securities usually include undisclosed commissions or markups. Option transactions will usually be effected through a broker and a commission will be charged. Each Fund also expects that securities will be purchased at times in underwritten offerings where the price includes a fixed amount of compensation generally referred to as a concession or discount.

The Adviser currently serves as investment adviser to a number of investment company clients and private accounts and may in the future act as adviser to others. Affiliates of the Adviser act as investment adviser to numerous private accounts and adviser to other investment companies. It is the policy of the Adviser and its affiliates to cause purchase and sale transactions to be allocated among the Funds and others whose assets they manage in such manner as it deems equitable. In making such allocations among the Funds and other client accounts, the main factors considered are the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment, the size of investment commitments generally held, and the opinions of the persons responsible for managing the portfolios of the Funds and other client accounts.

The policy of each Fund regarding purchases and sales of securities and options for its portfolio is that primary consideration will be given to obtaining the most favorable prices and efficient execution of transactions. In seeking to implement each Fund's policies, the Adviser effects transactions with those brokers and dealers who the Adviser believes can obtain the most favorable prices and are capable of providing efficient executions. If the Adviser believes such price and execution are obtainable from more than one broker or dealer, it may give consideration to placing portfolio transactions with those brokers or dealers who also furnish research and other services to the Funds or the Adviser of the type described in Section 28(e) of the Exchange Act. In doing so, the Funds may also pay higher commission rates than the lowest available when the Adviser believes it is reasonable to do so in light of the value of the brokerage and research services provided by the broker effecting the transaction. Such services may include, but are not limited to, any one or more of the following: (i) information as to the availability of securities for purchase or sale; (ii) statistical or factual information or opinions pertaining to investments; (iii) wire services; and (iv) appraisals or evaluations of potential and existing investments.

Research services furnished by brokers or dealers through which the Funds effect security transactions are used by the Adviser and its advisory affiliates in carrying out their responsibilities with respect to all of their accounts over which they exercise investment discretion. Such investment information may be useful only to one or more of such other accounts. The purpose of this sharing of research information is to avoid duplicative charges for research provided by brokers and dealers. Neither the Funds nor the Adviser has any agreement or legally binding understanding with any broker or dealer regarding any specific amount of brokerage commissions which will be paid in recognition of such services. However, in determining the amount of portfolio commissions directed to such brokers or dealers, the Adviser considers the level of services provided and, based on such determinations, the Adviser allocated brokerage commissions of \$13,336 for Small Cap Growth Fund, \$3,388 for Equity Income Fund, \$2,196 for Focused Growth and Income Fund, and \$4,484 for Global Financial services Fund, respectively, on portfolio transactions in the principal amount of \$10,670,229, \$4,090,273, \$2,162,269, and \$6,912,301 for Small Cap Growth Fund, Equity Income Fund, Focused Growth and Income Fund, and Global Financial Services Fund, respectively, during the fiscal year ended September 30, 2025. The average commissions on these transactions were \$0.050, \$0.050, \$0.019, and \$0.032 per share for Small Cap Growth Fund, Equity Income Fund, Focused Growth and Income Fund, and Global Financial Services Fund, respectively.

Investment research obtained by allocations of a Fund's brokerage is used to augment the scope and supplement the internal research and investment strategy capabilities of the Adviser but does not reduce the overall expenses of the Adviser to any material extent. Such investment research may be in written form or through direct contact with individuals and includes information on particular companies and industries as well as market, economic, or institutional activity areas. Research services furnished by brokers through which a Fund effects securities transactions are used by the Adviser and its advisory affiliates in carrying out their responsibilities with respect to all of their accounts over which they exercise investment discretion. Such investment information may be useful only to one or more of the other accounts of the Adviser and its advisory affiliates, and research information received for the commissions of those particular accounts may be useful both to a Fund and one or more of such other accounts.

The Adviser may also place orders for the purchase or sale of portfolio securities with G.research when it appears that, as an introducing broker or otherwise, G.research can obtain a price, execution, and commission which is at least as favorable as that obtainable by other qualified brokers and at a commission rate at least as favorable as it provides to its best customers for similar transactions. As required by Rule 17e-1 under the 1940 Act, the Board has adopted procedures which provide that the commissions paid to G.research on brokerage transactions must not exceed those which would have been charged by another qualified broker or member firm able to effect the same or a comparable transaction at an equally favorable price or it is what G.research charges its most favored customers on similar transactions. Rule 17e-1 under the 1940 Act and the Company's procedures contain requirements that the Board, including the Independent Directors, review such commissions and transactions quarterly and procedures at least annually to determine their continuing appropriateness. The Adviser and G.research are also required to furnish reports and maintain records in connection with such reviews.

To obtain the best execution of portfolio trades on the NYSE, G.research controls and monitors the execution of such transactions on the floor of the NYSE through independent "floor brokers" or the Designated Order Turnaround System of the NYSE. Such transactions are

then cleared, confirmed to each Fund for the account of G.research, and settled directly with the Custodian of the Funds by a clearing house member firm which remits the commission less its clearing charges to the G.research. G.research may also effect each Fund's portfolio transactions in the same manner and pursuant to the same arrangements on other national securities exchanges which adopt direct access rules similar to those of the NYSE. In addition, G.research may directly execute transactions for the Funds on the floor of any exchange, provided: (i) the Company's Board has expressly authorized G.research to effect such transactions; and (ii) G.research annually advises the Funds of the aggregate compensation it earned on such transactions.

The following table sets forth certain information regarding each Fund's payment of brokerage commissions for the past three fiscal years:

Small Cap Growth Fund

	<u>Year ended September 30</u>	<u>Commissions Paid</u>
Total Brokerage Commissions	2023	\$ 132,846
	2024	\$ 124,431
	2025	\$ 80,297
Commissions paid to G.research	2023	\$ 34,858
	2024	\$ 44,939
	2025	\$ 21,782

	<u>Year ended September 30</u>	<u>Commissions Paid</u>
Total Brokerage Commissions	2023	\$ 10,245
	2024	\$ 10,012
	2025	\$ 17,161
Commissions paid to G.research	2023	\$ 4,298
	2024	\$ 2,443
	2025	\$ 3,337
% of Total Brokerage Commissions paid to G.research	2025	19.44%
% of Total Transactions involving Commissions paid to G.research	2025	2.80%

During the fiscal year ended September 30, 2025, the following Funds purchased securities of their regular brokers or dealers and the holdings at the end of the fiscal year ended September 30, 2025 are:

<u>Fund</u>	<u>Name of Regular Broker or Dealer or Parent (Issuer)</u>	<u>Shares</u>	<u>Aggregate Market Value</u>
Equity Income Fund	Bank Of America Corp	8,800.00	\$ 453,992.00
Equity Income Fund	UBS Group AG	2,500.00	\$ 102,097.86
Equity Income Fund	Morgan Stanley	3,000.00	\$ 476,880.00
Equity Income Fund	Wells Fargo & Co	55,000.00	\$ 4,610,100.00
Equity Income Fund	The Bank Of New York Mellon Corp	240,000.00	\$ 6,150,400.00
Equity Income Fund	AllianceBernstein L.P.	20,000.00	\$ 764,400.00
Financial Services Fund	Barclays PLC	98,500.00	\$ 502,866.18

During the fiscal year ended September 30, 2025, the Equity Income, the Small Cap Growth, and the Focused Growth and Income Funds did not purchase securities of their regular broker-dealers or their parent companies.

REDEMPTION OF SHARES

Payment of the redemption price for shares redeemed may be made either in cash or in portfolio securities (selected by an ad hoc committee of independent Board members and taken at their value used in determining a Fund's NAV as described under "Determination of Net Asset Value"), or partly in cash and partly in portfolio securities. However, payments will be made wholly in cash unless (a) the shareholder has redeemed more than \$250,000 over the preceding three months, and (b) either the Adviser believes that economic conditions exist which would make payments in cash detrimental to the best interests of a Fund or the shareholder has indicated a preference to a Fund for redemptions in kind. If payment for shares redeemed is made wholly or partly in portfolio securities, brokerage costs may be incurred by the investor in converting the securities to cash. The Funds' policy is only to distribute securities to shareholders from its portfolio of investments that meet the following criteria: (i) traded on a major stock exchange and have a free float of at least \$500 million, or (ii) the subject of a publicly announced takeover transaction pursuant to which each party thereto has executed a binding transaction agreement and in which there is no pending litigation challenging the completion of the transaction. In either case, a Fund will not distribute an amount of securities of a particular issuer that exceeds 25% of the average daily trading volume of such security over the preceding 20 trading days.

Cancellation of purchase orders for Fund shares (as, for example, when checks submitted to purchase shares are returned unpaid) cause a loss to be incurred when the NAV of that Fund's shares on the date of cancellation is less than on the original date of purchase. The investor is responsible for such loss, and the Fund may reimburse itself or the Distributor for such loss by automatically redeeming shares from any account registered at any time in that shareholder's name, or by seeking other redress. If a Fund is unable to recover any loss to itself, it is the position of the SEC that the Distributor will be immediately obligated to make that Fund whole.

The Funds impose a redemption fee of 2.00% of the total redemption amount if shareholders sell or exchange any of their shares within seven days of the date of a purchase. The fee, its manner of calculation and exceptions to its applicability are discussed in the Funds' prospectus. The fee is not a sales charge (load) and is paid directly to the respective Fund and not to the Adviser or Distributor.

Except with respect to Class I Shares, no minimum initial investment is required for Officers, Directors, or full-time employees of the Funds, other investment companies managed by the Adviser, the Adviser, the Sub-Administrator, the Distributor or their affiliates, including members of the "immediate family" of such individuals and retirement plans and trusts for their benefit. The term "immediate family" refers to spouses, children and grandchildren (adopted or natural), parents, grandparents, siblings, a spouse's siblings, a sibling's spouse, and a sibling's children.

DETERMINATION OF NET ASSET VALUE

NAV is calculated separately for each class of each Fund. The NAV of Class C shares will generally be lower than the NAV of Class AAA, Class A, or Class I shares, as applicable, as a result of the higher service and distribution-related fees to which Class C shares are subject. It is expected, however, that the NAV per share of each class will tend to converge immediately after the recording of dividends, if any, which will differ by approximately the amount of the distribution and/or service fee expense accrual differential among the classes.

For purposes of determining each of the Fund's NAV, equity securities listed or traded on a nationally recognized securities exchange or traded in the U.S. OTC market where trades are reported contemporaneously and for which market quotations are readily available are valued at the last quoted sale or a market's official closing price at the close of the exchange's or other market's regular trading hours, as of or prior to the time and day as of which such value is being determined. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market as determined by the Adviser. If there has been no sale on the day the valuation is made, the securities are valued at the mean of the closing bid and ask prices on the principal market for such security on such day. If no ask prices are quoted on such day, then the security is valued at the closing bid price on the principal market for such security on such day. If no bid or ask prices are quoted on such day, a Fund's accounting agent will notify the Adviser, which has been appointed Valuation Designee pursuant to Rule 2a-5 under the 1940 Act ("Rule 2a-5") by the Board, and the security will be valued based on written or standing instructions from the Adviser, as Valuation Designee.

Equity securities which are primarily traded on foreign markets, except for those that trade primarily in Latin America or South America, are generally valued at the preceding closing values of such securities on their respective exchanges but may be fair valued by the Valuation Designee under procedures adopted pursuant to Rule 2a-5 if market conditions change significantly after the close of the foreign market but prior to the close of business on the day the securities are being valued. Equity securities which are primarily traded in Latin American or South American markets are valued each day approximately at the time of the close of regular trading on the NYSE as though such time were the close of trading on such Latin American or South American market and such Latin American or South American market were a U.S. market. When the NYSE is open, but the foreign market on which an equity security primarily trades is closed, such as for a foreign national holiday, the security will generally be valued at the last available closing value (subject to the Fair Value Procedures adopted by the Board under Rule 2a-5) using the prevailing exchange rate as described below. If some event occurs affecting or likely to affect the price of an equity security or group of equity securities to a significant extent including but not limited to material market movement, changes in market conditions after a foreign market closes, but prior to 4:00 p.m. Eastern Time, or a company development, such as a material business development, dividend declaration, stock split or rights offering, and if adequate and timely information relating to the event is not available or is not taken into account by the pricing service, the Valuation Designee should review the pricing furnished by the pricing service to determine whether it is appropriate in the circumstances. In such case, the Valuation Designee will obtain market quotations from another source or will make a fair value determination of such securities using other appropriate value measurements pursuant to the Funds' Rule 2a-5 policies and procedures, and such information will be reported to the Board when and as required under Rule 2a-5 and the Funds' policies and procedures adopted thereunder. If the primary market for such an equity security suspends or limits trading or price movements, whether for the market as a whole or the particular security, and trading also occurs on a secondary market which has not suspended or limited trading or price movement, valuation will be based on information from the secondary market provided by the Valuation Designee. If all markets on which such an equity security have suspended trading, the Valuation Designee will fair value such security as provided above. Information that becomes known after the close of the NYSE, normally 4:00 p.m. Eastern time, on any business day may be assessed in determining NAV per share after the time of receipt of the information, but will not be used to retroactively adjust the price of the security determined earlier or on a prior day.

Initial public offering securities are initially valued at cost. Upon commencement of trading, these securities are valued like any other equity security.

Debt obligations (including convertible debt) for which market quotations are readily available are valued at the average of the latest bid and ask prices. If there were no ask prices quoted on such day, the security is valued using the closing bid price. Such debt obligations are valued through prices provided by a pricing service overseen by the Valuation Designee.

Assets and liabilities denominated in foreign currencies will be translated into U.S. dollars at the prevailing exchange rates as provided by an appropriate pricing service. Forward currency exchange contracts will be valued using interpolated forward exchange rates. Prevailing foreign exchange rates and forward currency foreign exchange rates may generally be obtained on a consistent basis at approximately 11:00 a.m. Eastern time, which approximates the close of the London Exchange. As available and as provided by an appropriate pricing service, translation of foreign security and currency market values will also occur with the use of foreign exchange rates obtained at the close of the NYSE, normally 4:00 p.m. Eastern time.

Certain securities are valued principally using dealer quotations. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded. OTC futures and options on futures for which market quotations are readily available will be valued by quotations received from a pricing service or, if no quotations are available from a pricing service, by quotations obtained from one or more dealers in the instrument in question by the Valuation Designee.

Securities and assets for which market quotations are not readily available are valued at their fair value as determined in good faith by the Valuation Designee under procedures established pursuant to Rule 2a-5. Fair valuation methodologies and procedures may include, but are not limited to: (i) analysis and review of available financial and non-financial information about the company, (ii) comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities to the equivalent U.S. dollar value American Depositary Receipts securities at the close of U.S. exchanges, and (iii) evaluation of any other information that could be indicative of the value of the security.

A Fund may obtain valuations on the basis of prices provided by a pricing service overseen by the Valuation Designee. All other investment assets, including restricted and not readily marketable securities, are valued in good faith at fair value by the Valuation Designee under procedures established pursuant to Rule 2a-5. Additional information on fair valuation is provided in the Funds' prospectus under "Pricing of Fund Shares."

In addition, whenever developments in one or more securities markets after the close of the principal markets for one or more portfolio securities and before the time as of which a Fund determines its NAV would, if such developments had been reflected in such principal markets, likely have more than a minimal effect on any of the Fund's NAV, the Fund may fair value such portfolio securities based on available market information as of the time the Fund determines its NAV.

NYSE Closings

The holidays (as observed) on which the NYSE is closed, and therefore days upon which shareholders cannot redeem shares, currently are: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day and on the preceding Friday or subsequent Monday when a holiday falls on a Saturday or Sunday, respectively.

ADDITIONAL INFORMATION CONCERNING TAXES

General

Set forth below is a discussion of certain U.S. federal income tax issues concerning the Funds and the purchase, ownership, and disposition of the Funds' shares by U.S. persons who hold their shares as capital assets (generally, assets held as investments). This discussion is based upon present provisions of the Code, the Treasury regulations promulgated thereunder, and judicial and administrative ruling authorities, all of which are subject to change, which change may be retroactive. This discussion does not purport to be complete or to deal with all aspects of U.S. federal income taxation that may be relevant to investors in light of their particular circumstances. No ruling has been or will be sought from the Internal Revenue Service ("IRS") regarding any matter discussed herein. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position different from any of the tax aspects set forth below. Prospective investors should consult their own tax advisers with regard to the U.S. federal tax consequences of the purchase, ownership, or disposition of shares of the Funds, as well as the tax consequences arising under the laws of any state, foreign country, or other taxing jurisdiction.

Each Fund has elected to qualify and intends to continue to qualify as a regulated investment company under Subchapter M of the Code. Accordingly, each Fund must, among other things, (a) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities, or foreign currencies, or other income (including but not limited to gains from options, futures, or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies and (b) diversify its holdings so that, at the end of each quarter of the taxable year (i) at least 50% of the value of the Fund's total assets is represented by cash and cash items, U.S. government securities, the securities of other regulated investment companies and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its total assets is invested in the securities of (I) any one issuer (other than U.S. government securities and the securities of other regulated investment companies), (II) any two or more issuers (other than regulated investment companies) that it controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses or (III) any one or more "qualified publicly traded partnerships."

As a regulated investment company, each Fund generally is not subject to U.S. federal income tax on income and gains that it distributes to shareholders, if at least 90% of such Fund's investment company taxable income (which includes, among other items, dividends, interest, and the excess of any net short-term capital gains over net long-term capital losses) for the taxable year is distributed (or deemed distributed) in that taxable year. Any income or gains retained by the Funds will be subject to regular corporate-level income taxes. In addition, if a Fund were to fail to meet its annual distribution requirement or otherwise fail to qualify as a regulated investment company in any given year, that Fund would be subject to U.S. Federal income tax at regular corporate rates on all of its taxable income and gains in that year.

Each Fund will determine either to distribute or to retain for reinvestment all or part of any net long-term capital gains. If any such gains are retained by any Fund, that Fund will be subject to tax on such retained amount. In that event, each Fund expects that it will designate the retained amount as undistributed capital gains in a notice to its shareholders, each of whom (1) will be required to include in income for tax purposes as long-term capital gains, its share of the undistributed amount, (2) will be entitled to credit its proportionate share of the tax

paid by that Fund against its federal income tax liability and to claim refunds to the extent the credit exceeds such liability, and (3) will increase its basis in its shares of that Fund by an amount equal to the amount of undistributed capital gains included in such shareholder's gross income net of such tax.

A distribution will be treated as paid during the calendar year if it is paid during the calendar year or declared by a Fund in October, November, or December of that year, payable to shareholders of record on a date during any such month and paid by the Fund during January of the following year. Any such distributions paid during January of the following year will be deemed to be received on December 31 of the year the distributions are declared, rather than when the distributions are received.

Under the Code, amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax at the Fund level. To avoid the tax, a Fund must distribute during each calendar year an amount equal to at least the sum of (1) 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) 98.2% of its capital gains in excess of its capital losses for the one-year period generally ending on October 31 of the calendar year (unless an election is made by a Fund with a November or December year-end to use the Fund's fiscal year) and (3) certain ordinary income and net capital gains for previous years that were not previously distributed. To avoid application of the excise tax, the Funds intend to make distributions in accordance with calendar year distribution requirements.

Gains or losses on the sale of securities by each Fund will be long-term capital gains or losses if the securities have been held by the Fund for more than twelve months. Gains or losses on the sale of securities held for twelve months or less will be short term capital gains or losses.

Certain options, futures contracts, and options on futures contracts are "section 1256 contracts." Any gains or losses on section 1256 contracts are generally considered 60% long term and 40% short-term capital gains or losses ("60/40"). Also, section 1256 contracts held by each Fund at the end of each taxable year are "marked-to-market" with the result that unrealized gains or losses are treated as though they were realized and the resulting gain or loss is treated as 60/40 gain or loss.

Hedging transactions undertaken by each Fund may result in "straddles" for U.S. federal income tax purposes. The straddle rules may affect the character of gains (or losses) realized by a Fund. In addition, losses realized by each Fund on positions that are part of a straddle may be deferred under the straddle rules, rather than being taken into account in calculating the taxable income for the taxable year in which such losses are realized. Further, each Fund may be required to capitalize, rather than deduct currently, any interest expense on indebtedness incurred or continued to purchase or carry any positions that are part of a straddle. Each Fund may make one or more of the elections available under the Code which are applicable to straddles. If a Fund makes any of the elections, the amount, character, and timing of the recognition of gains or losses from the affected straddle positions will be determined under rules that vary according to the election(s) made. The rules applicable under certain of the elections accelerate the recognition of gains or losses from the affected straddle positions. Because application of the straddle rules may affect the character of gains or losses, defer losses, and/or accelerate the recognition of gains or losses from the affected straddle positions, and require the capitalization of interest expense, the amount which must be distributed to shareholders, and which will be taxed to shareholders as ordinary income or long-term capital gain, as described below, may be increased or decreased substantially as compared to a fund that did not engage in such hedging transactions.

Distributions

Except as provided below, distributions of investment company taxable income, whether paid in cash or reinvested in the applicable Fund's shares, are taxable to a U.S. shareholder as ordinary income. Distributions that are properly reported by a Fund and are attributable to qualified dividends received by the Fund from certain U.S. and non-U.S. corporations are taxable to U.S. shareholders who are individuals at a reduced rate, provided that certain holding period and other requirements are met. Properly reported dividends paid by the Fund to a corporate shareholder, to the extent such dividends are attributable to dividends received by the Fund from U.S. corporations, may, subject to limitations, be eligible for the dividends received deduction. In addition, properly reported dividends paid by a Fund that are attributable to its "qualified REIT dividends" (generally, ordinary income dividends paid by a real estate investment trust for U.S. federal income tax purposes, not including capital gain dividends or dividends treated as qualified dividend income) may be eligible for the 20% deduction described in Section 199A of the Code in the case of non-corporate U.S. shareholders, provided that certain holding period and other requirements are met by the Fund and by such shareholder.

Properly reported distributions of net capital gain (which consist of the excess of net long-term capital gains over net short-term capital losses) ("capital gain dividends"), if any, are taxable as long-term capital gain, whether paid in cash or in shares and regardless of how long the shareholder has held its Fund shares, and are not eligible for the dividends received deduction. The current distribution policy of the Equity Income Fund and the Focused Growth and Income Fund is to pay a fixed amount on a monthly basis for each class of shares. This policy may restrict the Equity Income Fund's and the Focused Growth and Income Fund's ability to pay out all its net long-term capital gains as a capital gain dividend. Shareholders receiving distributions in the form of newly issued shares will have a basis in such shares of each Fund equal to the fair market value of such shares on the distribution date. If the NAV of shares is reduced below a shareholder's cost as a result of a distribution by the Fund, such distribution may be taxable even though economically it represents a return of invested capital. The price of shares purchased at any time may reflect the amount of a forthcoming distribution. Those purchasing shares just prior to the record date for a distribution will receive a distribution which will be taxable to them, even though the distribution represents in part a return of invested capital.

If a Fund's distributions exceed the Fund's current and accumulated earnings and profits, the excess will be treated as a tax-free return of capital to the extent of the shareholder's basis in its shares (reducing the basis accordingly). Amounts exceeding the shareholder's basis will be treated as gain from the sale or exchange of the shares (capital gain, if the shareholder holds its shares as capital assets).

Disposition of Shares

Upon a redemption, sale or exchange of shares, a shareholder will realize a taxable gain or loss depending upon the basis in the shares. Such gain or loss will be long term, if the shareholder's holding period for the shares is more than twelve months. Any loss realized on a redemption, sale or exchange will be disallowed to the extent the shares disposed of are replaced (including through reinvestment of dividends of the same Fund) within a sixty-one-day period beginning thirty days before and ending thirty days after the date the shares are disposed of. In such case, the basis of the shares acquired will be adjusted to reflect the disallowed loss.

Any loss realized by a shareholder on the redemption, sale, or exchange of Fund shares held by the shareholder for six months or less will be treated for tax purposes as a long-term capital loss to the extent of any distributions of net capital gains (including amounts credited as an undistributed capital gain dividend) received by the shareholder with respect to such shares.

An exchange from one share class within a Fund to another share class within the same Fund is not a taxable transaction, provided that such classes have identical rights with respect to the Fund assets.

If a shareholder (i) incurs a sales load charge in acquiring shares in a Fund and, by reason of incurring such charge or acquiring the shares, acquires the right to acquire shares of one or more regulated investment companies without the payment of a load charge or with the payment of a reduced load charge (a "reinvestment right"), and (ii) disposes of the Fund shares before the 91st day after the date on which the shares were acquired and subsequently acquires shares in the Fund or in another regulated investment company before January 31 of the calendar year following the year of such disposition whereby the otherwise applicable load charge is reduced by reason of the reinvestment right, then the original load charge will not be taken into account for the purposes of determining the shareholder's gain or loss on the disposition (to the extent the original load charge does not exceed the reduction in the subsequent load charge) subject to certain exceptions. To the extent such charge is not taken into account in determining the amount of gain or loss, the charge will be treated as incurred in connection with the subsequently acquired shares and will have a corresponding effect on the shareholder's basis in such shares.

Medicare Tax

Certain U.S. holders who are individuals, estates or trusts and whose income exceeds certain thresholds will be required to pay a 3.8% Medicare tax on all or a portion of their "net investment income," which includes dividends received from a Fund and capital gains from the sale or other disposition of a Fund's stock.

Backup Withholding

The Company generally will be required to withhold U.S. federal income tax on all taxable distributions payable to shareholders who fail to provide their correct taxpayer identification number or Social Security number or to make required certifications, or who have been notified by the IRS that they are subject to backup withholding. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability.

Other Taxes

Dividends, distributions and redemption proceeds may also be subject to additional state, local, and foreign taxes depending on each shareholder's particular situation. Non-U.S. shareholders may be subject to U.S. tax rules that differ significantly from those summarized above, including the likelihood that ordinary income dividends distributed to them will be subject to withholding of U.S. tax at a rate of 30% (or a lower treaty rate, if applicable), or that distributions will be subject to withholding of U.S. tax at a rate of 30% in the case of certain non-U.S. entities that fail to satisfy applicable reporting and certification requirements regarding their owners and/or account holders.

If a shareholder recognizes a loss with respect to a Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Foreign Withholding Taxes

Income received by the Funds from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties between certain countries and the United States may reduce or eliminate such taxes. It is impossible to determine the rate of foreign tax in advance since the amount of the Funds' assets to be invested in various countries is not known. The Funds do not

expect that they will be eligible to elect to “pass through” to their shareholders the ability to use the foreign tax deduction or foreign tax credit for foreign taxes paid by the Funds with respect to qualifying taxes.

Special Federal Income Tax Rules

Certain of the Funds’ investment practices are subject to special and complex federal income tax provisions that may, among other things, (i) disallow, suspend, or otherwise limit the allowance of certain losses or deductions, (ii) convert lower taxed long-term capital gain or qualified dividend income, or qualified REIT dividends, into higher taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur and (vi) adversely alter the characterization of certain complex financial transactions. Each Fund will monitor its transactions and may, but is not required to, make certain tax elections in order to mitigate the effect of these provisions.

INVESTMENT PERFORMANCE INFORMATION

From time to time, each Fund may quote its performance in advertisements or in reports and other communications to shareholders, computed according to formulas prescribed by the SEC.

Each Fund’s performance will vary from time to time depending upon market conditions, the composition of its portfolio, and its operating expenses. Consequently, any given performance quotation should not be considered representative of each Fund’s performance for any specified period in the future. In addition, when considering “average” total return figures for periods longer than one year, it is important to note that each Fund’s annual total returns for any one year in the period might have been greater or less than the average for the entire period. In addition, because the performance will fluctuate, it may not provide a basis for comparing an investment in each Fund with certain bank deposits or other investments that pay a fixed yield for a stated period of time. Investors comparing each Fund’s performance with that of other mutual funds should give consideration to the quality and maturity of the respective investment companies’ portfolio securities.

In reports or other communications to shareholders or in advertising material, each Fund may compare its performance with that of other mutual funds as listed in the rankings prepared by Lipper Inc., Morningstar, Inc., or similar independent services that monitor the performance of mutual funds or other industry or financial publications. It is important to note that the total return figures are based on historical results and are not intended to indicate future performance. Shareholders may make inquiries regarding each Fund’s total return figures to the Distributor.

In its reports, investor communications or advertisements, each Fund may also include: (i) descriptions and updates concerning its strategies and portfolio investments; (ii) its goals, risk factors, and expenses compared with other mutual funds; (iii) analysis of its investments by industry, country, credit quality, and other characteristics; (iv) a discussion of the risk/return continuum relating to different investments; (v) the potential impact of adding foreign stocks to a domestic portfolio; (vi) the general biography or work experience of the portfolio manager of the Fund; (vii) portfolio manager commentary or market updates; (viii) discussion of macroeconomic factors affecting the Fund and its investments; and (ix) other information of interest to investors.

In connection with communicating its yield or total return to current or prospective shareholders, the Fund may also compare these figures to the performance of other mutual funds tracked by mutual fund rating services or to other unmanaged indexes which may assume reinvestment of dividends but generally do not reflect deductions for administrative and management costs.

DESCRIPTION OF THE FUNDS’ SHARES

Description of the Funds’ Shares

Each Fund is a series of Gabelli Equity Series Funds, Inc., which was incorporated in Maryland on July 25, 1991. The authorized capital stock consists of one billion three hundred fifty million shares of stock having a par value of one tenth of one cent (\$0.001) per share. The Company is not required, and does not intend, to hold regular annual shareholder meetings, but may hold special meetings for consideration of proposals requiring shareholder approval, such as changing fundamental policies or upon the written request of 10% of the Funds’ shares to replace its Directors. The Company’s Board is authorized to classify or reclassify the unissued shares of the Company to one or more classes of a separate series of stock, each series representing a separate, additional portfolio. The Board currently has authorized the division of the unissued shares into four series each having a separate portfolio. The Funds offer Class AAA, Class A, Class C, and Class I Shares. Shares of all series will have identical voting rights, except where by law, certain matters must be approved by the requisite proportion of the shares of the affected series. Each share of any class of each series of shares when issued has equal dividend, liquidation (see “Redemption of Shares”), and voting rights within the class for which it was issued and each fractional share has those rights in proportion to the percentage that the fractional share represents of a whole share. Shares will be voted in the aggregate except where otherwise required by law and except that each class of each series will vote separately on certain matters pertaining to its distribution and shareholder servicing arrangements.

There are no preemptive rights in connection with any shares of the Funds. All shares, when issued in accordance with the terms of the offering, will be fully paid and nonassessable. Shares will be redeemed at NAV per share, at the option of the shareholder and may be redeemed at the option of the Company under conditions determined by the Board in connection with a liquidation, reorganization or otherwise.

The Company sends semiannual and annual reports to all shareholders which include lists of portfolio securities and each Fund's financial statements, which will be audited annually. Unless a shareholder otherwise specifically requests in writing, a Fund may send a single copy of prospectus and reports to shareholders to all accounts at the same address who have the same last name or who the Company reasonably believes are members of the same family. The shares of each Fund have noncumulative voting rights which means that the holders of more than 50% of the shares can elect 100% of the Directors if the holders choose to do so, and, in that event, the holders of the remaining shares will not be able to elect any person or persons to the Board. Unless specifically requested by an investor who is a shareholder of record, each of the Funds do not issue certificates evidencing shares.

Corporate Matters

The Company reserves the right to create and issue a number of series shares, in which case the shares of each series would participate equally in the earnings, dividends, and assets of the particular series and would vote separately to approve management agreements or changes in investment policies, but shares of all series would vote together in the election or selection of Directors, principal underwriters and auditors.

Upon liquidation of the Company or any series, shareholders of the affected series would be entitled to share pro rata in the net assets of their respective series available for distribution to such shareholders.

Shareholder Approval

Other than elections of Directors, which is by plurality, any matter for which shareholder approval is required by the 1940 Act requires the affirmative vote of at least a majority, as defined by the 1940 Act, of the outstanding voting securities of a Fund or the Company at a meeting called for the purpose of considering such approval.

Information for Shareholders

All shareholder inquiries regarding administrative procedures including the purchase and redemption of shares should be directed to the Distributor, G. distributors, LLC, One Corporate Center, Rye, New York 10580-1422. For assistance, call 800-GABELLI (800-422-3554) or through the internet at www.gabelli.com.

The Company will send unaudited reports at least semiannually, and annual reports containing audited financial statements, to all of its shareholders.

FINANCIAL STATEMENTS

Each Fund's Financial Statements for the fiscal year ended September 30, 2025, including the reports of EY, independent registered public accounting firm, are incorporated herein by reference to each Fund's 2025 [Annual Report](#) to Shareholders. Each Fund's Annual Report and Semiannual Report is available upon request and without charge by calling 800-GABELLI (800-422-3554) or through the Internet at www.gabelli.com. EY provides audit services, tax return preparation and assistance, and other assurance services in connection with certain SEC filings.

APPENDIX A

DESCRIPTION OF CORPORATE DEBT RATINGS MOODY'S INVESTORS SERVICE, INC. ("Moody's")

- Aaa: Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.
- Aa: Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
- A: Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
- Baa: Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.
- Ba: Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.
- B: Obligations rated B are considered speculative and are subject to very high credit risk.
- Caa: Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.
- Ca: Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
- C: Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.
- NR: NR is assigned to an unrated issuer, obligation and/or program.

Should no rating be assigned, the reason may be one of the following:

1. An application for rating was not received or accepted.
2. The issue or issuer belongs to a group of securities that are not rated as a matter of policy.
3. There is a lack of essential data pertaining to the issue or issuer.
4. The issue was privately placed, in which case the rating is not published in Moody's publications.

Suspension or withdrawal may occur if new and material circumstances arise, the effects of which preclude satisfactory analysis; if there is no longer available reasonable up-to-date data to permit a judgment to be formed; if a bond is called for redemption; or for other reasons.

Note: Moody's appends numerical modifiers, 1, 2, and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of its generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.

STANDARD & POOR'S RATINGS SERVICES ("S&P") Investment Grade

- AAA: An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.
- AA: An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.
- A: An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.
- BBB: An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Speculative Grade

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

- BB: An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.
- B: An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.
- CCC: An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.
- CC: An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred, but Standard & Poor's expects default to be a virtual certainty, regardless of the anticipated time to default.
- C: An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.
- D: An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due unless Standard & Poor's believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.
- N: This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

* The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

Description of S&P and Moody's commercial paper ratings:

The designation A-1 by S&P indicates that the degree of safety regarding timely payment is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong. Capacity for timely payment on issues with an A-2 designation is satisfactory. However, the relative degree of safety is not as high as for issues designated A-1.

The rating Prime-1 (P-1) is the highest commercial paper rating assigned by Moody's. Issuers of P-1 paper must have a superior ability to repay short-term debt obligations, and ordinarily will be evidenced by leading market positions in well established industries, high rates of return of funds employed, conservative capitalization structures with moderate reliance on debt and ample asset protection, broad margins in earnings coverage of fixed financial charges and high internal cash generation, and well established access to a range of financial markets and assured sources of alternate liquidity.
