PROSPECTUS DATED

April 30, 2026

The Securities and Exchange Commission has not approved or disapproved the shares described in this prospectus or determined whether this prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

Gabelli Growth Innovators ETF
(the “Growth Innovators Fund” or the “Fund”)

Investment Objective

The Fund’s primary investment objective is to seek to provide capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees.	0.90%
Total Annual Fund Operating Expenses ⁽¹⁾	0.90%
Less Fee Waiver and/or Expenses Reimbursement ⁽²⁾	(0.90)%
Total Annual Fund Operating Expenses After Fee Waiver	<u>0.00%</u>

- (1) Expenses have been restated to reflect the current year’s expected expenses.
- (2) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% on the first \$25 million in net assets. The fee waiver agreement for the Growth Innovators Fund will continue for at least one year from the effective date of this Prospectus. This agreement may be terminated only by, or with the consent of, the Fund’s Board of Trustees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$0	\$202	\$420	\$1,047

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Growth Innovators Fund’s portfolio turnover rate was 6% of the average value of its portfolio.

Principal Investment Strategies

The Fund will primarily invest in common stocks of companies that are relevant to the Fund’s investment theme of innovation. The Adviser defines “innovation” as the introduction of new technologies, products or services that redefines how businesses operate. The Fund seeks to invest in companies whose prospects for earnings growth remain undervalued. The Fund may also invest in foreign securities by investing in American Depositary Receipts. The Adviser will sell any Fund investments that lose their perceived value when compared with other investment alternatives in the judgment of the portfolio managers.

The Adviser uses fundamental security analysis to develop earnings forecasts for companies and to identify investment opportunities. The Adviser bases its analysis on general economic and industry data provided by the U.S. Government, various trade associations and other sources, and published corporate financial data such as annual reports, 10-Ks, and quarterly statements as well as direct interviews with company management. Generally, the Adviser makes investment decisions first by looking at individual companies and then by scrutinizing their growth prospects in relation to their industries and the overall economy. The Adviser seeks to invest in companies with high future earnings potential relative to their current market valuations.

The Fund’s assets will be invested primarily in a broad range of readily marketable equity securities consisting of U.S. exchange-listed common stock and preferred stock. The Fund may invest in companies without regard to market capitalization. Many of these common stocks will not pay dividends; instead, stocks will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer’s management, general market conditions, the forecasts for the issuer’s industry, and the value of the issuer’s assets. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek both growth of capital and some income
- you believe that the market will favor growth over value stocks over the long-term
- you wish to include a growth strategy as a portion of your overall investments

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward

or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.

- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company's particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Growth Stock Risk.** Securities of growth companies may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks that can cushion stock prices in a falling market.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities

to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.

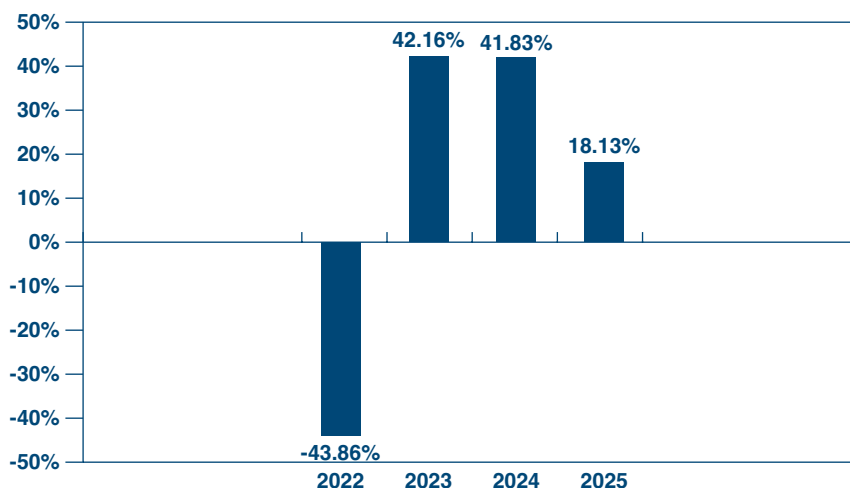

- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares.

- **Technology Sector Risk.** Technology companies, may have limited product lines, markets, financial resources or personnel. Technology companies typically face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights. Companies in the technology sector are facing increased government and regulatory scrutiny and may be subject to adverse government or regulatory action.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. (“NYSE Arca”) may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The bar chart and table that follow provide an indication of the risk of investing in the Growth Innovators Fund by showing changes in the Growth Innovators Fund’s performance from year to year and by showing how the Growth Innovators Fund’s average annual returns compared with those of a broad-based securities market index and an additional index that has investment characteristics similar to those of the Growth Innovators Fund. As with all mutual funds, the Growth Innovators Fund’s past performance (before and after taxes) does not predict how the Growth Innovators Fund will perform in the future. Updated information on the Growth Innovators Fund’s results can be obtained by visiting www.gabelli.com.

GROWTH INNOVATORS FUND
(Total returns for the Year Ended December 31)

During the calendar years shown in the bar chart, the highest return for a quarter was 19.94% (quarter ended March 31, 2024) and the lowest return for a quarter was (31.27)% (quarter ended June 30, 2022).

<u>Average Annual Total Returns (for the years ended December 31, 2025, with the maximum sales charges, if applicable)</u>	<u>Past One Year</u>	<u>Since Inception (February 12, 2021)</u>
Growth Innovators Fund		
Return Before Taxes	18.13%	7.37%
Return After Taxes on Distributions	17.93%	7.34%
Return After Taxes on Distributions and Sale of Fund Shares	10.74%	5.78%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	17.88%	13.72%
Nasdaq Composite Index (reflects no deduction for fees, expenses or taxes)	21.14%	11.73%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the “Return After Taxes on Distributions and Sale of Fund Shares” may be greater than “Return Before Taxes” because the investor is assumed to be able to use the capital loss from the sale of Fund shares to offset other taxable gains. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts, including “Roth” IRAs and SEP IRAs (collectively, “IRAs”).

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Howard F. Ward, CFA, portfolio manager of the Adviser and Chief Investment Officer of Growth Products for GAMCO Investors, Inc., has served as portfolio manager of the Fund since inception. Mr. John Belton, CFA, portfolio manager of the Adviser, has served as a portfolio manager of the Fund since June 1, 2024.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

**Gabelli Love Our Planet & People ETF
(the “Love Our Planet Fund” or the “Fund”)**

Investment Objective

The Fund’s investment objective is capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.90%
Other Expenses ⁽¹⁾	<u>0.00%</u>
Total Annual Fund Operating Expenses ⁽²⁾	<u>0.90%</u>

- (1) Other Expenses have been restated to reflect estimated amounts for the current fiscal year.
- (2) The Adviser has voluntarily agreed to waive the Fund’s management fee of 0.90% on the first \$100 million in net assets through the fiscal year ending December 31, 2026.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$92	\$288	\$500	\$1,110

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Love Our Planet Fund’s portfolio turnover rate was 14% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its objective by investing substantially all, and in any case no less than 80%, of its assets in U.S. exchange-listed common and preferred stocks of companies that meet the Fund’s guidelines for sustainability at the time of investment. The Fund may also invest in foreign securities by investing in American Depositary Receipts. Under normal market conditions, the Fund invests its assets in stocks that are listed on a national securities exchange or similar market, such as the National Market System of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Fund focuses on investments in companies whose securities are trading at a material discount to their private market value (“PMV”). PMV is the value the Adviser believes informed investors would be willing to pay for a company.

Sustainability Criteria. The Fund combines a differentiated, value-oriented investment philosophy with consideration of certain factors used to deliver returns in a manner that promotes environmental sustainability. In determining the sustainability factors of a particular company, the investment team looks for companies that, among other actions, have initiated programs to reduce the carbon footprint and/or waste profile of their products, services or operations or that produce goods or services that promote attributes such as energy and water conservation, recycling, the reduction of greenhouse gases and harmful chemicals and sustainable agriculture and clean-label food. The Fund relies primarily on proprietary research conducted by the Adviser to reach a judgement on the sustainability of each investment candidate but may also employ third-party data services. Pursuant to the guidelines, the Fund will not invest in publicly traded fossil fuel (coal, oil, and gas) companies, or in companies that derive more than 10% of their revenues from the following areas: tobacco, cannabis, alcohol, gambling, and defense/weapons production.

After identifying companies that satisfy these criteria, the Adviser then will invest in securities of companies that the Adviser believes are trading at a material discount to PMV. The Adviser will monitor each holding on a regular basis to ensure its compliance with the Fund’s guidelines. Securities that no longer meet these guidelines will be sold within a reasonable period of time after the Adviser makes such a determination. Securities may also be sold if the Adviser believes the securities no longer appear to be underpriced relative to their PMV, or if there is a change to an underlying industry or company that the Adviser believes may negatively affect the value of such securities.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek capital appreciation
- you want exposure to equity investments in companies that meet the Fund’s socially responsible guidelines
- you seek long-term growth of capital

The Fund’s share price will fluctuate with changes in the market value of the Fund’s portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund’s website, www.gabelli.com.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. “Authorized Participants” are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund’s distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund’s net asset value (“NAV”) and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. This adverse effect on liquidity for the Fund’s shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund’s shares and the underlying value of those shares.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund’s shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large

percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.

- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company's particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities.

In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.

- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares.

- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Sector Risk.** Although the Fund does not employ a sector focus, its exposure, from time to time, to specific sectors will increase based on the Adviser's perception of available investment opportunities. If the Fund focuses on a particular sector, the Fund may face an increased risk that the value of its portfolio will decrease because of events disproportionately affecting that sector. Furthermore, investments in particular sectors may be more volatile than the broader market as a whole.
- **Socially Responsible Investment Risk.** The application of the Adviser's socially responsible criteria will affect the Fund's exposure to certain issuers, industries, sectors, regions, and countries and may impact the relative financial performance of the Fund — positively or negatively — depending on whether such investments are in or out of favor.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The bar chart and table that follow provide an indication of the risk of investing in the Love Our Planet Fund by showing changes in the Love Our Planet Fund's performance from year to year and by showing how the Love Our Planet Fund's average annual returns for one year, five years, and ten years, if applicable, compared with those of a broad-based securities market index. As with all mutual funds, the Love Our Planet Fund's past performance (before and after taxes) does not predict how the Love Our Planet Fund will perform in the future. Updated information on the Love Our Planet Fund's results can be obtained by visiting www.gabelli.com.

LOVE OUR PLANET FUND
(Total returns for the Year Ended December 31)

During the calendar years shown in the bar chart, the highest return for a quarter was 9.38% (quarter ended December 31, 2022) and the lowest return for a quarter was (15.27)% (quarter ended June 30, 2022).

Average Annual Total Returns (for the years ended December 31, 2025, with the maximum sales charges, if applicable)	Past One Year	Since Inception (January 29, 2021)
Love Our Planet Fund		
Return Before Taxes	22.30%	7.57%
Return After Taxes on Distributions	21.89%	6.90%
Return After Taxes on Distributions and Sale of Fund Shares	13.20%	5.63%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	17.88%	14.56%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the “Return After Taxes on Distributions and Sale of Fund Shares” may be greater than “Return Before Taxes” because the investor is assumed to be able to use the capital loss from the sale of Fund shares to offset other taxable gains. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401 (k) plans or individual retirement accounts, including “Roth” IRAs and SEP IRAs (collectively, “IRAs”).

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Manager. Mr. Christopher J. Marangi, President and Co-Chief Investment Officer for the Value team of GAMCO Investors, Inc., has served as a portfolio manager of the Fund since its inception.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Gabelli Global Technology Leaders ETF
(formerly, Gabelli Automation ETF)
(the “Global Technology Leaders Fund” or the “Fund”)

Investment Objective

The Fund seeks high total return consistent with capital preservation, comprised primarily of current income and secondarily of capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.90%
Total Annual Fund Operating Expenses ⁽¹⁾	0.90%
Less Fee Waiver and/or Expense Reimbursement ⁽²⁾	(0.90)%
Total Annual Fund Operating Expenses After Fee Waiver	<u>0.00%</u>

(1) Expenses have been restated to reflect the current year’s expected expenses.

(2) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% on the first \$25 million in net assets. The fee waiver agreement for the Global Technology Leaders Fund will continue for at least one year following the effective date of this Prospectus. This agreement may be terminated only by, or with the consent of, the Fund’s Board of Trustees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$0	\$202	\$420	\$1,047

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Global Technology Leader Fund’s portfolio turnover rate was 37% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively managed exchange-traded fund (“ETF”). Under normal market conditions, the Fund invests at least 80% of the value of its net assets in the securities of companies principally engaged in the group of industries comprising the technology sector. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the group of industries comprising the technology sector. The Fund invests primarily in common stocks of foreign and domestic small capitalization, mid capitalization, and large capitalization issuers. As a “global” fund, the Fund invests in securities of issuers, or related investments thereof, located in at least three countries outside of the U.S., and at least 40% of the Fund’s total net assets are invested in securities of non-U.S. issuers or, if market conditions are not favorable, the Fund will invest at least 25% of the Fund’s assets outside the U.S. The Fund will favor investing in companies that the Adviser believes possess market leadership and competitive advantages. The Fund may invest in the equity securities of such companies, such as common stock, or preferred stock of such companies in accordance with the foregoing 80% policy. The Fund may also invest in foreign securities, including, but not limited to: (i) direct investments in securities of foreign issuers principally located in Japan, the United Kingdom, and Europe; and (ii) investments in American Depositary Receipts that represent indirect investments in securities of foreign issuers. The Fund may invest in companies without regard to market capitalization.

The Fund considers a company to be principally engaged in the group of industries comprising the technology sector if it devotes 50% of its assets to, or derives 50% of its revenues from, hardware, software and related services, data storage, and peripherals; communications services and equipment; semiconductors; and electronic equipment, instruments and components.

The Fund invests in equity securities of companies that the Adviser believes are leaders within their respective industries as demonstrated by the ability to deliver high relative returns on invested capital and proprietary technology, the proficiency to leverage technological expertise into a competitive advantage, and/or a proven track record of research and development resulting in new products, services, or technologies.

The Adviser’s investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value (“PMV”). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning that may surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management,

sale or spin-off of a division, or the development of a profitable new business. The Adviser expects to seek to sell any Fund investments that lose their perceived value relative to other investments, which could occur because of, among other things, a security reaching a predetermined price target, a change to a company's fundamentals that make the risk/reward profile unattractive, or a need to improve the overall risk/reward profile of the Fund.

The Fund may purchase or sell options on individual securities as well as on indices of securities as a means of achieving additional return on or hedging the value of the Fund's portfolio.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek growth of capital
- you believe that the market will favor value over growth stocks over the long-term
- you wish to include a value strategy as a portion of your overall investments

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the ETF involves the following risks:

- **Equity Risk.** The Fund will invest in equity securities of companies principally engaged in the group of industries comprising the technology sector, and is thus exposed to equity risk. Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause an equity security to be worth less than it was worth when it was purchased by the Fund. Because the value of equity securities, and thus shares of the Fund, could decline, you could lose money. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Concentration Risk.** The Fund concentrates its assets (i.e., invests 25% or more of its net assets) in securities of companies in the technology sector, and, as a result, the Fund may be subject to greater volatility with respect to its portfolio securities than the Fund that is more broadly diversified. Accordingly, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities.

- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. To the extent that all or a portion of the Fund's underlying securities trade in a market that is closed when the market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such security during the Fund's domestic trading day. In turn, this could lead to differences between the market price of the Fund's shares and the underlying value of its shares.

- **Risk of Investing in Japan.** The Japanese economy may be subject to considerable degrees of economic, political and social instability, which could have a negative impact on the companies in which the Fund invests. Japan's economic growth is heavily dependent on international trade, government support of the financial services sector, and consistent government policy supporting its export market. Since 2000, Japan's economic growth rate has generally remained low relative to other advanced economies, and it may remain low in the future. In addition, Japan is subject to the risk of natural disasters, such as earthquakes, volcanic eruptions, typhoons and tsunamis, which could negatively affect the Fund and its investments. Japan's relations with its bordering countries have at times been strained, and strained relations may cause uncertainty in the Japanese markets and adversely affect the overall Japanese economy.
- **Risk of Investing in Europe.** The Fund may be more exposed to the economic and political risks of Europe and of the European countries in which it invests than funds whose investments are more geographically diversified. Adverse economic and political events in Europe may cause the Fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. The Fund makes investments in securities of issuers that are domiciled in, or have significant operations in, member states of the European Union (the "EU") that are subject to economic and monetary controls that can adversely affect the Fund's investments. The European financial markets have experienced volatility and adverse trends in recent years and these events have adversely affected the exchange rate of the Euro and may continue to significantly affect other European countries.
- **Risk of Investing in the United Kingdom.** Investments in United Kingdom ("U.K.") companies may subject the Fund and its shareholders to regulatory, political, currency, security, and economic risks specific to the U.K. The U.K. has one of the largest economies in Europe, and the U.S. and other European countries are substantial trading partners of the U.K. As a result, the U.K.'s economy may be impacted by changes to the economic condition of the U.S. and other European countries. Following the U.K. officially withdrawing from the EU, commonly referred to as "Brexit," certain trading matters between the U.K. and the EU remain unresolved, including with respect to financial services. Continuing uncertainty regarding the U.K.'s relationship with the EU could have an adverse impact on the economy and currency of the U.K. Other risks to the U.K.'s economic growth and competitiveness include high public debt and relatively low productivity.
- **Technology Sector Risk.** Technology companies may have limited product lines, markets, financial resources, or personnel. Technology companies typically face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights. Companies in the technology sector are facing increased government and regulatory scrutiny and may be subject to adverse government or regulatory action.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.

- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Large Capitalization Companies Risk.** Large capitalization companies generally experience slower rates of growth in earnings per share than do mid and small capitalization companies.
- **Small- and Mid-Capitalization Companies Risk.** Investing in securities of small and mid-capitalization companies may involve greater risks than investing in larger, more established issuers. Small and mid-capitalization companies may be less well established and may have a more highly leveraged capital structure, less liquidity, a smaller investor base, limited product lines, greater dependence on a few customers, or a few key personnel and similar factors that can make their business and stock market performance susceptible to greater fluctuation and volatility.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.
- **Management Risk.** If the portfolio manager is incorrect in his assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations

for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.

- **Non-Diversification Risk.** As a non-diversified Fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund.
- **Options Risk.** The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio manager to forecast market movements correctly. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options.

- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.

Performance

The bar chart and table that follow provide an indication of the risk of investing in the Global Technology Leaders Fund by showing changes in the Global Technology Leaders Fund's performance from year to year and by showing how the Global Technology Leaders Fund's average annual returns for one year, five years, and ten years, if applicable, compared with those of a broad-based securities market index. Prior to December 15, 2025, the Fund's principal investment strategy was to invest at least 80% of the Fund's assets in automation companies. Accordingly, performance prior to December 15, 2025 was attributable to the Fund's prior investment strategy. As with all mutual funds, the Global Technology Leaders Fund's past performance (before and after taxes) does not predict how the Global Technology Leaders Fund will perform in the future. Updated information on the Global Technology Leaders Fund's results can be obtained by visiting www.gabelli.com.

GLOBAL TECHNOLOGY LEADERS FUND
(Total returns for the Year Ended December 31)

During the calendar years shown in the bar chart, the highest return for a quarter was 8.51% (quarter ended December 31, 2023) and the lowest return for a quarter was (3.38)% (quarter ended June 30, 2024).

Average Annual Total Returns (for the years ended December 31, 2025, with the maximum sales charges, if applicable)	Past One Year	Since Inception (January 3, 2022)
Return Before Taxes	19.78%	7.24%
Return After Taxes On Distributions	19.27%	6.87%
Return After Taxes on Distributions and Sale of Fund Shares	11.71%	5.46%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	17.88%	11.53%

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Manager. Mr. Hendi Susanto, Vice President of Gabelli Funds, LLC, has served as portfolio manager of the Fund since its inception.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Gabelli Commercial Aerospace and Defense ETF
(the “Aerospace and Defense Fund” or the “Fund”)

Investment Objective

The Fund seeks a high level of total return on its assets with an emphasis on income.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees.	<u>0.90%</u>
Total Annual Fund Operating Expenses ⁽¹⁾	0.90%
Less Fee Waiver and/or Expense Reimbursement ⁽²⁾	<u>(0.90)%</u>
Total Annual Fund Operating Expenses After Fee Waiver	<u>0.00%</u>

(1) Expenses have been restated to reflect the current year’s expected expenses.

(2) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% on the first \$25 million in net assets. The fee waiver agreement for the Aerospace and Defense Fund will continue for at least one year following the effective date of this Prospectus. This agreement may be terminated only by, or with the consent of, the Fund’s Board of Trustees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$0	\$199	\$415	\$1,035

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Aerospace and Defense Fund’s portfolio turnover rate was 9% of the average value of its portfolio.

Principal Investment Strategies

The Fund will seek to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets in income producing equity securities in the aerospace and defense sectors. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the group of industries comprising the aerospace and defense sectors. Aerospace companies include manufacturers, assemblers and distributors of aircraft and aircraft parts. Defense companies include producers of components and equipment for the defense industry, such as military aircraft, radar equipment and weapons. The Fund defines an “aerospace and defense” company as a company that derives at least 50% of its revenues from, or devotes 50% of its assets to, aerospace and/or defense related activities or devotes 50% of its assets to, aerospace and/or defense related activities. Income producing equity securities (e.g., dividend paying securities) include U.S. exchange-listed common stock and preferred stock. The Fund may invest in companies without regard to market capitalization. The Fund may also invest in foreign securities by investing in American Depositary Receipts. In making stock selections, the Adviser looks for securities that have a better yield than the average of the Standard and Poor’s 500 Index (the “S&P 500 Index”), as well as capital gains potential. In selecting investments for the Fund, the Adviser focuses on issuers that:

- have strong free cash flow and pay regular dividends;
- have potential for long-term earnings per share growth;
- may be subject to a value catalyst, such as industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business are well managed; and
- will benefit from sustainable long-term economic dynamics, such as globalization of an issuer’s industry or an issuer’s increased focus on productivity or enhancement of services

The Adviser also believes preferred stock of selected companies offer opportunities for capital appreciation as well as periodic income and may invest a portion of the Fund’s assets in such securities. This is particularly true in the case of companies that have performed below expectations. If a company’s performance has been poor enough, its preferred stock will trade more like common stock than like a fixed income security and may result in above average appreciation if performance improves. This leads to the possibility of capital appreciation if the price of the common stock recovers.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you are seeking income as well as capital appreciation

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Aerospace Industry Risk.** Government aerospace regulation and spending policies can significantly affect the aerospace industry because many companies involved in the aerospace industry rely to a large extent on U.S. (and other) Government demand for their products and services. There are significant inherent risks in government contracting, which could have a material adverse effect on the business, financial condition and results of operations of industry participants. Government spending in aerospace generally is not correlated with any economic cycle, but rather, on the cycle of general political support for this type of spending. However, there is no assurance that future levels of aerospace and defense spending will increase or that levels of aerospace and defense spending will not decrease in the future. In addition, the aerospace industry in particular has recently been affected by adverse economic conditions and consolidation within the industry. Furthermore, competition in the airline industry continues to increase as a result of airline deregulation.
- **Defense Industry Risk.** Companies in the defense industry are subject to numerous risks, including fierce competition, consolidation, adverse political, economic and governmental developments (both in the U.S. and abroad), compliance with varying regulation across international markets, substantial research and development costs, cuts in government funding, product and technology obsolescence, limited numbers of potential customers and decreased demand for new equipment. Since defense companies derive significant revenue from government contracts, they face a number of specific risks that may adversely affect a company's financial condition and outlook. The government may terminate a contract with an issuer as a result of an issuer's default, resulting in possible issuer liability to the government. The government may also terminate a contract for its own convenience, which may lead to difficulty for the issuer in recovering costs incurred prior to termination. Such contracts may also be modified or terminated due to changes in congressional funding levels. Government contractors are also subject to stringent routine audits and reviews, which may lead to significant price adjustments for products and services. The highly competitive bidding environment in which government contractors operate may also reduce the profitability of certain government contracts. Companies involved in the commercial aerospace industry are subject to risks including aircraft order cancellations, excess capacity, cutbacks in profitable business travel, fuel price hikes, labor union settlements, adverse changes in international politics and relations, intense global competition, government regulation and cyclical market patterns.

- **Concentration Risk.** The Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investments more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities and/or other assets of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector, market segment or asset class.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Large Capitalization Companies Risk.** Large capitalization companies generally experience slower rates of growth in earnings per share than do mid and small capitalization companies.
- **Small- and Mid-Capitalization Companies Risk.** Investing in securities of small and mid-capitalization companies may involve greater risks than investing in larger, more established issuers. Small and mid-capitalization companies may be less well established and may have a more highly leveraged capital structure, less liquidity, a smaller investor base, limited product lines, greater dependence on a few customers, or a few key personnel and similar factors that can make their business and stock market performance susceptible to greater fluctuation and volatility.
- **Non-Diversification Risk.** The Fund may invest a large percentage of its assets in securities issued by or representing a small number of issuers. As a result, the Fund's performance may depend on the performance of a small number of issuers.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.

- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will fluctuate, sometimes rapidly and unpredictably, due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.

- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the Adviser is incorrect in its assessment of the investment prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may

be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares.

- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Value Investing Risk.** The Fund invests in "value" stocks. Value investing refers to buying securities that the Adviser believes are out of favor and/or undervalued in comparison to their peers or their prospects for growth. From time to time, "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The bar chart and table that follow provide an indication of the risk of investing in the Commercial Aerospace and Defense Fund by showing changes in the Fund's performance from year to year and by showing how

the Fund’s average annual returns for one year, five years, and ten years, if applicable, compared with those of a broad-based securities market index. Prior to March 10, 2023, the Fund operated under its prior name, the Gabelli Equity Income ETF. The Fund’s prior name reflected its former investment strategy of seeking to attain a high level of total return, with an emphasis on income, through investing at least 80% of its net assets in income producing equity securities. Accordingly, performance prior to March 10, 2023, was attributable to the Fund’s prior investment strategy. As with all mutual funds, the Aerospace and Defense Fund’s past performance (before and after taxes) does not predict how the Fund will perform in the future. Updated information on the Fund’s results can be obtained by visiting www.gabelli.com.

COMMERCIAL AEROSPACE AND DEFENSE FUND
(Total returns for the Year Ended December 31)

During the calendar years shown in the bar chart, the highest return for a quarter was 8.80% (quarter ended March 31, 2024) and the lowest return for a quarter was (6.99)% (quarter ended September 30, 2023).

Average Annual Total Returns (for the years ended December 31, 2025, with the maximum sales charges, if applicable)	Past One Year	Since Inception (January 3, 2023)
Return Before Taxes	39.34%	24.89%
Return After Taxes On Distributions	38.44%	24.24%
Return After Taxes on Distributions and Sale of Fund Shares	23.53%	19.60%
S&P 500 Index	17.88%	23.24%

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Manager. Lieutenant Colonel G. Anthony (Tony) Bancroft, USMCR, has served as the team leader and portfolio manager of the Fund since its inception and commencement of operations on January 3, 2023.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

**Gabelli Financial Services Opportunities ETF
(the “Financial Services Fund” or the “Fund”)**

Investment Objective

The Fund seeks to provide capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.90%
Acquired Fund Fees and Expenses	<u>0.74%</u>
Total Annual Fund Operating Expenses ⁽¹⁾	1.64%
Less Fee Waiver and/or Expense Reimbursement ⁽²⁾	<u>(0.56)%</u>
Total Annual Fund Operating Expenses After Fee Waiver	<u><u>1.08%</u></u>

(1) Expenses have been restated to reflect the current year’s expected expenses.

(2) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% on the first \$25 million in net assets. The fee waiver agreement for the Financial Services Fund will continue for a period of no less than one year from the date of this prospectus. This agreement may be terminated only by, or with the consent of, the Fund’s Board of Trustees (the “Board”).

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$110	\$462	\$838	\$1,895

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Financial Services Fund’s portfolio turnover rate was 31% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of the value of its net assets, in the securities of companies principally engaged in the group of industries comprising the financial services sector. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the group of industries comprising the financial services sector. The Fund may invest in the equity securities of such companies, such as common stock, or preferred stock of such companies in accordance with the foregoing 80% policy. The Fund may also invest in foreign securities, including, but not limited to: (i) direct investments in securities of foreign issuers principally located in the United Kingdom, Europe, the European Union, and Japan; and (ii) investments in American Depositary Receipts that represent indirect investments in securities of foreign issuers. The Fund may invest in companies without regard to market capitalization.

The Fund considers a company to be principally engaged in the group of industries comprising the financial services sector if it devotes a significant portion of its assets to, or derives a significant portion of its revenues from, providing financial services. The Fund considers a company to be principally engaged in the group of industries comprising the financial services sector if it devotes 50% of its assets to, or derives 50% of its revenues from, providing financial services. Such services include but are not limited to the following: commercial, consumer, and specialized banking and financing; asset management; publicly-traded, government sponsored financial enterprises; insurance; accountancy; mortgage REITs; brokerage; securities exchanges and electronic trading platforms; financial data, technology, and analysis; and financial transaction and other financial processing services.

The Investment Company Act of 1940, as amended (the “1940 Act”), restricts the Fund from acquiring the securities of any company that derives more than 15% of its gross revenues from securities related activities, such as a broker, dealer, underwriter or a federally registered investment adviser (a “Securities Related Issuer”), subject to exception. Under Rule 12d3-1 under the 1940 Act, however, the Fund may generally purchase up to 5% of any class of equity securities of a Securities Related Issuer, or up to 10% of the outstanding principal amount of debt securities of a Securities Related Issuer, so long as, in each case, no more than 5% of the Fund’s total assets are invested in the Securities Related Issuer. These limitations are measured at the time of investment. Rule 12d3-1 may operate to limit the size of the Fund’s investment position with respect to one or more Securities Related Issuers. The 1940 Act also restricts the Fund from acquiring any security issued by an insurance company if the Fund owns, or will own as a result of the acquisition, more than 10% of the total outstanding voting stock of the insurance company. The 1940 Act may operate to limit the size of the Fund’s investment position with respect to one or more insurance companies.

The Adviser's investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value ("PMV"). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning that may surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business. The Adviser expects to seek to sell any Fund investments that lose their perceived value relative to other investments, which could occur because of, among other things, a security reaching a predetermined price target, a change to a company's fundamentals that make the risk/reward profile unattractive, or a need to improve the overall risk/reward profile of the Fund.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek capital appreciation
- you believe that the market will favor financial services companies over the long-term

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Equity Risk.** The Fund will invest in equity securities of companies principally engaged in the group of industries comprising the financial services sector, and is thus exposed to equity risk. Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause an equity security to be worth less than it was worth when it was purchased by the Fund. Because the value of equity securities, and thus shares of the Fund, could decline, you could lose money. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty. The value of equity securities of companies in the financial services sector may be adversely affected by, among other things: (i) changes in governmental regulation; (ii) fluctuations in the availability and cost of capital funds on which the profitability of financial services companies is largely dependent; (iii) deterioration of the credit markets; (iv) credit losses resulting from financial difficulties of borrowers; (v) financial losses associated with investment activities; (vi) the risk that any financial services company experiences substantial declines in the valuations of its assets, takes action to raise capital, or ceases operations; (vii) the risk that a market shock or other unexpected market, economic, political, regulatory, or other event might

lead to a sudden decline in the values of most or all companies in the financial services sector; and (viii) the interconnectedness or interdependence among financial services companies, including the risk that the financial distress or failure of one financial services company may materially or adversely affect a number of other financial services companies.

- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Concentration Risk.** The Fund concentrates its assets (i.e., invests 25% or more of its net assets) in securities of companies in the financial services sector, and, as a result, the Fund may be subject to greater volatility with respect to its portfolio securities than the Fund that is more broadly diversified. Accordingly, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.
- **New Fund Risk.** The Fund has a limited operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss. However, the fee waiver in place limits this risk for the periods that such fee waiver is effective.

- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares.
- **Risk of Investing in Europe.** The Fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests than funds whose investments are more geographically diversified. Adverse economic and political events in Europe may cause the Fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. The Fund makes investments in securities of issuers that are domiciled in, or have significant operations in, member states of the European Union (the "EU") that are subject to economic and monetary controls that can adversely affect the Fund's investments. The European financial markets have experienced volatility and adverse trends in recent years and these events have adversely affected the exchange rate of the Euro and may continue to significantly affect other European countries.
- **Risk of Investing in Japan.** The Japanese economy may be subject to considerable degrees of economic, political and social instability, which could have a negative impact on the companies in which the Fund invests. Since 2000, Japan's economic growth rate has generally remained low relative to other advanced economies, and it may remain low in the future. In addition, Japan is subject to the risk of natural disasters, such as earthquakes, volcanic eruptions, typhoons and tsunamis, which could negatively affect the Fund and its investments. Japan's relations with its bordering countries have at times been strained, and strained relations may cause uncertainty in the Japanese markets and adversely affect the overall Japanese economy.
- **Risk of Investing in the United Kingdom.** Investments in United Kingdom ("U.K.") companies may subject the Fund and its shareholders to regulatory, political, currency, security, and economic risks specific to the U.K. The U.K. has one of the largest economies in Europe, and the U.S. and other European countries are substantial trading partners of the U.K. As a result, the U.K.'s economy may be impacted by changes to the economic condition of the U.S. and other European countries. Following the U.K. officially withdrawing from the EU, commonly referred to as "Brexit," certain trading matters between the U.K. and the EU remain unresolved, including with respect to financial services. Continuing uncertainty regarding the U.K.'s relationship with the EU could have an adverse impact on the economy and currency of the U.K. Other risks to the U.K.'s economic growth and competitiveness include high public debt and relatively low productivity.

- **Growth Stock Risk.** Securities of “growth companies” (i.e., companies which appear to have favorable, yet undervalued, prospects for earnings growth and price appreciation) may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks (i.e., stocks that are trading at a price lower relative to their fundamentals, such as dividends, earnings, or sales) that can cushion stock prices in a falling market.
- **American Depositary Receipts (“ADRs”) Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.
- **Financial Services Risk.** The Fund will concentrate its investments in securities issued by financial services companies. Financial services companies can be significantly affected by changing economic conditions, demand for consumer loans, refinancing activity and intense competition, including price competition. Profitability can be largely dependent on the availability and cost of capital and the rate of consumer debt defaults, and can fluctuate significantly when interest rates change; unstable and/or rising interest rates may have a disproportionate effect on companies in the financial services sector. Financial services companies are subject to extensive government regulation, which can change frequently and may adversely affect the scope of their activities, the prices they can charge and the amount of capital they must maintain, or may affect them in other ways that are unforeseeable. In the past, financial services companies in general experienced considerable financial distress, which led to the implementation of government programs designed to ease that distress.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer’s goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer’s value, such as investor perception.
- **Large Capitalization Companies Risk.** Companies with \$10 billion or more in market capitalization are considered by the Adviser to be large capitalization companies. Large capitalization companies generally experience slower rates of growth in earnings per share than do mid and small capitalization companies.
- **Small- and Mid-Capitalization Companies Risk.** Investing in securities of small and mid-capitalization companies may involve greater risks than investing in larger, more established issuers. Small and mid-capitalization companies may be less well established and may have a

more highly leveraged capital structure, less liquidity, a smaller investor base, limited product lines, greater dependence on a few customers, or a few key personnel and similar factors that can make their business and stock market performance susceptible to greater fluctuation and volatility.

- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the portfolio manager is incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Non-Diversification Risk.** As a non-diversified Fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund.

- **Options Risk.** The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio manager to forecast market movements correctly. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Value Investing Risk.** The Fund invests in "value" stocks. The portfolio manager may be wrong in the assessment of a company's value and the stocks the Fund holds may not reach what the portfolio manager believes are their full values. From time to time "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.

Performance

The bar chart and table that follow provide an indication of the risk of investing in the Financial Services Fund by showing changes in the Financial Services Fund's performance from year to year and by showing how the Financial Services Fund's average annual returns for one year, five years, and ten years, if applicable, compared with those of a broad-based securities market index. As with all mutual funds, the Financial Services Fund's past performance (before and after taxes) does not predict how the Financial Services Fund will perform in the future. Updated information on the Financial Services Fund's results can be obtained by visiting www.gabelli.com.

FINANCIAL SERVICES FUND (Total returns for the Year Ended December 31)

During the calendar year shown in the bar chart, the highest return for a quarter was 18.38% (quarter ended December 31, 2023) and the lowest return for a quarter was 2.51% (quarter ended September 30, 2023).

Average Annual Total Returns (for the years ended December 31, 2025)	Past One Year	Since Inception (May 10, 2022)
Return Before Taxes	3.55%	22.37%
Return After Taxes On Distributions	2.74%	20.74%
Return After Taxes on Distributions and Sale of Fund Shares	2.11%	17.14%
S&P 500 Financials Index	15.02%	16.49%
S&P 500 Index	17.88%	17.65%

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Manager. Mr. Macrae Sykes, a portfolio manager for the Adviser, has served as portfolio manager of the Fund since inception.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Gabelli High Income ETF
(the “High Income Fund” or the “Fund”)

Investment Objective

The Fund seeks high total return, comprised primarily of current income and secondarily of capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.55%
Acquired Fund Fees and Expenses	<u>0.01%</u>
Total Annual Fund Operating Expenses ⁽¹⁾	0.56%
Less Fee Waiver and/or Expense Reimbursement ⁽²⁾	<u>(0.55)%</u>
Total Annual Fund Operating Expenses After Fee Waiver	<u>0.01%</u>

(1) Expenses have been restated to reflect the current year’s expected expenses.

(2) The Adviser has contractually agreed to waive the Fund’s management fee of 0.55% for at least one year from the effective date of this prospectus, and this arrangement cannot be terminated by the Fund or the Adviser before such time. The Adviser is not permitted to recoup any such waived fees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$1	\$124	\$258	\$649

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. As the Fund commenced operations on November 17, 2025, there is no portfolio turnover information to provide at this time.

Principal Investment Strategies

The Fund is an actively managed exchange-traded fund (“ETF”). The Fund seeks to achieve its investment objective by investing, as a principal strategy, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in a broad range of income producing securities, including debt, equity and hybrid instruments (the “80% Policy”). As part of the 80% Policy, under normal market conditions, the Fund will attempt to achieve its investment objective primarily by investing in high-yield corporate bonds and other debt instruments, with an emphasis on those rated below investment grade (including, but not limited to, bank loans in the form of assignments or participations, payment-in-kind securities, and deferred payment securities). The high-yield securities the Fund invests in may be fixed, variable, or floating rate. The Fund may invest in new issuances of high yield securities, distressed securities, and restricted or illiquid securities, including significant investments in Rule 144A securities. The Fund intends to invest primarily in higher yielding and generally lower quality debt securities (rated Ba1 / BB+ or below by a nationally recognized statistical rating organization (“NRSRO”) or unrated but determined by the Adviser to be of equivalent quality), including corporate loan obligations. Such securities are sometimes referred to as “junk bonds.” In addition, as part of the 80% Policy, under normal market conditions, the Fund may also opportunistically invest in investment grade instruments, dividend-paying common stock, preferred stock, and other equity-related hybrid instruments, including convertible securities.

The Fund may also invest in collateralized debt obligations (“CDOs”), including collateralized loan obligations (“CLOs”). CDOs are securitized interests in pools of generally non-mortgage-assets. Assets called collateral usually are comprised of loans or other debt instruments. Multiple tranches of securities are issued by the CDO, offering investors various maturity and credit risk characteristics. Tranches are categorized as senior, mezzanine and subordinated/equity, according to their degree of credit risk. If there are defaults or the CDO’s collateral otherwise underperforms, scheduled payments to senior tranches take precedence over those of mezzanine tranches, and scheduled payments to mezzanine tranches take precedence over those to subordinated/equity tranches. Senior and mezzanine tranches are typically rated, with the former receiving ratings of A to AAA/Aaa and the latter receiving ratings of B to BBB/Baa. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it. A CLO is a trust typically collateralized substantially by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. Senior tranches typically have higher ratings and lower yields than the CLO’s underlying securities and subordinated tranches and may be rated investment grade. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it.

The Fund may also invest in derivative instruments as a means of hedging risk and/or for investment or efficient portfolio management purposes, which may include altering the Fund's exposure to currencies, interest rates, inflation, sectors, industries and individual issuers. These derivative instruments may include, among other things, options, futures, forward foreign currency contracts, and swaps, such as total return swaps, credit default swaps and interest rate swaps. The Fund will count the notional value of investments in derivative instruments towards compliance with the 80% Policy.

The Fund may also invest in other investment companies, including ETFs, if the investment companies invest principally in the types of investments in which the Fund may invest directly. To the extent the Fund invests in other investment companies, including ETFs, the Fund will consider the underlying holdings of such funds for purposes of compliance with the 80% Policy.

The Fund may also invest in fixed-income instruments of foreign issuers, including issuers of debt securities in emerging markets. The Fund considers a security to be from a developed country if its issuer is located in the following developed countries list, which is subject to change: Australia, Austria, Belgium, Bermuda, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, The Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The Fund considers a security to be an emerging markets security if its issuer is located outside of the countries listed above. Generally, the Fund invests in U.S. dollar denominated securities, however, the Fund may invest in securities denominated in foreign currencies.

The Fund has no average maturity limitations, but it typically invests in intermediate-term debt securities. The Fund may also invest in long-term debt securities and short-term money market instruments and U.S. government securities.

The Fund may also hold cash or cash equivalents, including commercial paper and short-term securities issued by the U.S. government, its agencies and instrumentalities. The percentage of the Fund invested in such holdings varies and depends on various factors, including market conditions and purchases and redemptions of Fund shares. The Adviser may determine that it is appropriate to invest a substantial portion of the Fund's assets in such instruments in response to certain circumstances, such as periods of market turmoil.

The Fund may change the 80% Policy without shareholder approval. The Fund will provide shareholders with written notice at least 60 days prior to the implementation of any such changes.

The Adviser generally utilizes a fundamental, bottom-up, long-only investment strategy by investing in issuers that the Adviser believes can carry debt loads through different economic cycles. The Adviser seeks to invest in issuers that demonstrate the ability to generate strong, sustainable cash flows, which may enable an issuer to decrease leverage and improve its credit rating. The Adviser also uses proprietary research to identify areas of relative value, within the high yield market that the Adviser believes to be undervalued/overvalued relative to the overall market. The Adviser seeks to invest in issuers with high quality business models that have attractive risk adjusted return characteristics. The Adviser believes that the disciplined execution of its investment process will enable it to select individual securities that have the potential to perform well in diverse market environments.

The Adviser will sell any Fund investments that, in the Adviser's judgment, lose their perceived value relative to other investments.

In the event of adverse market, economic, political or other conditions, the Fund may take temporary defensive positions that are inconsistent with the Fund's principal investment strategies. To the extent the Fund assumes a defensive position, it may not achieve its investment objective.

Principal Risks

You may want to invest in the Fund if:

- you are seeking current income and appreciation of capital
- you are able to tolerate the risks associated with significant investments in high yield bonds

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Credit Risk.** Credit risk is the risk that the value of loans or other debt instruments may decline if the borrower or the issuer defaults or otherwise becomes unable or unwilling, or is perceived to be unable or unwilling, to honor its financial obligations, such as making payments to the Fund when due. If the issuer of a debt instrument fails to pay interest or principal when due, or negative perceptions exist in the market of the issuer's ability to make such payments, the price of the security may decline. Credit rating agencies assign credit ratings to certain loans and debt instruments to indicate their credit risk. A rating downgrade by such agencies can negatively impact the value of such instruments. Lower-rated or unrated loans or instruments held by the Fund may present increased credit risk as compared to higher-rated loans or instruments. Non-investment grade loans or debt instruments may be subject to greater price fluctuations and are more likely to experience a default than investment grade loans or debt instruments and therefore may expose the Fund to increased credit risk.
- **Debt Instruments Risk.** The risks of investing in debt or fixed-income instruments include (without limitation): (i) credit risk, *e.g.*, the issuer or guarantor of a debt security may be unable or unwilling (or be perceived as unable or unwilling) to make timely principal and/or interest payments or otherwise honor its obligations, or changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may affect the value of the Fund's investments; (ii) maturity risk, *e.g.*, a debt security with a longer maturity may fluctuate in value more than one with a shorter maturity; (iii) market risk, *e.g.*, low demand for debt securities may negatively impact their price; (iv) interest rate risk, *e.g.*, when interest rates go up, the value of a debt security generally goes down, and when interest rates go down, the value of a debt security generally goes up (long-term debt securities are generally more susceptible to interest rate risk than short-term debt securities); and (v) call or prepayment risk, *e.g.*, during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce the Fund's income if the proceeds are reinvested at lower interest rates.
- **Lower-Rated Debt Securities Risk.** Lower-rated debt securities (commonly known as "junk bonds") and unrated debt securities determined to be of comparable quality involve greater risks than investment grade debt securities. Such securities may fluctuate more widely in price and

yield and may fall in price, sometimes abruptly, due to changes in interest rates, market activity, economic conditions, such as when economic conditions are deteriorating or are expected to deteriorate, or other factors. These securities may be less liquid, may require a greater degree of judgment to establish a price and may be difficult to sell at the time and price the Fund desires. Lower-rated debt securities are considered by the major rating agencies to be predominantly speculative with respect to the issuer's continuing ability to pay principal and interest and carry a greater risk that the issuer of such securities will default in the timely payment of principal and interest. Issuers of securities that are in default or have defaulted may fail to resume principal or interest payments, in which case the Fund may lose its entire investment. The creditworthiness of issuers of these securities may be more complex to analyze than that of issuers of investment grade debt securities, and the overreliance on credit ratings may present additional risks.

- **Unrated Fixed Income Securities Risk.** The Adviser has the authority to make determinations regarding the quality of unrated fixed income securities for the purpose of assessing whether they meet the Fund's investment restrictions. However, analysis of unrated securities is more complex than that of rated securities, making it more difficult for the Adviser to accurately predict risk.
- **Collateralized Debt Obligations Risk.** CDOs, which include CLOs, issue classes or "tranches" of securities that vary in risk and yield and may experience substantial losses due to interest rate fluctuations, actual defaults, collateral defaults, disappearance of subordinate tranches, market anticipation of defaults, and investor aversion to CDO securities as a class. The risks of investing in CDOs depend largely on the quality and type of the underlying debt, which may include loans, bonds and mortgages, and the tranche of the CDO in which the Fund invests. In addition, CDOs that obtain their exposure through derivative instruments entail the additional risks associated with such instruments. CDOs may be difficult to value, may at times be illiquid, may be highly leveraged (which could make them highly volatile), and may produce unexpected investment results due to their complex structure. In addition, CDOs involve many of the same risks of investing in debt securities and asset-backed securities including, but not limited to, interest rate risk, credit risk, liquidity risk, and valuation risk.
- **Interest Rate Risk.** The value of debt instruments usually rise and fall in response to changes in interest rates. Declining interest rates generally increase the value of existing debt instruments, and rising interest rates generally decrease the value of existing debt instruments. Changes in a debt instrument's value usually will not affect the amount of interest income paid to the Fund, but it will affect the value of the Fund's shares. Interest rate risk is generally greater for investments with longer maturities, and the link between interest rates and debt security prices tends to be weaker with lower-rated debt securities than with investment grade debt securities. It is difficult to predict the pace at which central banks or monetary authorities may change interest rates or the timing, frequency, or magnitude of such changes. Any such changes could be sudden and could expose debt markets to significant volatility and reduced liquidity for investments.
- **Bank Loan Risk.** Bank loans may be unsecured or not fully collateralized, subject to restrictions on resale, and sometimes trade infrequently on the secondary market. Bank loans settle on a delayed basis; thus, sale proceeds may not be available to meet redemptions for a substantial period of time after the sale of the loan.

- **Convertible Securities Risk.** The Fund may invest in convertible securities which may include both convertible debt and convertible preferred stock. Such securities may be converted into shares of the underlying common stock at either a stated price or stated rate. Convertible securities provide higher yields than the underlying common stock, but generally offer lower yields than nonconvertible securities of similar quality. The value of convertible securities fluctuates in relation to changes in interest rates and, in addition, fluctuates in relation to the underlying common stock.
- **Preferred Stock Risk.** A preferred stock is a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may

be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Equity Risk.** Equity risk is the risk that the prices of the securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause an equity security to be worth less than it was worth when it was purchased by the Fund. Because the value of equity securities, and thus shares of the Fund, could decline, you could lose money.
- **Counterparty Risk.** Counterparty risk is the risk that a counterparty to a transaction in a financial instrument held by the Fund or by a special purpose or structured vehicle invested in by the Fund may become insolvent or otherwise fail to perform its obligations. As a result, the Fund may obtain no or limited recovery of its investment, and any recovery may be significantly delayed.
- **Prepayment and Extension Risk.** Prepayment and extension risk is the risk that a loan, bond or other security or investment might, in the case of prepayment risk, be called or otherwise converted, prepaid or redeemed before maturity and, in the case of extension risk, that the investment might not be called as expected. In the case of prepayment risk, if the investment is converted, prepaid or redeemed before maturity, the portfolio manager may not be able to invest the proceeds in other investments providing as high a level of income, resulting in a reduced yield to the Fund. In the case of mortgage- or other asset-backed securities, as interest rates decrease or spreads narrow, the likelihood of prepayment increases. Conversely, extension risk is the risk that an unexpected rise in interest rates will extend the life of a mortgage- or other asset-backed security beyond the prepayment time. If the Fund's investments are locked in at a lower interest rate for a longer time, the portfolio manager may be unable to capitalize on securities with higher interest rates or wider spreads.
- **Call Risk.** Upon an issuer's desire to call a security, or under other circumstances where a security is called, including when interest rates are low and issuers opt to repay the obligation underlying a "callable security" early, the Fund may have to reinvest the proceeds in an investment offering a lower yield and may not benefit from any increase in value that might otherwise result from declining interest rates.

- **Restricted and Illiquid Securities Risk.** The Fund may invest in restricted or illiquid securities, including Rule 144A securities, which are securities that are not registered for sale to the general public under the Securities Act of 1933, as amended (the “Securities Act”). These securities may be resold to certain institutional investors but, if at any time an insufficient number of qualified institutional buyers are interested in purchasing the securities, the Fund may not have the ability to dispose of such securities promptly or at expected prices. As such, even if determined to be liquid, the Fund’s investment in Rule 144A securities may subject the Fund to enhanced liquidity risk and potentially increase the Fund’s exposure to illiquid investments. Certain investments that were liquid when the Fund purchased them may become illiquid, sometimes abruptly. Unexpected episodes of illiquidity, including due to market or political factors, instrument or issuer-specific factors and/or unanticipated outflows or other factors, may limit the Fund’s ability to pay redemption proceeds within the allowable time period. To meet redemption requests during periods of illiquidity, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions.
- **Loan Interests Risk.** The Fund may acquire loan interests by direct investment as a lender, by obtaining an assignment of all or a portion of the interests in a particular loan that are held by an original lender or a prior assignee or by participation in a loan interest that is held by another party. As an assignee, the Fund normally will succeed to all rights and obligations of its assignor with respect to the portion of the loan that is being assigned. However, the rights and obligations acquired by the purchaser of a loan assignment may differ from, and be more limited than, those held by the original lenders of the assignor. When the Fund’s loan interest is a participation, the Fund may have less control over the exercise of remedies than the party selling the participation interest, and the Fund normally would not have any rights against the borrower. It is possible that the Fund could be held liable, or may be called upon to fulfill other obligations, with respect to loans in which it receives an assignment in whole or in part, or in which it owns a participation. The potential for such liability is greater for an assignee than for a participant. Loan interests may be difficult to value and may have extended settlement periods (the settlement cycle for many bank loans exceeds 7 days). Extended settlement periods may result in cash not being immediately available to the Fund. As a result, during periods of unusually heavy redemptions, the Fund may have to sell other investments or borrow money to meet its obligations.
- **Variable and Floating Rate Instruments Risk.** The market prices of instruments with variable and floating interest rates are generally less sensitive to interest rate changes than are the market prices of instruments with fixed interest rates. Variable and floating rate instruments may decline in value if market interest rates or interest rates paid by such instruments do not move as expected. Certain types of floating rate instruments, such as interests in bank loans, may be subject to greater liquidity risk than other debt securities, may have restrictions on resale and may lack an active market.
- **Highly Leveraged Transactions Risk.** The loans or other debt instruments in which the Fund invests may include highly leveraged transactions where the borrower assumes large amounts of debt. Loans or other debt instruments that are part of highly leveraged transactions involve a greater risk (including default or bankruptcy) than other investments.

- **Impairment of Collateral Risk.** The value of collateral, if any, securing a loan can decline, and may be insufficient to meet the borrower's obligations or may be difficult or costly to liquidate. In addition, the Fund's access to collateral may be limited by bankruptcy or other insolvency laws. Certain floating rate and other loans may not be fully collateralized and may decline in value.
- **Distressed Securities Risk.** Distressed securities may present a substantial risk of default or may be in default. Distressed securities involve the substantial risk that principal will not be repaid and the Fund may lose a substantial portion or all of its investment. The Fund may not receive interest payments on the distressed securities, which would not generate income for shareholders, and may incur costs to protect its investment. The prices of such securities may be subject to periods of abrupt and erratic market movements and above-average price volatility and it may be difficult to value such securities. In certain periods, there may be little or no liquidity in the markets for distressed securities meaning that the Fund may be unable to exit its position.
- **Deferred Payment Securities Risk.** Deferred payment securities are zero-coupon securities that convert on a specified date to interest bearing debt securities. On this date, the stated coupon rate becomes effective and interest is paid at regular intervals. During the time that interest payments are not being made on these securities, holders are deemed to receive income (phantom income) annually, even though cash is not received currently. The effect of owning instruments that do not make current interest payments is that a fixed yield is earned not only on the original investment but also, in effect, on all discount accretion during the life of the obligations. This implicit reinvestment of earnings at a fixed rate eliminates the risk of being unable to invest distributions at a rate as high as the implicit yield on the bond, but at the same time eliminates the holder's ability to reinvest at higher rates in the future. For this reason, some of these securities may be subject to greater price fluctuations when interest rates change than securities that currently pay interest. Longer term zero-coupon bonds are more exposed to this risk than those with shorter terms.
- **Payment-in-Kind Securities Risk.** Payment-in-kind securities carry additional risks as holders of these types of securities realize no cash until the cash payment date unless a portion of such securities is sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. The market price of payment-in-kind securities is affected by interest rate changes to a greater extent, and therefore tends to be more volatile, than that of securities which pay interest in cash.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **Emerging Markets Risk.** Securities of companies in emerging markets or companies with significant exposure to emerging markets may be more volatile than those of companies in more developed markets. Emerging markets may be more likely to experience economic, political or social instability than more developed markets. Foreign securities risks are more pronounced in the securities of companies located in emerging markets.

- **Currency Risk.** Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar. To the extent that the Fund invests in securities or other instruments denominated in or indexed to foreign currencies, changes in currency rates could adversely impact investment gains or add to investment losses. Currency exchange rates may fluctuate significantly over short periods of time and can be affected unpredictably by various factors, including investor perception and changes in interest rates; intervention, or failure to intervene, by U.S. or foreign governments, central banks, or supranational entities; or by currency controls or political developments in the U.S. or abroad.
- **Changing Distribution Level Risk.** The Fund normally expects to receive income, which may include interest, dividends and/or capital gains, depending on its investments. The distribution amounts paid by the Fund will vary and generally depend on the amount of income the Fund earns (less expenses) on its portfolio holdings, and capital gains or losses it recognizes. A decline in the Fund's income or net capital gains arising from its investments may reduce its distribution level. Income received from the Fund may vary widely over the short- and long-term and/or be less than anticipated if the proceeds from maturing securities in the Fund are reinvested in lower-yielding securities. In certain circumstances, the Fund may be treated as receiving income even though no cash is received.
- **Issuer Risk.** An issuer in which the Fund invests or to which it has exposure may perform poorly or below expectations, and the value of its loans or securities may therefore decline, which may negatively affect the Fund's performance. Underperformance of an issuer may be caused by poor management decisions, competitive pressures, breakthroughs in technology, reliance on suppliers, labor problems or shortages, corporate restructurings, fraudulent disclosures, natural disasters, military confrontations and actions, war, other conflicts, terrorism, diseases/virus outbreaks, epidemics or other events, and various conditions and other factors, all of which may impair the value of your investment in the Fund.
- **Derivatives Risk.** Derivatives and other similar instruments (collectively referred to as "derivatives") may include, among other things, futures, options, forwards and swap agreements, including credit default swaps. The Fund may use derivatives for any purpose, including to attempt to enhance income, yield or return, as a substitute for investing directly in a security or asset, or as a hedging technique in an attempt to manage risk in the Fund's portfolio. The Fund may choose not to make use of derivatives for a variety of reasons, and no assurance can be given that any derivatives strategy employed will be successful. Investments in derivatives may result in increased volatility and the Fund may incur a loss greater than its principal investment.

The performance of derivatives depends largely on the performance of their underlying asset reference, rate, or index; therefore, derivatives often have risks similar to those risks of the underlying asset, reference rate or index, in addition to other risks. However, the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, reference, rate or index. Many derivatives create leverage, thereby causing the Fund to be more volatile than it would have been if it had not used derivatives. Over-the-counter ("OTC") derivatives are traded bilaterally between two parties, which exposes the Fund to heightened liquidity risk, valuation risk and counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations), including the credit risk of the derivative counterparty, compared to other types of investments. Changes in the value of a derivative may also create

margin delivery or settlement payment obligations for the Fund. Certain derivatives are subject to exchange trading and/or mandatory clearing (which interposes a central clearinghouse to each participant's derivative transaction). Exchange trading, central clearing and margin requirements are intended to reduce counterparty credit risk and increase liquidity and transparency, but do not make a derivatives transaction risk-free and may subject the Fund to increased costs. The use of derivatives may not be successful, and certain of the Fund's transactions in derivatives may not perform as expected, which may prevent the Fund from realizing the intended benefits, and could result in a loss to the Fund. In addition, given their complexity, derivatives expose the Fund to risks of mispricing or improper valuation, as well as liquidity risk. The use of derivatives is also subject to operational risk which refers to risk related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error, as well as legal risk which refers to the risk of loss resulting from insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

- **Short-Term Investments.** Short-term investments include money market instruments, repurchase agreements, certificates of deposit and bankers' acceptances and other short-term instruments that are not U.S. government securities. These securities generally present less risk than many other investments, but they are generally subject to credit risk and may be subject to other risks as well.
- **New Fund Risk.** The Fund is a new fund with no operating history. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer its assets at a loss.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market

disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.

- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation is often accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Management Risk.** If the portfolio manager is incorrect in his assessment of the investment prospects of securities the Fund holds, then the value of the Fund's shares may decline.
- **Value Investing Risk.** Value investing refers to buying securities that the Adviser believes are out of favor and/or undervalued in comparison to their peers or their prospects for growth. From time to time, "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.
- **U.S. Government Securities.** Obligations issued or guaranteed by the U.S. government, its agencies, authorities and instrumentalities and backed by the full faith and credit of the United States only guarantee principal and interest will be timely paid to holders of the securities. The entities do not guarantee that the value of Fund shares will increase, and the market values of such obligations may fluctuate.
- **Other Investment Company Risk.** To the extent the Fund invests in other investment companies, including money market funds and ETFs, its performance will be affected by the performance of those other investment companies and to the allocation of its assets among those other investment companies. Investments in other investment companies are subject to the risks of the other investment companies' investments, as well as to the other investment companies' expenses.

- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca (as defined below) and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.

Performance

The Fund commenced operations on November 17, 2025, and, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Manager. Mr. Wayne C. Plewniak, Managing Director, Head of Fixed Income and Portfolio Manager, has managed the Fund since its inception in October 2025.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded fund (commonly referred to as an "ETF"). Individual shares of the Fund are listed on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund's NAV (premium) or less than the

Fund's NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the "bid-ask spread"). The Fund will only issue or redeem shares that have been aggregated into blocks of 40,000 shares or multiples thereof ("Creation Units") to Authorized Participants who have entered into agreements with the Fund's distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

**Keeley Dividend ETF
(the “Dividend Fund” or the “Fund”)**

Investment Objective

The Fund seeks capital appreciation and current income.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):⁽¹⁾

Management Fees	0.90%
Total Annual Fund Operating Expenses ⁽²⁾	0.90%
Less Fee Waiver and/or Expense Reimbursement ⁽³⁾	(0.90)%
Total Annual Fund Operating Expenses After Fee Waiver	0.00%

- (1) The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.
- (2) Expenses have been restated to reflect the current year’s expected expenses.
- (3) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% for at least one year from the effective date of this prospectus, and this arrangement cannot be terminated by the Fund or the Adviser before such time. The Adviser is not permitted to recoup any such waived fees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$0	\$196	\$410	\$1,025

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. As the Fund commenced operations on December 8, 2025, there is no portfolio turnover information to provide at this time.

Principal Investment Strategies

The Fund is an actively managed exchange-traded fund (“ETF”). The Fund seeks to achieve its investment objective by investing, as a principal strategy, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in common stocks and other equity-type securities (such as preferred stock, convertible debt securities and warrants) of dividend-paying companies, as defined below. While the Fund expects to invest primarily in small- and mid-cap companies, it may invest in companies of any market capitalization.

“Dividend-paying companies” have one or more of the following characteristics: (i) attractive dividend yields that, in the opinion of the Adviser, are relatively stable or expected to grow; (ii) that pay a small dividend, but could grow their dividend over the next few years; and (iii) that pay no dividend, but may initiate a dividend or return cash to shareholders in other ways, such as a share repurchase program. The Adviser believes that a track record of dividend increases is an excellent indicator of a company’s financial health and growth prospects, and that over the long-term, income can contribute significantly to total return. Dividends also can help reduce the Fund’s volatility during periods of market turbulence and can help offset losses when stock prices are falling.

The Adviser’s investment philosophy with respect to buying and selling equity securities is to identify stocks that are selling in the public market at a discount to their intrinsic value. The Adviser defines intrinsic value as the product of a reasonable earnings multiple and an assessment of normalized future earnings. The Adviser considers factors such as price, earnings expectations, earnings and price histories, dividends and their sustainability, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning, that may surface additional value.

It is the Adviser’s intention for the Fund typically to hold securities for more than one year. However, the Adviser may sell securities when a more attractive opportunity emerges, when a company becomes over-weighted in the portfolio, or when operating difficulties or other circumstances make selling desirable.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek capital appreciation
- You believe that the market will favor dividend-paying companies over the long-term

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause a security to be worth less than it was worth when it was purchased by the Fund. Because the value of securities, and thus shares of the Fund could decline, you could lose money.
- **Dividend-Paying Securities Risk.** There can be no guarantee that companies that have historically paid dividends will continue to pay them or pay them at the current rates in the future. The prices of dividend-paying equity securities can be highly volatile. In addition, dividend-paying equity securities, in particular those whose market price is closely related to their yield, may exhibit greater sensitivity to interest rate changes. The Fund's investment in such securities may also limit its potential for appreciation during a broad market advance.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized

Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.

- **New Fund Risk.** The Fund is a new ETF with no operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Large Capitalization Companies Risk.** Companies with \$10 billion or more in market capitalization are considered by the Adviser to be large capitalization companies. Large capitalization companies generally experience slower rates of growth in earnings per share than do mid and small capitalization companies.

- **Small- and Mid-Capitalization Companies Risk.** Investing in securities of small and mid-capitalization companies may involve greater risks than investing in larger, more established issuers. Small and mid-capitalization companies may be less well established and may have a more highly leveraged capital structure, less liquidity, a smaller investor base, limited product lines, greater dependence on a few customers, or a few key personnel and similar factors that can make their business and stock market performance susceptible to greater fluctuation and volatility.
- **Interest Rate Risk.** Investments in dividend and interest paying securities involve interest rate risk. When interest rates decline, the value of such securities generally rises. Conversely, when interest rates rise, the value of such securities generally declines. It is also possible that the issuer of a security will not be able to make dividend, interest and principal payments when due. The Fund may be subject to heightened interest rate risk as a result of changes in economic conditions, inflation and government monetary policy, such as changes in the federal funds rate. There is no way of predicting the frequency or quantum of potential interest rate changes.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation is often accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other

militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.

- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca (as defined below) and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Value Investing Risk.** The Fund invests in "value" stocks. The portfolio manager may be wrong in the assessment of a company's value and the stocks the Fund holds may not reach what the portfolio managers believe are their full values. From time to time "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.

Performance

The Fund commenced operations on December 8, 2025, and, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Messrs. Thomas E. Browne, Jr., CFA, portfolio manager of the Adviser, and Brian P. Leonard, CFA, portfolio manager of the Adviser, have been jointly and primarily responsible for the management of the Fund since its inception in November 2025.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

**Gabelli Opportunities in Live and Sports ETF
(the “Sports Fund” or the “Fund”)**

Investment Objective

The Fund seeks to provide capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)⁽¹⁾

Management Fees	0.90%
Total Annual Fund Operating Expenses ⁽²⁾	0.90%
Less Fee Waiver and/or Expense Reimbursement ⁽³⁾	(0.90)%
Total Annual Fund Operating Expenses After Fee Waiver	<u>0.00%</u>

- (1) The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.
- (2) Expenses have been restated to reflect the current year’s expected expenses.
- (3) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% for at least one year from the effective date of this prospectus, and this arrangement cannot be terminated by the Fund or the Adviser before such time. The Adviser is not permitted to recoup any such waived fees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$0	\$196	\$410	\$1,025

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. As the Fund commenced operations on December 31, 2025, there is no portfolio turnover information to provide at this time.

Principal Investment Strategies

The Fund is an actively managed exchange-traded fund (“ETF”). Under normal market conditions, the Fund invests at least 80% of the value of its net assets in securities of companies principally engaged in the group of industries comprising the live media and entertainment and sports sectors. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the sports, media and entertainment industries. The Fund may invest in the equity securities of such companies, such as common stock, or preferred stock of such companies in accordance with the foregoing 80% policy. The Fund may also invest in foreign securities, including, but not limited to, direct investments in securities of foreign issuers and investments in American Depositary Receipts that represent indirect investments in securities of foreign issuers. The Fund may invest in companies without regard to market capitalization. In addition, the Fund may invest up to 10% of the value of its net assets in option contracts in accordance with Rule 18f-4 under the 1940 Act.

The Fund considers a company to be principally engaged in the live media and entertainment sector if it devotes a significant portion of its assets to or derives at least 50% of its revenues from the development, production or distribution of live media and entertainment. Live media and entertainment include, but are not limited to, television and radio stations, motion picture companies, print publishing and providers of internet content, as well as satellite service providers, cable service providers and advertising service providers.

The Fund considers a company to be principally engaged in the group of industries comprising the sports sector if it devotes a significant portion of its assets to or derives at least 50% of its revenues from sports-related activities. Sports-related activities include, but are not limited to, the following: (i) the direct operation or ownership of sports teams or leagues; (ii) the development or monetization of sports-related real estate (*e.g.*, stadiums, sports resorts, or experiential venues such as golf and ski destinations); (iii) the sale of sports related products or services (*e.g.*, athletic apparel, equipment, or ticketing); and (iv) sports media and content distribution. A company with indirect or adjacent exposure to a sports-related activity—such as an event promoter, live entertainment company, or large conglomerate with business lines that own or operate sports assets—may also qualify for investment if the Adviser believes the sports-related component represents a meaningful portion of the company’s business value.

The Fund’s assets will be invested primarily in a broad range of readily marketable equity securities consisting of common stock and preferred stock. Many of the common stocks the Fund will buy will not pay dividends; instead, stocks will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer’s management, general market conditions,

the forecasts for the issuer's industry, and the value of the issuer's assets. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty. The Fund may also buy warrants, which are rights to purchase securities at a specified time at a specified price.

The Adviser's investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value ("PMV"). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning that may surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business. The Adviser expects to seek to sell any Fund investments that lose their perceived value relative to other investments, which could occur because of, among other things, a security reaching a predetermined price target, a change to a company's fundamentals that make the risk/reward profile unattractive, or a need to improve the overall risk/reward profile of the Fund.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek capital appreciation
- You believe that the market will favor companies in the sports sector over the long-term

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause an equity security to be worth less than it was worth when it was purchased by the Fund. Because the value of equity securities, and thus shares of the Fund, could decline, you could lose money. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **Concentration Risk.** The Fund concentrates its assets (*i.e.*, invests 25% or more of its net assets) in securities of companies in the sports sector, and, as a result, the Fund may be subject to greater volatility with respect to its portfolio securities than a fund that is more

broadly diversified. Accordingly, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities. Risks associated with investments in the sports sector include, among others:

- **Communication Services Risk.** The Fund's investments include securities issued by companies that conduct business in the communication services sector. The communication services sector consists of, among other things, companies in the media and entertainment industry. Companies in the media and entertainment industry group encompass a variety of services and products including television broadcasting, gaming products, social media, networking platforms, online classifieds, online review websites and Internet search engines. The communication services sector is often subject to extensive government regulation. The costs of complying with governmental regulations, delays or failure to receive required regulatory approvals, or the enactment of new regulatory requirements may negatively affect the business of communications companies. Companies in the communication services sector may encounter distressed cash flows due to the need to commit substantial capital to meet increasing competition, particularly in developing new products and services using new technology. Communication services companies are particularly vulnerable to the potential obsolescence of products and services due to technological advancement and the innovation of competitors. While all companies may be susceptible to network security breaches, certain companies in the communication services sector may be particular targets of hacking and potential theft of proprietary or consumer information or disruptions in service, which could have a material adverse effect on their businesses. The Fund's investments in the communication services sector include companies in the media and entertainment industry, which are subject to risks that include competition, particularly with respect to products and services using new technologies; high costs of production, research and development for new content, products and services; cyclicity of revenues and earnings; changing consumer tastes and preferences; and decreases in the discretionary income of targeted consumers.
- **Professional Sports Risk.** Professional sports teams depend on the performance and/or popularity of their franchises, and they compete with other sporting events, which are delivered through the Internet and online services (*e.g.*, streaming), mobile applications, television networks, radio and other sources. Professional sports teams also depend on attracting attendance to competitions at their home venues, and they compete with other leisure-time activities and entertainment options such as television shows, motion pictures, concerts and other live performances, restaurants, nightlife venues, Internet websites and other online applications such as social media and social networking platforms, and other sources of entertainment. Economic downturns and other adverse conditions, such as suspension of sports events or limitations on in-person attendance at such events, can negatively affect professional sports companies' operations. Professional sports companies also depend on the on-field success of their teams, which is affected by the teams' ability to develop, obtain and retain talented players.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities

or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund's website, www.gabelli.com.

- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. "Authorized Participants" are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. The Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value ("NAV") and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.
- **New Fund Risk.** The Fund is a new fund with no operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Growth Stock Risk.** Securities of "growth companies" (*i.e.*, companies which appear to have favorable, yet undervalued, prospects for earnings growth and price appreciation) may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks (*i.e.*, stocks that are trading at a price lower relative to their fundamentals, such as dividends, earnings, or sales) that can cushion stock prices in a falling market.
- **Foreign Securities Risk.** Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Large Capitalization Companies Risk.** Companies with \$10 billion or more in market capitalization are considered by the Adviser to be large capitalization companies. Large capitalization companies generally experience slower rates of growth in earnings per share than do mid and small capitalization companies.
- **Small- and Mid-Capitalization Companies Risk.** Investing in securities of small and mid-capitalization companies may involve greater risks than investing in larger, more established issuers. Small and mid-capitalization companies may be less well established and may have a

more highly leveraged capital structure, less liquidity, a smaller investor base, limited product lines, greater dependence on a few customers, or a few key personnel and similar factors that can make their business and stock market performance susceptible to greater fluctuation and volatility.

- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation is often accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Non-Diversification Risk.** As a non-diversified Fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund.

- **Options Risk.** The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio managers to forecast market movements correctly. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options.
- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca (as defined below) and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Value Investing Risk.** The Fund invests in "value" stocks. The portfolio managers may be wrong in the assessment of a company's value and the stocks the Fund holds may not reach what the portfolio managers believe are their full values. From time to time "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.

Performance

The Fund commenced operations on December 31, 2025, and, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Christopher Marangi, President and Co-Chief Investment Officer of the Value Team of GAMCO Investors, Inc., and a portfolio manager of the Adviser, and Mr. Alec Boccanfuso, a portfolio manager for the Adviser, have been jointly and primarily responsible for the day-to-day management of the Fund since December 2025.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

INVESTMENT OBJECTIVES, INVESTMENT STRATEGIES, AND RELATED RISKS

The Funds may also use the following investment techniques:

- **Temporary Defensive Investments.** When opportunities for capital appreciation do not appear attractive or when adverse market or economic conditions exist, the Fund may temporarily invest all or a portion of its assets in defensive investments only outside normal market conditions. Such investments include obligations of the U.S. government and its agencies and instrumentalities and short-term money market investments. When following a defensive strategy, the Fund will be less likely to achieve its investment goal of capital appreciation.

The Funds may also engage in other investment practices in order to achieve its investment objectives. These are discussed in the Statement of Additional Information (“SAI”), which may be obtained by calling 800-GABELLI (800-422-3554), your financial intermediary, or free of charge through the Fund’s website at www.gabelli.com.

Gabelli Growth Innovators ETF

The Fund’s primary investment objective is to provide capital appreciation.

The Fund will primarily invest in common stocks of companies that are relevant to the Fund’s investment theme of innovation. The Adviser defines “innovation” as the introduction of new technologies, products or services that redefines how businesses operate. The Fund seeks to invest in companies whose prospects for earnings growth remain undervalued. The Adviser will sell any Fund investments that lose their perceived value when compared with other investment alternatives in the judgment of the portfolio managers.

The Adviser uses fundamental security analysis to develop earnings forecasts for companies and to identify investment opportunities. The Adviser bases its analysis on general economic and industry data provided by the U.S. Government, various trade associations and other sources, and published corporate financial data such as annual reports, 10-Ks, and quarterly statements as well as direct interviews with company management. Generally, the Adviser makes investment decisions first by looking at individual companies and then by scrutinizing their growth prospects in relation to their industries and the overall economy. The Adviser seeks to invest in companies with high future earnings potential relative to their current market valuations.

The Fund’s assets will be invested primarily in a broad range of readily marketable equity securities consisting of U.S. exchange-listed common stock and preferred stock. Many of these common stocks will not pay dividends; instead, stocks will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer’s management, general market conditions, the forecasts for the issuer’s industry, and the value of the issuer’s assets. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.

Gabelli Love Our Planet & People ETF

The investment objective of the Fund is capital appreciation.

The Fund seeks to provide capital appreciation. The Fund seeks to achieve its objective by investing substantially all, and in any case no less than 80%, of its assets in U.S. exchange-listed common and preferred stocks of companies that meet the Fund's guidelines for social responsibility at the time of investment. Your investment in the Fund is not guaranteed and you could lose some or all of the amount you invested.

The Adviser will invest in companies that are selling in the public market at a significant discount to the Adviser's assessment of their PMV or "fair value." The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. The Adviser will sell any Fund investments that, in the Adviser's judgment, lose their perceived value relative to other investments.

Under normal market conditions, the Fund invests its assets in stocks that are listed on a national securities exchange. The Adviser will invest in companies that are selling in the public market at a significant discount to the Adviser's assessment of their PMV or "fair value." The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. The Adviser will sell any Fund investments that, in the Adviser's judgment, lose their perceived value relative to other investments.

The Fund's assets will be invested primarily in a broad range of readily marketable equity securities consisting of common stock, and preferred stock. Many of the common stocks the Fund will buy will not pay dividends; instead, stocks will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer's management, general market conditions, the forecasts for the issuer's industry, and the value of the issuer's assets. Holders of equity securities have rights to value in the company only after all debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.

Sustainability Criteria. The Fund combines a differentiated, value-oriented investment philosophy with consideration of certain factors used to deliver returns in a manner that promotes environmental sustainability. In determining the sustainability factors of a particular company, the investment team looks for companies that, among other actions, have initiated programs to reduce the carbon footprint and/or waste profile of their products, services or operations or that produce goods or services that promote attributes such as energy and water conservation, recycling, the reduction of greenhouse gases and harmful chemicals and sustainable agriculture and clean-label food. The Fund relies primarily on proprietary research conducted by the Adviser to reach a judgement on the sustainability of each investment candidate but may also employ third-party data services. Pursuant to the guidelines, the Fund will not invest in publicly traded fossil fuel (coal, oil, and gas) companies, or in companies that derive more than 10% of their revenues from the following areas: tobacco, cannabis, alcohol, gambling, and defense/weapons production.

After identifying companies that satisfy these social criteria, the Adviser then will invest in securities of companies that the Adviser believes are trading at a material discount to PMV. The Adviser will monitor each holding on a regular basis to ensure its compliance with the Fund's guidelines. Securities that no longer meet these guidelines will be sold within a reasonable period of time after the Adviser makes such a determination. Securities may also be sold if the Adviser believes the securities no longer appear to be underpriced relative to their PMV, or if there is a change to an underlying industry or company that the Adviser believes may negatively affect the value of such securities.

Gabelli Global Technology Leaders ETF

The investment objective of the Fund is high total return consistent with capital preservation, comprised primarily of current income and secondarily of capital appreciation.

The Fund is an actively managed exchange-traded fund ("ETF"). Under normal market conditions, the Fund invests at least 80% of the value of its net assets in the securities of companies principally engaged in the group of industries comprising the technology sector. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the group of industries comprising the technology sector. The Fund invests primarily in common stocks of foreign and domestic small capitalization, mid capitalization, and large capitalization issuers. As a "global" fund, the Fund invests in securities of issuers, or related investments thereof, located in at least three countries outside of the U.S., and at least 40% of the Fund's total net assets are invested in securities of non-U.S. issuers or, if market conditions are not favorable, the Fund will invest at least 25% of the Fund's assets outside the U.S. The Fund will favor investing in companies that possess market leadership and competitive advantages. The Fund may invest in the equity securities of such companies, such as common stock, or preferred stock of such companies in accordance with the foregoing 80% policy. The Fund may also invest in foreign securities, including, but not limited to: (i) direct investments in securities of foreign issuers principally located in Japan, the United Kingdom, and Europe; and (ii) investments in American Depositary Receipts that represent indirect investments in securities of foreign issuers. The Fund may invest in companies without regard to market capitalization.

The Fund considers a company to be principally engaged in the group of industries comprising the technology sector if it devotes 50% of its assets to, or derives 50% of its revenues from, hardware, software and related services, data storage, and peripherals; communications services and equipment; semiconductors; and electronic equipment, instruments and components.

The Fund invests in equity securities of companies that the Adviser believes are leaders within their respective industries as demonstrated by the ability to deliver high relative returns on invested capital and proprietary technology, the proficiency to leverage technological expertise into a competitive advantage, and/or a proven track record of research and development resulting in new products, services, or technologies.

The Adviser's investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value ("PMV"). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning that may surface additional

value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business. The Adviser expects to seek to sell any Fund investments that lose their perceived value relative to other investments, which could occur because of, among other things, a security reaching a predetermined price target, a change to a company's fundamentals that make the risk/reward profile unattractive, or a need to improve the overall risk/reward profile of the Fund.

The Fund may purchase or sell options on individual securities as well as on indices of securities as a means of achieving additional return on or hedging the value of the Fund's portfolio.

Gabelli Commercial Aerospace and Defense ETF

The Fund's investment objective is to seek a high level of total return on its assets with an emphasis on income.

The Fund will seek to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets in income producing equity securities in the aerospace and defense sectors. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the group of industries comprising the aerospace and defense sectors.

Aerospace companies include manufacturers, assemblers and distributors of aircraft and aircraft parts. Defense companies include producers of components and equipment for the defense industry, such as military aircraft, radar equipment and weapons. The Fund defines an "aerospace and defense" company as a company that derives at least 50% of its revenues from, or devotes 50% of its assets to, aerospace and/or defense related activities, or devotes 50% of its assets to, aerospace and/or defense related activities. Income producing equity securities (e.g., dividend paying securities) include U.S. exchange-listed common stock and preferred stock. The Fund invests in common stocks of small capitalization, mid capitalization, and large capitalization issuers. The Fund may also invest in foreign securities by investing in American Depositary Receipts. In making stock selections, the Adviser looks for securities that have a better yield than the average of the Standard and Poor's 500 Index (the "S&P 500 Index"), as well as capital gains potential. In selecting investments for the Fund, the Adviser focuses on issuers that:

- have strong free cash flow and pay regular dividends;
- have potential for long-term earnings per share growth;
- may be subject to a value catalyst, such as industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business are well managed; and
- will benefit from sustainable long-term economic dynamics, such as globalization of an issuer's industry or an issuer's increased focus on productivity or enhancement of services.

The Adviser also believes preferred stock of selected companies offer opportunities for capital appreciation as well as periodic income and may invest a portion of the Fund's assets in such securities. This is particularly true in the case of companies that have performed below expectations. If a company's performance has been poor enough, its preferred stock will trade more like common stock than like a fixed income security and may result in above average appreciation if performance improves. This leads to the possibility of capital appreciation if the price of the common stock recovers.

Gabelli Financial Services Opportunities ETF

The investment objective of the Fund is to provide capital appreciation. In selecting investments for the Fund, the Adviser seeks issuers that:

- are principally engaged in the financial services sector;
- are well managed;
- are undervalued; and
- may be subject to a catalyst, such as industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business.

The Adviser believes that the current market, economic and regulatory environment is favorable for financial services companies. The Adviser believes that there are opportunities available in the financial services sector in light of the regulatory environment, potential consolidation, expanding technological innovation, growth in global payments, and continuing demand for wealth management services.

Gabelli High Income ETF

The investment objective of the Fund is to seek high total return, comprised primarily of current income and secondarily of capital appreciation. Neither the investment objective nor any of the policies are fundamental, except as expressly stated herein, and each may be modified without shareholder approval. Shareholders will receive notice sixty days prior to any change in the Fund's investment objective.

The Fund seeks to achieve its investment objective by investing, as a principal strategy, at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in a broad range of income producing securities, including debt, equity and hybrid instruments (the "80% Policy"). As part of the 80% Policy, under normal market conditions, the Fund will attempt to achieve its investment objective primarily by investing in high-yield corporate bonds and other debt instruments, with an emphasis on those rated below investment grade (including, but not limited to, bank loans in the form of assignments or participations, payment-in-kind securities, and deferred payment securities). The high-yield securities the Fund invests in may be fixed, variable, or floating rate. The Fund may invest in new issuances of high yield securities, distressed securities, and restricted or illiquid securities, including significant investments in Rule 144A securities. The Fund intends to invest primarily in higher yielding and generally lower quality debt securities (rated Ba1 / BB+ or below by a NRSRO or unrated but determined by the Adviser to be of equivalent quality), including corporate loan obligations. Such securities are sometimes referred to as "junk bonds." In addition, as part of the 80% Policy, under normal market conditions, the Fund may also opportunistically invest in investment grade instruments, common stock, preferred stock, and other equity-related hybrid instruments, including convertible securities.

The Fund may also invest in CDOs, including CLOs. CDOs are securitized interests in pools of generally non-mortgage-assets. Assets called collateral usually are comprised of loans or other debt instruments. Multiple tranches of securities are issued by the CDO, offering investors various maturity and credit risk characteristics. Tranches are categorized as senior, mezzanine and subordinated/equity, according to their degree of credit risk. If there are defaults or the CDO's collateral otherwise underperforms, scheduled payments to senior tranches take precedence over those of mezzanine tranches, and scheduled payments to mezzanine tranches take precedence over those to subordinated/equity tranches. Senior and mezzanine

tranches are typically rated, with the former receiving ratings of A to AAA/Aaa and the latter receiving ratings of B to BBB/Baa. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it. A CLO is a trust typically collateralized substantially by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. Senior tranches typically have higher ratings and lower yields than the CLO's underlying securities and subordinated tranches and may be rated investment grade. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it.

The Fund may also invest in derivative instruments as a means of hedging risk and/or for investment or efficient portfolio management purposes, which may include altering the Fund's exposure to currencies, interest rates, inflation, sectors, industries and individual issuers. These derivative instruments may include, among other things, futures, options, forward foreign currency contracts, and swaps, such as total return swaps, credit default swaps and interest rate swaps. The Fund will count the notional value of investments in derivative instruments towards compliance with the 80% Policy.

As part of the 80% Policy, the Fund may also invest in other investment companies, including exchange-traded funds ("ETFs"), if the investment companies invest principally in the types of investments in which the Fund may invest directly. To the extent the Fund invests in other investment companies, including ETFs, the Fund will consider the underlying holdings of such funds for purposes of compliance with the 80% Policy.

The Fund may also invest in fixed-income instruments of foreign issuers, including issuers of debt securities in emerging markets. The Fund considers a security to be from a developed country if its issuer is located in the following developed countries list, which is subject to change: Australia, Austria, Belgium, Bermuda, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, The Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The Fund considers a security to be an emerging markets security if its issuer is located outside of the countries listed above. Generally, the Fund invests in U.S. dollar denominated securities, however, the Fund may invest in securities denominated in foreign currencies.

The Fund has no average maturity limitations, but it typically invests in intermediate-term debt securities. The Fund may also invest in long-term debt securities and short-term money market instruments and U.S. government securities.

The Fund may also hold cash or cash equivalents, including commercial paper and short-term securities issued by the U.S. government, its agencies and instrumentalities. The percentage of the Fund invested in such holdings varies and depends on various factors, including market conditions and purchases and redemptions of Fund shares. The Adviser may determine that it is appropriate to invest a substantial portion of the Fund's assets in such instruments in response to certain circumstances, such as periods of market turmoil.

The Fund may change the 80% Policy without shareholder approval. The Fund will provide shareholders with written notice at least 60 days prior to the implementation of any such changes.

The Adviser generally utilizes a fundamental, bottom-up, long-only investment strategy by investing in issuers that the Adviser believes can carry debt loads through different economic cycles. The Adviser seeks to invest in issuers that demonstrate the ability to generate strong, sustainable cash flows, which may enable an issuer to decrease leverage and improve its credit rating. The Adviser also uses proprietary research to identify areas of relative value, within the high yield market that the Adviser believes to be undervalued/overvalued relative to the overall market. The Adviser seeks to invest in issuers with high quality business models that have attractive risk adjusted return characteristics. The Adviser believes that the disciplined execution of its investment process will enable it to select individual securities that have the potential to perform well in diverse market environments.

The Adviser will sell any Fund investments that, in the Adviser's judgment, lose their perceived value relative to other investments.

In the event of adverse market, economic, political or other conditions, the Fund may take temporary defensive positions that are inconsistent with the Fund's principal investment strategies. To the extent the Fund assumes a defensive position, it may not achieve its investment objective.

You may lose money by investing in the Fund. When you sell your shares of the Fund, they could be worth less than what you paid for them.

Gabelli Keeley Dividend ETF

The investment objective of the Fund is to provide capital appreciation and current income. The Fund's investment objective may be changed without shareholder approval. Shareholders will receive notice sixty days prior to any change in the Fund's investment objective.

The Fund is an actively managed exchange-traded fund ("ETF"). The Fund seeks to achieve its investment objective by investing, as a principal strategy, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in common stocks and other equity-type securities (such as preferred stock, convertible debt securities and warrants) of dividend-paying companies, as defined below. While the Fund expects to invest primarily in small- and mid-cap companies, it may invest in companies of any market capitalization.

"Dividend-paying companies" have one or more of the following characteristics: (i) attractive dividend yields that, in the opinion of the Adviser, are relatively stable or expected to grow; (ii) that pay a small dividend, but could grow their dividend over the next few years; and (iii) that pay no dividend, but may initiate a dividend or return cash to shareholders in other ways, such as a share repurchase program. The Adviser believes that a track record of dividend increases is an excellent indicator of a company's financial health and growth prospects, and that over the long-term, income can contribute significantly to total return. Dividends also can help reduce the Fund's volatility during periods of market turbulence and can help offset losses when stock prices are falling.

The Adviser's investment philosophy with respect to buying and selling equity securities is to identify stocks that are selling in the public market at a discount to their intrinsic value. The Adviser defines intrinsic value as the product of a reasonable earnings multiple and an assessment of normalized future earnings. The Adviser considers factors such as price, earnings expectations, earnings and price histories, dividends and their sustainability, balance sheet characteristics, and perceived management skills. The Adviser

also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning, that may surface additional value.

It is the Adviser's intention for the Fund typically to hold securities for more than one year. However, the Adviser may sell securities when a more attractive opportunity emerges, when a company becomes over-weighted in the portfolio, or when operating difficulties or other circumstances make selling desirable.

In selecting investments for the Fund, the Adviser seeks issuers that:

- are well managed; and
- are undervalued.

Gabelli Opportunities in Live and Sport ETF

The investment objective of the Fund is to provide capital appreciation. The Fund's investment objective may be changed without shareholder approval. Shareholders will receive notice sixty days prior to any change in the Fund's investment objective.

The Fund is an actively managed exchange-traded fund ("ETF"). Under normal market conditions, the Fund invests at least 80% of the value of its net assets in securities of companies principally engaged in the group of industries comprising the live media and entertainment and sports sectors. As a fundamental policy, the Fund will concentrate (invest at least 25% of the value of its net assets) in the securities of companies principally engaged in the sports, media and entertainment industries. The Fund may invest in the equity securities of such companies, such as common stock, or preferred stock of such companies in accordance with the foregoing 80% policy. The Fund may also invest in foreign securities, including, but not limited to, direct investments in securities of foreign issuers and investments in American Depositary Receipts that represent indirect investments in securities of foreign issuers. The Fund may invest in companies without regard to market capitalization. In addition, the Fund may invest up to 10% of the value of its net assets in option contracts in accordance with Rule 18f-4 under the 1940 Act, which requires the Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon the Fund's level of exposure to derivative instruments.

The Fund considers a company to be principally engaged in the live media and entertainment sector if it devotes a significant portion of its assets to or derives at least 50% of its revenues from the development, production or distribution of live media and entertainment. Live media and entertainment include, but are not limited to, television and radio stations, motion picture companies, print publishing and providers of internet content, as well as satellite service providers, cable service providers and advertising service providers.

The Fund considers a company to be principally engaged in the group of industries comprising the sports sector if it devotes a significant portion of its assets to or derives at least 50% of its revenues from sports-related activities. Sports-related activities include, but are not limited to, the following: (i) the direct operation or ownership of sports teams or leagues; (ii) the development or monetization of sports-related real estate (*e.g.*, stadiums, sports resorts, or experiential venues such as golf and ski destinations); (iii) the sale of sports-related products or services (*e.g.*, athletic apparel, equipment, or ticketing); and (iv) sports media and content distribution. A company with indirect or adjacent exposure to a sports-related

activity—such as an event promoter, live entertainment company, or large conglomerate with business lines that own or operate sports assets—may also qualify for investment if the Adviser believes the sports-related component represents a meaningful portion of the company’s business value.

The Fund’s assets will be invested primarily in a broad range of readily marketable equity securities consisting of common stock and preferred stock. Many of the common stocks the Fund will buy will not pay dividends; instead, stocks will be bought for the potential that their prices will increase, providing capital appreciation for the Fund. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer’s management, general market conditions, the forecasts for the issuer’s industry, and the value of the issuer’s assets. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty. The Fund may also buy warrants, which are rights to purchase securities at a specified time at a specified price.

The Adviser’s investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value (“PMV”). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for a catalyst, something indigenous to the company, its industry or geographic positioning that may surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business. The Adviser expects to seek to sell any Fund investments that lose their perceived value relative to other investments, which could occur because of, among other things, a security reaching a predetermined price target, a change to a company’s fundamentals that make the risk/reward profile unattractive, or a need to improve the overall risk/reward profile of the Fund.

In selecting investments for the Fund, the Adviser seeks issuers that:

- are principally engaged in the sports sector;
- are well managed;
- are undervalued; and
- may be subject to a catalyst, such as industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business.

The Adviser believes that the current market, economic and regulatory environment is favorable for sports companies. The Adviser believes that there are opportunities available in the sports sector in light of potential consolidation, expanding technological innovation, and continuing demand for sports-related goods and services.

Investing in the Funds involves the following risks:

- **Absence of an Active Market.** *All Funds* — Although shares of the Funds are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation

Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in the Funds' shares. The absence of an active market for the Funds' shares may lead to wider bid-ask spreads and may contribute to the Funds' shares trading at a premium or discount to NAV. If a shareholder purchases a Fund's shares at a time when the market price is at a premium to the NAV or sells a Fund's shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

- **Aerospace Industry Risk.** *Aerospace and Defense Fund only* — Government aerospace regulation and spending policies can significantly affect the aerospace industry because many companies involved in the aerospace industry rely to a large extent on U.S. (and other) Government demand for their products and services. There are significant inherent risks in government contracting, which could have a material adverse effect on the business, financial condition and results of operations of industry participants. Government spending in aerospace generally is not correlated with any economic cycle, but rather, on the cycle of general political support for this type of spending. However, there is no assurance that future levels of aerospace and defense spending will increase or that levels of aerospace and defense spending will not decrease in the future. In addition, the aerospace industry in particular has recently been affected by adverse economic conditions and consolidation within the industry. Furthermore, competition in the airline industry continues to increase as a result of airline deregulation.
- **American Depositary Receipts (“ADRs”) Risk.** *All Funds* — Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.
- **Authorized Participant Concentration Risk.** *All Funds* — Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. “Authorized Participants” are broker-dealers that are permitted to create and redeem shares directly with the Fund and who have entered into agreements with the Fund's distributor. A Fund has a limited number of institutions that may act as Authorized Participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to process creation and/or redemption orders with respect to the Fund and no other Authorized Participant steps forward to create or redeem, Fund shares may trade at a premium or discount to the Fund's net asset value (“NAV”) and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. Authorized participant concentration risk may be heightened for ETFs that invest in securities issued by non-U.S. issuers or other securities or instruments that have lower trading volumes. Additionally, in stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying

portfolio holdings. This adverse effect on liquidity for the Fund's shares could, in turn, lead to wider bid-ask spreads and differences between the market price of the Fund's shares and the underlying value of those shares.

- **Concentration Risk.** *Aerospace and Defense Fund only* — The Aerospace and Defense Fund may concentrate its investments in securities of companies principally engaged in the group of industries comprising the aerospace and defense sectors, which means that the Fund is less diversified than the Fund investing in a broader range of industries, and is particularly sensitive to general market conditions and other risks of the aerospace and defense industries, including that the aerospace industry and the defense industry can be significantly affected by government regulation and spending policies because companies involved in this industry rely, to a significant extent, on government demand for their products and services. The financial condition of these companies is heavily influenced by government defense spending, which may be reduced in efforts to control government budgets. The aerospace industry in particular has recently been affected by adverse economic conditions and consolidation within the industry.
- **Concentration Risk.** *Global Technology Leaders Fund only* — The Fund will concentrate its investments in securities of companies principally engaged in the group of industries comprising the technology sector, which means that the Fund is less diversified than the Fund investing in a broader range of industries, and is particularly sensitive to general market conditions and other risks of the technology industry, including fluctuations in demand for products or services, intense competition, unexpected risks and costs associated with research and development, increased government regulation or scrutiny, and limited financial resources. Technology companies also rely on intellectual property rights and may be adversely affected by the loss or impairment of those rights.
- **Concentration Risk.** *Financial Services Fund only* — The Fund will concentrate its investments in securities issued by financial services companies which means that the Fund is less diversified than the Fund investing in a broader range of industries, and is particularly sensitive to general market conditions and other risks of the financial services industry, including:

Financial services companies can be significantly affected by changing economic conditions, demand for consumer loans, refinancing activity and intense competition, including price competition. Profitability can be largely dependent on the availability and cost of capital and the rate of consumer debt defaults, and can fluctuate significantly when interest rates change; unstable and/or rising interest rates may have a disproportionate effect on companies in the financial services sector. Financial services companies are subject to extensive government regulation, which can change frequently and may adversely affect the scope of their activities, the prices they can charge and the amount of capital they must maintain, or may affect them in other ways that are unforeseeable. In the past, financial services companies in general experienced considerable financial distress, which led to the implementation of government programs designed to ease that distress. Different areas of the overall financial services sector tend to be highly correlated and particularly vulnerable to certain factors.

Additional risks of investing in the financial services sector include: (i) systemic risk: factors outside the control of a particular financial institution may adversely affect the ability of the financial institution to operate normally or may impair its financial condition; (ii) non-diversified loan portfolios:

financial services companies may have concentrated portfolios that makes them vulnerable to economic conditions that affect an industry; (iii) credit: financial services companies may have exposure to investments or agreements that may lead to losses; (iv) governmental limitations on a company's loans, other financial commitments, product lines and other operations; (v) recent ongoing changes in the financial services industry (including consolidations, development of new products and changes to the industry's regulatory framework); and (vi) rapidly rising inflation. Some financial services companies have recently experienced significant losses in value and the possible recapitalization of such companies may present greater risks of loss.

Insurance companies have additional risks, such as heavy price competition, claims activity and marketing competition, and can be particularly sensitive to specific events such as manmade and natural disasters, terrorism, mortality risks and morbidity rates. Individual insurance companies may be exposed to reserve inadequacies, problems in investment portfolios (for example, due to real estate or "junk" bond holdings) and failures of reinsurance carriers.

Federal or state law and regulations require banks, bank holding companies, broker dealers and insurance companies to maintain minimum levels of capital and liquidity. Bank regulators have broad authority and can impose sanctions, including conservatorship or receivership, on non-complying banks even when these banks continue to be solvent, thereby possibly resulting in the elimination of stockholders' equity. Commercial banks (including "money center" regional and community banks), savings and loan associations and holding companies of the foregoing are especially subject to adverse effects of volatile interest rates, concentrations of loans in particular industries (such as real estate) and significant competition. The profitability of these businesses is to a significant degree dependent upon the availability and cost of capital funds. Economic conditions in the real estate market may have a particularly strong effect on certain banks and savings associations.

The Fund may invest in financial services companies that invest in real estate, such as commercial banks, savings and loan associations (each discussed above) and Mortgage REITs. REITs are financial vehicles that pool investors' capital to purchase or finance real estate. Mortgage REITs invest the majority of their assets in real property mortgages and generally derive income primarily from interest payments thereon. Like investment companies, REITs are typically dependent on management skills and subject to management fees and other expenses, and so the Fund that invests in REITs will bear its proportionate share of the costs of the REITs' operations. REITs may be highly leveraged and financial covenants may affect the ability of REITs to operate effectively. REITs are subject to a highly technical and complex set of provisions in the Internal Revenue Code of 1986 (the "Code"). No assurances can be given that a REIT will be able to continue to qualify as a REIT or that complying with the REIT requirements under the Code will not adversely affect such REIT's ability to execute its business plan. Issuers with exposure to the real estate, mortgage and credit markets are particularly affected by volatility in both foreign and domestic equity markets. REITs (especially mortgage REITs) are subject to the possibility of adverse changes in interest rates and in the credit markets and the possibility of borrowers paying off mortgages sooner than expected (which may lead to reinvestment of assets at lower prevailing interest rates). In addition to these market and financial risks, REITs are subject to risks associated with the ownership of

real estate, including possible adverse changes in zoning laws, limitations on rents, the risk of casualty or condemnation losses and terrorist attacks, and war or other acts that destroy real property.

- **Concentration Risk.** *Sports Fund only* — The Fund concentrates its assets (*i.e.*, invests 25% or more of its net assets) in securities of companies in the sports sector, and, as a result, the Fund may be subject to greater volatility with respect to its portfolio securities than a fund that is more broadly diversified. Accordingly, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities. Risks associated with investments in the sports sector include, among others:
 - **Communication Services Risk.** The Fund's investments include securities issued by companies that conduct business in the communication services sector. The communication services sector consists of, among other things, companies in the media and entertainment industry. Companies in the media and entertainment industry group encompass a variety of services and products including television broadcasting, gaming products, social media, networking platforms, online classifieds, online review websites and Internet search engines. The communication services sector is often subject to extensive government regulation. The costs of complying with governmental regulations, delays or failure to receive required regulatory approvals, or the enactment of new regulatory requirements may negatively affect the business of communications companies. Companies in the communication services sector may encounter distressed cash flows due to the need to commit substantial capital to meet increasing competition, particularly in developing new products and services using new technology. Communication services companies are particularly vulnerable to the potential obsolescence of products and services due to technological advancement and the innovation of competitors. While all companies may be susceptible to network security breaches, certain companies in the communication services sector may be particular targets of hacking and potential theft of proprietary or consumer information or disruptions in service, which could have a material adverse effect on their businesses. The Fund's investments in the communication services sector include companies in the media and entertainment industry, which are subject to risks that include competition, particularly with respect to products and services using new technologies; high costs of production, research and development for new content, products and services; cyclicity of revenues and earnings; changing consumer tastes and preferences; and decreases in the discretionary income of targeted consumers.
 - **Professional Sports Risk.** Professional sports teams depend on the performance and/or popularity of their franchises, and they compete with other sporting events, which are delivered through the Internet and online services (e.g., streaming), mobile applications, television networks, radio and other sources. Professional sports teams also depend on attracting attendance to competitions at their home venues, and they compete with other leisure-time activities and entertainment options such as television shows, motion pictures, concerts and other live performances, restaurants, nightlife venues, Internet websites and other online applications such as social media and social networking platforms, and other sources of entertainment. Economic downturns and other adverse

conditions, such as suspension of sports events or limitations on in-person attendance at such events, can negatively affect professional sports companies' operations. Professional sports companies also depend on the onfield success of their teams, which is affected by the teams' ability to develop, obtain and retain talented players.

- **Defense Industry Risk.** *Aerospace and Defense Fund only* — Companies in the defense industry are subject to numerous risks, including fierce competition, consolidation, adverse political, economic and governmental developments (both in the U.S. and abroad), compliance with varying regulation across international markets, substantial research and development costs, cuts in government funding, product and technology obsolescence, limited numbers of potential customers and decreased demand for new equipment. Since defense companies derive significant revenue from government contracts, they face a number of specific risks that may adversely affect a company's financial condition and outlook. The government may terminate a contract with an issuer as a result of an issuer's default, resulting in possible issuer liability to the government. The government may also terminate a contract for its own convenience, which may lead to difficulty for the issuer in recovering costs incurred prior to termination. Such contracts may also be modified or terminated due to changes in congressional funding levels. Government contractors are also subject to stringent routine audits and reviews, which may lead to significant price adjustments for products and services. The highly competitive bidding environment in which government contractors operate may also reduce the profitability of certain government contracts. Companies involved in the commercial aerospace industry are subject to risks including aircraft order cancellations, excess capacity, cutbacks in profitable business travel, fuel price hikes, labor union settlements, adverse changes in international politics and relations, intense global competition, government regulation and cyclical market patterns.
- **Early Close/Trading Halt Risk.** *All Funds* — An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in a Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Funds may be unable to rebalance their portfolios, may be unable to accurately price their investments and/or may incur substantial trading losses. Any security for which trading has been halted for an extended period of time will be disclosed on the Funds' website, www.gabelli.com.
- **Equity Risk.** *All Funds* — Equity risk is the risk that the prices of the equity securities held by the Funds will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause an equity security to be worth less than it was worth when it was purchased by the Funds. Because the value of equity securities, and thus shares of the Funds, could decline, you could lose money.
- **Foreign Securities Risk.** *All Funds* — Investments in foreign securities involve risks relating to political, social, and economic developments abroad, as well as risks resulting from the differences between the regulations to which U.S. and foreign issuers and markets are subject. These risks include expropriation, differing accounting and disclosure standards, currency exchange risks, settlement difficulties, market illiquidity, difficulties enforcing legal rights, and greater transaction costs.

- **Geopolitical Risk.** *All Funds* — Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. There is significant uncertainty as to further actions that may be taken by the U.S. and foreign governments with respect to trade policy. In addition, Russia's military invasion of Ukraine and the conflict among Israel, Iran, Hamas, and the potential for wider conflict, have increased volatility and uncertainty in the financial markets, adversely affected regional and global economies, and could present material uncertainty and risk with respect to the Funds and the performance of the Funds' investments or operations. These events, as well as other recent geopolitical events, such as rising tensions between the Chinese government and Taiwan, and related changes in foreign and domestic political and economic conditions, could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, secondary trading, credit ratings, inflation, investor sentiment and other factors affecting the value of the Funds' investments.
- **Growth Stock Risk.** *Growth Innovators Fund only* — Securities of growth companies may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks that can cushion stock prices in a falling market. Stocks of companies the Adviser believes are fast-growing may trade at a higher multiple of current earnings than other stocks. The values of these stocks may be more sensitive to changes in current or expected earnings than the values of other stocks. Earnings disappointments often lead to sharply falling prices because investors buy growth stocks in anticipation of superior earnings growth. If the Adviser's assessment of the prospects for a company's earnings growth is wrong, or if the Adviser's judgment of how other investors will value the company's earnings growth is wrong, then the price of the company's stock may fall or may not approach the value that the Adviser has placed on it.
- **Inflation Risk.** *All Funds* — Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of each Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment. Inflation has recently increased and it cannot be predicted whether and to what extent it may decline.

Although the Federal Reserve has raised the federal funds rate, there is no guarantee that such increases will be effective at lowering inflation. Unanticipated or persistent inflation may have a material and adverse impact on the financial conditions or operating results of issuers in which

the Fund may invest, which may cause the value of the Fund's investments to decline. In addition, higher interest rates that often accompany or follow periods of high inflation may cause investors to favor asset classes other than common stocks, which may lead to broader market declines not necessarily related to the performance of any specific investments or specific issuers.

- **Issuer Risk.** *All Funds* — The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Large Capitalization Company Risk.** *Aerospace and Defense Fund, Global Technology Leaders Fund, Financial Services Fund, Dividend Fund and Sports Fund only* — Companies with \$10 billion or more in market capitalization are considered by the Adviser to be large capitalization companies. Large capitalization companies generally experience slower rates of growth in earnings per share than do mid and small capitalization companies.
- **Large Shareholder Risk.** *All Funds* — Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Funds' shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Funds. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca, Inc. and may, therefore, have a material upward or downward effect on the market price of the Funds' shares. The form of a large shareholder's contribution and any redemption activity in the Funds can adversely affect the tax efficiency of the Funds.
- **Management Risk.** *All Funds* — If the portfolio managers are incorrect in their assessment of the investment prospects of the securities a Fund holds, then the value of that Fund's shares may decline. In addition, the Adviser's strategy may produce returns that are different from other funds that invest in similar securities.
- **Market Risk.** *All Funds* — Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Funds' portfolios may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Funds' investments and operations. In addition,

the value of the Funds' investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.

- **Market Trading Risk.** *All Funds* — Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from a Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below a Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Mid-Capitalization Company Risk.** *Aerospace and Defense Fund, Global Technology Leaders Fund, Financial Services Fund, Dividend Fund and Sports Fund only* — Mid-cap company risk is the risk that investing in securities of mid-cap companies could entail greater risks than investments in larger, more established companies. Mid-cap companies tend to have narrower product lines, more limited financial resources and a more limited trading market for their stocks, as compared with larger companies. As a result, their stock prices may decline more significantly or more rapidly than stocks of larger companies as market conditions change.
- **Non-Diversification Risk.** *Aerospace and Defense Fund, Global Technology Leaders Fund, Financial Services Fund and Sports Fund only* — Each Fund is classified as a "non-diversified" Fund. As a non-diversified Fund, more of a Fund's assets may be focused in the securities of a small number of issuers, which may make the value of each Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund. The ability to invest in a more limited number of securities may increase the volatility of each Fund's investment performance, as each Fund may be more susceptible to risks associated with a

single economic, political, or regulatory event than a diversified Fund. If the securities in which each Fund invests perform poorly, each Fund could incur greater losses than it would have had if it had been invested in a greater number of securities.

- **Options Risk.** *Global Technology Leaders Fund only* — The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio manager to forecast market movements correctly. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options.
- **Preferred Stock Risk.** *All Funds* — A preferred stock is a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Preferred stock has preference over common stock in the receipt of dividends and in any residual assets after payment to creditors should the issuer be dissolved. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.
- **Risk of Investing in Europe.** *Global Technology Leaders Fund, Financial Services Fund, Dividend Fund and Sports Fund only* — The Fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests than are funds whose investments are more geographically diversified. Adverse economic and political events in Europe may cause the Fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. The Fund makes investments in securities of issuers that are domiciled in, or have significant operations in, member states of the EU. The EU requires compliance by member states with restrictions on inflation rates, deficits, interest rates and debt levels, as well as fiscal and monetary controls, each of which may significantly affect every country in Europe, including those countries that are not members of the EU. Changes in imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the Euro (the common currency of certain EU countries), the default or threat of default by an EU member state on its sovereign debt, or an economic recession in an EU member state may have a significant adverse effect on the economies of EU member states and their trading partners. The European financial markets have experienced volatility and adverse trends in recent years due to concerns about economic downturns or rising government debt levels in several European countries, including, but not limited to, Austria, Belgium, Cyprus, France, Greece, Ireland, Italy, Portugal, Spain and Ukraine. These events have adversely affected the exchange rate of the Euro and may continue to significantly affect other European countries. Responses to the financial problems by European governments, central banks

and others, including austerity measures and reforms, may not produce the desired results, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and other entities of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world.

One or more countries may abandon the Euro and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

- **Risk of Investing in Japan.** *Global Technology Leaders Fund, Financial Services Fund, Dividend Fund and Sports Fund only* — Japan may be subject to political, economic, nuclear, and labor risks, among others. Any of these risks, individually or in the aggregate, can impact an investment made in Japan.
 - **Economic Risk** — The growth of Japan’s economy has recently lagged that of its Asian neighbors and other major developed economies. Since 2000, Japan’s economic growth rate has generally remained low relative to other advanced economies, and it may remain low in the future. Global health outbreaks may lead to significant disruptions in global economic activity and as a result, may have negative effects on Japan’s economy.
 - **Political Risk** — Historically, Japan has had unpredictable national politics and may experience frequent political turnover. Future political developments may lead to changes in policy that might adversely affect the Fund’s investments. In addition, China has become an important trading partner with Japan. Japan’s political relationship with China, however, is strained and delicate. Should political tension increase, it could adversely affect the Japanese economy and destabilize the region as a whole.
 - **Currency Risk** — The Japanese yen has fluctuated widely at times, and any increase in its value may cause a decline in exports that could weaken the Japanese economy. The Japanese government has, in the past, intervened in the currency markets to attempt to maintain or reduce the value of the yen. Japanese intervention in the currency markets could cause the value of the yen to fluctuate sharply and unpredictably and could cause losses to investors.
 - **Nuclear Energy Risk** — The nuclear power plant catastrophe in Japan in March 2011 may have long-term effects on the Japanese economy and its nuclear energy industry, the extent of which are currently unknown. Similar catastrophes in the future may have negative consequences in the companies in which the Fund invests.
 - **Geographic Risk** — Natural disasters, such as earthquakes, volcanic eruptions, typhoons and tsunamis, could occur in Japan or surrounding areas and could negatively affect the Japanese economy, and, in turn, could negatively affect the Fund and its shareholders.
- **Risk of Investing in the United Kingdom.** *Global Technology Leaders Fund, Financial Services Fund, Dividend Fund and Sports Fund only* — Investment in United Kingdom (“U.K.”) companies may subject the Fund to regulatory, political, currency, security, and economic risks specific to the U.K. The U.K.’s economy relies heavily on the export of financial services to the U.S. and other European countries. A prolonged slowdown in the financial services sector

may have a negative impact on the U.K.'s economy. In the past, the U.K. has been a target of terrorism. Acts of terrorism in the U.K. or against U.K. interests may cause uncertainty in the U.K.'s financial markets and adversely affect the performance of the companies in which the Fund invests. Following the U.K. officially withdrawing from the EU, commonly referred to as "Brexit," certain trading matters between the U.K. and the EU remain unresolved, including with respect to financial services. Continuing uncertainty regarding the U.K.'s relationship with the EU could have an adverse impact on the economy and currency of the U.K. Other risks to the U.K.'s economic growth and competitiveness include high public debt and relatively low productivity.

- **Sector Risk.** *Aerospace and Defense Fund only* — Under normal circumstances, the Aerospace and Defense Fund will invest at least 80% of its net assets in aerospace and defense companies, and thus its investments will be focused in a particular sector. By investing a significant portion of its assets in a particular sector, the Fund will be subject to the risk that companies in the same sector are likely to react similarly to legislative or regulatory changes, adverse market conditions, increased competition, or other factors affecting that market segment. In such cases, the Fund would be exposed to an increased risk that the value of its overall portfolio will decrease because of events that disproportionately and negatively affect that sector. In addition, investments in a particular sector may be more volatile than the broader market as a whole, and the Fund's investments in such a sector may be disproportionately susceptible to losses.

Love Our Planet Fund only — Although the Fund does not employ a sector focus, the percentage of the Fund's assets invested in a particular sector can increase from time to time based on the Adviser's perception of available investment opportunities. If the Fund invests a significant portion of its assets in a particular sector, the Fund will be subject to the risk that companies in the same sector are likely to react similarly to legislative or regulatory changes, adverse market conditions, increased competition, or other factors affecting that market segment. In such cases, the Fund would be exposed to an increased risk that the value of its overall portfolio will decrease because of events that disproportionately and negatively affect that sector. In addition, investments in a particular sector may be more volatile than the broader market as a whole, and the Fund's investments in such a sector may be disproportionately susceptible to losses.

Growth Innovators Fund and Global Technology Leaders Fund only — Technology companies, may have limited product lines, markets, financial resources or personnel. Technology companies typically face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights. Companies in the technology sector are facing increased government and regulatory scrutiny and may be subject to adverse government or regulatory action.

- **Small Capitalization Companies Risk.** *Aerospace and Defense Fund, Global Technology Leaders Fund, Financial Services Fund, Dividend Fund and Sports Fund only* — Investing in securities of small capitalization companies may involve greater risks than investing in larger, more established issuers. Smaller capitalization companies typically have relatively lower revenues, limited product lines and lack of management depth, and may have a smaller share of the market for their products or services, than larger capitalization companies. The

stocks of smaller capitalization companies tend to have less trading volume than stocks of larger capitalization companies. Less trading volume may make it more difficult for the portfolio manager to sell securities of smaller capitalization companies at quoted market prices. Finally, there are periods when investing in smaller capitalization stocks fall out of favor with investors and the stocks of smaller capitalization companies underperform.

- **Socially Responsible Investment Risk.** *Love Our Planet Fund only* — The application of the Adviser’s socially responsible criteria will affect the Fund’s exposure to certain issuers, industries, sectors, regions, and countries and may impact the relative financial performance of the Fund – positively or negatively – depending on whether such investments are in or out of favor. The Fund’s investment strategy limits the types of investments the Fund can make. Consequently, the Fund may underperform the market as a whole or other funds that are not subject to the same limitations.
- **Trading Issues Risk.** *All Funds* — Shares of a Fund may trade in the secondary market at times when a Fund does not accept orders to purchase or redeem shares. At such times, shares may trade in the secondary market with more significant premiums or discounts than might be experienced at times when a Fund accepts purchase and redemption orders. Secondary market trading in a Fund’s shares may be halted by a stock exchange because of market conditions or for other reasons. In addition, trading in a Fund’s shares on a stock exchange or in any market may be subject to trading halts caused by extraordinary market volatility pursuant to “circuit breaker” rules on the stock exchange or market.
- **Value Investing Risk.** *Aerospace and Defense Fund, Financial Services Fund, High Income, Dividend Fund, and Sports Fund only* — The Fund invests in “value” stocks. The portfolio manager may be wrong in the assessment of a company’s value and the stocks each Fund holds may not reach what the portfolio manager believes are their full values. From time to time “value” investing falls out of favor with investors. During those periods, each Fund’s relative performance may suffer.
- **Credit Risk.** *High Income only* — Credit risk is the risk that the value of loans or other debt instruments may decline if the borrower or the issuer defaults or otherwise becomes unable or unwilling, or is perceived to be unable or unwilling, to honor its financial obligations, such as making payments to the Fund when due. If the issuer of a debt instrument fails to pay interest or principal when due, or negative perceptions exist in the market of the issuer’s ability to make such payments, the price of the security may decline. Credit rating agencies assign credit ratings to certain loans and debt instruments to indicate their credit risk. A rating downgrade by such agencies can negatively impact the value of such instruments. Lower-rated or unrated loans or instruments held by the Fund may present increased credit risk as compared to higher-rated loans or instruments. Non-investment grade loans or debt instruments may be subject to greater price fluctuations and are more likely to experience a default than investment grade loans or debt instruments and therefore may expose the Fund to increased credit risk.

The credit quality of a security or instrument can deteriorate suddenly and rapidly, which may negatively impact its liquidity and value. The securities in which the Fund invests may be subject to credit enhancement (for example, guarantees, letters of credit, or bond insurance). Entities

providing credit or liquidity support also may be affected by credit risk. Credit enhancement is designed to help assure timely payment of the security; it does not protect the Fund against losses caused by declines in a security's value due to changes in market conditions.

- **Debt Instruments Risk.** *High Income only* — The risks of investing in debt or fixed-income instruments include (without limitation): (i) credit risk, e.g., the issuer or guarantor of a debt security may be unable or unwilling (or be perceived as unable or unwilling) to make timely principal and/or interest payments or otherwise honor its obligations, or changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may affect the value of the Fund's investments; (ii) maturity risk, e.g., a debt security with a longer maturity may fluctuate in value more than one with a shorter maturity; (iii) market risk, e.g., low demand for debt securities may negatively impact their price; (iv) interest rate risk, e.g., when interest rates go up, the value of a debt security generally goes down, and when interest rates go down, the value of a debt security generally goes up (long-term debt securities are generally more susceptible to interest rate risk than short-term debt securities); and (v) call or prepayment risk, e.g., during a period of falling interest rates, the issuer may redeem a security by repaying it early, which may reduce the Fund's income if the proceeds are reinvested at lower interest rates.
- **Lower Rated Debt Securities Risk.** *High Income only* — Lower-rated debt securities (commonly known as "junk bonds") and unrated debt securities determined to be of comparable quality involve greater risks than investment grade debt securities. Such securities may fluctuate more widely in price and yield and may fall in price, sometimes abruptly, due to changes in interest rates, market activity, economic conditions, such as when economic conditions are deteriorating or are expected to deteriorate, or other factors. These securities may be less liquid and also may require a greater degree of judgment to establish a price, may be difficult to sell at the time and price the Fund desires, and may carry higher transaction costs. In particular, these securities may be issued by smaller companies or by highly indebted companies, which are generally less able than more financially stable companies to make scheduled payments of interest and principal. Lower-rated debt securities are considered by the major rating agencies to be predominantly speculative with respect to the issuer's continuing ability to pay principal and interest and carry a greater risk that the issuer of such securities will default in the timely payment of principal and interest. Such securities are susceptible to such a default or decline in market value due to real or perceived adverse economic and business developments relating to the issuer, the industry in general, market interest rates and market liquidity. Such securities may be unsecured or have insufficient collateral and may be subordinated to other creditors, which increases the risk of loss on these securities. Issuers of securities that are in default or have defaulted may fail to resume principal or interest payments, in which case the Fund may lose its entire investment. Where it deems it appropriate and in the best interests of Fund shareholders, the Fund may incur additional expenses to seek recovery on a defaulted security and/or to pursue litigation to protect the Fund's investment. The credit rating of a security may not accurately reflect the actual credit risk associated with such a security. The creditworthiness of issuers of these securities may be more complex to analyze than that of issuers of investment grade debt securities, and the overreliance on credit ratings may present additional risks. Adverse publicity and investor perceptions, such as a high profile default, whether or not based

on fundamental analysis, may decrease the values and liquidity of such securities, especially in a thinly traded or illiquid market. To the extent the Fund owns or may acquire illiquid or restricted lower-rated debt securities or unrated debt securities of comparable quality, these securities may involve special registration responsibilities, liabilities, costs, and liquidity and valuation difficulties.

- **Unrated Fixed Income Securities Risk.** *High Income only* — The Adviser has the authority to make determinations regarding the quality of unrated fixed income securities for the purpose of assessing whether they meet the Fund’s investment restrictions. However, analysis of unrated securities is more complex than that of rated securities, making it more difficult for the Adviser to accurately predict risk. Unrated fixed income securities may not be lower in quality than rated securities, but due to their perceived risk, they may not have as broad a market as rated securities, making it more difficult to sell unrated securities.
- **Collateralized Debt Obligations Risk.** *High Income only* — CDOs, which include CLOs, issue classes or “tranches” of securities that vary in risk and yield and may experience substantial losses due to interest rate fluctuations, actual defaults, collateral defaults, disappearance of subordinate tranches, market anticipation of defaults, and investor aversion to CDO securities as a class. The risks of investing in CDOs depend largely on the quality and type of the underlying debt, which may include loans, bonds and mortgages, and the tranche of the CDO in which the Fund invests. In addition, CDOs that obtain their exposure through derivative instruments entail the additional risks associated with such instruments. CDOs may be difficult to value, may at times be illiquid, may be highly leveraged (which could make them highly volatile), and may produce unexpected investment results due to their complex structure. In addition, CDOs involve many of the same risks of investing in debt securities and asset-backed securities including, but not limited to, interest rate risk, credit risk, liquidity risk, and valuation risk.
- **Interest Rate Risk.** *High Income and Dividend only* — The value of debt instruments usually rise and fall in response to changes in interest rates. Declining interest rates generally increase the value of existing debt instruments, and rising interest rates generally decrease the value of existing debt instruments. Changes in a debt instrument’s value usually will not affect the amount of interest income paid to the Fund, but it will affect the value of the Fund’s shares. Interest rate risk is generally greater for investments with longer maturities, and the link between interest rates and debt security prices tends to be weaker with lower-rated debt securities than with investment grade debt securities. It is difficult to predict the pace at which central banks or monetary authorities may change interest rates or the timing, frequency, or magnitude of such changes. Any such changes could be sudden and could expose debt markets to significant volatility and reduced liquidity for investments.

Certain instruments pay interest at variable or floating rates. Variable rate instruments reset at specified intervals, while floating rate instruments reset whenever there is a change in a specified index rate. The market prices of these instruments may fluctuate significantly when interest rates change. Some investments give the issuer the option to call or redeem an investment before its maturity date. If an issuer calls or redeems an investment during a time of declining interest rates, the Fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore it might not benefit from any increase in value as a result of declining interest rates.

- **Bank Loan Risk.** *High Income only* — Investing in loans (including floating rate loans, loan assignments, loan participations and other loan instruments) carries certain risks in addition to the risks typically associated with high yield/fixed income securities. Loans may be unsecured or not fully collateralized, subject to restrictions on resale and sometimes trade infrequently on the secondary market. In the event a borrower defaults, the Fund's access to the collateral may be limited or delayed by bankruptcy or other insolvency laws. There is a risk that the value of the collateral securing the loan may decline after the Fund invests and that the collateral may not be sufficient to cover the amount owed to the Fund. If the loan is unsecured, there is no specific collateral on which the Fund can foreclose. In addition, if a secured loan is foreclosed, the Fund may bear the costs and liabilities associated with owning and disposing of the collateral, including the risk that the collateral may be difficult to sell.
- **Convertible Securities Risk.** *High Income only* — The Fund may invest in convertible securities which may include both convertible debt and convertible preferred stock. Such securities may be converted into shares of the underlying common stock at either a stated price or stated rate. Therefore, convertible securities enable the holder to benefit from increases in the market price of the underlying common stock. Convertible securities provide higher yields than the underlying common stock, but generally offer lower yields than nonconvertible securities of similar quality. The value of convertible securities fluctuates in relation to changes in interest rates and, in addition, fluctuates in relation to the underlying common stock. While no securities investment is without some risk, investments in convertible securities generally entail less risk than the issuer's common stock; however, the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security. A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security held by the Fund is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into underlying common stock, or sell it to a third party. Investments by the Fund in convertible debt securities are not subject to any ratings restrictions, although the Adviser will consider such ratings, and any changes in such ratings, in its determination of whether the Fund should invest and/or continue to hold the securities. The credit standing of the issuer and other factors may have an effect on a convertible security's investment value. Convertible securities rank senior to common stock in a corporation's capital structure, but are usually subordinated to comparable non-convertible securities. Convertible securities are subject to interest rate risk and credit risk and are often lower-quality securities.
- **Counterparty Risk.** *High Income only* — Counterparty risk is the risk that a counterparty to a transaction becomes insolvent or otherwise fails to perform its obligations with respect to a financial instrument held by the Fund. As a result, the Fund may obtain no or limited recovery of its investment, and any recovery may be significantly delayed.
- **Prepayment and Extension Risk.** *High Income only* — Prepayment and extension risk is the risk that a loan, bond or other security or investment might, in the case of prepayment risk, be called or otherwise converted, prepaid or redeemed before maturity and, in the case of extension risk, that the investment might not be called as expected. In the case of prepayment risk, if the investment is converted, prepaid or redeemed before maturity, the portfolio manager may not be able to invest the proceeds in other investments providing as high a level of income,

resulting in a reduced yield to the Fund. In the case of mortgage- or other asset-backed securities, as interest rates decrease or spreads narrow, the likelihood of prepayment increases. Conversely, extension risk is the risk that an unexpected rise in interest rates will extend the life of a mortgage- or other asset-backed security beyond the prepayment time. If the Fund's investments are locked in at a lower interest rate for a longer time, the portfolio manager may be unable to capitalize on securities with higher interest rates or wider spreads.

- **Call Risk.** *High Income only* — Upon an issuer's desire to call a security, or under other circumstances where a security is called, including when interest rates are low and issuers opt to repay the obligation underlying a "callable security" early, the Fund may have to reinvest the proceeds in an investment offering a lower yield and may not benefit from any increase in value that might otherwise result from declining interest rates. This may reduce the amount of the Fund's distributions. The likelihood of a call also may impact the price of a security.
- **Restricted and Illiquid Securities Risk.** *High Income only* — The Fund may invest in restricted or illiquid securities, including Rule 144A securities, which are securities that are not registered for sale to the general public under the Securities Act. These securities may be resold to certain institutional investors but, if at any time an insufficient number of qualified institutional buyers are interested in purchasing the securities, the Fund may not have the ability to dispose of such securities promptly or at expected prices. As such, even if determined to be liquid, the Fund's investment in Rule 144A securities may subject the Fund to enhanced liquidity risk and potentially increase the Fund's exposure to illiquid investments. The market for lower-quality debt securities is generally less liquid than the market for higher-quality securities. Adverse publicity and investor perceptions, as well as new and proposed laws, also may have a greater negative impact on the market for lower-quality securities. Changing regulatory and market conditions, including increases in interest rates and credit spreads may adversely affect the liquidity of the Fund's investments. Certain investments that were liquid when the Fund purchased them may become illiquid, sometimes abruptly. Unexpected episodes of illiquidity, including due to market or political factors, instrument or issuer-specific factors and/or unanticipated outflows or other factors, may limit the Fund's ability to pay redemption proceeds within the allowable time period. To meet redemption requests during periods of illiquidity, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions.
- **Loan Interests Risk.** *High Income only* — The Fund may acquire loan interests by direct investment as a lender, by obtaining an assignment of all or a portion of the interests in a particular loan that are held by an original lender or a prior assignee or by participation in a loan interest that is held by another party. As an assignee, the Fund normally will succeed to all rights and obligations of its assignor with respect to the portion of the loan that is being assigned. However, the rights and obligations acquired by the purchaser of a loan assignment may differ from, and be more limited than, those held by the original lenders of the assignor. When the Fund's loan interest is a participation, the Fund may have less control over the exercise of remedies than the party selling the participation interest, and the Fund normally would not have any rights against the borrower. It is possible that the Fund could be held liable, or may be called upon to fulfill other obligations, with respect to loans in which it receives an assignment in whole or in part, or in which it owns a participation. The potential for such liability is greater for an assignee than for a participant. Loan interests generally are subject to restrictions on transfer, and the Fund

may be unable to sell its loan interests a time when it may otherwise be desirable to do so or may be able to sell them promptly only at prices that are less than what the Fund regards as their fair market value. Accordingly, loan interests may at times be illiquid. Loan interests may be difficult to value and may have extended settlement periods (the settlement cycle for many bank loans exceeds 7 days). Extended settlement periods may result in cash not being immediately available to the Fund. As a result, during periods of unusually heavy redemptions, the Fund may have to sell other investments or borrow money to meet its obligations.

- **Variable and Floating Rate Instruments Risk.** *High Income only* — The market prices of instruments with variable and floating interest rates are generally less sensitive to interest rate changes than are the market prices of instruments with fixed interest rates. Variable and floating rate instruments may decline in value if market interest rates or interest rates paid by such instruments do not move as expected. Conversely, variable and floating rate instruments will not generally rise in value if market interest rates decline. Thus, investing in variable and floating rate instruments generally allows less opportunity for capital appreciation and depreciation than investing in instruments with a fixed interest rate. Certain types of floating rate instruments, such as interests in bank loans, may be subject to greater liquidity risk than other debt securities, may have restrictions on resale and may lack an active market.

Certain variable and floating rate instruments have an interest rate floor feature, which prevents the interest rate payable by the instrument from dropping below a specified level as compared to a reference interest rate, such as the Secured Overnight Financing Rate. Such a floor protects the Fund from losses resulting from a decrease in the reference rate below the specified level. However, if the reference rate is below the floor, there will be a lag between a rise in the reference rate and a rise in the interest rate payable by the instrument, and the Fund may not benefit from increasing interest rates for a significant period of time. Rates on certain variable rate instruments typically only reset periodically. As a result, changes in prevailing interest rates, particularly sudden and significant changes, can cause some fluctuations in the Fund's value to the extent that it invests in variable rate instruments.

- **Covenant Lite Loan Risk.** *High Income only* — The Fund may invest in, or obtain exposure to, loans that are “covenant lite.” Covenants contained in loan documentation are intended to protect lenders by imposing certain restrictions and other limitations on a borrower's operations or assets and by providing certain information and consent rights to lenders. Covenant lite loans may lack financial maintenance covenants that in certain situations can allow lenders to claim a default on the loan to seek to protect the interests of the lenders. The absence of financial maintenance covenants in a covenant lite loan might result in a lower recovery in the event of a default by the borrower. Covenant lite loans have become much more prevalent in recent years.
- **Highly Leveraged Transactions Risk.** *High Income only* — The loans or other debt instruments in which the Fund invests may include highly leveraged transactions where the borrower assumes large amounts of debt. Loans or other debt instruments that are part of highly leveraged transactions involve a greater risk (including default or bankruptcy) than other investments. Interests in loans made to finance highly leveraged companies or to finance corporate acquisitions or other transactions may be especially vulnerable to adverse changes in economic or market conditions.

- **Impairment of Collateral Risk.** *High Income only* — The value of collateral, if any, securing a loan can decline, and may be insufficient to meet the borrower's obligations or may be difficult or costly to liquidate. In addition, the Fund's access to collateral may be limited by bankruptcy or other insolvency laws. Second or lower lien secured loans, and unsecured loans, will generally be paid only if the value of the collateral exceeds the amount of the borrower's obligations to senior secured lenders, and the remaining collateral may not be sufficient to cover the full amount owed on the loan. Furthermore, there is a risk that a court could take action with respect to a loan that is adverse to the holders of the loan. Certain floating rate and other loans may not be fully collateralized and may decline in value.
- **Distressed Securities Risk.** *High Income only* — Distressed securities are securities of companies that are in financial distress and that may be in or about to enter bankruptcy or some other legal proceeding. The Fund may not receive interest payments on the distressed securities, which would not generate income for shareholders, and may incur costs to protect its investment. These securities may present a substantial risk of default or may be in default. Distressed securities involve the substantial risk that principal will not be repaid. The Fund may lose a substantial portion or all of its investment in distressed securities or may be required to accept cash, securities or other property with a value less than its original investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal of or interest on its portfolio holdings. Distressed securities include loans, bonds and notes, many of which are not publicly traded, and may involve a substantial degree of risk. In certain periods, there may be little or no liquidity in the markets for distressed securities meaning that the Fund may be unable to exit its position. Distressed securities and any securities received in an exchange for such securities may be subject to restrictions on resale. In addition, the prices of such securities may be subject to periods of abrupt and erratic market movements and above-average price volatility. It may be difficult to obtain information regarding the financial condition of a borrower or issuer, and its financial condition may change rapidly. Also, it may be difficult to value such securities and the spread between the bid/ask prices of such securities may be greater than expected.
- **Deferred Payment Securities Risk.** *High Income only* — Deferred payment securities are zero-coupon securities that convert on a specified date to interest bearing debt securities. On this date, the stated coupon rate becomes effective and interest is paid at regular intervals. During the time that interest payments are not being made on these securities, holders are deemed to receive income (phantom income) annually, even though cash is not received currently. The effect of owning instruments that do not make current interest payments is that a fixed yield is earned not only on the original investment but also, in effect, on all discount accretion during the life of the obligations. This implicit reinvestment of earnings at a fixed rate eliminates the risk of being unable to invest distributions at a rate as high as the implicit yield on the bond, but at the same time eliminates the holder's ability to reinvest at higher rates in the future. For this reason, some of these securities may be subject to greater price fluctuations when interest rates change than securities that currently pay interest. Longer term zero-coupon bonds are more exposed to this risk than those with shorter terms.

- **Payment-in-Kind Securities Risk.** *High Income only* — Payment-in-kind securities carry additional risks as holders of these types of securities realize no cash until the cash payment date unless a portion of such securities is sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. The market price of payment-in-kind securities is affected by interest rate changes to a greater extent, and therefore tends to be more volatile, than that of securities which pay interest in cash. In addition, current federal tax law requires the holder of certain pay-in-kind bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for federal income and excise taxes, the fund may be required to distribute income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances to generate cash to satisfy these distribution requirements.
- **Emerging Markets Risk.** *High Income only* — Securities of companies in emerging markets or companies with significant exposure to emerging markets may be more volatile than those of companies in more developed markets. Emerging markets may be more likely to experience economic, political or social instability than more developed markets. For example, the economies of such countries can be subject to rapid and unpredictable rates of inflation or deflation. Since these markets are often small, they may be more likely to suffer sharp and frequent price changes or long-term price depression because of adverse publicity, investor perceptions or the actions of a few large investors. They may also have policies that restrict investment by foreigners, or that prevent foreign investors from withdrawing their money at will. Certain emerging markets may also face other significant internal or external risks, including the imposition of sanctions and risk of war and civil unrest. In addition, in times of market stress, regulatory authorities of different emerging market countries may apply varying techniques and degrees of intervention, which can have an effect on prices. For these reasons, investments in emerging markets may be considered speculative.
- **Currency Risk.** *High Income only* — Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar. To the extent that the Fund invests in securities or other instruments denominated in or indexed to foreign currencies, changes in currency rates could adversely impact investment gains or add to investment losses. Domestic issuers that hold substantial foreign assets may be similarly affected. Currency exchange rates may fluctuate significantly over short periods of time and can be affected unpredictably by various factors, including investor perception and changes in interest rates; intervention, or failure to intervene, by U.S. or foreign governments, central banks, or supranational entities; or by currency controls or political developments in the U.S. or abroad. To the extent the Fund invests or hedges based on the perceived relationship between two currencies, there is a risk that the correlation between those currencies may not behave as anticipated.
- **Changing Distribution Level Risk.** *High Income only* — The Fund normally expects to receive income which may include interest, dividends and/or capital gains, depending on its investments. The distribution amounts paid by the Fund will vary and generally depend on the amount of income the Fund earns (less expenses) on its portfolio holdings, and capital gains or losses it recognizes. A decline in the Fund's income or net capital gains arising from its investments may reduce its distribution level. Income received from the Fund may vary widely

over the short- and long-term and/or be less than anticipated if the proceeds from maturing securities in the Fund are reinvested in lower-yielding securities. The Fund may not be able to pay distributions, or may have to reduce distribution levels, if the cash distributions the Fund receives from its investments decline. In certain circumstances, the Fund may be treated as receiving income even though no cash is received.

- **Derivatives Risk.** *High Income only* — Derivatives and other similar instruments (collectively referred to as “derivatives”) may include, among other things, futures, options, forwards and swap agreements, including credit default swaps. The Fund may use derivatives for any purpose, including to attempt to enhance income, yield or return, as a substitute for investing directly in a security or asset, or as a hedging technique in an attempt to manage risk in the Fund’s portfolio. The Fund may choose not to make use of derivatives for a variety of reasons, and no assurance can be given that any derivatives strategy employed will be successful. Investments in derivatives may result in increased volatility and the Fund may incur a loss greater than its principal investment. The performance of derivatives depends largely on the performance of their underlying asset reference, rate, or index; therefore, derivatives often have risks similar to those risks of the underlying asset, reference rate or index, in addition to other risks. However, the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, reference, rate or index. Many derivatives create leverage, thereby causing the Fund to be more volatile than it would have been if it had not used derivatives. Over-the-counter (“OTC”) derivatives are traded bilaterally between two parties, which exposes the Fund to heightened liquidity risk, valuation risk and counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations), including the credit risk of the derivative counterparty, compared to other types of investments. Changes in the value of a derivative may also create margin delivery or settlement payment obligations for the Fund. Certain derivatives are subject to exchange trading and/or mandatory clearing (which interposes a central clearinghouse to each participant’s derivative transaction). Exchange trading, central clearing and margin requirements are intended to reduce counterparty credit risk and increase liquidity and transparency, but do not make a derivatives transaction risk-free and may subject the Fund to increased costs. The use of derivatives may not be successful, and certain of the Fund’s transactions in derivatives may not perform as expected, which may prevent the Fund from realizing the intended benefits, and could result in a loss to the Fund. In addition, given their complexity, derivatives expose the Fund to risks of mispricing or improper valuation, as well as liquidity risk. The use of derivatives is also subject to operational risk which refers to risk related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error, as well as legal risk which refers to the risk of loss resulting from insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

Derivatives may give rise to a form of leverage which magnifies the potential for gain and the risk of loss. It is generally more difficult to ascertain the risk of, and to properly value, derivatives. The prices of derivatives may move in unexpected ways, especially in abnormal market conditions. Derivatives are usually less liquid than traditional securities and are subject to counterparty risk (the risk that the other party to the contract will default or otherwise not be able to perform its

contractual obligations). The use of derivatives is also subject to operational risk which refers to risk related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error.

Additional risks associated with certain types of derivatives are discussed below:

- **Futures.** A futures contract is an agreement that obligates a purchaser to take delivery and a seller to make delivery of a specified quantity of a security or commodity at a specified price at a future date. The value of a futures contract tends to increase and decrease in tandem with the value of its underlying instrument. Therefore, purchasing futures contracts will tend to increase the Fund's exposure to positive and negative market price fluctuations in the underlying instrument. Futures contracts are subject to the risk that an exchange may impose price fluctuation limits, which may make it more difficult or impossible for the Fund to close out a position when desired. In the absence of such limits, the liquidity of the futures market depends on participants entering into offsetting transactions rather than taking or making delivery. To the extent the Fund enters into futures contracts requiring physical delivery (e.g., certain commodities contracts), the inability of the Fund to take or make physical delivery can negatively impact performance.
- **Forward Contracts.** Forward commitment agreements (also referred to as forward contracts or forwards) are agreements for the purchase of securities at an agreed upon price on a specified future date. When the Fund sells a security on a forward commitment, the Fund does not participate in future gains or losses with respect to the security. If the other party to the transactions fails to pay for the security, the Fund could suffer a loss. In addition, when selling a security on a forward commitment basis without owning the security, the Fund will incur a loss if the security's price appreciates in value above the agreed upon price on the settlement date. There are no limitations on daily price movements of forward contracts. Changes in foreign exchange regulations by governmental authorities might limit the trading of forward contracts on currencies.
- **Options.** An option on a security is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call option) or sell to (in the case of a put option) the writer of the option the security underlying the option at a specified exercise price at any time during the term of the option. The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. If a strategy is applied at an inappropriate time or market conditions or trends are judged incorrectly, the use of options may lower the Fund's return. There can be no guarantee that the use of options will increase the Fund's return or income. An abrupt change in the price of an underlying security could render an option worthless. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility of the underlying instrument (known as implied volatility), which in turn are affected by the performance of the issuer of the underlying instrument, by fiscal and monetary policies and by national and international political and economic events. As such, prior to the exercise or expiration of the option, the Fund is exposed to implied volatility risk,

meaning the value, as based on implied volatility, of an option may increase due to market and economic conditions or views based on the sector or industry in which issuers of the underlying instrument participate, including company-specific factors.

- **Swaps.** Over-the-counter swap agreements are privately negotiated derivative products in which two parties agree to exchange payment streams calculated in relation to a rate, index, instrument or certain securities (referred to as the “underlying”) and a predetermined amount (referred to as the “notional amount”). The risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make or, in the case of the other party to a swap defaulting, the net amount of payments that the Fund is contractually entitled to receive. If the Fund sells a credit default swap, however, the risk of loss may be the entire notional amount of the swap. Some swaps are now executed through an organized exchange or regulated facility and cleared through a regulated clearing organization. The absence of an organized exchange or market for swap transactions may result in difficulties in trading and valuation, especially in the event of market disruptions. The use of an organized exchange or market for swap transactions is expected to result in swaps being easier to trade or value, but this may not always be the case.
- **Short-Term Investments.** *High Income only* — Short-term investments include money market instruments, repurchase agreements, certificates of deposit and bankers’ acceptances and other short-term instruments that are not U.S. government securities. These securities generally present less risk than many other investments, but they are generally subject to credit risk and may be subject to other risks as well.
- **New Fund Risk.** *High Income, Dividend and Sports only* — The Fund is a new fund with no operating history. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer its assets at a loss.
- **U.S. Government Securities.** *High Income only* — Obligations issued or guaranteed by the U.S. government, its agencies, authorities and instrumentalities and backed by the full faith and credit of the United States only guarantee principal and interest will be timely paid to holders of the securities. The entities do not guarantee that the value of Fund shares will increase, and the market values of such obligations may fluctuate. In addition, not all U.S. government securities are backed by the full faith and credit of the United States, and there is no guarantee that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law.
- **Other Investment Company Risk.** *High Income only* — To the extent the Fund invests in other investment companies, including money market funds and ETFs, its performance will be affected by the performance of those other investment companies and to the allocation of its assets among those other investment companies. Investments in other investment companies are subject to the risks of the other investment companies’ investments, as well as to the other investment companies’ expenses. If the Fund invests in other investment companies, the Fund

may receive distributions of taxable gains from portfolio transactions by that investment company and may recognize taxable gains from transactions in shares of that investment company, which could be taxable to the Fund's shareholders when distributed to them.

With respect to the 80% policies for the Aerospace and Defense Fund and Global Technology Leaders Fund, these policies are non-fundamental and can be changed without shareholder approval. Fund shareholders would be given at least 60 days' notice prior to any such change.

Portfolio Holdings. A description of each Fund's policies and procedures with respect to the disclosure of its portfolio securities is available in the Statement of Additional Information ("SAI"), which may be obtained by calling 800-GABELLI (800-422-3554), your financial intermediary, or free of charge through the Funds' website at www.gabelli.com.

MANAGEMENT OF THE FUNDS

The Adviser. Gabelli Funds, LLC, with its principal offices located at One Corporate Center, Rye, New York 10580-1422, serves as investment adviser to the Funds. The Adviser makes investment decisions for each Fund and continuously reviews and administers each Fund's investment programs and manages the operations of the Funds under the general supervision of the Trust's Board. The Adviser also manages several other open-end and closed-end investment companies in the Gabelli family of Funds ("Gabelli Fund Complex" or "Fund Complex"). The Adviser is a New York limited liability company organized in 1999 and a wholly owned subsidiary of GAMCO Investors, Inc. ("GAMI"), a publicly held company listed on the OTCQX.

As compensation for its services and the related expenses borne by the Adviser, each Fund is contractually obligated to pay the Adviser an advisory fee computed daily and payable monthly equal to 0.90% of the value of such Fund's average daily net assets, except as provided in the fee waiver arrangements described below. The investment advisory agreement between Gabelli ETFs Trust (the "Trust") and Gabelli Funds, LLC (the "Adviser") provides that the Adviser will pay all operating expenses of the Funds, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses. A discussion regarding the basis for the Board's approval of the investment advisory agreement for each Fund is available in the Fund's Form N-CSR for the fiscal year ended December 31, 2025.

Fee Waivers. The Adviser has contractually agreed to waive (1) each of the Global Technology Leaders Fund's, the Growth Innovators Fund's, the Aerospace and Defense Fund's, and Financial Services Fund's management fees of 0.90% on each Fund's first \$25 million in net assets, (2) the High Income Fund's management fee of 0.55%, and (3) each of the Dividend Fund's and Sports Fund's management fee of 0.90%. Each fee waiver agreement will continue for at least one year following the effective date of this Prospectus. The fee waiver agreements may be terminated only by, or with the consent of, the Board. The Adviser has voluntarily agreed to waive the Love Our Planet Fund's management fee of 0.90% on the first \$100 million in net assets through the fiscal year ending December 31, 2026.

The Portfolio Managers. Mr. Christopher J. Marangi has been primarily responsible for the day-to-day management of the Love Our Planet Fund since its inception, and has been jointly and primarily responsible for the day-to-day management of the Sports Fund since its inception in December 2025. Mr. Marangi joined GAMI in 2003 and currently serves as President and Co-Chief Investment Officer of its Value Team. Mr. Marangi is a portfolio manager of the Adviser, managing several funds within the Gabelli Fund Complex, and GAMCO, on its institutional and high net worth accounts team.

Mr. Howard F. Ward, CFA, has been primarily responsible for the day-to-day investment management of the Growth Innovators Fund's investments since its inception. Mr. Ward joined the Adviser in 1995 and currently serves as GAMI's Chief Investment Officer of Growth Products. Mr. Ward is also a portfolio manager of several funds in the Gabelli Fund Complex.

Mr. Hendi Susanto, Vice President of Gabelli Funds, LLC has been a portfolio manager for the Global Technology Leaders Fund since its inception. Mr. Susanto joined Gabelli in 2007 as a research analyst. He currently covers the global technology industry. Mr. Susanto received a BS degree summa cum laude from the University of Minnesota, a MS from Massachusetts Institute of Technology, and an MBA from the Wharton School of Business. Mr. Susanto is also a portfolio manager of several funds in the Gabelli Fund Complex.

Mr. John Belton, CFA, has been a portfolio manager of the Growth Innovator Fund since June 1, 2024. Mr. Belton joined the Adviser in January 2024 and currently serves as a Managing Director of its Growth Products. Mr. Belton was most recently an Investment Analyst and Partner at Absolute Partners Global. Prior to joining Absolute in 2021, Mr. Belton was an Equity Research Analyst at Evercore ISI for six years, culminating as a Vice President, Equity Research. Mr. Belton holds an MBA with Honors in Finance and Economics from Columbia Business School, a BA in Mathematics and Philosophy from Boston College, and is a CFA Charterholder.

Lieutenant Colonel G. Anthony (Tony) Bancroft, USMCR, has served as the team leader and portfolio manager of the Aerospace and Defense Fund since its inception. Lieutenant Colonel Bancroft joined Gabelli Funds in 2009 as an associate in the alternative investments division and is currently an analyst covering the aerospace and defense and environmental services sectors, with a focus on suppliers to the commercial, military and regional jet aircraft industry and waste services. He previously served in the United States Marine Corps as an F/A-18 Hornet fighter pilot. Tony graduated with distinction from the United States Naval Academy with a BS in systems engineering and holds an MBA in finance and economics from Columbia Business School.

Mr. Macrae Sykes has served as the portfolio manager of the Financial Services Fund since its inception. Mr. Sykes joined Gabelli in 2008 as a research analyst. He currently covers the investment services industry, and is a member of the portfolio management team of another fund within the Gabelli Fund Complex. Mr. Sykes holds a B.A. in economics from Hamilton College and an M.B.A. in finance from Columbia Business School.

Mr. Wayne C. Plewniak has been responsible for the day-to-day management of the High Income Fund. Mr. Plewniak has been a Managing Director and Head of Gabelli Fixed Income since 2006, serving as portfolio manager of the firm's high yield products and participating on a number of other investment teams. He joined Teton Advisors, Inc. in 2017 as a portfolio manager. Mr. Plewniak was formerly with Lehman Brothers/Neuberger Berman where he served as Managing Director and Senior Portfolio Manager of that

firm's High Yield business following its acquisition by Lipper & Company in 2002. Mr. Plewniak had run the business at Lipper & Company since its inception in 1991. Mr. Plewniak has a B.S. in Industrial Engineering from the Rochester Institute of Technology and an M.B.A. in Finance and International Business from Georgetown University

Messrs. Thomas E. Browne, Jr. and Brian P. Leonard have been jointly and primarily responsible for the management of the Dividend Fund since its inception in November 2025. Before joining the Adviser in May 2025, Messrs. Browne and Leonard were portfolio managers at Keeley-Teton Advisors, LLC since prior to 2020.

Mr. Alec Boccanfuso has been jointly and primarily responsible for the day-to-day management of the Sports Fund since its inception in December 2025. He joined Gabelli in 2018 as an analyst covering communications services and technology with a focus on interactive entertainment and outdoor leisure products. Mr. Boccanfuso graduated with honors from New York University with a BS in finance, and holds an MBA from Columbia Business School. He currently serves as a research analyst and portfolio manager for the Adviser managing funds within the Gabelli Fund Complex.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed by them, and their ownership of securities in the Funds.

INDEX DESCRIPTIONS

The **S&P 500 Index** is a widely recognized, unmanaged index of common stock prices. The index figures do not reflect any deductions for fees, expenses, or taxes. You cannot invest directly in the S&P 500 Index.

The **Nasdaq Composite Index** is an unmanaged indicator of stock market performance. Dividends are considered reinvested. You cannot invest directly in an index.

The **S&P 500 Financials Index** comprises those companies included in the S&P 500 that are classified as members of the GICS Financials Sector. Dividends are considered reinvested. You cannot invest directly in an index.

PURCHASE AND SALE OF SHARES

Trading in the Secondary Market. Shares of the Funds are listed and available for trading on the Listing Exchange during its core trading session (generally 9:30 am until 4:00 pm Eastern time). Shares may also be bought and sold on other national securities exchanges and alternative trading systems that have obtained appropriate licenses, adopted applicable rules, and developed systems to support trading in the Funds' shares. There can be no guarantee that an active trading market will develop or be maintained, or that the Funds' listings will continue or remain unchanged. The Funds do not impose any minimum investment for shares of the Funds purchased in the secondary market.

The Funds' shares may be purchased and sold in the secondary market only through a broker-dealer. When buying or selling shares, you may incur trading commissions or other charges determined by your broker-dealer. Due to applicable brokerage charges and other trading costs, frequent trading may detract from realized investment returns. Frequent trading may also result in adverse tax consequences. Trading commissions are frequently a fixed dollar amount, and therefore may be proportionately more costly when buying or selling small amounts of shares.

Each Fund is an actively managed exchange-traded fund (commonly referred to as an "ETF"). Individual shares of a Fund are listed on the Listing Exchange, which is a national securities exchange. Most investors will buy and sell shares of a Fund through a broker-dealer. The price of Fund shares is based on market price, and because ETF shares trade at market prices rather than at NAV, shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). The Funds will only issue or redeem shares that have been aggregated into blocks or multiples thereof to Authorized Participants who have entered into agreements with the Funds' distributor. The Funds generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Funds specify each day.

Shares of a Fund are not sponsored, endorsed, or promoted by any Listing Exchange. The Listing Exchange makes no representation or warranty, express or implied, to the owners of the shares of the Funds. The Listing Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of the shares of a Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Listing Exchange has no obligation or liability to owners of the shares of a Fund in connection with the administration, marketing, or trading of the shares of a Fund. Without limiting any of the foregoing, in no event shall the Listing Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the distributor and the Funds make no representation or warranty, express or implied, to the owners of shares of each Fund or any member of the public regarding the advisability of investing in securities generally or in a Fund particularly.

Information regarding each Fund's NAV, market price, premiums and discounts, and bid-ask spreads is available on the Fund's website at www.gabelli.com.

PAYMENTS TO BROKER/DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of a Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of a Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend any of the Funds over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

PRICING OF FUND SHARES

The NAV is calculated separately for the shares of each Fund on each Business Day. The New York Stock Exchange (the “NYSE”) is open Monday through Friday, but currently is scheduled to be closed on New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day and on the preceding Friday or subsequent Monday when a holiday falls on a Saturday or Sunday, respectively.

Each Fund’s NAV is determined as of the close of regular trading on the NYSE, normally 4:00 p.m., Eastern Time. The NAV of each Fund is computed by dividing the value of the applicable Fund’s net assets, *i.e.*, the value of its securities and other assets less its liabilities, including expenses payable or accrued by the total number of shares outstanding at the time the determination is made.

Equity securities listed or traded on a national securities exchange or traded in the U.S. over-the counter market where trades are reported contemporaneously and for which market quotations are readily available are valued at the last quoted sale or a market’s official closing price at the close of the exchange’s or other market’s regular trading hours, as of or prior to the time and day as of which such value is being determined.

Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market as determined by the Adviser. If there has been no sale on the day the valuation is made, the securities are valued at the mean of the closing bid and ask prices on the principal market for such security on such day. If no ask prices are quoted on such day, then the security is valued at the closing bid price on the principal market for such security on such day. If no bid or ask prices are quoted on such day, a Fund’s accounting agent will notify the Adviser and the security will be valued based on written or standing instructions from the Adviser.

Initial public offering securities are initially valued at cost. Upon commencement of trading, these securities are valued like any other equity security.

Occasionally, reliable market quotations are not readily available (such as for certain restricted or unlisted securities and private placements) or securities and other assets may not be reliably priced (such as in the case of trade suspensions or halts, price movement limits set by certain foreign markets, and thinly traded or illiquid securities), or there may be events affecting the value of foreign securities or other securities held by the Fund that occur when regular trading or foreign or other exchanges are closed, but before trading on the NYSE is closed. Securities and other assets for which market quotations are not readily available are fair valued as determined by the Adviser, as the “valuation designee,” as such term is defined in Rule 2a-5(e)(4) of the 1940 Act, pursuant to Fair Value Procedures adopted pursuant to Rule 2a-5 under the 1940 Act. The Board oversees the Adviser in its role as the Valuation Designee in accordance with the requirements of Rule 2a-5 under the 1940 Act. Fair valuation methodologies and procedures may include, but are not limited to: analysis and review of available financial and non-financial information about the company; comparisons with the valuation and changes in valuation of similar securities, including a comparison of foreign securities to the equivalent U.S. dollar value American Depositary Receipt securities at the close of the relevant U.S. exchange; and evaluation of any other information that could be indicative of the value of the security.

Attempts to determine the fair value of securities introduce an element of subjectivity to the pricing of securities. As a result, the price of a security determined through fair valuation techniques may differ from the price quoted or published by other sources and may not accurately reflect the market value of the security when trading resumes.

NAV is the price at which the Fund issues and redeems shares. It is calculated in accordance with the standard formula for valuing mutual fund shares. The market price of the Fund generally is determined using the midpoint between the highest bid and the lowest ask on the primary securities exchange on which shares of the Fund are listed for trading, as of the time that the Fund's NAV is calculated. The Fund's market price may be at, above or below its NAV. The NAV of the Fund will fluctuate with changes in the value of its portfolio holdings. The market price of the Fund will fluctuate in accordance with changes in its NAV, as well as market supply and demand.

Premiums or discounts are the differences (expressed as a percentage) between the NAV and market price of the Fund on a given day, generally at the time the NAV is calculated. A premium is the amount that the Fund is trading above the reported NAV, expressed as a percentage of the NAV. A discount is the amount that the Fund is trading below the reported NAV, expressed as a percentage of the NAV.

Because shares of the Fund may trade at a premium or discount, shareholders may pay more than NAV when they buy shares of the Fund and receive less than NAV when they sell those shares, because the shares are bought and sold at current market prices.

Debt obligations (including convertible debt) for which market quotations are readily available are valued at the average of the latest bid and ask prices. If there were no ask prices quoted on such day, the security is valued using the closing bid price. Such debt obligations are valued through prices provided by a pricing service overseen by the Adviser.

Information regarding how often the shares of the Fund traded on the applicable exchange at a price above (at a premium) or below (at a discount) the NAV of the Fund for the most recently completed calendar year, and the most recently completed calendar quarters since that year, can be found at www.gabelli.com/funds/etfs (click on the name of the Fund).

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Board has not adopted a policy of monitoring for frequent purchases and redemptions of Fund shares ("frequent trading") that appear to attempt to take advantage of potential arbitrage opportunities presented by a lag between a change in the value of a Fund's portfolio securities after the close of the primary markets for a Fund's portfolio securities and the reflection of that change in a Fund's NAV ("market timing"). The Board believes this is appropriate because an ETF, such as a Fund, is intended to be attractive to arbitrageurs, as trading activity is critical to ensuring that the market price of Fund shares remains at or close to NAV. Since each Fund issues and redeems Creation Units at NAV plus applicable transaction fees, and each Fund's shares may be purchased and sold on the NYSE Arca at prevailing market prices, the risks of frequent trading are limited.

DIVIDENDS AND DISTRIBUTIONS

The Funds intend to pay dividends and capital gain distributions, if any, on an annual basis. Shareholders may have dividends and/or capital gain distributions automatically reinvested in additional shares of the Funds. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom the shareholder purchased shares makes such option available.

Brokers may make available the Depository Trust Company book-entry dividend reinvestment service to their customers who own the Funds' shares. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Funds purchased on the secondary market, at the then current market price. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require Funds' shareholders to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Funds purchased in the secondary market.

TAX INFORMATION

The Funds expect that distributions will consist primarily of investment company taxable income and net capital gain. Capital gains may be taxed at different rates for individuals depending on the length of time a Fund holds the securities giving rise to such capital gains. Dividends from investment company taxable income (including distributions of net short-term capital gains, *i.e.*, gains from securities held by a Fund for one year or less) are generally taxable to you as ordinary income if you are a U.S. shareholder, except certain qualified dividends that are discussed below. Properly designated distributions of net capital gain, *i.e.*, net long-term capital gains minus net short-term capital loss ("Capital Gain Dividends"), are taxable to you at long-term capital gain rates no matter how long you have owned your shares. A Fund's distributions, whether you receive them in cash or reinvest them in additional shares of a Fund, generally will be subject to federal and, if applicable, state and local taxes. Although dividends (including dividends from short-term capital gains) are generally taxable as ordinary income, individual shareholders who satisfy certain holding periods and other requirements are taxed on such dividends at long-term capital gain rates to the extent the dividends are attributable to "qualified dividend income" received by a Fund. Qualified dividend income generally consists of dividends received from U.S. corporations (other than certain dividends from real estate investment trusts and regulated investment companies) and certain foreign corporations. The amount of qualified dividend income distributed by a Fund in any year depends on its investments and cannot be predicted. Corporations may be able to take a dividends-received deduction for a portion of the income dividends they receive. A redemption of Fund shares or an exchange of Fund shares for shares of another Fund will be treated for tax purposes as a sale of Fund shares, and any gain you realize on such a transaction generally will be taxable. A Fund may be required to withhold, as federal backup withholding, a percentage (currently 24%) of the dividends, distributions, and redemption proceeds payable to shareholders who fail to provide the Funds they have invested in with their correct taxpayer identification number or to make required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. Also, dividends, distributions, and redemption proceeds payable to foreign shareholders may be subject to a federal withholding tax.

A dividend declared by the Funds in October, November, or December to shareholders of record on a specific date in such a month and paid during January of the following year will be treated as paid in December for tax purposes.

After the end of each year, the Funds you have invested in will provide you with the information regarding any shares you redeemed and the federal tax status of any dividends or distributions you received during the previous year.

Under current law, interest, dividends and capital gains from the Funds generally will be subject to the 3.8 percent federal tax that is imposed on net investment income of U.S. individuals with modified adjusted gross income exceeding \$200,000 (or \$250,000 if married filing jointly), and of estates and trusts.

If you sell your Fund shares, it is considered a taxable event for you. Depending on the purchase price and the sale price of the shares you sell, you may have a gain or a loss on the transaction. You are responsible for any tax liabilities generated by your transaction.

This summary of tax consequences is intended for general information only and is subject to change by legislative, judicial, or administrative action, and any such change may be retroactive. It is applicable only to shareholders who are U.S. persons. A Fund may make taxable distributions during periods in which the share price has declined. A more complete discussion of the tax rules applicable to you and the Funds can be found in the SAI that is incorporated by reference into this prospectus. You should consult a tax adviser concerning the federal, state, and local tax consequences of your investment in the Funds.

CREATIONS AND REDEMPTIONS

Prior to trading in the secondary market, shares of a Fund are “created” at NAV by market makers, large investors and institutions only in block-size Creation Units or multiples thereof. The following table sets forth the number of shares of the applicable Fund that constitute a Creation Unit:

<u>Name of the Fund</u>	<u>Creation Unit Size</u>
Gabelli Growth Innovators ETF	5,000
Gabelli Love Our Planet & People ETF	5,000
Gabelli Global Technology Leaders ETF	5,000
Gabelli Aerospace and Defense ETF	5,000
Gabelli Financial Services Opportunities ETF	5,000
Gabelli High Income ETF	40,000
Keeley Dividend ETF	5,000
Gabelli Opportunities in Live and Sports ETF	5,000

Each “creator” or “Authorized Participant” enters into an authorized participant agreement with G.distributors, LLC, the Funds’ distributor (the “Distributor”). Only an Authorized Participant may create or redeem Creation Units directly with a Fund.

A Fund may issue or redeem Creation Units in return for a specified amount of cash or a designated portfolio of securities and/or cash that a Fund specifies each day. To the extent cash is used, an Authorized Participant must transfer cash in an amount equal to the value of the Creation Unit(s) purchased and the applicable transaction fee. An Authorized Participant also may effect a creation transaction by depositing

into a Fund a designated portfolio of securities (including any portion of such securities for which cash may be substituted) and a specified amount of cash approximating the holdings of a Fund in exchange for a specified number of Creation Units (a "Creation Basket"). The composition of each Creation Basket will be determined in accordance with Board-approved policies and procedures applicable to the construction of creation and redemption baskets, and subject to acceptance by the Distributor. Creation and redemption baskets may differ and each Fund will accept "custom baskets." More information regarding custom baskets is contained in the SAI.

Redemption proceeds will be paid in cash or in kind. If redemption proceeds are paid in kind, shares will be redeemed in Creation Units for a designated portfolio of securities (including any portion of such securities for which cash may be substituted) held by a Fund and a specified amount of cash. The composition of redemption proceeds will be determined in accordance with Board-approved policies and procedures applicable to the construction of creation and redemption baskets. Except when aggregated in Creation Units, shares are not redeemable by a Fund.

The prices at which creations and redemptions occur are based on the next calculation of NAV after a creation or redemption order is received in an acceptable form under the authorized participant agreement.

In the event of a system failure or other interruption, including disruptions at market makers or Authorized Participants, orders to purchase or redeem Creation Units either may not be executed according to a Fund's instructions or may not be executed at all, or a Fund may not be able to place or change orders.

To the extent a Fund engages in in-kind transactions, the Fund intends to comply with the U.S. federal securities laws in accepting securities for deposit and satisfying redemptions with redemption securities by, among other means, assuring that any securities accepted for deposit and any securities used to satisfy redemption requests will be sold in transactions that would be exempt from registration under the Securities Act of 1933, as amended (the "1933 Act"). Further, an Authorized Participant that is not a "qualified institutional buyer" as such term is defined in Rule 144A under the 1933 Act, will not be able to receive restricted securities eligible for resale under Rule 144A.

Information about the procedures regarding creation and redemption of Creation Units (including the cutoff times for receipt of creation and redemption orders) is included in the Fund's SAI.

Because new shares may be created and issued on an ongoing basis, at any point during the life of a Fund a "distribution," as such term is used in the 1933 Act, may be occurring. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner that could render them statutory underwriters subject to the prospectus delivery and liability provisions of the 1933 Act. Any determination of whether one is an underwriter must take into account all the relevant facts and circumstances of each particular case.

Broker-dealers should also note that dealers who are not "underwriters," but are participating in a distribution (as contrasted to ordinary secondary transactions), and thus dealing with shares that are part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the 1933 Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the 1933 Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the 1933 Act is available only with respect to transactions on a national securities exchange.

Costs Associated with Creations and Redemptions. Authorized Participants are charged standard creation and redemption transaction fees to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units. The standard creation transaction fee is charged to the Authorized Participant on the day such Authorized Participant creates a Creation Unit, and is the same regardless of the number of Creation Units purchased by the Authorized Participant on the applicable business day.

Similarly, the standard redemption transaction fee is charged to the Authorized Participant on the day such Authorized Participant redeems a Creation Unit, and is the same regardless of the number of Creation Units redeemed by the Authorized Participant on the applicable business day. Creations and redemptions for cash (when cash creations and redemptions (in whole or in part) are available or specified) are also subject to an additional charge (up to the maximum amounts shown in the table below). This charge is intended to compensate for brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to cash transactions. Investors who use the services of a broker or other financial intermediary to acquire or dispose of Fund shares may pay fees for such services.

The following table sets forth the Fund’s standard creation transaction fees and maximum additional charge (as described above). Transaction fees may be waived in certain circumstances deemed appropriate by the Trust.

Fund	Standard Creation Transaction Fee	Maximum Additional Charge for Creations⁽¹⁾
Gabelli Growth Innovators ETF	\$ 250	3%
Gabelli Love Our Planet & People ETF	\$ 250	3%
Gabelli Global Technology Leaders ETF	\$ 250	3%
Gabelli Commercial Aerospace and Defense ETF	\$ 250	3%
Gabelli Financial Services Opportunities ETF	\$ 250	3%
Gabelli High Income ETF	\$ 250	3%
Keeley Dividend ETF	\$ 250	3%
Gabelli Opportunities in Live and Sports ETF	\$ 250	3%

⁽¹⁾ As a percentage of the NAV per Creation Unit.

MAILINGS AND E-DELIVERY TO SHAREHOLDERS

In our continuing efforts to reduce duplicative mail and Fund expenses, we currently send a single copy of prospectuses and shareholder reports to your household even if more than one member in your household owns the same Fund or Funds described in the prospectus or report. Additional copies of our prospectuses and reports may be obtained by calling 800-GABELLI (800-422-3554). If you do not want us to continue to consolidate your Fund mailings and would prefer to receive separate mailings at any time in the future, please call us at the telephone number above and we shall resume separate mailings, in accordance with your instructions, within thirty days of your request. Each Fund offers electronic delivery of Fund documents. Shareholders of a Fund can elect to receive each Fund’s annual, semiannual, and quarterly reports, as well as manager commentaries and prospectuses via e-delivery. For more information or to sign

up for e-delivery, please visit a Fund’s website at www.gabelli.com. Shareholders who purchased shares of a Fund through a financial intermediary should contact their financial intermediary to sign up for e-delivery of the Fund documents, if available.

As permitted by regulations adopted by the Securities and Exchange Commission (“SEC”), paper copies of the Fund’s annual and semiannual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund’s website (<https://gabelli.com>), and you will be notified by mail each time a report is posted and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. To elect to receive all future reports in paper free of charge, please contact your financial intermediary, or, if you invest directly with the Fund, you may call 800-422-3554 or send an email request to info@gabelli.com. Your election to receive reports in paper will apply to the Fund held in your account if you invest through your financial intermediary or all funds held within the Fund Complex if you invest directly with such funds.

FINANCIAL HIGHLIGHTS

The Financial Highlights tables are intended to help you understand the financial performance of Gabelli Growth Innovators ETF, Gabelli Love Our Planet & People ETF, Gabelli Global Technology Leaders ETF, Gabelli Commercial Aerospace and Defense ETF, Gabelli Financial Services Opportunities ETF, Gabelli High Income ETF, Keeley Dividend ETF, and Gabelli Opportunities in Live and Sports ETF for each of the past five fiscal years, or since inception if shorter. The total returns in the tables represent the percentage amount that an investor would have earned or lost on an investment in each Fund (assuming reinvestment of all distributions).

The financial highlights for the period shown through December 31, 2025, have been audited by PricewaterhouseCoopers LLP, each Fund’s independent registered public accounting firm, whose report, along with each Fund’s financial statements, is included in each Fund’s Form N-CSR, which is available upon request.

For More Information:

For more information about each Fund, the following documents will be available free upon request:

Annual/Semiannual Reports and Form N-CSR:

Each Fund's semiannual and annual reports to shareholders and Form N-CSR contain additional information on the Funds' investments. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. In Form N-CSR, you will find the Funds' annual and semi-annual financial statements.

Statement of Additional Information (SAI):

The SAI provides more detailed information about each Fund, including their operations and investment policies. It is incorporated by reference into, and is legally considered a part of, this prospectus.

You can obtain free copies of these documents and prospectuses of other funds in the Gabelli Fund Complex, or request other information and discuss your questions about a Fund by mail, toll free telephone, or the Internet as follows:

PROSPECTUS DATED

April 30, 2026

This Exchange-Traded Fund (“ETF”) is different from traditional ETFs.

Unlike traditional ETFs, these ETFs will not tell the public what assets they hold each day. This may create additional risks for your investment. For example:

- You may have to pay more money to trade an ETF’s shares. These ETFs will provide less information to traders, who tend to charge more for trades when they have less information about the underlying holdings.
- The price you pay to buy ETF shares on an exchange may not match the value of an ETF’s portfolio. The same is true when you sell shares. These price differences may be greater for the ETFs offered pursuant to this Prospectus compared to other ETFs because these ETFs provide less information to traders with respect to the underlying portfolio holdings.
- These additional risks may be even greater in bad or uncertain market conditions.

The differences between these ETFs and other ETFs may also have advantages. By keeping certain information about an ETF secret, the ETF may face less risk that other traders can predict or copy its investment strategy. This may improve an ETF’s performance. If other traders are able to copy or predict an ETF’s investment strategy, however, this may hurt the ETF’s performance.

For additional information regarding the unique attributes and risks of the Funds, see the “Non-Transparent Exchange-Traded Fund (“ETF”) Structure Risk,” “Early Close/Trading Halt Risk” and “Authorized Participant and AP Representative Concentration Risk” in the “Principal Risks” section of this Prospectus below.

The Securities and Exchange Commission has not approved or disapproved the shares described in this prospectus or determined whether this prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

Gabelli Equity Income ETF
(the “Equity Income Fund” or the “Fund”)

Investment Objective

The Fund seeks to provide high level of total return on its assets with an emphasis on income.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees (fees paid directly from your investment):	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):	
Management Fees	0.90%
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.90%
Less Fee Waiver and/or Expense Reimbursement ⁽²⁾	(0.90)%
Total Annual Fund Operating Expenses After Fee Waiver	0.00%

- (1) “Other Expenses” are based on estimated amounts for the current fiscal year. As of April 30, 2025, the Fund had not yet launched.
- (2) The Adviser has contractually agreed to waive the Fund’s management fee of 0.90% on the first \$25 million in net assets. The fee waiver agreement for the Equity Income Fund will continue until at least April 30, 2026. This agreement may be terminated only by, or with the consent of, the Fund’s Board of Trustees.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$0	\$197

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. No portfolio turnover is included for the Fund because the Fund has not yet commenced operations.

Principal Investment Strategies

The Fund will seek to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets (including any assets purchased using borrowings for investment purposes) in income producing equity. The Fund may also invest in foreign securities by investing in American Depositary Receipts. In making stock selections, the Adviser looks for securities that have a better yield than the average of the Standard and Poor’s 500 Index (the “S&P 500 Index”), as well as capital gains potential. In selecting investments for the Fund, the Adviser focuses on issuers that:

- have strong free cash flow and pay regular dividends;
- have potential for long-term earnings per share growth;
- may be subject to a value catalyst, such as industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business are well managed; and
- will benefit from sustainable long-term economic dynamics, such as globalization of an issuer’s industry or an issuer’s increased focus on productivity or enhancement of services

The Adviser also believes preferred stock of selected companies offer opportunities for capital appreciation as well as periodic income and may invest a portion of the Fund’s assets in such securities. This is particularly true in the case of companies that have performed below expectations. If a company’s performance has been poor enough, its preferred stock will trade more like common stock than like a fixed income security and may result in above average appreciation if performance improves. This leads to the possibility of capital appreciation if the price of the common stock recovers.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you are seeking income as well as capital appreciation

The Fund’s share price will fluctuate with changes in the market value of the Fund’s portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the ETF involves the following risks:

- **Non-Transparent Exchange-Traded Fund (“ETF”) Structure Risk.** Unlike most actively managed ETFs the Fund does not provide daily disclosure of its portfolio holding. Instead, the Fund provides a verified intraday indicative value (“VIIV”), calculated and disseminated every second throughout the trading day. The VIIV is intended to provide investors and other market participants with a highly correlated per share value of the underlying portfolio that can be compared to the current market price. There is, however, a risk that shares of the Fund may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade. Because the Fund trades on the basis of the VIIV, it may trade at a wider bid/ask spread than traditional ETFs that publish their portfolios on a daily basis. Accordingly, the Adviser or its designee will monitor on an ongoing basis how shares of the Fund trade, including the level of any market price premium or discount to net asset value (“NAV”) and the bid/ask spreads on market transactions. Should there be extended periods of unusually high bid/ask spreads, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, action would be appropriate to among other things, narrow the premium/discount or spread, as applicable. Potential actions may include, but are not limited to, changing lead market makers, listing the Fund on a different exchange, changing the size of Creation Units (as defined below), changing the Fund’s investment objective or strategy, and liquidating the Fund. There is also a risk that the market price may vary significantly from the NAV and, thus, the underlying value of the Fund significantly from the underlying NAV of the Fund. There is also a risk that, despite not disclosing the portfolio holdings each day, some market participants may seek to use publically available information, including the VIIV, to identify the Fund’s investment strategy and engage in certain predatory trading practices that may have the potential to harm the Fund.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. In addition, due to the non-transparency of the portfolio a trading halt in a portfolio security could cause discrepancies between the VIIV and NAV of the Fund resulting in uncertainty on the part of the AP that results in wider, less liquid markets. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund’s website, www.gabelli.com.
- **Authorized Participant and AP Representative Concentration Risk.** The creation and redemption process for the Fund occurs through a confidential brokerage account with an agent, called an “AP Representative,” on behalf of an authorized participant permitted to engage in creation or redemption transactions (each, an “Authorized Participant”). Each day, the AP Representative will be given the names and quantities of the securities to be deposited, in the case of a creation, or redeemed, in the case of a redemption, allowing the AP Representative to buy and sell positions in the portfolio securities to permit creations or redemptions on the Authorized Participant’s behalf, without disclosing the information to the Authorized Participant. The Fund may have a limited number of institutions that act as Authorized Participants and AP Representatives, none of which are obligated to engage in creation or redemption transactions.

To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to process creation and/or redemption orders, Fund shares may trade at a discount to NAV and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. The fact that the Fund is offering a novel and unique structure may affect the number of entities willing to act as Authorized Participants and AP Representatives. During times of market stress, Authorized Participants may be more likely to step away from this type of ETF than a traditional ETF.

- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **New Fund Risk.** The Fund is new with a limited operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss. However, the fee waiver in place limits this risk for the periods that such fee waiver is effective.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company's particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.

- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the portfolio manager is incorrect in his assessment of the growth prospects of the securities the ETF holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to

other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Non-Diversification Risk.** The Fund may invest a large percentage of its assets in securities issued by or representing a small number of issuers. As a result, the Fund's performance may depend on the performance of a small number of issuers.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Value Investing Risk.** The Fund invests in "value" stocks. The portfolio manager may be wrong in the assessment of a company's value and the stocks the Fund holds may not reach what the portfolio manager believes are their full values. From time to time "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The Fund has not yet commenced operations, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Mario J. Gabelli, CFA, Chief Investment Officer — Value Portfolios, and Robert Leininger have served as portfolio managers of the Fund since its inception.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Gabelli Small & Mid Cap ETF
(the “Small & Mid Cap Fund” or the “Fund”)

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.90%
Other Expenses ⁽¹⁾	<u>0.00%</u>
Total Annual Fund Operating Expenses	<u>0.90%</u>

(1) “Other Expenses” are based on estimated amounts for the current fiscal year. As of April 30, 2025, the Fund had not yet launched.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$92	\$287

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher

taxes when the Fund's shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund's performance. No portfolio turnover is included for the Fund because the Fund has not yet commenced operations.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities (such as U.S. exchange-listed common stock and preferred stock) of companies with small or medium sized market capitalizations ("small-cap" and "mid-cap" companies, respectively). The Fund may also invest in foreign securities by investing in American Depositary Receipts. A company's market capitalization is generally calculated by multiplying the number of a company's shares outstanding by its stock price. The Fund defines "small-cap companies" as those with a market capitalization generally less than \$3 billion at the time of investment, and "mid-cap companies" as those with a market capitalization between \$3 billion and \$12 billion at the time of investment. The Fund may invest in equity securities of companies of any market capitalization, subject to its policy of investing at least 80% of its net assets in the equity securities of small-cap and/or mid-cap companies at the time of investment. The Fund may invest up to 25% of its net assets in securities of issuers in a single industry.

The Adviser's investment philosophy with respect to equity securities is to identify assets that are selling in the public market at a discount to their private market value ("PMV"). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser also normally evaluates an issuer's free cash flow and long-term earnings trends. Finally, the Adviser looks for a catalyst, something indigenous to the company, its industry or country that will surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business.

The Fund is intended for investors seeking long-term growth of capital. It is not intended for those who wish to play short-term swings in the stock market.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek long-term growth of capital

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Non-Transparent Exchange-Traded Fund ("ETF") Structure Risk.** Unlike most actively managed ETFs the Fund does not provide daily disclosure of its portfolio holding. Instead, the Fund provides a verified intraday indicative value ("VIIV"), calculated and disseminated every second throughout the trading day. The VIIV is intended to provide investors and other

market participants with a highly correlated per share value of the underlying portfolio that can be compared to the current market price. There is, however, a risk that shares of the Fund may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade. Because the Fund trades on the basis of the VIIV, it may trade at a wider bid/ask spread than traditional ETFs that publish their portfolios on a daily basis. Accordingly, the Adviser or its designee will monitor on an ongoing basis how shares of the Fund trade, including the level of any market price premium or discount to net asset value (“NAV”) and the bid/ask spreads on market transactions. Should there be extended periods of unusually high bid/ask spreads, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, action would be appropriate to among other things, narrow the premium/discount or spread, as applicable. Potential actions may include, but are not limited to, changing lead market makers, listing the Fund on a different exchange, changing the size of Creation Units (as defined below), changing the Fund’s investment objective or strategy, and liquidating the Fund. There is also a risk that the market price may vary significantly from the NAV and, thus, the underlying value of the Fund. There is also a risk that, despite not disclosing the portfolio holdings each day, some market participants may seek to use publically available information, including the VIIV, to identify the Fund’s investment strategy and engage in certain predatory trading practices that may have the potential to harm the Fund.

- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. In addition, due to the non-transparency of the portfolio a trading halt in a portfolio security could cause discrepancies between the VIIV and NAV of the Fund resulting in uncertainty on the part of the AP that results in wider, less liquid markets. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund’s website, www.gabelli.com.
- **Authorized Participant and AP Representative Concentration Risk.** The creation and redemption process for the Fund occurs through a confidential brokerage account with an agent, called an “AP Representative,” on behalf of an authorized participant permitted to engage in creation or redemption transactions (each, an “Authorized Participant”). Each day, the AP Representative will be given the names and quantities of the securities to be deposited, in the case of a creation, or redeemed, in the case of a redemption, allowing the AP Representative to buy and sell positions in the portfolio securities to permit creations or redemptions on the Authorized Participant’s behalf, without disclosing the information to the Authorized Participant. The Fund may have a limited number of institutions that act as Authorized Participants and AP Representatives, none of which are obligated to engage in creation or redemption transactions. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to process creation and/or redemption orders, Fund shares may trade at a discount to NAV and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. The fact

that the Fund is offering a novel and unique structure may affect the number of entities willing to act as Authorized Participants and AP Representatives. During times of market stress, Authorized Participants may be more likely to step away from this type of ETF than a traditional ETF.

- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **New Fund Risk.** The Fund is new with a limited operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will fluctuate, sometimes rapidly and unpredictably, due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to

increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.

- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** If the Adviser is incorrect in its assessment of the investment prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants

that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Mid-Capitalization Company Risk.** Mid-cap company risk is the risk that investing in securities of mid-cap companies could entail greater risks than investments in larger, more established companies. Mid-cap companies tend to have narrower product lines, more limited financial resources and a more limited trading market for their stocks, as compared with larger companies. As a result, their stock prices may decline more significantly or more rapidly than stocks of larger companies as market conditions change.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Small-Capitalization Company Risk.** Investing in securities of small-capitalization companies may involve greater risks than investing in larger, more established issuers. Smaller capitalization companies typically have relatively lower revenues, limited product lines and lack of management depth, and may have a smaller share of the market for their products or services, than larger capitalization companies. The stocks of smaller capitalization companies tend to have less trading volume than stocks of larger capitalization companies. Less trading volume may make it more difficult for the Adviser to sell securities of smaller capitalization companies at quoted market prices. Finally, there are periods when investing in smaller capitalization stocks falls out of favor with investors and the stocks of smaller capitalization companies underperform.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Value Investing Risk.** The Fund invests in "value" stocks. Value investing refers to buying securities that the Adviser believes are out of favor and/or undervalued in comparison to their peers or their prospects for growth. From time to time, "value" investing falls out of favor with investors. During those periods, the Fund's relative performance may suffer.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility

and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The Fund has not yet commenced operations, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Mario J. Gabelli, CFA, Chief Investment Officer — Value Portfolios; Mr. Kevin V. Dreyer, Managing Director and Co-Chief Investment Officer of the Value Team of GAMCO Investors, Inc., LLC; and Mr. Christopher J. Marangi, President and Co-Chief Investment Officer of the Value Team of GAMCO Investors, Inc. have served as portfolio managers of the Fund since its inception.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Gabelli Micro Cap ETF
(the “Micro Cap Fund” or the “Fund”)

Investment Objective

The Fund primarily seeks to provide investors with long-term capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees

(fees paid directly from your investment): None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.90%
Other Expenses ⁽¹⁾	<u>0.00%</u>
Total Annual Fund Operating Expenses	<u>0.90%</u>

(1) “Other Expenses” are based on estimated amounts for the current fiscal year. As of April 30, 2025, the Fund had not yet launched.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$92	\$287

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. No portfolio turnover is included for the Fund because the Fund has not yet commenced operations.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of companies that are considered micro-cap companies at the time the Micro Cap Fund makes its investment. The Fund defines as companies that have a market capitalization (defined as shares outstanding multiplied by the current market price) of \$250 million or less at the time of the Fund's investment. Equity securities include common stocks (including indirect holdings of common stock of foreign securities through American Depositary Receipts), as well as preferred stocks. The Fund will not purchase any securities that are illiquid at the time of purchase. Micro-cap companies may be engaged in new and emerging industries. Micro-cap companies are generally not well-known to investors and have less of an investor following than larger companies. The Adviser's investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value ("PMV"), and the Fund focuses on micro-cap companies that appear to be underpriced relative to their PMV. PMV is the value the Adviser believes informed purchasers would be willing to pay to acquire a company or other assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for catalysts, factors indigenous to the company, its industry or geographic positioning that may surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business.

Principal Risks

You may want to invest in the Fund if:

- you seek exposure to the micro-capitalization market segment despite the potential volatility of micro-capitalization stocks
- you are a long-term investor
- you seek long-term growth of capital

The Fund's share price will fluctuate with changes in the market value of the Fund's portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Non-Transparent Exchange-Traded Fund ("ETF") Structure Risk.** Unlike most actively managed ETFs the Fund does not provide daily disclosure of its portfolio holding. Instead, the Fund provides a verified intraday indicative value ("VIIV"), calculated and disseminated every second throughout the trading day. The VIIV is intended to provide investors and other market participants with a highly correlated per share value of the underlying portfolio that can be compared to the current market price. There is, however, a risk that shares of the Fund may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade.

Because the Fund trades on the basis of the VIIV, it may trade at a wider bid/ask spread than traditional ETFs that publish their portfolios on a daily basis. Accordingly, the Adviser or its designee will monitor on an ongoing basis how shares of the Fund trade, including the level of any market price premium or discount to net asset value (“NAV”) and the bid/ask spreads on market transactions. Should there be extended periods of unusually high bid/ask spreads, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, action would be appropriate to among other things, narrow the premium/discount or spread, as applicable. Potential actions may include, but are not limited to, changing lead market makers, listing the Fund on a different exchange, changing the size of Creation Units (as defined below), changing the Fund’s investment objective or strategy, and liquidating the Fund. There is also a risk that the market price may vary significantly from the NAV and, thus, the underlying value of the Fund significantly from the underlying NAV of the Fund. There is also a risk that, despite not disclosing the portfolio holdings each day, some market participants may seek to use publically available information, including the VIIV, to identify the Fund’s investment strategy and engage in certain predatory trading practices that may have the potential to harm the Fund.

- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. In addition, due to the non-transparency of the portfolio a trading halt in a portfolio security could cause discrepancies between the VIIV and NAV of the Fund resulting in uncertainty on the part of the AP that results in wider, less liquid markets. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund’s website, www.gabelli.com.
- **Authorized Participant and AP Representative Concentration Risk.** The creation and redemption process for the Fund occurs through a confidential brokerage account with an agent, called an “AP Representative,” on behalf of an authorized participant permitted to engage in creation or redemption transactions (each, an “Authorized Participant”). Each day, the AP Representative will be given the names and quantities of the securities to be deposited, in the case of a creation, or redeemed, in the case of a redemption, allowing the AP Representative to buy and sell positions in the portfolio securities to permit creations or redemptions on the Authorized Participant’s behalf, without disclosing the information to the Authorized Participant. The Fund may have a limited number of institutions that act as Authorized Participants and AP Representatives, none of which are obligated to engage in creation or redemption transactions. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to process creation and/or redemption orders, Fund shares may trade at a discount to NAV and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. The fact that the Fund is offering a novel and unique structure may affect the number of entities willing to act as Authorized Participants and AP Representatives. During times of market stress, Authorized Participants may be more likely to step away from this type of ETF than a traditional ETF.

- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **New Fund Risk.** The Fund is new with a limited operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company's particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **Growth Stock Risk.** Securities of growth companies may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks that can cushion stock prices in a falling market.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.

- **Micro Cap Company Risk.** Although micro cap companies may offer greater potential for capital appreciation than larger companies, investing in securities of micro cap companies may involve greater risks than investing in larger, more established issuers. Micro cap companies generally have limited product lines, markets, and financial resources. Their securities may trade less frequently and in more limited volume than the securities of larger, more established companies. The securities of micro cap companies tend to be more volatile and less liquid than securities of larger companies. Also, micro cap companies are typically subject to greater changes in earnings and business prospects than larger companies. Consequently, micro cap company stock prices tend to rise and fall in value more than other stocks.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.

- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Non-Diversification Risk.** As a non-diversified Fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund.
- **Preferred Stock Risk.** Preferred stocks are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. The dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The Fund has not yet commenced operations, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mr. Mario J. Gabelli, CFA, Chief Investment Officer — Value Portfolios of the Adviser, and Ms. Sarah Donnelly, Senior Vice President of GAMCO Investors Inc., have served as portfolio managers of the Fund and have been jointly and primarily responsible for the day-to-day management of the Fund since its inception. Mr. Gabelli and Ms. Donnelly are assisted by a team of associate portfolio managers comprised of Mr. Ashish Sinha, Assistant Vice President of GAMCO Asset Management UK, Mr. Hendi Susanto, Vice President of Gabelli Funds, LLC, and Mr. Chong-Min Kang, Senior Vice President of GAMCO Investors Inc.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Gabelli Green Energy ETF
(the “Green Fund” or the “Fund”)

Investment Objective

The Fund seeks total return through current income and capital appreciation.

Fees and Expenses of the Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** The investment advisory agreement between Gabelli ETFs Trust (the “Trust”) and Gabelli Funds, LLC (the “Adviser”) provides that the Adviser will pay all operating expenses of the Fund, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses.

Shareholder Fees (fees paid directly from your investment):	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):	
Management Fees	0.90%
Other Expenses ⁽¹⁾	<u>0.00%</u>
Total Annual Fund Operating Expenses	<u>0.90%</u>

(1) “Other Expenses” are based on estimated amounts for the current fiscal year.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$92	\$287

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the annual Fund operating expenses or in the example, affect the Fund’s performance. No portfolio turnover is included for the Fund because the Fund has not yet commenced operations.

Principal Investment Strategies

The Fund invests, under normal circumstances, at least 80% of its net assets (measured at the time of purchase) in U.S. equity securities and American Depositary Receipts (“ADRs”) issued by clean energy companies which should benefit from evolution of the global energy industry to a cleaner and more environmentally responsible one. In order to generate current income, the Adviser also seeks to identify companies that have favorable income-paying histories and for which income payments are expected to continue to increase.

The Fund invests in clean energy production, transmission and distribution companies, and clean energy equipment and technology providers. For these purposes, “clean energy” sources include biomass, geothermal energy, hydroelectricity, solar and wind energy. The Fund considers nuclear and gas to be fuel sources that enable a low-carbon transition and thus will count toward the Fund’s 80% policy discussed above. For purposes of that policy, the Fund’s investments in clean energy companies may include: U.S. and depositary receipts of non-U.S. companies that have at least 50% of their assets, income, earnings, sales, or profits committed to, or derived from clean energy (or transmitting and delivering clean energy). The Fund may invest in companies that provide energy-saving solutions to companies engaged in the production or delivery of clean water and/or treating wastewater. In addition, the Fund may invest outside of its 80% policy in companies that transmit or deliver clean water and/or treat wastewater. The Fund cannot invest in coal, oil, or petroleum drillers or producers.

Clean energy companies include electric and gas utilities which have made a commitment to environmentally responsible energy (significant carbon reduction goals) and are in the process of a material transformation from some portion of fossil-fired or coal-fired generation to a more significant renewable energy and lower-carbon mix. In addition, some clean energy companies are considered to be industrials as they supply equipment, towers, solar panels, turbines, motors, pumps, or valves to the production generation or distribution of clean energy. The Adviser considers energy storage, battery storage, and battery storage companies to be an important element to optimizing renewable energy. Some information technology companies that provide or communicate valuable data resulting in efficiencies or conservation of energy may also be considered clean energy stocks. The Fund can invest in domestic or foreign companies (through ADRs) that are involved to a substantial extent in clean energy-related businesses.

Principal Risks

You may want to invest in the Fund if:

- you are a long-term investor
- you seek current income and capital appreciation

The Fund’s share price will fluctuate with changes in the market value of the Fund’s portfolio securities. Your investment in the Fund is not a deposit of the bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; you may lose money by investing in the Fund. When you sell Fund shares, they may be worth more or less than what you paid for them.

Investing in the Fund involves the following risks:

- **Non-Transparent Exchange-Traded Fund (“ETF”) Structure Risk.** Unlike most actively managed ETFs the Fund does not provide daily disclosure of its portfolio holding. Instead, the Fund provides a verified intraday indicative value (“VIIV”), calculated and disseminated every second throughout the trading day. The VIIV is intended to provide investors and other market participants with a highly correlated per share value of the underlying portfolio that can be compared to the current market price. There is, however, a risk that shares of the Fund may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade. Because the Fund trades on the basis of the VIIV, it may trade at a wider bid/ask spread than traditional ETFs that publish their portfolios on a daily basis. Accordingly, the Adviser or its designee will monitor on an ongoing basis how shares of the Fund trade, including the level of any market price premium or discount to net asset value (“NAV”) and the bid/ask spreads on market transactions. Should there be extended periods of unusually high bid/ask spreads, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, action would be appropriate to among other things, narrow the premium/discount or spread, as applicable. Potential actions may include, but are not limited to, changing lead market makers, listing the Fund on a different exchange, changing the size of Creation Units (as defined below), changing the Fund’s investment objective or strategy, and liquidating the Fund. There is also a risk that the market price may vary significantly from the NAV and, thus, the underlying value of the Fund significantly from the underlying NAV of the Fund. There is also a risk that, despite not disclosing the portfolio holdings each day, some market participants may seek to use publically available information, including the VIIV, to identify the Fund’s investment strategy and engage in certain predatory trading practices that may have the potential to harm the Fund.
- **Early Close/Trading Halt Risk.** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses. In addition, due to the non-transparency of the portfolio a trading halt in a portfolio security could cause discrepancies between the VIIV and NAV of the Fund resulting in uncertainty on the part of the AP that results in wider, less liquid markets. Any security for which trading has been halted for an extended period of time will be disclosed on the Fund’s website, www.gabelli.com.
- **Authorized Participant and AP Representative Concentration Risk.** The creation and redemption process for the Fund occurs through a confidential brokerage account with an agent, called an “AP Representative,” on behalf of an authorized participant permitted to engage in creation or redemption transactions (each, an “Authorized Participant”). Each day, the AP Representative will be given the names and quantities of the securities to be deposited, in the case of a creation, or redeemed, in the case of a redemption, allowing the AP Representative to buy and sell positions in the portfolio securities to permit creations or redemptions on the Authorized Participant’s behalf, without disclosing the information to the Authorized Participant. The Fund may have a limited number of institutions that act as Authorized Participants and AP

Representatives, none of which are obligated to engage in creation or redemption transactions. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to process creation and/or redemption orders, Fund shares may trade at a discount to NAV and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. The fact that the Fund is offering a novel and unique structure may affect the number of entities willing to act as Authorized Participants and AP Representatives. During times of market stress, Authorized Participants may be more likely to step away from this type of ETF than a traditional ETF.

- **Large Shareholder Risk.** Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Fund's shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and may, therefore, have a material upward or downward effect on the market price of the Fund's shares. The form of a large shareholder's contribution and any redemption activity in the Fund can adversely affect the tax efficiency of the Fund.
- **Absence of an Active Market.** Although shares of the Fund are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in Fund shares. The absence of an active market for the Fund's shares may lead to wider bid-ask spreads and may contribute to the Fund's shares trading at a premium or discount to NAV. If a shareholder purchases Fund shares at a time when the market price is at a premium to the NAV or sells Fund shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **New Fund Risk.** The Fund is new with a limited operating history and may have higher expenses. There can be no assurance that the Fund will grow to or maintain an economically viable size. The Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss.
- **Equity Risk.** Equity risk is the risk that the prices of the equity securities held by the Fund will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer company's particular circumstances. Holders of equity securities only have rights to value in the company after all issuer debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty.
- **American Depositary Receipts ("ADRs") Risk.** Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted.

- **Clean Energy Company Risk.** Renewable and alternative energy companies can be significantly affected by the following factors: obsolescence of existing technology, short product cycles, legislation resulting in more strict government regulations and enforcement policies, fluctuations in energy prices and supply and demand of alternative energy fuels, energy conservation, the success of exploration projects, the supply of and demand for oil and gas, world events and economic conditions. In addition, shares of clean energy companies have been significantly more volatile than shares of companies operating in other more established industries and the securities included in the Fund may be subject to sharp price declines. This industry is relatively nascent and under-researched in comparison to more established and mature sectors, and should therefore be regarded as having greater investment risk.
- **Issuer Risk.** The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. In addition, this risk may be significantly elevated compared to normal conditions because of recent monetary policy measures and the current interest rate environment.
- **Market Risk.** Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Fund's investments and operations. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other

militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.

- **Management Risk.** If the portfolio managers are incorrect in their assessment of the growth prospects of the securities the Fund holds, then the value of the Fund's shares may decline.
- **Market Trading Risk.** Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from the Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below the Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than when you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of the Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of the Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Non-Diversification Risk.** As a non-diversified Fund, more of the Fund's assets may be focused in the common stocks of a small number of issuers, which may make the value of the Fund's shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund.
- **Trading Issues Risk.** Trading in Fund shares on NYSE Arca, Inc. ("NYSE Arca") may be halted in certain circumstances. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met.
- **Geopolitical Risk.** Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain

foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. These and any further actions that may be taken by the U.S. and foreign governments with respect to trade policy may impair the value of your investment in the Fund.

Performance

The Fund has not yet commenced operations, therefore, performance information is not yet available. Performance information will be available after the Fund has been in operation for one calendar year.

Management

The Adviser. Gabelli Funds, LLC

The Portfolio Managers. Mario J. Gabelli and Timothy M. Winter have been portfolio managers of the Fund since its inception.

Other Information

Purchase and Sale of Fund Shares

The Fund is an actively managed exchange-traded Fund (commonly referred to as an “ETF”). Individual shares of the Fund are listed and traded on a national securities exchange, and individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at market price. These transactions, which do not involve the Fund, are made at market prices that may vary throughout the day, rather than at NAV. Shares of the Fund may trade at a price greater than the Fund’s NAV (premium) or less than the Fund’s NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the “bid-ask spread”). The Fund will only issue or redeem shares that have been aggregated into blocks of 5,000 shares or multiples thereof (“Creation Units”) to Authorized Participants who have entered into agreements with the Fund’s distributor. The Fund generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Fund specifies each day.

Tax Information

The Fund expects that distributions will generally be taxable as ordinary income or long-term capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

INVESTMENT OBJECTIVES, INVESTMENT STRATEGIES, AND RELATED RISKS

The Funds may also use the following investment techniques:

- **Temporary Defensive Investments.** When opportunities for capital appreciation do not appear attractive or when adverse market or economic conditions exist, the Fund may temporarily invest all or a portion of its assets in defensive investments only outside normal market conditions. Such investments include obligations of the U.S. government and its agencies and instrumentalities and short-term money market investments. When following a defensive strategy, the Fund will be less likely to achieve its investment goal of capital appreciation.

The Funds may also engage in other investment practices in order to achieve its investment objectives. These are discussed in the Statement of Additional Information (“SAI”), which may be obtained by calling 800-GABELLI (800-422-3554), your financial intermediary, or free of charge through the Fund’s website at www.gabelli.com.

Gabelli Equity Income ETF

The Fund’s investment objective is to seek a high level of total return on its assets with an emphasis on income.

The Fund will seek to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets in income producing equity securities. Income producing equity securities include U.S. exchange-listed common stock and preferred stock. The Fund may also invest in foreign securities by investing in American Depositary Receipts. In making stock selections, the Adviser looks for securities that have a better yield than the average of the Standard and Poor’s 500 Index (the “S&P 500 Index”), as well as capital gains potential. In selecting investments for the Equity Income Fund, the Adviser focuses on issuers that:

- have strong free cash flow and pay regular dividends;
- have potential for long-term earnings per share growth;
- may be subject to a value catalyst, such as industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business are well managed; and
- will benefit from sustainable long-term economic dynamics, such as globalization of an issuer’s industry or an issuer’s increased focus on productivity or enhancement of services.

The Adviser also believes preferred stock of selected companies offer opportunities for capital appreciation as well as periodic income and may invest a portion of the Equity Income Fund’s assets in such securities. This is particularly true in the case of companies that have performed below expectations. If a company’s performance has been poor enough, its preferred will trade more like common stock than like a fixed income security and may result in above average appreciation if performance improves.

Gabelli Small & Mid Cap ETF

The investment objective of the Fund is long-term capital growth.

Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities (such as U.S. exchange-listed common stock and preferred stock) of companies with small or medium-sized market capitalizations (“small-cap” and “mid-cap” companies, respectively). A company’s market capitalization is generally calculated by multiplying the number of a company’s shares outstanding by its stock price. The Fund defines “small-cap companies” as those with a market capitalization generally less than \$3 billion at the time of investment and “mid-cap companies” as those with a market capitalization between \$3 billion and \$12 billion at the time of investment. The Fund may invest in the equity securities of companies of any market capitalization, subject to its policy of investing at least 80% of its net assets in the equity securities of small-cap and/or mid-cap companies at the time of investment. The Fund may invest up to 25% of its net assets in securities of issuers in a single industry.

The Adviser’s investment philosophy with respect to equity securities is to identify assets that are selling in the public market at a discount to their private market value (“PMV”). The Adviser defines PMV as the value informed purchasers are willing to pay to acquire assets with similar characteristics. The Adviser also normally evaluates an issuer’s free cash flow and long-term earnings trends. Finally, the Adviser looks for a catalyst, something indigenous to the company, its industry or country that will surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business. In selecting securities for the Fund, the Adviser will use a bottom-up, value approach. The Adviser will primarily focus on company-specific criteria rather than on political, economic or other factors.

Gabelli Micro Cap ETF

The investment objective of the Fund is to provide long-term capital appreciation.

Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of companies that are considered micro-cap companies at the time the Micro Cap Fund makes its investment. The Fund defines as companies that have a market capitalization (defined as shares outstanding multiplied by the current market price) of \$250 million or less at the time of the Fund’s investment. Equity securities include common stocks (including indirect holdings of common stock through ADRs), as well as preferred stocks. Micro-cap companies may be engaged in new and emerging industries. Micro-cap companies are generally not well-known to investors and have less of an investor following than larger companies.

The Adviser’s investment philosophy with respect to buying and selling equity securities is to identify assets that are selling in the public market at a discount to their private market value (“PMV”), and the Fund focuses on companies that appear to be underpriced relative to their PMV. PMV is the value the Adviser believes informed purchasers would be willing to pay to acquire a company or other assets with similar characteristics. The Adviser considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills. The Adviser also considers changes in economic and political outlooks as well as individual corporate developments. Further, the Adviser looks for catalysts, factors indigenous to the company, its industry or geographic positioning that may surface additional value, including, but not limited to, industry developments, regulatory changes, changes in management, sale or spin-off of a division, or the development of a profitable new business.

Additionally, the Adviser may also consider the securities of companies that appear to have favorable yet undervalued prospects for earnings growth and price appreciation. In this regard, the Adviser may invest the Fund's assets in companies that it believes have above average or expanding market shares, profit margins, and returns on equity. In evaluating growth prospects, the Adviser uses fundamental security analysis to develop earnings forecasts for companies and to identify investment opportunities. The Adviser bases its analysis on general economic and industry data provided by the U.S. Government, various trade associations and other sources, and published corporate financial data such as annual reports and quarterly statements as well as direct interviews with company management. When applying a growth strategy, the Adviser seeks to invest in companies with high future earnings potential relative to their current market valuations.

The Adviser expects to seek to sell investments that lose their perceived value relative to other investments, which could occur because of, among other things, a security reaching a predetermined price target, a change to a company's fundamentals that make the risk/reward profile unattractive, or a need to improve the overall risk/reward profile of the Fund.

Gabelli Green Energy ETF

The Fund invests, under normal circumstances, at least 80% of its net assets (measured at the time of purchase) in U.S. equity securities and ADRs issued by clean energy companies which should benefit from evolution of the global energy industry to a cleaner and more environmentally responsible one.

The Fund invests, under normal circumstances, at least 80% of its net assets (measured at the time of purchase) in U.S. equity securities and ADRs issued by clean energy companies which should benefit from, or contribute to, the evolution of the global energy industry to a cleaner and more environmentally responsible one.

The Fund invests in clean energy production, transmission and distribution companies, and clean energy equipment and technology providers. For these purposes, "clean energy" sources include biomass, geothermal energy, hydroelectricity, solar and wind energy. The Fund considers nuclear and gas to be fuel sources that enable a low-carbon transition and thus will count toward the Fund's 80% policy discussed above. For purposes of that policy, the Fund's investments in clean energy companies may include: U.S. companies and ADRs of non-U.S. companies that have at least 50% of their assets, income, earnings, sales, or profits committed to, or derived from clean energy (or transmitting and delivering clean energy). The Fund may invest in companies that provide energy-saving solutions to companies engaged in the production or delivery of clean water and/or treating wastewater. In addition, the Fund may invest outside of its 80% policy in companies that transmit or deliver clean water and/or treat wastewater. The Fund cannot invest in coal, oil, or petroleum drillers or producers.

Clean energy companies include electric and gas utilities which have made a commitment to environmentally responsible energy (significant carbon reduction goals) and are in the process of a material transformation from some portion of fossil-fired or coal-fired generation to a more significant renewable energy and lower-carbon mix. In addition, some clean energy companies are considered to be industrials as they supply equipment, towers, solar panels, turbines, motors, pumps, or valves to the production, generation or distribution of clean energy. The Adviser considers energy storage, battery storage, and battery storage companies to be an important element to optimizing renewable energy. Some information

technology companies that provide or communicate valuable data resulting in efficiencies or conservation of energy may also be considered clean energy stocks. The Fund can invest in domestic or foreign companies (through ADRs) that are involved to a substantial extent in clean energy-related businesses.

Investing in the Funds involves the following risks:

- **Non-Transparent Exchange-Traded Fund (“ETF”) Structure Risk.** *All Funds* — Unlike most actively managed ETFs the Funds do not provide daily disclosure of their portfolio holdings. Instead, the Funds provide a verified intraday indicative value (“VIIV”), calculated and disseminated every second throughout the trading day. The VIIV is intended to provide investors and other market participants with a highly correlated per share value of the underlying portfolio that can be compared to the current market price. There is, however, a risk that shares of the Funds may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade. Because the Funds trade on the basis of the VIIV, they may trade at a wider bid/ask spread than traditional ETFs that publish their portfolios on a daily basis. Accordingly, the Funds’ Adviser or their designee will monitor on an ongoing basis how shares of the Funds trade, including the level of any market price premium or discount to net asset value (“NAV”) and the bid/ask spreads on market transactions. Should there be extended periods of unusually high bid/ask spreads, the Board of Trustees of the Trust (the “Board”) will consider the continuing viability of the Funds, whether shareholders are being harmed, and what, if any, action would be appropriate to, among other things, narrow the premium/discount or spread, as applicable. Potential actions may include, but are not limited to, changing lead market makers, listing the Funds on a different exchange, changing the size of Creation Units (as defined below), changing the Funds’ investment objectives or strategies, and liquidating the Funds. There is also a risk that the market price may vary significantly from the NAV and, thus, the underlying value of the Funds significantly from the underlying NAV of the Funds. There is also a risk that, despite not disclosing the portfolio holdings each day, some market participants may seek to use publically available information, including the VIIV, to identify the Funds’ investment strategies and engage in certain predatory trading practices that may have the potential to harm the Funds.
- **Early Close/Trading Halt Risk.** *All Funds* — An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in a Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Funds may be unable to rebalance their portfolios, may be unable to accurately price their investments and/or may incur substantial trading losses. In addition, due to the non-transparency of the portfolio a trading halt in a portfolio security could cause discrepancies between the VIIV and NAV of the Funds resulting in uncertainty on the part of the AP that results in wider, less liquid markets. Any security for which trading has been halted for an extended period of time will be disclosed on the Funds’ website, www.gabelli.com.
- **Authorized Participant and AP Representative Concentration Risk.** *All Funds* — The creation and redemption process for the Funds occurs through a confidential brokerage account (“Confidential Account”) with an agent, called an “AP Representative,” on behalf of

an authorized participant permitted to engage in creation or redemption transactions (each, an “Authorized Participant”). Each day, the AP Representative will be given the names and quantities of the securities to be deposited, in the case of a creation, or redeemed, in the case of a redemption, allowing the AP Representative to buy and sell positions in the portfolio securities to permit creations or redemptions on the Authorized Participant’s behalf, without disclosing the information to the Authorized Participant. The Funds may have a limited number of institutions that act as Authorized Participants and AP Representatives, none of which are obligated to engage in creation or redemption transactions. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Funds and no other Authorized Participant is able to step forward to process creation and/or redemption orders, Fund shares may trade at a discount to NAV and possibly face trading halts and/or delisting. This risk may be more pronounced in volatile markets, potentially where there are significant redemptions in ETFs, generally. The fact that the Funds are offering a novel and unique structure may affect the number of entities willing to act as Authorized Participants and AP Representatives. During times of market stress, Authorized Participants may be more likely to step away from this type of ETF than a traditional ETF.

- **Large Shareholder Risk.** *All Funds* — Certain shareholders, including the Adviser and its affiliates, may own a substantial amount of the Funds’ shares. The disposition of shares by large shareholders, resulting in redemptions through or by Authorized Participants, could have a significant negative impact on the Funds. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca, Inc. and may, therefore, have a material upward or downward effect on the market price of the Funds’ shares. The form of a large shareholder’s contribution and any redemption activity in the Funds can adversely affect the tax efficiency of the Funds.
- **Absence of an Active Market.** *All Funds* — Although shares of the Funds are listed for trading on one or more stock exchanges, there can be no assurance that an active trading market for such shares will develop or be maintained by market makers or Authorized Participants. Authorized Participants are not obligated to execute purchase or redemption orders for Creation Units. In periods of market volatility, market makers and/or Authorized Participants may be less willing to transact in the Funds’ shares. The absence of an active market for the Funds’ shares may lead to wider bid-ask spreads and may contribute to the Funds’ shares trading at a premium or discount to NAV. If a shareholder purchases a Fund’s shares at a time when the market price is at a premium to the NAV or sells a Fund’s shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.
- **Inflation Risk.** *All Funds* — Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of each Fund’s shares and distributions thereon can decline. Inflation risk is linked to increases in the prices of goods and services and a decrease in the purchasing power of money. Inflation often is accompanied or followed by a recession, or period of decline in economic activity, which may include job loss and other hardships and may cause the value of securities to go down generally. Inflation risk is greater for fixed-income instruments with longer maturities. Unanticipated or persistent inflation may have a material and adverse impact on the financial conditions or operating results of issuers in which the Funds may invest, which

may cause the value of each Fund's investments to decline. In addition, higher interest rates that often accompany or follow periods of high inflation may cause investors to favor asset classes other than common stocks, which may lead to broader market declines not necessarily related to the performance of any specific investments or specific issuers.

- **New Fund Risk.** *All Funds* — Each Fund is new with a limited operating history and may have higher expenses. There can be no assurance that a Fund will grow to or maintain an economically viable size. Each Fund could cease operations, and investors may be required to liquidate or transfer their assets at a loss. However, the fee waivers in place with respect to certain of the Funds limits this risk for the periods that such fee waivers are effective.
- **Equity Risk.** *All Funds* — Equity risk is the risk that the prices of the equity securities held by the Funds will change due to general market and economic conditions, perceptions regarding the industries in which the companies issuing the securities participate, and the issuer companies' particular circumstances. These fluctuations may cause an equity security to be worth less than it was worth when it was purchased by the Funds. Because the value of equity securities, and thus shares of the Funds, could decline, you could lose money.
- **Growth Stock Risk.** *Micro Cap Fund only* — Securities of growth companies may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks that can cushion stock prices in a falling market. Stocks of companies the Adviser believes are fast-growing may trade at a higher multiple of current earnings than other stocks. The values of these stocks may be more sensitive to changes in current or expected earnings than the values of other stocks. Earnings disappointments often lead to sharply falling prices because investors buy growth stocks in anticipation of superior earnings growth. If the Adviser's assessment of the prospects for a company's earnings growth is wrong, or if the Adviser's judgment of how other investors will value the company's earnings growth is wrong, then the price of the company's stock may fall or may not approach the value that the Adviser has placed on it.
- **American Depositary Receipts ("ADRs") Risk.** *All Funds* — Investment in ADRs does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of ADRs is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the ADRs and the underlying securities are quoted. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.
- **Clean Energy Company Risk.** *Green Fund only* — Renewable and alternative energy companies can be significantly affected by the following factors: obsolescence of existing technology, short product cycles, legislation resulting in more strict government regulations and enforcement policies, fluctuations in energy prices and supply and demand of alternative energy fuels, energy conservation, the success of exploration projects, the supply of and demand for oil and gas, world events and economic conditions. In addition, shares of clean energy companies have been significantly more volatile than shares of companies operating

in other more established industries and the securities included in the Fund may be subject to sharp price declines. This industry is relatively nascent and under-researched in comparison to more established and mature sectors, and should therefore be regarded as having greater investment risk.

- **Issuer Risk.** *All Funds* — The value of a security may decline for a number of reasons that directly relate to an issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets or factors unrelated to the issuer's value, such as investor perception.
- **Market Risk.** *All Funds* — Global economies and financial markets are increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Funds' portfolios may underperform in comparison to securities in general financial markets, a particular financial market, or other asset classes due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. For example, the U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The current political climate, including political and diplomatic events within the U.S. and abroad, may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Funds' investments and operations. In addition, the value of the Funds' investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. For example, the ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Iran, Hamas and other militant groups in the Middle East have caused and may continue to cause significant market disruptions. As a result, there is significant uncertainty around how these conflicts will evolve, which may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets.
- **Management Risk.** *All Funds* — If the portfolio managers are incorrect in their assessment of the investment prospects of the securities a Fund holds, then the value of that Fund's shares may decline. In addition, the Adviser's strategy may produce returns that are different from other funds that invest in similar securities.
- **Market Trading Risk.** *All Funds* — Individual Fund shares may be purchased and sold only on a national securities exchange or alternative trading system through a broker-dealer, and may not be directly purchased or redeemed from a Fund. There can be no guarantee that an active trading market for shares will develop or be maintained, or that their listing will continue unchanged. Buying and selling shares may require you to pay brokerage commissions and expose you to other trading costs. Due to brokerage commissions and other transaction costs

that may apply, frequent trading may detract from realized investment returns. Trading prices of shares may be above, at, or below a Fund's NAV, will fluctuate in relation to NAV based on supply and demand in the market for shares and other factors, and may vary significantly from NAV during periods of market volatility. The return on your investment will be reduced if you sell shares at a greater discount or narrower premium to NAV than you acquired shares. In addition, the market price of shares includes a "bid-ask spread" charged by the market makers or other participants that trade the shares. The spread of a Fund's shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease.

Where all or a portion of a Fund's underlying securities trade in a foreign market that is closed when the domestic market in which the Fund's shares are listed and trading is open, there may be changes between the last quote from the closed foreign market and the value of such underlying security during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the underlying value of the shares.

- **Mid-Capitalization Company Risk.** *Small & Mid Cap Fund only* — Mid-cap company risk is the risk that investing in securities of mid-cap companies could entail greater risks than investments in larger, more established companies. Mid-cap companies tend to have narrower product lines, more limited financial resources and a more limited trading market for their stocks, as compared with larger companies. As a result, their stock prices may decline more significantly or more rapidly than stocks of larger companies as market conditions change.
- **Micro Cap Company Risk.** *Micro Cap Fund only* — Although micro cap companies may offer greater potential for capital appreciation than larger companies, investing in securities of such companies may involve greater risks than investing in larger, more established companies, including the risk of loss and the risk that the returns may differ significantly from returns of the Fund investing in larger-cap companies or other asset classes. Micro cap companies may be new or unseasoned companies which are in their very early stages of development. Micro cap companies generally have limited product lines, markets, management personnel, competitive strengths, research, and financial resources, and may be more vulnerable to adverse business or market developments. Their securities may trade less frequently and in more limited volume, and are subject to more abrupt or erratic market price movements, than the securities of larger, more established companies. The Fund may be able to deal with only a few market-makers when purchasing and selling micro cap securities, and may need a considerable amount of time to purchase or sell its positions in these securities. Also, micro cap companies are typically subject to greater changes in earnings and business prospects than larger companies. The securities of micro cap companies tend to be more volatile and less liquid than the securities of larger companies. Consequently, micro cap company stock prices tend to rise and fall in value more than other stock prices. Micro cap securities are highly volatile, and these companies may fail to execute their business plans and go out of business. Micro cap companies carry additional risks because of the tendency of their earnings and revenues to be less predictable. Micro cap companies may be more vulnerable than larger companies to key personnel losses due to reliance on a smaller number of management personnel. These conditions, which create greater opportunities to find securities trading below the Adviser's estimate of the company's current worth, also involve increased risk. The shares of micro-cap companies may require

fair-value pricing, which is subjective and requires judgment by the Adviser, and may be at risk for de-listing from a securities exchange, making it difficult for the Fund to buy and sell shares of a particular company. The actual market prices for a security may differ from the fair value of that security as determined by the Adviser, and there is no assurance that the Fund will realize fair valuation upon the sale of a security. In addition, there may be less public information available about micro cap companies. It may take a long time before the Fund realizes a gain, if any, on an investment in a micro cap company. Micro cap companies may have limited financial resources and little or no access to additional credit and therefore may be more susceptible to market downturns or rising credit costs than larger, more established companies.

- **Non-Diversification Risk.** *Equity Income Fund, Micro Cap Fund, and Green Fund only* — Each Fund is classified as a “non-diversified” Fund. As a non-diversified Fund, more of a Fund’s assets may be focused in the securities of a small number of issuers, which may make the value of each Fund’s shares more sensitive to changes in the market value of a single issuer or industry than shares of a diversified Fund. The ability to invest in a more limited number of securities may increase the volatility of each Fund’s investment performance, as each Fund may be more susceptible to risks associated with a single economic, political, or regulatory event than a diversified Fund. If the securities in which each Fund invests perform poorly, each Fund could incur greater losses than it would have had if it had been invested in a greater number of securities.
- **Preferred Stock Risk.** *Small & Mid Cap Fund, Micro Cap Fund and Equity Income Fund only* — A preferred stock is a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer’s growth may be limited. Preferred stock has preference over common stock in the receipt of dividends and in any residual assets after payment to creditors should the issuer be dissolved. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.
- **Small Capitalization Company Risk.** *Small & Mid Cap Fund only* — Investing in securities of small capitalization companies may involve greater risks than investing in larger, more established issuers. Smaller capitalization companies typically have relatively lower revenues, limited product lines and lack of management depth, and may have a smaller share of the market for their products or services, than larger capitalization companies. The stocks of smaller capitalization companies tend to have less trading volume than stocks of larger capitalization companies. Less trading volume may make it more difficult for the portfolio managers to sell securities of smaller capitalization companies at quoted market prices. Finally, there are periods when investing in smaller capitalization stocks fall out of favor with investors and the stocks of smaller capitalization companies underperform.
- **Trading Issues Risk.** *All Funds* — Shares of a Fund may trade in the secondary market at times when a Fund does not accept orders to purchase or redeem shares. At such times, shares may trade in the secondary market with more significant premiums or discounts than might be experienced at times when a Fund accepts purchase and redemption orders. Secondary market trading in a Fund’s shares may be halted by a stock exchange because of market conditions or

for other reasons. In addition, trading in a Fund's shares on a stock exchange or in any market may be subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules on the stock exchange or market.

- **Value Investing Risk.** *Small & Mid Cap Fund and Equity Income Fund only* — Each Fund invests in "value" stocks. The portfolio manager may be wrong in the assessment of a company's value and the stocks each Fund holds may not reach what the portfolio manager believes are their full values. From time to time "value" investing falls out of favor with investors. During those periods, each Fund's relative performance may suffer.
- **Geopolitical Risk.** *All Funds* — Occurrences of global events such as war, terrorist attacks, natural disasters, country instability, infectious disease epidemics, pandemics and other public health issues, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers and other governmental trade or market control programs, the potential exit of a country from its respective union and related geopolitical events, may result in market volatility and may have long-lasting impacts on both the U.S. and global financial markets. For example, the U.S. government has imposed, and may in the future further increase, tariffs on certain foreign goods, and some foreign governments have instituted retaliatory tariffs on certain U.S. goods. There is significant uncertainty as to further actions that may be taken by the U.S. and foreign governments with respect to trade policy. In addition, Russia's military invasion of Ukraine and the conflict among Israel, Iran, Hamas and the potential for wider conflict, have increased volatility and uncertainty in the financial markets, adversely affected regional and global economies, and could present material uncertainty and risk with respect to the Funds and the performance of the Funds' investments or operations. These events, as well as other recent geopolitical events, such as rising tensions between the Chinese government and Taiwan and Brexit, and related changes in foreign and domestic political and economic conditions, could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, secondary trading, credit ratings, inflation, investor sentiment and other factors affecting the value of the Funds' investments.

Portfolio Holdings. A description of each Fund's policies and procedures with respect to the disclosure of its portfolio securities is available in the Statement of Additional Information ("SAI"), which may be obtained by calling 800-GABELLI (800-422-3554), your financial intermediary, or free of charge through the Funds' website at www.gabelli.com.

MANAGEMENT OF THE FUNDS

The Adviser. Gabelli Funds, LLC, with its principal offices located at One Corporate Center, Rye, New York 10580-1422, serves as investment adviser to the Funds. The Adviser makes investment decisions for each Fund and continuously reviews and administers each Fund's investment programs and manages the operations of the Funds under the general supervision of the Trust's Board. The Adviser also manages several other open-end and closed-end investment companies in the Gabelli family of Funds ("Gabelli Fund Complex" or "Fund Complex"). The Adviser is a New York limited liability company organized in 1999 and a wholly owned subsidiary of GAMCO Investors, Inc. ("GAMI"), a publicly held company listed on the OTCQX.

As compensation for its services and the related expenses borne by the Adviser, each Fund is contractually obligated to pay the Adviser an advisory fee computed daily and payable monthly equal to 0.90% of the value of such Fund's average daily net assets, except as provided in the fee waiver arrangements described below. The investment advisory agreement between Gabelli ETFs Trust (the "Trust") and Gabelli Funds, LLC (the "Adviser") provides that the Adviser will pay all operating expenses of the Funds, except the management fees, interest expenses, taxes, expenses incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions, distribution fees or expenses, litigation expenses, and any extraordinary expenses. A discussion regarding the basis for the Board's approval of the investment advisory agreement for each Fund is available in the Fund's next report on Form N-CSR.

Fee Waivers. The Adviser has contractually agreed to waive the Equity Income Fund's management fees of 0.90% on the Fund's first \$25 million in net assets. The fee waiver agreement will continue until at least April 30, 2027. The fee waiver agreements may be terminated only by, or with the consent of, the Board.

The Portfolio Managers. Mr. Mario J. Gabelli, CFA, has been primarily responsible for the day-to-day management of the Equity Income Fund, Micro Cap Fund, Small & Mid Cap Fund, and Green Fund since their inception. Mr. Gabelli is Chairman and Co-Chief Executive Officer of GAMI and Executive Chairman of Associated Capital Group, Inc.; Chief Investment Officer — Value Portfolios of GAMI, Gabelli Funds, LLC, and GAMCO Asset Management, Inc., another wholly-owned subsidiary of GAMI; Chief Executive Officer and Chief Investment Officer of GGCP; and an officer or director of other companies affiliated with GAMI. Mr. Gabelli serves as portfolio manager for and is a director of several funds in the Gabelli Fund Complex. The Adviser relies to a considerable extent on the expertise of Mr. Gabelli, who may be difficult to replace in the event of his death, disability, or resignation.

Mr. Robert D. Leininger, CFA, has served as portfolio manager of the Equity Income Fund since its inception. Mr. Leininger joined GAMCO Investors, Inc. in 1993 as an equity analyst. Subsequently, he was a partner and portfolio manager at Rorer Asset Management before rejoining GAMCO in 2010 where he currently serves as a portfolio manager of Gabelli Funds, LLC. Mr. Leininger is a magna cum laude graduate of Amherst College with a degree in Economics and holds an MBA degree from the Wharton School at the University of Pennsylvania.

Mr. Kevin V. Dreyer has been primarily responsible for the day-to-day management of the Small & Mid Cap Fund since its inception. Mr. Dreyer joined GAMI in 2005 as a research analyst and currently serves as a Managing Director and Co-Chief Investment Officer of its Value Team. Mr. Dreyer is a portfolio manager of the Adviser, managing several funds within the Gabelli Fund Complex, and GAMCO, on its institutional and high net worth separate account team.

Mr. Christopher J. Marangi has been primarily responsible for the day-to-day management of the Small & Mid Cap Fund since its inception. Mr. Marangi joined GAMI in 2003 and currently serves as a President and Co-Chief Investment Officer of its Value Team. Mr. Marangi is a portfolio manager of the Adviser, managing several funds within the Gabelli Fund Complex, and GAMCO, on its institutional and high net worth accounts team.

Ms. Sarah Donnelly, Senior Vice President of GAMCO Investors Inc., has been jointly and primarily responsible for the day-to-day investment management of the Micro Cap Fund since its inception. Ms. Donnelly joined GAMCO in 1999 as a junior analyst working with the consumer staples and media analysts. She received a BS degree in Business Administration with a concentration in Finance and minor in History from Fordham University and currently serves on the advisory board on the Gabelli Center for Global Security Analysis at Fordham University. Ms. Donnelly is also a portfolio manager of several funds in the Gabelli Fund Complex.

Mr. Chong-Min Kang, Senior Vice President of GAMCO Investors Inc., has been an associate portfolio manager for the Micro Cap Fund since its inception. Mr. Kang joined the firm in 2007 as a research analyst. Mr. Kang received a BA degree from Boston College and an MBA from the Columbia Business School. Mr. Kang is also an associate portfolio manager of The Gabelli Global Mini Mites Fund, a series of GAMCO Global Series, Inc.

Mr. Hendi Susanto, Vice President of Gabelli Funds, LLC has been an associate portfolio manager for the Micro Cap Fund since its inception. Mr. Susanto joined Gabelli in 2007 as a research analyst. He currently covers the global technology industry. Mr. Susanto received a BS degree summa cum laude from the University of Minnesota, a MS from M.I.T., and an MBA from the Wharton School of Business. Mr. Susanto is also a portfolio manager of several funds in the Gabelli Fund Complex.

Mr. Timothy M. Winter, CFA, has been the portfolio manager of the Green Fund since its inception. Mr. Winter joined Gabelli & Company in April of 2009 and covers the utility industry. He has over 20 years' experience as an equity research analyst covering this industry, including the years 1992-2007 at AG Edwards from where he received industry recognition as a 3 time Wall Street Journal All-Star and was a senior member of the Institutional Investor (I.I.) #1 ranked Electric Utility Team for the years 2001, 2002, 2003, 2004 and 2005. He was most recently recognized in the 2017 Thomson Reuters US Analyst Awards as a "Top Stock Picker" in the gas utility industry. Mr. Winter received his B.A. in Economics in 1991 from Rollins College and MBA in Finance from Notre Dame in 1992. Mr. Winter is also a portfolio manager of several funds in the Gabelli Fund Complex.

Mr. Ashish Sinha, Assistant Vice President of GAMCO Asset Management UK, joined the firm in 2012 as a research analyst. He is based in London and serves as a portfolio manager for the Adviser and is focused on European equities in a generalist role. Prior to joining the firm, Mr. Sinha was an equity research analyst at Morgan Stanley in London for several years during which he covered European Technology, European mid-caps and European Business Services sector. Prior to that, he worked in planning and strategy at Birla Sun Life Insurance in India. Mr. Sinha has holds a Bachelor of Business Administration from IMS, India and a Master of International Business from the Indian Institute of Foreign Trade, India. He is a CFA charterholder. Mr. Sinha is also a portfolio manager of several funds in the Gabelli Fund Complex.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed by them, and their ownership of securities in the Funds.

INDEX DESCRIPTIONS

The **S&P 500 Index** is a widely recognized, unmanaged index of common stock prices. The index figures do not reflect any deductions for fees, expenses, or taxes. You cannot invest directly in the S&P 500 Index.

PURCHASE AND SALE OF SHARES

Trading in the Secondary Market. Shares of the Funds are listed and available for trading on the Listing Exchange during its core trading session (generally 9:30 am until 4:00 pm Eastern time). Shares may also be bought and sold on other national securities exchanges and alternative trading systems that have obtained appropriate licenses, adopted applicable rules, and developed systems to support trading in the Funds' shares. There can be no guarantee that an active trading market will develop or be maintained, or that the Funds' listings will continue or remain unchanged. The Funds do not impose any minimum investment for shares of the Funds purchased in the secondary market.

The Funds' shares may be purchased and sold in the secondary market only through a broker-dealer. When buying or selling shares, you may incur trading commissions or other charges determined by your broker-dealer. Due to applicable brokerage charges and other trading costs, frequent trading may detract from realized investment returns. Frequent trading may also result in adverse tax consequences. Trading commissions are frequently a fixed dollar amount, and therefore may be proportionately more costly when buying or selling small amounts of shares.

Each Fund is an actively managed non-transparent exchange-traded fund (commonly referred to as an "ETF"). Individual shares of a Fund are listed on the Listing Exchange, which is a national securities exchange. Most investors will buy and sell shares of a Fund through a broker-dealer. The price of Fund shares is based on market price, and because ETF shares trade at market prices rather than at NAV, shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). The Funds will only issue or redeem shares that have been aggregated into blocks or multiples thereof to Authorized Participants who have entered into agreements with the Funds' distributor. The Funds generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Funds specify each day.

Shares of a Fund are not sponsored, endorsed, or promoted by any Listing Exchange. The Listing Exchange makes no representation or warranty, express or implied, to the owners of the shares of the Funds. The Listing Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of the shares of a Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Listing Exchange has no obligation or liability to owners of the shares of a Fund in connection with the administration, marketing, or trading of the shares of a Fund. Without limiting any of the foregoing, in no event shall the Listing Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the distributor and the Funds make no representation or warranty, express or implied, to the owners of shares of each Fund or any member of the public regarding the advisability of investing in securities generally or in a Fund particularly.

Information regarding each Fund's NAV, market price, premiums and discounts, and bid-ask spreads is available on the Funds' website at www.gabelli.com.

The Verified Intraday Indicative Value. Information regarding the intraday value of shares of the Funds, also known as the VIIV, is calculated and disseminated every second throughout each trading day by the Listing Exchange or by market data vendors or other information providers. It is available on websites that publish updated market quotations during the trading day, like Yahoo Finance (<https://finance.yahoo.com>), by searching for a Fund's ticker plus the extension .IV, though some websites require their own unique extensions. The VIIV is based on the current market value of the securities in a Fund's portfolio that day. The VIIV is intended to provide investors and other market participants with a highly correlated per share value of the underlying portfolio that can be compared to the current market price. To calculate the VIIV, the Funds employ two separate calculation engines to provide two independently calculated sources of intraday indicative values (calculation engines). The Funds then use a pricing verification agent to continuously compare the data from both the calculations engines on a real time basis. If during the process of real time price verification, the indicative values from the calculation engines differ by more than 25 basis points for 60 consecutive seconds, the pricing verification agent will alert the Adviser and the Adviser will request that the Listing Exchange halt trading of a Fund's shares until the two indicative values come back into line. The specific methodology for calculating a Fund's VIIV, which will be overseen by the Funds' board, is available on the Funds' website (www.gabelli.com).

Although the VIIV is intended to provide investors with enough information to allow for an effective arbitrage mechanism that will keep the market price of each Fund at or close to the underlying NAV per share of each Fund, there is a risk (which may increase during periods of market disruption or volatility) that market prices will vary significantly from the underlying NAV of a Fund. ETFs trading on the basis of a published VIIV may trade at a wider bid/ask spread than ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade. Although the Funds seek to benefit from not disclosing its portfolio information daily, market participants may attempt to use the VIIV to identify a Fund's trading strategy, which if successful, could result in such market participants engaging in certain predatory trading practices that may have the potential to harm that Fund and its shareholders. If at any time 10% or more of the securities in a Fund's portfolio become subject to a trading halt or otherwise do not have readily available market quotations, the advisor will ask the Listing Exchange to halt trading of that Fund. Trading halts may have a greater impact on the Funds compared to other ETFs because it is less transparent.

PAYMENTS TO BROKER/DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of a Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems or other services related to the sale or promotion of a Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend any of the Funds over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

PRICING OF FUND SHARES

The NAV is calculated separately for the shares of each Fund on each Business Day. The New York Stock Exchange (the “NYSE”) is open Monday through Friday, but currently is scheduled to be closed on New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day and on the preceding Friday or subsequent Monday when a holiday falls on a Saturday or Sunday, respectively.

Each Fund’s NAV is determined as of the close of regular trading on the NYSE, normally 4:00 p.m., Eastern Time. The NAV of each Fund is computed by dividing the value of the applicable Fund’s net assets, *i.e.*, the value of its securities and other assets less its liabilities, including expenses payable or accrued by the total number of shares outstanding at the time the determination is made. As discussed in the “Purchase and Sale of Shares” section, although a Fund’s NAV is only computed once each regular trading day, each Fund’s VIIV will be broadcast each second throughout the course of a regular trading day. Equity securities listed or traded on a national securities exchange or traded in the U.S. over-the-counter market where trades are reported contemporaneously and for which market quotations are readily available are valued at the last quoted sale or a market’s official closing price at the close of the exchange’s or other market’s regular trading hours, as of or prior to the time and day as of which such value is being determined. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market as determined by the Adviser. If there has been no sale on the day the valuation is made, the securities are valued at the mean of the closing bid and ask prices on the principal market for such security on such day. If no ask prices are quoted on such day, then the security is valued at the closing bid price on the principal market for such security on such day. If no bid or ask prices are quoted on such day, a Fund’s accounting agent will notify the Adviser and the security will be valued based on written or standing instructions from the Adviser.

Initial public offering securities are initially valued at cost. Upon commencement of trading, these securities are valued like any other equity security.

Debt obligations (including convertible debt) for which market quotations are readily available are valued at the average of the latest bid and ask prices. If there were no ask prices quoted on such day, the security is valued using the closing bid price. Such debt obligations are valued through prices provided by a pricing service overseen by the Adviser.

NAV is the price at which a Fund issues and redeems shares. It is calculated in accordance with the standard formula for valuing mutual fund shares. The market price of a Fund generally is determined using the midpoint between the highest bid and the lowest ask on the primary securities exchange on which shares of the Fund are listed for trading, as of the time that the Fund’s NAV is calculated. A Fund’s market price may be at, above or below its NAV. The NAV of a Fund will fluctuate with changes in the value of its portfolio holdings. The market price of a Fund will fluctuate in accordance with changes in its NAV, as well as market supply and demand.

Premiums or discounts are the differences (expressed as a percentage) between the NAV and market price of a Fund on a given day, generally at the time the NAV is calculated. A premium is the amount that a Fund is trading above the reported NAV, expressed as a percentage of the NAV. A discount is the amount that a Fund is trading below the reported NAV, expressed as a percentage of the NAV.

Because shares of the Funds may trade at a premium or discount, shareholders may pay more than NAV when they buy shares of the Funds and receive less than NAV when they sell those shares, because the shares are bought and sold at current market prices.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Board has not adopted a policy of monitoring for frequent purchases and redemptions of Fund shares (“frequent trading”) that appear to attempt to take advantage of potential arbitrage opportunities presented by a lag between a change in the value of a Fund’s portfolio securities after the close of the primary markets for the Fund’s portfolio securities and the reflection of that change in the Fund’s NAV (“market timing”). The Board believes this is appropriate because an ETF, such as a Fund, is intended to be attractive to arbitrageurs, as trading activity is critical to ensuring that the market price of Fund shares remains at or close to NAV. Since each Fund issues and redeems Creation Units at NAV plus applicable transaction fees, and each Fund’s shares may be purchased and sold on the NYSE Arca at prevailing market prices, the risks of frequent trading are limited.

DIVIDENDS AND DISTRIBUTIONS

The Funds intend to pay dividends and capital gain distributions, if any, on an annual basis. Shareholders may have dividends and/or capital gain distributions automatically reinvested in additional shares of the Funds. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom the shareholder purchased shares makes such option available.

Brokers may make available the Depository Trust Company book-entry dividend reinvestment service to their customers who own the Funds’ Shares. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole Shares of the Funds purchased on the secondary market, at the then current market price. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require Funds’ shareholders to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares of the Funds purchased in the secondary market.

TAX INFORMATION

The Funds expect that distributions will consist primarily of investment company taxable income and net capital gain. Capital gains may be taxed at different rates for individuals depending on the length of time a Fund holds the securities giving rise to such capital gains. Dividends from investment company taxable income (including distributions of net short-term capital gains, *i.e.*, gains from securities held by a Fund for one year or less) are generally taxable to you as ordinary income if you are a U.S. shareholder, except certain qualified dividends that are discussed below. Properly designated distributions of net capital gain, *i.e.*, net long-term capital gains minus net short-term capital loss (“Capital Gain Dividends”), are taxable to you at long-term capital gain rates no matter how long you have owned your shares. A Fund’s distributions, whether you receive them in cash or reinvest them in additional shares of a Fund, generally will be subject

to federal and, if applicable, state and local taxes. Although dividends (including dividends from short-term capital gains) are generally taxable as ordinary income, individual shareholders who satisfy certain holding periods and other requirements are taxed on such dividends at long-term capital gain rates to the extent the dividends are attributable to “qualified dividend income” received by a Fund. Qualified dividend income generally consists of dividends received from U.S. corporations (other than certain dividends from real estate investment trusts and regulated investment companies) and certain foreign corporations. The amount of qualified dividend income distributed by a Fund in any year depends on its investments and cannot be predicted. Corporations may be able to take a dividends-received deduction for a portion of the income dividends they receive. A redemption of Fund shares or an exchange of Fund shares for shares of another Fund will be treated for tax purposes as a sale of Fund shares, and any gain you realize on such a transaction generally will be taxable. A Fund may be required to withhold, as federal backup withholding, a percentage (currently 24%) of the dividends, distributions, and redemption proceeds payable to shareholders who fail to provide the Funds they have invested in with their correct taxpayer identification number or to make required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. Also, dividends, distributions, and redemption proceeds payable to foreign shareholders may be subject to a federal withholding tax.

A dividend declared by the Funds in October, November, or December to shareholders of record on a specific date in such a month and paid during January of the following year will be treated as paid in December for tax purposes.

After the end of each year, the Funds you have invested in will provide you with the information regarding any shares you redeemed and the federal tax status of any dividends or distributions you received during the previous year.

Under current law, interest, dividends and capital gains from the Funds generally will be subject to the 3.8 percent federal tax that is imposed on net investment income of U.S. individuals with modified adjusted gross income exceeding \$200,000 (or \$250,000 if married filing jointly), and of estates and trusts.

If you sell your Fund shares, it is considered a taxable event for you. Depending on the purchase price and the sale price of the shares you sell, you may have a gain or a loss on the transaction. You are responsible for any tax liabilities generated by your transaction.

This summary of tax consequences is intended for general information only and is subject to change by legislative, judicial, or administrative action, and any such change may be retroactive. It is applicable only to shareholders who are U.S. persons. A Fund may make taxable distributions during periods in which the share price has declined. A more complete discussion of the tax rules applicable to you and the Funds can be found in the SAI that is incorporated by reference into this Prospectus. You should consult a tax adviser concerning the federal, state, and local tax consequences of your investment in the Funds.

CREATIONS AND REDEMPTIONS

Prior to trading in the secondary market, shares of a Fund are “created” at NAV by market makers, large investors and institutions only in block-size Creation Units or multiples thereof. The following table sets forth the number of shares of the applicable Fund that constitute a Creation Unit:

Name of the Fund	Creation Unit Size
Gabelli Equity Income ETF	5,000
Gabelli Small & Mid Cap ETF	5,000
Gabelli Micro Cap ETF	5,000
Gabelli Green Energy ETF	5,000

Each “creator” or “Authorized Participant” enters into an authorized participant agreement with G.distributors, LLC, the Funds’ distributor (the “Distributor”). Each Authorized Participant creates or redeems Creation Units through an AP Representative. An AP Representative is an unaffiliated broker dealer with which the Authorized Participant has signed an agreement (the “Confidential Account Agreement”) to establish a Confidential Account for the benefit of such Authorized Participant and that will deliver or receive, on behalf of the Authorized Participant, all consideration to or from a Fund in a creation or redemption transaction.

Each day, the custodian will transmit the composition of each Fund’s Creation Basket (as defined below) to each AP Representative. Acting on execution instructions from an Authorized Participant, the AP Representative may purchase or sell the securities in the Creation Basket for purposes of effecting in-kind creation and redemption activity during the day. Authorized Participants are responsible for all order instructions and associated profit and loss, and will be able to monitor the execution quality of the AP Representative by comparing the price at which they purchase or sell Creation Baskets with the VIIV and the end of day NAV.

A creation transaction, which is subject to acceptance by the Distributor generally begins when an Authorized Participant enters into an irrevocable creation order with a Fund and delivers to the AP Representative the cash necessary to purchase a designated portfolio of securities in the Confidential Account. The AP Representative then delivers the purchased portfolio of securities (“Deposit Instruments”) to a Fund in exchange for a specified number of Creation Units.

Similarly, shares are redeemed only in Creation Units. A redemption transaction generally begins when an Authorized Participant enters into an irrevocable redemption order with a Fund. That Fund then instructs its custodian to deliver a designated portfolio of securities (“Redemption Instruments”) to the appropriate Confidential Account in exchange for the Creation Units being redeemed. The Authorized Participant will instruct the AP Representative when to liquidate the securities in the Confidential Account, which will be liquidated no later than the end of the day, so that the Confidential Account holds no positions at the end of day.

On any given Business Day, the name and quantities of the instruments that constitute Deposit Instruments and the names and quantities of the instruments that constitute Redemption Instruments will correspond pro rata to the positions in a Fund’s portfolio (including cash positions) used to calculate a Fund’s NAV for that day, and will be identical. These instruments are referred to, in the case of either a purchase or a redemption, as the “Creation Basket.”

An AP Representative will not trade securities in the Confidential Account on behalf of an Authorized Participant other than buying or selling the securities included in a Creation Basket to be delivered to or received from, respectively, a Fund. Pursuant to the Confidential Account Agreement, the AP Representative is restricted from disclosing the Creation Basket. In addition, the AP Representative undertakes an obligation not to use the identity or weighting of the securities in the Creation Basket for any purpose other than executing creations and redemptions for a Fund. The purpose of this arrangement is to protect the identity and weightings of a Fund's portfolio holdings.

The prices at which creations and redemptions occur are based on the next calculation of NAV after a creation or redemption order is received in an acceptable form under the authorized participant agreement. In the event of a system failure or other interruption, including disruptions at market makers, Authorized Participants or AP Representatives, orders to purchase or redeem Creation Units either may not be executed according to a Fund's instructions or may not be executed at all, or a Fund may not be able to place or change orders.

To the extent a Fund engages in in-kind transactions, a Fund intends to comply with the U.S. federal securities laws in accepting securities for deposit and satisfying redemptions with redemption securities by, among other means, assuring that any securities accepted for deposit and any securities used to satisfy redemption requests will be sold in transactions that would be exempt from registration under the Securities Act of 1933 (the "1933 Act"). Further, an Authorized Participant that is not a "qualified institutional buyer" as such term is defined in Rule 144A under the 1933 Act, will not be able to receive restricted securities eligible for resale under Rule 144A.

Information about the procedures regarding creation and redemption of Creation Units (including the cutoff times for receipt of creation and redemption orders) is included in a Fund's SAI.

Because new shares may be created and issued on an ongoing basis, at any point during the life of a Fund a "distribution," as such term is used in the 1933 Act, may be occurring. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner that could render them statutory underwriters subject to the prospectus delivery and liability provisions of the 1933 Act. Any determination of whether one is an underwriter must take into account all the relevant facts and circumstances of each particular case.

Broker-dealers should also note that dealers who are not "underwriters," but are participating in a distribution (as contrasted to ordinary secondary transactions), and thus dealing with shares that are part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the 1933 Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the 1933 Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the 1933 Act is available only with respect to transactions on a national securities exchange. Authorized Participants are charged standard creation and redemption transaction fees to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units. The standard creation transaction fee is charged to the Authorized Participant on the day such Authorized Participant creates a Creation Unit, and is the same regardless of the number of Creation Units purchased by the Authorized Participant on the applicable business day.

Similarly, the standard redemption transaction fee is charged to the Authorized Participant on the day such Authorized Participant redeems a Creation Unit, and is the same regardless of the number of Creation

Units redeemed by the Authorized Participant on the applicable business day. Creations and redemptions for cash (when cash creations and redemptions (in whole or in part) are available or specified) are also subject to an additional charge (up to the maximum amounts shown in the table below). This charge is intended to compensate for brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to cash transactions. Investors who use the services of a broker or other financial intermediary to acquire or dispose of Fund shares may pay fees for such services.

DELIVERY OF SHAREHOLDER DOCUMENTS – HOUSEHOLDING

Householding is an option available to certain investors. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Funds is available through certain broker-dealers. Please contact your broker-dealer if you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder document, or if you are currently enrolled in householding and wish to change your householding status.

FINANCIAL HIGHLIGHTS

Financial information for the Funds when available, will be included in each such Fund's next Form N-CSR.

Gabelli ETFs Trust

Gabelli Equity Income ETF
Gabelli Small & Mid Cap ETF
Gabelli Micro Cap ETF
Gabelli Green Energy ETF

For More Information:

For more information about each Fund, the following documents will be available free upon request:

Annual/Semiannual Reports and Form N-CSR:

Each Fund's semiannual and annual reports to shareholders and Form N-CSR contain additional information on the Funds' investments. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. In Form N-CSR, you will find the Funds' annual and semi-annual financial statements.

Statement of Additional Information (SAI):

The SAI provides more detailed information about each Fund, including their operations and investment policies. It is incorporated by reference into, and is legally considered a part of, this prospectus.

You can obtain free copies of these documents and prospectuses of other funds in the Gabelli Fund Complex, or request other information and discuss your questions about a Fund by mail, toll free telephone, or the Internet as follows:

Gabelli ETFs Trust
One Corporate Center
Rye, NY 10580-1422
Telephone: 800-GABELLI (800-422-3554)
