KEELEY DIVIDEND ETF

WHAT IS KDVD?

KDVD is a fully transparent, actively managed exchange-traded fund that seeks capital appreciation and current income through investments in dividend-paying stocks.

SMID-Cap Focus: While most dividend ETFs focus predominantly on large-cap and pure dividend growth, KDVD emphasizes small and mid-cap names with a blend of growth and current yield. This creates a larger opportunity set.

Full Dividend Spectrum: KDVD seeks modest, growing and high-yield payers. Additionally, the fund targets solid-steady growers, aiming to hold stocks that increase dividends in line with earnings.

Experienced Leadership: For 16+ years, KDVD Portfolio Managers Thomas Browne and Brian Leonard have diligently focused on the small and mid-cap value and dividend space, managing \$416 million in AUM across their 3 existing mutual funds.

INVESTMENT STRATEGY

- Diversified actively managed ETF seeking capital appreciation
- Invests at least 80% in common stocks and other equity-type securities of dividend-paying companies, primarily in the small- to mid-cap range
- A flexible dividend approach focused on the intersection of Quality, Timeliness, and Valuation.

TAX EFFICIENCY

Investors in the Keeley Dividend ETF can benefit from the same tax dynamics as traditional ETFs through direct fund transactions that are typically done in-kind with Authorized Participants (APs). These cashless transactions are not taxable events and therefore may help mitigate the yearly capital gain distributions.

COST EFFECTIVENESS

Like traditional ETFs, the Fund can reduce operational costs from the transfer agent and other custody fees. Also, since the buying and selling of fund shares happens outside of the structure, internal costs can be lower. This is achieved through the ETF creation/redemption process.

INTRADAY TRADING & REAL TIME PRICING

Similar to other listed stocks and ETFs, KDVD will trade intraday in the marketplace but with additional clarity on real-time pricing.

IMPORTANT DISCLOSURES

- Shares of this ETF are bought and sold at market price (not NAV) and are not individually redeemed from the fund.
- Buying or selling ETF shares may require additional fees such as brokerage commissions, which will reduce returns.
- These additional risks may be even greater in bad or uncertain market conditions.

You should consider the ETFs' investment objectives, risks, charges and expenses carefully before you invest.
