15 Million Common Shares	\$153 Million (NAV)
5.20% Series E Cumulative Preferred	\$39 Million
5.20% Series G Cumulative Preferred	\$31 Million

Leverage Risk. The use of leverage, which can be described as exposure to changes in price at a ratio greater than the amount of equity invested, through the issuance of preferred shares, magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. The Fund's use of leverage in its investment operations subjects it to risk of loss.

Industry Concentration Risks. The Fund invests a significant portion of its assets in companies in the healthcare and wellness industries. As a result, the value of the Fund's shares will be more susceptible to factors affecting those particular types of companies, which may include, among others, governmental regulation, changes in government subsidy and reimbursement levels, the government approval process, rapid obsolescence of products and services, and patent expirations. In addition, global demographic changes could have a positive or negative impact on the Fund's shares.

(a) Performance returns for periods of less than one year are not annualized. Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. The Fund's use of leverage may magnify the volatility of net asset value changes versus funds that do not employ leverage. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. The S&P 500 Health Care Index is an unmanaged indicator of health care equipment and services, pharmaceuticals, biotechnology, and life sciences stock performance. The S&P 500 Consumer Staples Index is an unmanaged indicator of food and staples retailing, food, beverage and tobacco, and household and personal products stock performance. Dividends are considered reinvested. You cannot invest directly in an index.

(b) Total returns and average annual returns reflect changes in the NAV per share, reinvestment of distributions at NAV on the ex-dividend date, and adjustments for rights offerings and are net of expenses. Since inception return is based on an initial NAV of \$8.00.

(c) Total returns and average annual returns reflect changes in closing market values on the NYSE, reinvestment of distributions, and adjustments for rights offerings. Since inception return is based on an initial offering price of \$8.00.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.
